		Market Report and Statements	939-958
		Return of Street Accidents	959-961
		Report of Medical Officer, Infectious Diseases Hospitals	962-972
5.	Educational	Report of the Joint Schools Committee	973-992
6.	Auditors' Report		993-1022

Review by the Standing Committee of the Administration Report of the Municipal Commissioner for the year 1898-99.

General.

A new Corporation came into office on the 1st of April 1898, and at its first meeting, held on the 4th April 1898, the Hon'ble Mr. Bhalchandra K. Bhatawadekar, L.M., was elected President for the ensuing year and held office till 31st March 1899. Mr. Ibrahim Rahimtoola was Chairman of the Standing Committee for the year. The executive post of Commissioner was held by Mr. P. C. H. Snow, I.C.S., C.I.E., till 21st August 1898, on which date it was taken over from him by Mr. W. L. Harvey, I.C.S., who continued to hold the appointment till the end of the year. Mr. H. W. Barrow, Municipal Secretary, proceeded on six months' leave on 21st May 1898, at the end of which he retired on pension after a long and faithful service in the Municipality of nearly 28 years. He was succeeded by Mr. M. N. Wadia, B.A., Assistant Secretary to Government.

2. Death played sad havoc in the ranks of the Corporation during the year and carried off some of its eminent, useful and promising members in the persons of Mr. F. Edgelow, Sir Jamsetji Jejeebhoy, Bart., C.S.I., Dr. Kaikhosru N. Bahadurjee, Mr. Jaya Karadi Lingu, Mr. G. W. Roughton and Mr. Dost Mahomed Allana.

3. During the year the Corporation had the honour of officially welcoming to this country, on the 30th December 1898, the newly appointed Viceroy and Governor General of India, the Right Honourable Baron Curzon of Kedlestone. The Corporation held 40 meetings during the year, and 40 meetings were held by Committees of the Corporation other than the Standing Committee. The last named body held 56 meetings.

Financial.

4. The opening gross balance of the year was Rs. 26,25,144-5-5, representing, as explained at page 2 of last year's review, an actual unappropriated net surplus cash

balance of Rs. 2,25,501-12-11, exclusive of the minimum of Rs. 1,00,000 required by law. The revenue realizations of the year amounted to Rs. 71,61,911-7-8, making a total sum of Rs. 97,87,055-13-1 to be accounted for in the year. The expenditure of the year was Rs. 73,39,025-12-3, leaving a closing balance of Rs. 24,48,030-0-10. Deducting from this gross balance—

Rs.	8,19,471	2	11	for lapsed grants of 1898-99 and previous years proposed to be renewed in 1899-1900,
„	8,75,554	7	10	for value of reserve stock,
„	1,00,000	0	0	for the minimum cash balance required by law,
Total Rs.	17,95,025	10	9—	

the net balance remains at Rs. 6,53,004-6-1 only. The sum of Rs. 8,12,546, being the net advance for the purchase of land on the Agripada, &c., estates, has not been taken into account as before in estimating the closing balance, as it has now been included in the expenditure of the year, and thus temporarily written off. The Corporation, however, propose to ask Government to allow the amount to be recouped to the municipal balances by the raising of a loan. The net balance of Rs. 6,53,004-6-1 compares very favourably with the balance of Rs. 2,25,501-12-11 of the previous year, but has been attained by a rebate of Rs. 5,00,000 on account of plague expenditure met from Revenue in 1897-98, against which there are no plague charges debited to current revenue as in the previous year, the whole of the year's expenditure on plague having been charged to loan funds.

5. At pages 10 and 11 of his report the Commissioner gives a statement of revenue and expenditure under main heads as compared with the Budget estimates of the year and also with the actuals of the preceding years. It appears that the total revenue realized (Rs. 71,61,911), though less by Rs. 65,688 than the estimate, exceeded the revenue of the previous year by Rs. 4,53,406. The *General Tax*, which was levied at 9½ per cent. during the year against 8½ per cent. in the previous year, realized Rs. 1,67,927 more. A larger increase might have been expected, but it is explained that the outstandings of previous years collected in 1898-99 were less than the outstandings collected in 1897-98 by over Rs. 75,000. Another large increase (of Rs.1,71,118) was

under *Water Tax and other Miscellaneous Water Works Revenue*, due to the fact that under Standing Committee Resolution No. 1644, dated the 12th May 1897, bills for water supplied by meter measurement during the last quarter of 1897 were collected, and the amounts credited, in 1898-99. *Town Duties* also realized Rs. 1,65,737 more than in the previous year, though much of the increase was merely nominal as will appear below. Three main heads of revenue show a falling off, the principal one being of Rs. 53,442 under *Miscellaneous Receipts and Investments of Surplus Loan and other Balances*, due to smaller realizations by rents and by sale of lands and rights and to reduction of interest consequent on a large reduction in the invested balances.

6. The total ordinary expenditure of the year was Rs. 70,26,479, which was less than the estimate by over 14 lakhs of rupees, and nearly the same as the actuals of 1897-98, if from the latter is left out a sum of Rs. 5 lakhs spent from the year's revenue on plague charges. This sum of Rs. 5 lakhs was refunded in the year of report, but on the other hand Rs. 8,12,546 have been taken into account on the expenditure side for writing off the net amount advanced up to 1897-98 on account of the purchases of frontage lands in the Agripada, &c., estates. The total ordinary expenditure thus amounted to Rs. 73,39,025 against Rs. 70,59,914 in 1897-98. The expenditure on loan works (including Plague expenses) was Rs. 20,22,955 against Rs. 29,13,192 in the previous year, bringing up the total disbursements of the year to Rs. 93,61,981 against Rs. 99,73,106 in 1897-98. The items which show a very considerable increase of expenditure are *Public Health Department* and *Municipal Debt*. Under the former the increase was Rs. 1,02,541, due to the department having been reorganized from November 1898 and to better conservancy arrangements for the City. Under the latter it was Rs. 2,20,566, due to the high rate of interest paid on the temporary loans amounting to 35 lakhs taken from the Bank of Bombay.

7. Under each and every item of expenditure the actuals fell short of the estimates, and the total actual expenditure was short of the estimate by more than 14 lakhs of rupees

a very rigorous economy having been enjoined on and practised by all Departments to keep moneys available for plague expenditure.

8. The sum of Rs. 20,22,955 spent on Loan Works during the year was distributed as shown in the statement embodied in para. 31 of the Commissioner's Report. In the five years ending with the year of report this expenditure has aggregated Rs. 79,48,049. The largest item is plague expenditure, which has amounted up to the close of 1898-99 to Rs. 35,32,408. Recoveries have been made from Government on account of plague expenditure incurred on their behalf, in addition whereto provisional grants, aggregating Rs. 14½ lakhs, have been received from Government towards the plague expenditure, but have not been credited to plague expenses, pending settlement of the question of the division of such expenses between Government and the Municipality. The total sum expended by the Municipality of Bombay on Loan Works up to the end of the year of report aggregates very nearly 4¾ crores of rupees. The total Municipal debt on 31st March 1899 amounted to Rs. 4,18,54,457, against Rs. 4,11,20,497 on 31st March 1898, the increase of Rs. 7,33,960 being made up by Rs. 8,00,000, being the amount taken up out of the temporary loan of 20 lakhs for plague purposes arranged with the Bank of Bombay, less Rs. 53,000, being the value of Drainage Loan Debentures paid off during the year, and Rs. 13,040 paid to Government towards the liquidation of the Vehar Debt. Adding to this other liabilities, the Municipal liabilities amounted altogether to Rs. 4,38,08,328 against a total figure of Rs. 5,88,41,631 for assets, made up as follows :—

Cash Balance and Invested Sinking and other Funds and Contractors and other deposits	Rs.	60,11,808
Advances to Departments and to Contractors	„	2,18,661
Municipal Property (including Water Works, Lands and Buildings, Roads, Bridges, &c.)	„	5,17,35,608
Reserved Stock	„	8,75,554
Total ...	Rs.	5,88,41,631

The assets are thus in excess of the liabilities by over a crore and a half of rupees. In the review of the Report for 1897-98 doubts were expressed as to the accuracy of the

valuation of assets, and a correct re-valuation was suggested. It is noticed that the suggestion is being acted upon. The Sinking Fund Investments increased from Rs. 19,06,597 to Rs. 22,62,415, which is roughly about 6½ per cent. of the total Municipal debt, excluding the Vehar Debt, which is being paid off by monthly instalments to Government, the Drainage Loan of 1878, which is also being paid off by annual instalments to the public, and the temporary loans taken from the Bank of Bombay.

9. As in the previous year, the Municipality was unable to float the permanent loans of 49 lakhs required in the year. In response to an invitation of tenders for 29 lakhs, only about Rs. 15,000 were offered, so unfavourably was the state of the money market, owing chiefly to dislocation of business by plague. It was necessary to fall back again upon the Bank of Bombay, which renewed up to 30th September 1899, on the security of Municipal Debentures, the temporary loans of 35 lakhs previously taken from it, at 1 per cent. below current rate, subject to a minimum of 4 per cent., interest being payable half-yearly. This accommodation, supplemented by a timely provisional contribution of 10 lakhs from Government for plague expenditure, enabled the Municipality to finance the plague and other loan expenditure up to the end of the year of report. At the end of the year a further provisional plague grant of Rs. 4½ lakhs was received from Government.

Revenue.

10. With an increase of 1 per cent. in the year of report, *i.e.*, from 8½ to 9½ per cent., the total amount of *General Tax* leviable for the year, exclusive of the compounded sums payable by Government and the Port Trust, was Rs. 20,35,222 against Rs. 17,94,227 in the previous year. The compounded sums payable by Government under Section 144 (3) and by the Port Trust under Section 145 (3) of the Municipal Act increased from Rs. 98,374 and Rs. 1,52,482 to Rs. 1,09,947 and Rs. 1,70,420 respectively. And altogether the total realizations expected from the *General Tax* were in excess of the previous year by Rs. 2,70,506. The *Water Tax* demand rose from Rs. 12,42,199 to Rs. 14,76,817, being an increase of Rs. 2,34,618.

From *Halalkhor Tax* Rs. 7,16,783 were expected against Rs. 6,98,561 in the previous year, the improvement amounting to Rs. 18,222. The demand on account of Wheel Tax on private conveyances and animals for the four quarters ending 31st December 1898 was Rs. 1,62,961 against Rs. 1,55,282 in 1897. The total collections during the year from *Property and Wheel Taxes* aggregated Rs. 47,85,033 and were more than those in 1897-98 by Rs. 3,13,661, a large increase due chiefly to the addition of 1 per cent. to the General Tax. Reverting to *Wheel Tax* it may be noticed that 654 bicycles and 7 tricycles were taxed during the year in accordance with Corporation's Resolution No. 9604, dated the 10th January 1898, evidently a very small proportion of the machines actually in use in the city. As the legality of the Cycle Tax has since been affirmed by a High Court decision and a Committee of the Corporation is sitting to suggest efficient means of collecting the tax, the revenue from this source may develop. The *Outstanding Balance*, which was Rs. 1,07,100 on 31st March 1898, increased to Rs. 1,13,477 on 31st March 1899. But the Assessor and Collector reports that Rs. 64,129 out of this amount have been accounted for up to the 15th July 1899, and that the balance of Rs. 49,347, which is made up of the outstandings of all previous years, consists chiefly of disputed and departmental bills. This result is very creditable to Mr. Brunton and his Department, especially in view of the unsettled state of the City on account of plague.

11. 53,328 properties stood registered in the Assessment Book, being an increase of 163 properties over those registered up to the end of 1897-98. The recorded gross valuation of these properties was Rs. 2,98,53,636, being an increase of Rs. 3,70,831, chiefly due to erection of new buildings and enlargement of existing ones. The increase in valuation due to rise in rents and correction of under-assessment is shown at Rs. 14,358 only, an insignificant figure when compared with that of the previous year, which was Rs. 2,37,562, or with those of the three preceding years, the lowest of which was Rs. 1,49,527 (in 1895-96). No explanation is given of the smallness of this increase.

12. There were 12 *appeals* against the action of the Department to the Chief Judge of the Court of Small Causes, of which 8 were settled by consent, 1 was withdrawn and 3 dismissed.

Town Duties.

13. These are collected for the Municipality by the Trustees of the Port of Bombay and the G. I. P. and the B. B. & C. I. Railway Companies. The aggregate of their collections for the year was the large sum of Rs. 22,55,540, which is over 5¼ lakhs better than in the previous year. But the refunds also were proportionately larger,* and the net revenue of Rs. 9,92,953 is better than that of the previous year by Rs. 996 only—not a very satisfactory result when it is remembered that the duties on grain, flour and firewood were doubled for the year, and that on ghee was raised by 25 per cent. Such a result was, however, anticipated in last year's review, where it was noted that the importation of sugar into Bombay in 1897-98 was abnormally large, and moreso in the last three months of the year, and that probably a good portion of the large excess of revenue would ultimately prove to have been only nominal. Not only was the collection on sugar in the year of report less by Rs. 57,360 than in 1897-98, but the refunds were more by Rs. 1,75,338, and a decrease in the net revenue from this article of Rs. 2,32,698 was thus brought about. All the other articles which paid Town Duties yielded more net revenue than in the previous year, the total increase being Rs. 2,33,695, which is all but wiped off by the falling off on sugar. Next to sugar the largest gross collection was from grain, amounting to Rs. 6,35,222, or nearly 4½ lakhs better than in the previous year, but nearly 3¾ lakhs of this had to be refunded on exports, the previous year's refund being a little less than half-a-lakh. No refunds had to be paid on firewood, all the 542,662 candies of it imported being for local consumption.

New Works.

14. By the completion during the year of certain works remaining to be done at the *Gamdevi and Sankli Tank Fire Brigade Stations*, the eleven fire brigade stations, sanctioned by the Corporation under Resolution No. 5144, of the 14th August 1892, were fully completed during the year of

* In para. 5, where the increase in Town Duty Revenue is given as Rs. 1,65,737, the figure is arrived at by taking into account the outstandings at the beginning of the year and leaving out those at the end of the year and by deducting only the refunds actually paid during the year and not those remaining unpaid though passed by the Refund Officer.

report. The total cost of the eleven stations has amounted to Rs. 4,03,008 against the sanctioned grant of Rs. 4,57,425. The *Fergusson Road Market* was completed and opened on 1st November 1898. Out of the sanctioned grant of Rs. 10,000 for this work an expenditure of Rs. 6,829 was passed up to 31st March 1899. During the five months of the year for which it was open a revenue of Rs. 1,187 was realized from rent of stalls and squatters' fees, which indicates that the market will be a paying one and will probably require enlargement at an early date.

15. The construction of the *Nasarwanji Manekji Petit Public Hall* has been delayed by the unfortunate death of its munificent donor, Bai Dinbai Petit. Bai Awanbai Petit, daughter of Bai Dinbai, has undertaken the payment of the donation promised by her mother, and a deed of trust for the payment is under preparation, on the execution of which the purchase money for the site will be paid by the Municipality to Government, and the work, all preliminary arrangements for which have been made, will be commenced.

16. The portion of *Reay Road* between Dockyard Road and Gunpowder Road was completed at a cost of Rs. 13,812 and opened to traffic on 10th August 1898, and arrangements have been made for completing the remainder of the road, except the portion between DeLima Street and Wari Bunder Road and the northern approach to the proposed over-bridge over the existing Railway sidings at Wari Bunder which cannot be taken in hand until the alignment of the over-bridge and its southern approach is finally settled by the Port Trust and the G. I. P. Railway. A departure from the original line of the road may be necessary if the projected Port Trust Railway is sanctioned. The Standing Committee trust the Commissioner will press the Railway and the Trust for an early settlement. The roads and streets on the Agripada Land and estates, which have passed to the City Improvement Trust under Act IV of 1898, are not being proceeded with. The *Arthur Road Diversion* has been completed at a cost of Rs. 16,266.

17. The works in connection with the *Transport of town-sweepings to Deonar* were nearly completed in the year of report. The Railway line from Kurla to Deonar was formally

opened for use on the 12th of May 1899, and the transportation of sweepings commenced on 7th June 1899. The work of loading the sweepings at Mahaluxmi and unloading them at Deonar, has been assigned to the Health Department. The B. B. & C. I. and the G. I. P. Railway Companies will carry the wagons over their respective lines for payment, the siding at Mahalaxmi will be maintained by the B. B. & C. I. Railway at Municipal expense and the maintenance of the Municipal Railway from Coorla to Deonar will belong to the Executive Engineer's Department. Out of the sanctioned grant of Rs. 8,44,000 for this work, the expenditure up to the end of March 1899 was Rs. 6,41,203. The 823 acres of marshy land purchased by the Municipality for deposit of sweepings, are expected to be reclaimed by the cutchra of Bombay in about 23 years, and, when fully reclaimed, to become a valuable Municipal estate yielding an annual income of about a lakh of rupees. The Executive Engineer highly commends the way in which the construction of this work has been superintended by his personal assistant, Mr. Manekji Sheriarji Bharucha, L.C.E., assisted by Inspectors Madhavrao Ramchander Natu, and Muncherji Edalji Joshi, L.C.E. The credit of planning and of efficiently and economically executing this useful scheme, which promises to be so remunerative, belongs to the Executive Engineer himself.

18. All the works for the preparation and completion of the *Burial ground for Sunni Mahomedans* at Tank Bunder have been executed. The Collector of Bombay having nearly completed the enquiry in the matter of the acquisition of a portion of Narielwadi for the future extension of this burial ground, the land will shortly be made over to the Municipality when it will be enclosed and filled up. The new *Beni-Israel burial ground* at Mount Road has been handed over to the community for use. A plot of land admeasuring 30,390 square yards has been acquired under the Land Acquisition Act for Rs. 39,699 for the extension of the *Christian Cemetery at Sewree.* A plot of ground has also been purchased for the *Burning and Burial ground at Mahim.*

DRAINAGE.

19. The *Worthington Pumping Engines* at the *Love Grove Station* continued to work very satisfactorily, and were maintained during the year at an average efficiency of 92·4 per

cent. The maintenance of the station during the year cost Rs. 99,406. One item of cost was the purchase of 4 revolvers and 50 rounds of ammunition for Rs. 159 for the use of the four Engineers to enable them to guard the important works and the workmen in any public disturbance.

20. The street portions of *House Drainage Connections* were made to 1,381 houses, at a total cost of Rs. 39,813.

21. The working of the *Installation for Electrolized Sea-water*, which was stopped at the commencement of the monsoon of 1897, was re-started on the 7th April 1898, and continued without interruption up to the 18th of June 1898, when it was again closed at the break of the monsoon. It was set working once more on the 9th January 1899, and worked to the end of the official year, the total expense of the year being Rs. 2,901. The Drainage and the Health Departments used the fluid for flushing of sewers and privies. The Health Officer considers the fluid valuable for the flushing of the shafts of privies, as it instantly destroys all disagreeable smells and is lasting in its effects. The chlorine produced is estimated by the Executive Engineer to cost about Rs. 1,450 per ton, while the cost of chlorine from chloride of lime is estimated at Rs. 780 per ton; but it is stated that the Hermite Electrolized Solution is twice as effective as the chlorine derived from chloride of lime (bleaching powder), which is a deliquescent powder, while the former is a fluid, containing not only chlorine but other powerful deodorizing agents.

Streets and Buildings.

22. More activity in building operations is indicated by the fact that the 1,671 applications received during the year for permission to build or rebuild were about 33 per cent. more than in the previous year. 33 of these were disapproved on sanitary and other grounds, and the rest were passed on certain conditions.

23. Twenty-eight buildings or parts of buildings fell during the year, by which 7 persons were killed and 31 injured.

24. The total amount sanctioned by the Corporation for street improvement was Rs. 2,06,735, out of which Rs. 1,11,247 were disbursed during the year and a large liability remains outstanding. An area of 5,232 square yards

was added to streets at an expenditure of Rs. 73,661. The Executive Engineer appeals for larger grants for widening streets, and urges that, in view of the steadily increasing prices of land in Bombay, the taking up of all open spaces lying within the "regular lines" of streets should not be delayed, and that the opportunity presented by the improvement of insanitary houses under the Epidemic Diseases Act should be availed of for setting back houses wherever necessary.

ROADS.

25. The Executive Engineer again complains of the insufficiency of the grant for the repair of roads, the number and extent of which in the City is constantly increasing. The year's grant was Rs. 3,40,000, but Rs. 60,000 of this had to be held back during the monsoon to meet plague expenditure, and, when released in November, could not be fully utilized owing to both labour and material being difficult to obtain. Only Rs. 3,12,759 could therefore be spent, and Rs. 27,240 remained unspent. No paving of footpaths was done in the year as it was not possible to provide any grant for the purpose. The Executive Engineer recommends that the annual grant for this work should be renewed. The watering of roads was satisfactorily done. The system of watering by hydrants, which is found more convenient and effective, is gradually superseding the old system of watering by carts.

PUBLIC LIGHTING.

26. The City was lighted with 3,873 gas lamps costing Rs. 2,17,874, and 1,769 kerosine lamps costing Rs. 30,932. The Electric Light Installation for the Crawford Markets and the Municipal Office worked fairly well during the year. The expenditure on it was Rs. 11,898.

WORKSHOPS.

27. The Municipal Workshops continued to be useful and efficient. The value of the works done at them during the year was Rs. 1,26,061, on which a profit of Rs. 14,083 is calculated to have been made.

PLAGUE OPERATIONS.

28. 2,633 houses were inspected, out of which 2,213 were found to need improvement and 405 to be fit for demolition as being incapable of improvement. 293 houses

were actually demolished during the year; and 2,086 improvement notices were served. They were complied with in the case of 704 houses, and 725 houses were declared unfit for human habitation. Compensation, amounting to Rs. 12,890,— was awarded by the Government Assessor for 85 buildings condemned for demolition. Rs. 2,989 were paid for huts or sheds demolished under Section 426 of the Municipal Act, and a sum of Rs. 1,097 still remains to be paid on that account. The Executive Engineer draws attention to the dearth of suitable house accommodation for the poorer classes, and to the insanitary, ill-ventilated, damp and overcrowded dwellings in which they have to herd in consequence. It may be hoped that these evils will, at no distant date, be to a large extent mitigated by the operations of the City Improvement Trust.

29. Thirty-seven plague camps were erected or old ones repaired and strengthened during the year under review by the Executive Engineer's Department. Latrine accommodation, drainage and cesspool arrangements were provided wherever necessary, and all the camps were lighted with kerosine oil.

Water Works.

30. *Tansa.*—The year's rainfall, 98·68 inches, was sufficient, but below the fall in the two previous years when it was 120·13 and 104·82 inches, respectively. On an average of the seven monsoons previous to that of the year of report it has been estimated that annually 82,833 million gallons of rainfall in the drainage area of the Tansa Lake, of which 40,695 million gallons (or 50·7 per cent.) reach the lake, the rest being evaporated or absorbed. In the year of report the total rainfall over the drainage area was 74,842 million gallons only, of which 36,424 millions or 48·6 per cent. passed to the lake. After 31·52 inches of rain had fallen, Tansa overflowed on 8th July 1898, and the water continued to pass out till the 4th October 1898. From a comparison of the storage of water above the lowest outlet on 1st October 1898 and 1st April 1899, it is estimated that in six months 6,487 million gallons of water passed out of the lake, or 35·6 millions a day, inclusive of evaporation and leakage. The actual daily quantity delivered into the aqueduct is estimated at 23·8 million gallons. The quantity of water which passed over the waste weir is calculated at 25,198 million gallons. The highest flood was

on 21st July, when the water reached 405·9 T.H.D. During the year only 47·5 million gallons of Tansa Water were passed into the Vehar Lake against 165 and 213 million gallons in the two previous years, respectively, the quantity being diminished year by year owing to increased consumption. The water-supply to the city from Tansa was interrupted for nine days during the year for repair of bursts, &c.

31. *Vehar.*—The rainfall was 94·51 inches against 109·81 and 97·36 in the two previous years. 8,464 million gallons of rain water are estimated to have been received by the drainage area of this lake, and 5,255 million gallons of it (70%) to have passed into the Lake. 865 million gallons overflowed from the Tulsi Lake to the Vehar gathering ground. Between the 11th September, when a level of 264·50 T.H.D. was reached, and the 1st October, 1898, the lake kept overflowing. The storage capacity of the lake was raised by about 400 million gallons by the raising of the waste weir stop planks from 263·50 to 264·50 T.H.D. Including evaporation and leakage and excluding the supply received from the Tansa Duct, 15·5 million gallons per day are estimated to have passed out from the lake in the six dry months of the year—October to March. 2,300 million gallons flowed over the waste weir. On the mains between Vehar and Kurla, there were two bursts which required the stoppage of supply for 54½ hours in all. The construction of the road from Vehar to Tulsi, sanctioned in 1894 at an estimated cost of Rs. 35,000, has not yet commenced, because the present Deputy Executive Engineer, Water Works, estimates the cost at Rs. 76,000.

32. *Tulsi.*—The rainfall was 111·56 inches. In 1896 it was 139·52, and in 1897 118·66 inches. The rainfall received in the drainage area is estimated at 4,298 million gallons. 62 per cent. of this or 2,670 million gallons went into the lake. In the six dry months of the year, 5·7 million gallons of water are believed to have gone out of the lake per diem.

33. *Pawai.*—Negociations, which have since been completed, were in progress for letting the land and buildings attached to this useless lake to the Agave Fibre Syndicate for the cultivation of the Agave plant and its manufacture into fibre.

34. *The reservoirs.*—These and the filters attached to them have received proper attention during the year.

35. *Distribution of Water.*—As a hygienic measure in connection with plague operations 204 water connections were cut off and 151 stand-pipes erected to supply people thus deprived of their water. The Water Engineer reiterates his complaint as to excessive consumption. 471 new connections were made during the year. The Standing Committee sanctioned the severance of water connections in 1,621 cases under Section 379 of the Municipal Act, but the sanction was acted on in 176 cases only.

SPECIAL DRAINAGE.

36. In addition to 20 works described as "unfinished," already in hand, three new works were taken up during the year of report.

37. The progress of the "unfinished" works, several of which were practically finished in 1897-98, was as follows :—On the *Colaba Sewerage Works*, completed in 1897-98, a small expenditure of Rs. 59 was incurred during the year, which brings up the amount of the total expenditure to Rs. 8,21,070. Messrs. Bulkley & Co.'s suit against the Municipality in respect of the contract for this and other works was still pending at the end of the year. On the *Umarkhadi Sewerage Works*, also completed in 1897-98, Rs. 251 were spent in the year of report. The total cost of this work has been Rs. 3,49,961. *The Mazagon Sewerage Works (Gravitation portion)*, which, according to the contract, should have been completed in November 1897, were not completed in the year of report, and were expected to go on for another four months at least. Progress was slow on account of the difficult nature of the work which required deep excavations in hard rock. Rs. 18,256 were spent on these works in the year of report, making a total of Rs. 2,74,128. The Street portions of *House Drainage Connections in the Colaba District* were completed by the making of 33 connections (bringing up the total to 275) at a cost of Rs. 1,746. On the *Fergusson Road and Chinchpokli Sewerage Works* (Gravitation portion), which were completed in 1897-98, Rs. 4,168 more had to be spent for providing addi-

tional manholes, raising the total expenditure to Rs. 89,910. Under the *Old Race Course Sewerage Works* (Gravitation portion) an additional expenditure of Rs. 1,556 was incurred for connecting, by a temporary arrangement, the new sewer with the Ripon Road sewer. The total sum spent so far on the work was Rs. 39,039. Rs. 7,117 were expended during the year under *Improvement of Roadside Drains, &c., in Khetwadi*, the total expenditure now amounting to Rs. 52,657. *The Masonry Drain from Girgaum Road to Back Bay* was practically completed by 30th April 1898, but some necessary extra work had to be done, which was only finished in March 1899. The final bill for this work amounts to Rs. 18,962. The work of *Opening out the water-course to the west of Messrs. Kamas' property and constructing a covered drain thereat* still remains partially done, on legal advice, owing to the Messrs. Kamas objecting to the work. Some additional masonry work required for the *Culvert in the eastern bank of the Mahaluxmi Storm-water Reservoir* was done at a cost of Rs. 82, which brings up the whole cost of the work to Rs. 1,755. The difficulties met with in constructing the *Storm-water Drain from the Wellington Fountain to the Sea* were described in the report for 1897-98. The work was completed in May 1898 at a total cost of Rs. 36,702. It is understood that the demand of the Contractors to be paid for extra excavation and extra concrete, which was left for decision till the conclusion of the works, was finally allowed by the Commissioner as sole arbiter under the contract. The final bills for the undermentioned works were passed during the year, the total expenditure being as shown opposite to them :— (1) *Storm-water Drains in Esplanade Road and in Wodehouse Road*, Rs. 11,364. (2) *Storm-water Drain in Lower Colaba Road and Thomas Street*, Rs. 10,466. (3) *Storm-water Drain at the East Foot of Wodehouse Bridge*, Rs. 1,331. (4) *Ovoiding Side-drains in Pathan 1st Street*, Rs. 6,095. (5) *Arched Masonry Drain between the Poor Parsi Chawls in Gilder Lane and the B. B. & C. I. Railway*, Rs. 3,581. The *Improvement of Roadside Drains and Water Courses in and about Dadar Road* was completed, except a small portion to be done in the ground belonging to the B. B. & C. I. Railway, which has remained undone, pending settlement of objections raised by the Railway authorities. The total expenditure certified and

passed to the end of the year was Rs. 14,219. An expenditure of Rs. 3,68,649 was incurred during the year on the provision of *Machinery for the Parel, &c., Sectional Sewerage Districts.* A detailed account of the progress of the work is given at pages 638—643 of the Special Drainage Engineer's Report. The *Mazagon Sectional Sewerage Works* were commenced in December 1898, and are expected to take 18 months to complete. An expenditure of Rs. 24,197 was certified and passed to the end of the year of report.

38. Of the new works the *Surface Drainage Works* in the Kamathipura District are reported to be progressing satisfactorily. The expenditure incurred and passed on this work amounts to Rs. 50,741. *41 manholes on the old ovoid sewers in Kamathipura* were provided at a cost of Rs. 2,543. The *work in 9" pipe sewers in some new roads in the southern parts of the Apollo Reclamation* was undertaken by the Special Drainage Department at the request of the Port Trust, and were completed at a total cost to the Trust of Rs. 4,532.

39. Two Committees of the Corporation sat and reported during the year on the Special Drainage Engineer's Scheme for Surface and Subsoil Drainage ; but as the Corporation was still unable to come to a positive opinion, it was decided to seek the advice of an outside Engineer. Mr. Arthur John Hughes, C.I.E., M. Inst. C.E., of Calcutta was first communicated with, but ultimately (on 11th May 1899) the Corporation authorized the Commissioner to engage the services of Mr. W. Santo Crimp, and appointed a third Committee "to help in seeing that all necessary materials were placed before Mr. Crimp."

40. The machinery and ejectors at the Colaba Air Compressor Station worked satisfactorily, and there were no stoppages or breakdowns of more than very temporary duration. The volume of sewage lifted from 1st March 1898 to 28th February 1899 was a little over 325 million gallons approximately. In the year previous it was 220 million gallons for the same period. The increase was due to additional house drainage connections. The maintenance of the Station cost during the year Rs. 27,829.

Public Gardens.

41. Ten public gardens were maintained by the Municipality during the year at an expenditure of Rs. 60,898. 788,890 persons visited the gardens. These were more by 26,079 than in the previous year, but less by about three lakhs than in the year before. These figures may be taken as showing effectively how the distress and harassment under which the City has been labouring since the advent of plague has weighed down the spirits of the masses. Many improvements were carried out in the gardens, and every endeavour made to keep up to the usual standard of neatness and order, in spite of the need for curtailing expenditure and the difficulty of getting skilful workmen. The Northbrook Gardens continued to be occupied for plague purposes.

Fire Brigade.

42. The establishment and appliances are reported to have been maintained in a state of efficiency. The water-supply at fires was satisfactory in all cases, and the Water Works staff was always promptly on the spot and helpful. There were 115 calls to fires, excluding 5 false alarms. Of these 70 were extinguished by Brigade appliances. In the remainder the attendance of the Brigade was not required or the fires were extinguished before the arrival of the Brigade. The total value of property damaged by fire was Rs. 23,61,918, showing an increase of Rs. 3,63,451 as compared with the previous year. The estimated quantity of water used for extinguishing fires during the year was 2,877,300 gallons, of which 2,720,000 gallons were taken from street mains, and the rest from wells and tanks or from the sea. The fires of 1898-99 show a decrease of 21 as compared with those of 1897-98 and compared with the average of the past ten years a decrease of 1.

Public Health.

43. The Health Officer's Report* records another unprecedentedly unhealthy year. Plague continued to defy the combined organizations of Government and the Municipality and prevailed with even greater intensity than in 1897. The first rise of the epidemic was about the middle of Decem-

* The Report is for the calendar year 1898.

ber 1897. On the 9th February a mortality of 347 was recorded, followed by a series of repressions and fluctuations till the 16th of March, on which date and on the 18th of the same month 358 deaths were registered. Then there was a decline and fall up to the end of June, after which till the second week of October there was another rise, but not half so high as in the first three months of the year. Thereafter there was another slight decline, but from the first week of December the mortality again rose.

44. The total mortality of the City (exclusive of still-born) was 51,961, or 63·23 per mille, against 47,896, or 58·28 per mille in 1897. The number of deaths registered as from plague were 18,185 as against 11,003 in 1897. The number of plague attacks which came to notice and were registered were 22,130 against 13,314 in 1897. A good portion of the Health Officer's Report is taken up with an interesting disquisition on plague, the causes affecting it and the measures to cope with it, and elaborate statistics are attached to show its prevalence by class and race, by sex and age, by days and months, by sections and wards, by floors of houses, by places of birth, &c.

45. Inoculation was pushed on more vigorously than in the previous year, 27,887 persons having been inoculated against 8,142 in 1897. The results of treatment by Lustig's serum are described by the Health Officer as "encouraging to further experiment," but it is understood that subsequent experiments made on a different system of selection of patients have proved less favourable.

46. The plague administration passed from the Plague Committee to the Municipal Commissioner under the orders of the Plague Commissioner with effect from the 1st June 1898.

47. The mortality from *Cholera* in the year of report is small, only 104 deaths being registered against 1,265 in 1897. The mortality was highest in the first three months of the year and in July. The Health Officer notices as a striking fact that all but 9 of those who died from cholera were persons from outside Bombay.

48. Some cases of a disease called *Jiggers*, not heretofore known in Bombay, were imported in the year. Stringent measures were put in force by Government to prevent the importation of the disease.

49. 4,114 deaths were registered from *Fevers*, being 2,837 less than in 1897 and 2,772 less than the average. The largest number was under *Remittent Fever*, and in the month of March more deaths occurred from fever than in any other month. 546 deaths were registered from *Relapsing Fever*, of which there were two recrudescences in the year—one in the cold season, which attained its maximum in March, and the other in the rains, which attained its maximum in October. The maxima periods of intensity of relapsing fever corresponded with the maxima periods of intensity of plague. The death-rate from *Relapsing Fever* in the Arthur Road Hospital was 20·8 per cent. against a death-rate of 73·25 per cent. from plague. From *Measles* 254 deaths were registered, being 105 less than in 1897 and 190 less than the average. More than half the deaths occurred among children of 2 years of age and under.

50. 5,624 deaths were registered from *Phthisis*, which though less than those in 1897 by 303, were more than the average deaths from this cause by 1,372. The largest number of victims was, as is usually the case, from 2nd Nagpada, Umarkhadi, Chukla, Kamathipura, Khara Talao, Byculla and Bhuleshwar, all localities of ill repute, worthy the attention of the City Improvement Trust. 55 deaths were registered from *Small-pox* against 57 in 1897. From *Diseases of the Digestive System* (diarrhœa, dysentery, &c.) 4,602 deaths were registered, being 66 less than in 1897 and 1,472 more than the average. 51 persons died of *Leprosy* against 39 in the previous year. From *Diseases of the Respiratory System* (bronchitis, pneumonia, whooping cough, &c.) 8,423 persons were registered to have died, being 566 more than in the previous year and 2,885 more than the average.

51. 10,784 living and 1,569 still-born births were registered, being 1,448 more than in 1897; of the living births 5,640 were males and 5,144 females. Excluding the small community of Negro-Africans, the highest birth rate (per mille) was among Low-caste Hindus, and the lowest among Brahmins.

52. Under the re-organization scheme of the Health Department, which came into force on 1st November 1898, the City was divided into four administrative divisions, each in charge of a Divisional Health Officer. The total gross ordinary expenditure of the Department was Rs. 15,40,720 and its income Rs. 8,02,621. The net cost was therefore Rs. 7,38,099. The special sanitary measures undertaken for dealing with the pestilence necessitated a further extraordinary expenditure of Rs. 3,04,726.

53. The above statistics and those which follow will furnish some idea of the amount of work falling on the Health Department. On an average 4,003 men and women, 1,053 scavenging and drain carts and 205 night-soil and cesspool carts were at work in 1898 ; 388,817 tons of garbage, equal to 1,065 tons a day, were collected, removed and disposed of ; 172 miles of covered drains were opened and cleaned ; 4,229 notices and 2,401 summonses were issued ; 1,009 building plans were received and disposed of ; and 35,433 cart-loads of kutchra were burnt in the Garlick Incinerator.

Licenses.

54. The income contributed by this Department during the year of report was Rs. 60,646, which shows a falling off of Rs. 3,095 from the income of the previous year. It appears, however, that the figure for 1897-98 was swelled by a sum of Rs. 4,642 collected in that year for 1896-97. The corresponding sum for 1897-98 collected in 1898-99 is only Rs. 344. 1,904 prosecutions were undertaken by the Department against 2,115 instituted in 1897-98 ; 5,588 licenses were issued against 5,750 in the previous year.

Markets.

55. The Market revenue, which was steadily rising year by year up to 1895-96, but had in the two subsequent years shown a tendency to decline owing to plague, slightly recovered itself in the year of report, the revenue realized, Rs. 3,86,633, being better by Rs. 12,631 than in the previous year. The fruit and vegetable supply of the year was plentiful and cheap, and the beef and mutton supply was fairly good. A considerable number of market stalls were

vacated owing to absence of customers who had gone elsewhere on account of plague, and on the whole the state of business was slack. The opening of the Fergusson Market and its financial success have been noticed above.

ARTHUR ROAD HOSPITAL.

56. In this Municipal Hospital for infectious diseases the largest admissions were for Plague and Relapsing Fever and a few cases were received of Cholera, Small-pox, Chicken-pox, Measles and Whooping-cough. The total admissions in the twelve months of 1898 were 4,319; of these 2,187 were for Plague and 1,581 for Relapsing Fever. Among plague patients death resulted in 1,602 cases, giving a mortality rate for the year of 73·25 per cent., nearly 7 per cent. higher than in the two previous years. The Medical Officer writes :—

"This, the third plague epidemic, was known no less for its extreme virulence than for the severity of the individual cases, and during March it far surpassed in malignancy, the worst period of the second epidemic. Scarcely ten per cent. of patients were free from serious lung complications, a factor which was non-existent in the previous epidemics, and which contributed not a little to the higher mortality rate."

The Medical Officer then reports that the mortality rate for the months of January to May 1899 works out to 79·24 per cent., or 6 per cent. more than of 1898, and infers from it the increasing virulence of each succeeding epidemic. The mortality in 1898 was highest among Hindus (74·38); 10 per cent. less among Musalmans and Native Christians and 40 per cent. less (*i.e.*, 35 per cent. only) among the few Parsees who went to this hospital.

57. Of the 1,581 relapsing fever patients admitted, 329 died, giving a mortality rate of 20·80 per cent. The mortality rate from this disease also indicates an annual increase. It was 18·08 per cent. in 1897, 20·80 per cent. in 1898 and 24·37 per cent. in the first five months of the current year. The admissions increased with the increase of plague and decreased with its decline. Its incidence was confined chiefly to Hindus of the lower classes, the number admitted of whom was 2,435 in a gross total of 2,525.

PRIMARY EDUCATION.

58. The Government grant remained the same (Rs. 42,666), but the contribution from the Municipal Fund was Rs. 80,000 against Rs. 72,748 in 1897-98 and Rs. 59,135

in the year previous. The schools again suffered from disorganization caused by plague. As the epidemic rose the numbers declined, and a few schools had for days not a single pupil. Several schools had to be temporarily closed from time to time as a measure of precaution. The only schools that were able to maintain very satisfactory attendance in spite of the plague were the Urdu schools. The report records with regret that the progress of primary education in Bombay has suffered a check in consequence of the successive visitations of plague. Four new day-schools were opened and six night-schools closed for want of attendance. The number of Municipal schools therefore decreased from 81 to 79, but the number of pupils increased from 3,075 to 3,618. Of aided schools there were 86 against 85 in the previous year. In these the numbers fell from 5,912 to 5,860. Of the total number of 9,478 children receiving education in these schools, 6,041 were boys and 3,437 girls. The examination results were on the whole fairly satisfactory.

Municipal Audit.

59. The report of the Municipal Auditors calls for no particular observations. A suggestion is made that in future the report need not contain any remarks on the differences between the actuals of the year under report and those of the preceding year, as these are fully dealt with in the Commissioner's Report. The Standing Committee see no objection to this course being adopted.

Conclusion.

60. In conclusion the Standing Committee would congratulate the Commissioner on his successful administration of the Municipality during another anxious and arduous year.

In accordance with the terms of Section 124 (3) of the Bombay Municipal Act, III of 1888, the Standing Committee direct that all the printed appendices attached to the reports of the several heads of departments, as received from the Commissioner, be circulated with his report for the information of the Corporation.

NANABHAI NAVROSJI KATRAK,
Chairman of the Standing Committee.

22*nd November* 1899.

Annual Administration Report of the Municipal Commissioner for the City of Bombay for the Year 1898-99.

Introductory.

Mr. W. L. Harvey was appointed Municipal Commissioner on the 21st of August 1898, *vice* Mr. P. C. H. Snow, and continued to hold the appointment during the remainder of the year.

2. Below are summarized some of the principal features of the year :—

The Old Race Course Sewerage Works (Gravitation Portion), Improvement of road side drains and provision of water gullies in Khetwadi District, Storm Water Drain in Elphinstone Road and in Wodehouse Road. Storm Water Drain in Lower Colaba Road and Thomas Street, and improvement of road side drains and water courses about Dadar Road were completed.

The Shone system of drainage at Colaba worked with uniform satisfaction during the year and machinery has been obtained for the new Air Compressor Station at Love Grove.

The Worthington engines at Love Grove continued to work efficiently.

House connections and sanitary improvements have been carried out in different parts of the City.

A plot of land comprising 30,390 square yards has been acquired for the extension of the Christian Cemetery at Sewree and also a plot of land at Mahim for a burning and burial ground.

Two bursts in the 32″ and 24″ Vehar Water mains occurred, one at Coorla and the other at the junction of Marol and Andheri Roads; but were speedily controlled and repaired.

3. The health of the City has not been good and the recurrence of plague caused the mortality to be heavy.

4. No circumstance has arisen in any Department of the Municipality in which it was necessary to put into operation the provisions of the Municipal Servants Act.

I. Corporation and Standing Committee.

THE CORPORATION.

5. The Hon'ble Mr. Bhalchandra Krishna Bhatawadekar, L. M., was appointed President of the Corporation at the meeting of the 4th April 1898, and held that appointment until the 31st March 1899.

6. Forty meetings of the Corporation, one attendance of Councillors for the presentation of an address to the Right Honourable George Nathaniel Baron Curzon of Kedlestone,

Viceroy and Governor-General of India, Designate, and forty meetings of Committees of the Corporation were held.

7. The changes in the *personnel* of the Corporation were as follow :—

Mr. C. T. Burke was appointed by Government on the 9th May 1898, in place of the Hon'ble Mr. W. C. Hughes, resigned. Mr. Burke left for Europe on the 4th March 1899 without vacating his seat.

Mr. Chimanlal H. Setalvad was elected by the Justices on the 11th February 1899, in place of Mr. R. H. Vincent, C.I.E., resigned. Mr. Chimanlal left for England on the 25th March 1899 without vacating his seat.

Sir George Cotton proceeded to England on the 21st May 1898 without vacating his seat, and returned on the 3rd December 1898.

Mr. Dost Mahomed Alana died on the 28th March 1899.

Mr. F. Edgelow died on the 11th May 1898, and in his place Mr. A. McKenzie was appointed by Government on the 9th June 1898.

Commander T. G. R. Finny resigned on the 23rd November, and in his place Mr. J. Willcocks was appointed by Government.

Mr. H. G. Gell left for Europe on the 1st March 1898 without vacating his seat, and returned on the 22nd August 1898.

The Hon'ble Mr. Hughes resigned and in his place Mr. C. T. Burke was appointed by Government on the 9th May 1898.

Sir Jamsetjee Jejeebhoy, Bart., C. S. I., died on the 18th July 1898, and in his place Sir Cowasjee Jamsetjee Jejeebhoy, Bart., was appointed by Government on the 2nd August 1898.

Mr. Jaya Karadi Lingu died on the 26th October 1898, and in his place Mr. Sarafali Mamuji was elected by the rate-payers.

Dr. Kaikhosro N. Bahadurji died on the 15th August 1898, and in his place Mr. Manmohandas Ramji was elected by the rate-payers.

Mr. H. Kennedy was appointed by Government on the 18th January 1899, in place of Mr. G. Lund, resigned.

Mr. G. Lund resigned on the 8th January 1899, and in his place Mr. Kennedy was appointed by Government.

Mr. James Macdonald was appointed by Government on the 17th June 1898 in place of Mr. B. Phillips, resigned.

Mr. Manmohandas Ramji was elected by the rate-payers on the 5th September 1898 in place of Dr. K. N. Bahadurji, deceased.

Mr. A. McKenzie was appointed by Government on the 9th June 1898, in place of Mr. F. Edgelow, deceased.

Mr. Nowroji Nusserwanji Wadia, proceeded to Europe on the 17th December 1898.

Mr. B. Phillips resigned on the 16th May 1898, and in his place Mr. J. Macdonald was appointed by Government.

Mr. Sarafali Mamuji was elected on the 1st December 1898 by the rate-payers in place of Mr. Jaya Karadi Lingu, deceased.

Mr. R. H. Vincent resigned on the 5th January 1899, and in his place Mr. Chimanlal H. Setalvad was elected by the Justices.

Mr. J. Willcocks was appointed by Government on the 13th December 1898 in place of Commander T. G. R. Finny, resigned.

THE STANDING COMMITTEE.

8. Mr. Ibrahim Rahimtoola was appointed Chairman of the Standing Committee at the meeting held on the 13th April 1898, and held that appointment throughout the year.

9. There were fifty-six meetings of the Standing Committee and twenty-two meetings of the Sub-Committees thereof.

10. There were one hundred and thirty-five attendances for cheque signing and forty-nine for the audit of the weekly statements of accounts; three other attendances for audit were fixed but not held.

11. The changes in the *personnel* of the Committee were as follows :—

Dr. Kaikhosru N. Bahadurji died on the 15th August 1898, and in his place Mr. K. M. Shroff was elected by the Corporation.

Mr. G. W. Roughton died on the 26th March 1899.

Mr. R. H. Vincent resigned on the 5th January 1899, and in his place Mr. H. Kennedy was appointed by Government.

12. The following is a list of the Municipal Councillors who held office on 31st March 1899 :—

THE HON'BLE MR. BHALCHANDRA K. BHATAWADEKAR, LL.M., *President*, J. P., *R* (D Ward.)

ABDUL HUSSEIN ADAMJI PIRBHAI, Esq., J. P. *R* (C Ward)
ARDASIR FRAMJI UNWALLA, Esq., B.A., *J. P. R* (G Ward)
BADRUDIN BIN ABDULA KUR, Esq., J. P. *R* (C Ward)
BHAGWANDAS NAROTAMDAS, Esq., J. P. *R* (F Ward)
BURKE, C. T., Esq., B.E., M.I.C.E., J. P. *G*
BYRAMJEE NUSSERWANJEE SERVAI, Esq., J. P. *G*
CAMPBELL, H. O., Esq., *G*
CHIMANLAL H. SETALVAD, Esq, B.A., LL.B. J. P. *J*
COTTON, SIR GEORGE, KT., J. P. *C C*
COWASJEE HORMUSJEE, Esq., G.G.M.C., J. P. *J*
CUFFE, T. W., Esq., J. P. *C C*
DARASHAH RATANJI CHICHGAR, Esq., J. P. *J*
D'MONTE, DOMINICK A., Esq., M.D., L.R.C.P. (*London*), L.M. & S., *J. P. J*
DESILVA DIOGO MANUAL, Esq., L. M. & S., *R* (C Ward)
DHAKJI KASHINATHJI, RAO BAHADUR, J. P. *R* (C Ward)
DINSHA BOMANJI MASTER, Esq., L.M. & S., J. P. *J*.
DINSHA EDULJI WACHA, Esq., J. P. *R* (A Ward)
ELAPPA BALARAM, RAO BAHADUR, J. P. *R* (E Ward)
F. SORABJI TALEYARKHAN, Esq., J. P. *J*

NOTE.—The letters against the names signify—*R*, that the member was elected by the Ratepayers; *J*, by the Bench of Justices; *C C*, by the Chamber of Commerce; *U*, by the University; and *G*, appointed by Government.

II. Heads of Departments.

13. Mr. H. W. Barrow, the Municipal Secretary, obtained leave on private affairs for six months from the 21st May 1898 during which period Mr. M. N. Wadia was appointed to act as Municipal Secretary. On the 21st November 1898 Mr. Barrow retired on pension and Mr. Wadia was confirmed in the appointment.

14. Mr. C. C. James, the Acting Deputy Executive Engineer, Drainage, obtained 6 months' half pay leave from the 7th May 1898. During his absence Mr. J. W. Smith, Special Drainage Engineer, was in charge of Mr. James' duties.

15. Mr. W. Pearson, Revenue and Refund Audit Officer was on leave from the 3rd August 1898 to 8th October 1898, during which period Mr. R. N. Koyaji acted for the absent incumbent.

16. Mr. C. D. Mahaluxmiwalla, Superintendent of Gardens, was on three months' privilege leave from the 13th March 1899, and Mr. J. M. Doctor, Assistant Superintendent of the Zoological Collection, was appointed to act for him.

17. Mr. W. Nicholls, Chief of Fire Brigade, was on 3 months' privilege leave from 9th April to 8th July 1898, and Mr. G. F. Weston, Head Foreman, acted for him during the period.

18. Mr. Douglas Bennett, Superintendent of Markets and Slaughter Houses, went on privilege leave from 20th July to 19th October 1898. Mr. H. Holmes, Assistant to the Municipal Commissioner, acted for him and Mr. Anandrao Wamon Shete, Head Clerk to the Municipal Commissioner, acted for Mr. Holmes, as Assistant to Commissioner, during the period.

III. Financial.

20. The income and expenditure and the opening and closing balances of the year were as under :—

	Rs.	a.	p.
Opening balance, including recoverable advances, reserve stock, &c., and excluding deposits, unexpended loan balances and minor adjustment items (*vide* page 10 of the Report for 1897-98)	26,25,144	5	5
Revenue (*vide* pages 10 and 80)	71,61,911	7	8
Total available for expense.....	97,87,055	13	1
Spent during the year (*vide* pages 11 and 99)	73,39,025	12	3
Balance.....	24,48,030	0	10

21. Deducting from the above opening balance the sum of Rs. 9,03,586-11-9 advanced for reserve stock and Rs. 5,83,509-8-1 on account of lapsed grants for 1897-98 and previous years proposed to be renewed during the year, the net balance amounted to Rs. 11,38,048-1-7, or Rs. 2,38,048-1-7 more than the estimate. This balance of Rs. 11,38,048-1-7 was, however, inclusive of the net sum of Rs. 8,12,546-4-8 advanced up to 1897-98 for the purchase of frontage lands in the Agripada, &c. Estate, which, for the reasons stated at page 108 of the Report for that year, could no longer be treated as a recoverable asset. Thus the net opening balance amounted to Rs. 3,25,501-12-11.

22. Against the original Budget Estimate of Rs. 72,27,600 the actual income for the year amounted to Rs. 71,61,911-7-8 or Rs. 65,688-8-4 less than the estimate. The decrease was chiefly under the heads Halalkhore Tax, Wheel Tax and Tolls and Market Receipts. The actuals were, however, better than the revised estimate by Rs. 73,511-7-8 owing principally to higher realizations from Town and Tobacco Duties.

23. As compared with the income for 1897-98, which amounted to Rs. 67,08,505-8-4 (excluding the rebate of Rs. 4,37,055-0-1 on account of plague expenses), the actuals for 1898-99 showed a net increase of Rs. 4,53,405-15-4 obtained chiefly on the General Tax, Water Tax and Town Duties.

24. The total grants sanctioned for expenditure during the year amounted to Rs. 88,65,049-8-11, as shown below :—

	Rs.	a.	p.
As per original Budget Estimate	72,54,300	0	0
Lapsed grants for 1897-98 and previous years renewed in 1898-99...	5,20,069	14	11
Additional grants sanctioned (including Rs. 8,12,546-4-8 for writing off the net amount advanced for the purchase of frontage lands in the Agripada, &c., Estate)	10,90,679	10	0
Total sanctioned (*vide* pages 11 and 91)...	88,65,049	8	11
Deduct—Spent (*vide* pages 11 and 99)	73,39,025	12	3
Balance (expenditure less than sanctioned, *vide* pages 11 and 99)	15,26,023	12	8

25. Of the above unexpended balance of Rs. 15,26,023-12-8, a sum of Rs. 8,19,471-2-11 is proposed to be renewed in 1899-1900, leaving a net saving of Rs. 7,06,552-9-9, of which Rs. 5,36,915 were anticipated at the time of preparing the Budget Estimate for 1899-1900, and consequently appropriated in that Budget. Thus the net unappropriated saving amounted to Rs. 1,69,637-9-9. It will be noticed that the amount of lapsed grants renewed in 1899-1900 is unusually large, but the reason of this is explained at page 100 of the Chief Accountant's Report.

26. Out of the closing balance of Rs. 24,48,030-0-10 shown in para. 20 *ante*, the amount actually available at the end of the year for further requirements was Rs. 6,53,004-6-1 as shown below :—

		Rs.	a.	p.
Closing balance as shown in para. 20		24,48,030	0	10
Less—Lapsed grants for 1898-99 and previous years proposed to be renewed in 1899-1900	Rs. 8,19,471 2 11			
Value of reserve stock	„ 8,75,554 7 10			
		16,95,025	10	9
		7,53,004	6	1
Less—Minimum cash balance required by law...		1,00,000	0	0
Net balance as shown at page 111 of the Chief Accountant's report		Rs. 6,53,004	6	1

27. The expenditure for 1898-99 was higher than that of the preceding year by Rs. 2,79,111-9-6. The increase was principally under Public Health Department and Municipal Debt.

28. The main heads of Revenue and Expenditure for 1898-99 as compared with the Budget estimates and also with the actuals for the preceding year are shown in the following tables A and B :—

A.

29. The causes of the variations between the original budget and revised estimates and the actuals of the income and expenditure for the year have been fully explained in the Chief Accountant's Report. Brief explanations of the causes of the variations between the actuals of the year under report and those of the preceding year are given below :—

INCOME STATEMENT **A.**

General Tax.—The increase of Rs. 1,67,927-10-2 is due to the tax having been increased from 8½ per cent. to 9½ per cent. The increase would have been considerably more, had not the outstandings for previous years collected in 1898-99 been less than those collected in the preceding year by over Rs. 75,000.

Water Tax and other Miscellaneous Water Works Revenue.—The increase of Rs. 1,71,118-7-7 is due to the change in the system of charging for water supplied by meter measurement sanctioned in Standing Committee's Resolution No. 1644, dated 12th May 1897, under which the collections of the bills for water supplied by meter measurement during the last quarter of 1897 were deferred until 1898-99.

Halalkhore Tax.—The recovery of larger outstandings in 1897-98 account for the decrease of Rs. 22,363-1-11 under this head.

Wheel Tax and Tolls.—Out of the total decrease of Rs. 7,641-5-8 under this head, Rs. 2,450-3-8 are under Private Conveyances, Rs. 4,467-2-0 under Public Conveyances and Rs. 724-0-0 under Toll Fees.

Town Duties.—The increase of Rs. 1,65,737-1-3 under this head can be attributed to the increase in the duties on grain, firewood and ghee.

Receipts from Government for Tobacco Duty.—The increase of Rs. 19,220-14-1 under this head can only be attributed to a larger consumption of tobacco.

Market Receipts.—The larger realizations of slaughter fees, and stall rents account for the increase of Rs. 12,848-8-9.

Returns from other Property and Miscellaneous.—The decrease of Rs. 53,442-2-11 is entirely under Miscellaneous Receipts and Investments of Surplus Loan and other Balances. The decrease under the former head is due to less realizations from sale of land and materials, rent

of reclamation grounds at different places and sale of rights of cutting grass, collecting fruits, &c. That under the latter head is due to a large reduction in our invested balances.

EXPENDITURE STATEMENT B.

General Superintendence.—The non-recurrence in 1898-99 of the charges paid in 1897-98 on account of the Deputy Commissioner's salary would have shown a decrease of Rs. 18,000. But owing to the payment in 1898-99 of the late Commissioner's salary at the increased rate of Rs. 3,000 per mensem from 6th April 1898 and of the Acting Commissioner's salary for 3 months at Rs. 2,500 per mensem and of a larger amount of law charges, the decrease is reduced to Rs. 4,411-10-5.

Assessment & Collection Department.—The increase of Rs. 6,694-9-3 is due to the payment of bonus to the members of the Assessment and Collection Department for special services rendered during the Plague epidemic and to the payment of larger commission charges for the collection of Town Duties.

Fire Brigade.—The decrease of Rs. 9,431-7-7 is principally due to charges for two years for clothing having been paid in 1897-98, whereas none were paid in 1898-99, to arrear telephone connection charges and higher rates of food stuffs having been paid in the former year.

Public Gardens.—The increase of Rs. 3,512-0-9 is chiefly due to the bills for the charges for water supply during the last quarter of 1897 having been preferred and adjusted in 1898-99.

Public Works, Ordinary.—The large decrease of Rs. 1,15,715-2-4 is principally under Water Works Maintenance, and Roads, Footpaths, &c. That under the first head is attributable to heavy repairs executed to the Tansa Main embankment in 1897-98 and to the non-recurrence in 1898-99 of the expenditure on the reconstruction of a portion of the Tansa Duct at the end of the 45th mile. That under the second head is due to no expenditure having been incurred in 1898-99 on paving foot-paths and to the repairs of some of the roads in the City having been deferred for some time owing to financial pressure.

Public Works, New.—The large outlay incurred in 1897-98 on the purchase of the electrolizers and setting them up, cost of the old boiler house, &c., at Love Grove taken over by the Drainage Department, plastering and pointing with Indian patent stone the walls of the settling basin at the

Bhandarwada Reservoir and making improvements to the chawls at the Bandora Slaughter Houses account for the decrease of Rs. 75,056-0-2.

Public Health Department.—The increase of Rs. 1,02,541-6-11 is due to the Health Department Reorganization Scheme having been partially brought into force from November 1898 and to more efficient arrangements having been made for the conservancy of the City.

Municipal Debt.—The increase of Rs. 2,20,566-11-5 is solely due to the payment of interest to the Bank of Bombay on the temporary Loans of Rs. 35 lakhs taken up from the Bank.

Police.—The carrying out of certain additions and alterations to the Byculla Police Quarters and the Girgaum Police Station accounts for the increase of Rs. 1,012-12-5.

Education.—The increase of Rs. 12,152-8-11 is due to the enhancement in the Municipal contribution towards primary education, to the insurance of the Victoria and Albert Museum Building and its contents and to certain structural alterations, &c., having been executed to the Museum building.

Hospitals and Dispensaries.—The increase of Rs. 967-7-1 is due to the unexpended balance of the Municipal contribution towards the Gokuldas Tejpal Hospital refunded by Government in 1898-99 being less than that refunded in the preceding year.

Pensions, Gratuities and Compassionate Allowances.—The payment in 1897-98 of a large amount of compassionate allowances to the widows and children of deceased Municipal Officers and Servants accounts for the reduction of Rs. 13,229-15-11 under this head.

Miscellaneous.—The payments made in 1897-98 of grain compensation to peons, &c., Workshops ground rent and telephone charges for 1895-96 and 1896-97, cost of illuminating and enclosing an address to Her Imperial Majesty the Queen Empress on the occasion of the Diamond Jubilee and the expenses of the General Election of Councillors account for the increase of Rs. 1,00,092-15-7.

Plague Expenses.—The sum of Rs. 5 lakhs debited to current revenue in 1897-98 was adjusted against Loan, &c., Funds in 1898-99 and hence a decrease under this item.

The last item of Rs. 8,12,546-4-8 on account of the write-off of the net amount advanced for the purchase of frontage lands in the Agripada, &c., estate needs no explanation.

30. The following statement shows the net Revenue and net Expenditure for 1898-99 and the preceding year as required in the Standing Committee's Resolution No. 12212, dated 2nd February 1892 :—

Particulars.	1897-98. Rs. a. p.	1898-99. Rs. a. p.

Less—Expenditure incurred in 1898-99 .. ..

32. It will be seen from the foregoing statement that the expenditure on Plague Operations up to the close of 1898-99 (including recoveries already made from Government on account of expenditure incurred on their behalf) amounted to Rs. 35,32,408-4-6. In addition to the payments made by Government in respect of the charges payable by them, they have paid to the Municipality provisional grants aggregating Rs. 14½ lakhs towards the plague expenditure. This sum has not been credited to plague expenses pending the settlement of the question of the division of such expenses between Government and the Municipality.

33. The following statement exhibits the total Assets and Liabilities at the end of the year :—

35. The revenue, expenditure and balances of the last five years have been contrasted in the following table :—

	1894-95.	1895-96.	1896-97.	1897-98	1898-99.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	65,39,373	67,61,710	62,08,978	67,08,506 *h*	71,61,911 *l*
Expenditure	68,78,486	67,02,516	70,04,743 *e*	70,59,914 *i*	73,39,926 *m*
Closing balance (including recoverable advances to Loan Works, Reserve Stock, &c., and excluding minor deposits, &c.) ...	37,13,124 *a*	37,72,318 *c*	29,76,553 *f*	26,25,144 *j*	24,48,030 *n*
Add—Recoverable Revenue Outstanding	65,000	50,000	2,75,000	83,000	1,00,000
	37,78,124	38,22,318	32,51,553	27,08,144	25,48,030
Deduct—Uncompleted Works, &c., the unexpended balances of the grants for which were required for payment in following year ...	4,84,218	4,80,048	6,71,162	5,20,070	8,19,471
Net workable balance available for requirements of following year..	32,93,906 *b*	33,42,270 *d*	25,80,391 *g*	21,88,074 *k*	17,28,559 *o*

a & *b* Excluding Rs. 9,14,284 on account of the value of Reserve Stock on hand on 31st March 1895, the net closing balances amounted to Rs. 27,98,840 and Rs. 23,79,622 respectively.

c & *d* Excluding Rs. 8,76,660 on account of the value of Reserve Stock on hand on 31st March 1896, the net closing balances amounted to Rs. 28,95,658 and Rs. 24,65,610.

e Including Rs. 4,37,055-0-1 on account of plague expenses debited to revenue in 1896-97.

f & *g* Excluding Rs. 9,01,841 on account of the value of Reserve Stock on hand on 31st March 1897, the net closing balances amounted to Rs. 20,74,712 and Rs. 16,73,550.

h Excluding Rs. 4,37,055-0-1 on account of rebate to current Revenue in respect of plague expenses up to 1896-97, which has been shewn by a deduction from the expenditure. The sum of Rs. 67,08,506 includes over Rs. 2½ lakhs on account of recoveries of outstandings.

i Includes Rs. 5 lakhs on account of plague expenses debited to Revenue.

j & *k* Excluding Rs. 9,03,587 on account of the value of Reserve Stock on hand on 31st March 1898, and Rs. 8,12,546 on account of net advance made for the purchase of frontage lands in the Agripada, &c., estate, the net closing balances amounted to Rs. 9,03,011 and Rs. 4,71,941.

l In this year the General Tax was increased from 8¾ to 9¼ per cent. and the Town Duties on Grain, Firewood and Ghee were increased from annas two per candy, anna one per candy, and annas eight per maund to annas four per candy, annas two per candy and annas ten per maund respectively.

m Includes a debit of Rs. 8,12,546-4-8 on account of the write off of the net amount advanced for the purchase of frontage lands in the Agripada, &c., estate and a credit of Rs. 5 lakhs on account of rebate of Plague expenses debited to revenue in 1897-98.

n & *o* Excluding Rs. 8,75,554 on account of the value of Reserve stock on hand on 31st March 1899, the net closing balance amounted to Rs. 15,72,476 and Rs. 8,53,005.

IV. Assessment and Collection of Revenue.

36. The total amount collected under all heads exclusive of miscellaneous receipts was Rs. 47,85,033-5-10, against the estimate of Rs. 48,15,100, the difference being Rs. 30,066-10-2, and the falling off being in items of Halalkhore Tax, Wheel Tax and Tolls.

37. The decrease in the Halalkhore Tax includes Rs. 11,390 for special halalkhore tax to Mills, and this with the decreases in wheel tax and tolls is probably attributable to a reduction in the number of animals and vehicles kept on account of the plague. As compared with the collections for 1897-98, which amounted to Rs. 44,71,371-12-10, the increase for 1898-99 is Rs. 3,13,661-9-0.

38. There was an increase of one per cent. in the general tax for the year under report.

39. The total collections for the past 5 years, exclusive of miscellaneous receipts, were as follows :—

	Rs.	a.	p.
1894-95	42,86,095	4	9
1895-96	43,51,271	11	4
1896-97	41,76,528	0	6
1897-98	44,71,371	12	10
1898-99	47,85,033	5	10

Registration of Properties.

40. The number of properties on the Assessment book at the close of the year was 53,328 and in the previous year 53,165, thus showing an increase of 163.

41. The following table shows the differences for the last five years :—

YEARS.	Classification of properties according to description.				Classification of properties according to liability to General Tax.			
	Buildings.	Salt-pans.	Lands, including tanks, wells &c.	Total.	Number assessed for the General Tax.	Number exempted or compounded for on special terms.	Small plots of unproductive lands for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9
1894-95.....	34,265	175	17,708	52,148	40,032	4,446	7,670	52,148
1895-96.....	35,083	175	17,241	52,499	40,318	4,493	7,688	52,499
1896-97.....	35,495	146	17,318	52,959	40,653	4,561	7,745	52,959
1897-98.....	35,091	146	17,928	53,165	40,685	4,578	7,902	53,165
1898-99.....	34,805	146	18,377	53,328	40,823	4,585	7,921	53,328

42. During the year there were 678 buildings demolished and 392 new buildings erected. Existing properties to the number of 183 were enlarged.

Valuation.

43. The recorded gross value of these properties for the year under report is shown in the following table in contrast with that of the preceding year :—

Closing valuation of 1897-98.	Opening valuation for 1898-99.	Valuation after complaints.		Subsequent amendments.		Closing valuation of 1898-99.				Increase.
		Number of complaints.	Amount after disposal of complaints.	Reductions.	Enhancements.	Valuation assessed to the with General Tax.	Valuation exempted from General Tax.	Valuation for which no General Tax bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs. 2,94,82,805	Rs. 2,97,58,212	Rs. 2,637	Rs. 2,95,90,409	Rs. 2,25,560	Rs. 4,68,787	Rs. 2,70,70,930	Rs. 27,24,608	Rs. 18,998	Rs. 2,98,55,536	Rs. 3,70,831

44. The increase is in the valuation of private properties and is made up as under:—

	Rs.
Erection of new buildings	1,77,855
Enlargements	1,78,618
Rise in rents and correction of under-assessment	14,358
Total...Rs.	3,70,831

Property Taxes.

45. The following comparative tables show the increases in property taxes :—

(1) GENERAL TAX.

1897-98.				1898-99.				
8¼ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by the Port Trust.	Total.	9½ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by the Port Trust.	Total.	Increase.
1	2	3	4	5	6	7	8	9
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
17,94,227 6 5	98,374 0 0	1,52,462 0 0	20,45,063 6 5	20,35,222 12 9	1,09,947 0 0	1,70,420 0 0	23,15,589 12 9	2,70,506 6 4

46. The amount of general tax on properties exempt under Section 143 of the Act does not appear in the above table. The amount, as contrasted with that of the previous year, is as under :—

	Rs.	a.	p.
1897-98	2,11,268	4	11
1898-99	2,37,921	5	3

(2) WATER TAX.

1897-98.				1898-99.				Increase.			
On Value.	Compounded.	On Meter Measurement.	Total.	On Value.	Compounded.	On Meter Measurement.	Total.	On Value.	Compounded.	On Meter Measurement.	Net Increase.
1	2	3	4	5	6	7	8	9	10	11	12
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
6,45,311 6 1	36,583 4 4	5,62,105 4 5	12,42,199 14 10	6,47,690 6 1	40,371 2 9	7,88,156 4 2	14,76,217 13 0	4,179 0 0	4,387 14 5	2,26,050 15 9	2,34,617 14 2

(3) HALALKHORE TAX.

1897-98.			1898-99.					
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	Increase of Halalkhore Tax on value.	Increase of special Halalkhore Tax.	Net increase.
1	2	3	4	5	6	7	8	9
Rs. a. p. 5,62,500 8 4	Rs. a. p. 1,36,060 13 7	Rs. a. p. 6,98,561 5 11	Rs. a. p. 5,68,618 13 6	Rs. a. p. 1,43,164 2 11	Rs. a. p. 7,16,783 0 5	Rs. a. p. 6,118 5 2	Rs. a. p. 12,103 6 4	Rs. a. p. 18,221 10 6

47. The total demand on account of property taxes for 1898-99 amounted to Rs. 45,09,190-10-2, to which must be added Rs. 25,785-6-4 on account of previous years, making a total of Rs. 45,34,976-0-6.

Collection.

48. From the total demand for the year, a sum of Rs. 78,989-12-2 was allowed as drawback under Section 158 (2) of the Act, and the sum of Rs. 2,80,367 was the amount payable by Government and the Port Trust. For the recovery of the remainder, bills were issued as under :—

Year.	Bills issued.	
	No.	Amount.
		Rs. a. p.
1894-95	2	101 1 5
1895-96	2	115 0 0
1896-97	94	2,722 11 5
1897-98	479	22,846 9 6
Total ...	577	25,785 6 4
1898-99	72,737	41,49,833 14 0
Total ...	73,314	41,75,619 4 4

49. The outstanding balance on account of Property taxes at the end of 1897-98 was Rs. 1,00,550-2-11, and the total amount for Collection in 1898-99 was Rs. 42,76,169-7-3 —exclusive of Rs. 2,80,367—which is the amount payable by Government and Port Trust, which is paid by them direct into the Municipal Treasury without bills being issued for the same. At the end of the year the total amount outstanding was Rs. 1,06,854-14-4. This amount was, by the 15th of July 1899, reduced to Rs. 47,255-6-10, Rs. 59,599-7-6 having been collected from 1st April to 15th July 1899.

510. The following table gives the details of the amounts with Head to be collected during the year :—

Taxes.	To be collected.				Collected.			Uncollected.	DEDUCT.			Balance out and r at the end of 1898-99.		
	Opening balance outstanding on 31st March 1898.	Total of Bills issued during 1898-99.	Amount payable by Government and Port Trust without Bills.	Total.	On account of former years.	On account of 1898-99.	Total.		On account of former years. Amount written off as per Standing Committee's Resolutions Nos. 1678 4686 18-6-98 17-8-98 6437 and 2-11-98 9242 16-1-99	On account of former years. Tax on Vehicles and Animals.

51. The opening outstanding balance on account of this tax was Rs. 6,550-2-3, the demand for the year ending 31st December 1898, was Rs. 1,62,961-12-11, as against Rs. 1,55,282-7-0 for the previous year, and the bills to the extent of Rs. 933-12-0 were issued on account of tax due for former years, so that the total demand was Rs. 1,70,445-11-2. The amount actually collected during the year was Rs. 1,61,912-3-7 against a collection of Rs. 1,64,378-7-3 in the previous year.

52. The Corporation having resolved in their Resolution No. 9604 of 10th January 1898, to tax bicycles and tricycles, 654 of the former and 7 of the latter were taxed at the end of the calendar year 1898.

53. The legality of the tax was confirmed by a decision of the High Court, on the 4th April 1899 on a reference to that court by the Chief Judge of the Small Causes Court in the case of Hogan *vs.* the Municipal Commissioner.

54. The amount recovered on account of licensed public conveyances, including license fees and fees for badges, and the amount realized from tolls at Mahim and Sion Causeways, as contrasted with the previous year, is as follows :—

Years.	Tax on Public Licensed Conveyances.	License Fees.	Fees for Badges.	Toll Fees at Mahim and Sion Causeways.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1897-98 ...	1,67,989 10 9	5,265 8 0	8,380 12 0	14,489 14 0
1898-99 ...	1,63,522 8 0	5,757 10 0	7,386 6 0	13,765 14 0

Property Taxes and Taxes on Vehicles and Animals.

55. The following tables show—(**A**) the total assessment ; (**B**) the collection and outstanding balances under these heads for the year as compared with those of the preceding four years :—

Table A.

Total Assessment on account of Property Taxes and Wheel Tax.

Years.	No. of Properties.	Gross annual value at the end of the year.		ASSESSED DEMAND.														
				Property Taxes.									Wheel Tax, including Public Conveyances and the Toll on the Causeways.	Total Demand.

Bye-election	1	1	...	...	...	1
Tax on bicycle ...	1	1	...	...	...	1
Total.....	12	3	...	1	8	12

REVENUE AUDIT.

59. The books and balances of the Ward clerks in all the seven ward offices of the City were duly examined at the end of each quarter and the bills checked in detail after comparison with the Head Office Accounts. The Assessment books in the Head Office were also examined with a view to ascertain that no taxation of property had been evaded. The books relating to the collection of taxes, on animals and vehicles were also scrutinized. The revenue from the tax on public land conveyances licensed by the Commissioner of Police was also audited for the twelve months from the 1st January to the 31st December 1898, and the certificates of issue of licenses supplied by that officer under arrangements made with him were duly checked with the register, now kept by the Chief Accountant instead of the Superintendent of the Byculla Ward as in former years. There were 15,044 claims for one-fifth drawback under Section 158 (2) of the Municipal Act as against 13,664 for the previous year. In forms 11, 11A and 11B,

relating to increase and decrease of valuations, 5,751 entries were checked as against 6,201 in the preceding year and traced through all the Assessment and Collection accounts. The number of complaints against valuation heard by the Revenue and Refund Audit Officer fell from 966 to 702 in the year under report, and decisions on 221 complaints against amendments under Section 167 were scrutinized.

60. The revenue receipts or vouchers of the following departments were also examined and checked :—

	No. of receipts.	Amount. Rs. a. p.
Engineer's Department	6,176	32,792 7 11
Health Department	20,907	59,503 12 4
Markets and Slaughter-Houses ...	14,919	3,83,433 12 11
Victoria Gardens	3,035	4,580 2 2
Rent Accounts of Health Camps.	2,709	5,128 8 0

61. In the Licensing Department 5,575 licenses were granted as against 5,415 in 1897-98: each of these was scrutinized with special reference to the amount of fee leviable.

62. The number of claims for refund sanctioned after examination on account of vacancy or over-collection was 1,305 amounting to Rs. 31,324-11-10.

TOWN DUTIES.

63. The following table shows in detail the increases and decreases in collections, refunds and net revenues for the year. The total collections for the year under report amounted to Rs. 22,55,540-4-10, against Rs. 17,29,760-15-7 in the preceding year. The net revenue shows an aggregate increase of Rs. 2,33,695-0-6 under all heads except sugar in which there was a falling off of Rs. 2,32,698-5-3, bringing the net increase to Rs. 996-11-3. This is probably due to the preponderance of the previous year's imports over exports which after allowing for local consumption left a large balance available for export during the year under report.

Statement contrasting the Collections, Refunds and Net Revenue from Town Duties for the Years 1897-98 and 1898-99.

* Should be 123-8-8, the difference Rs. 1-5-0, being the amount short credited by the B. B. & C. I. Railway Company, steps have been taken for the due payment of this amount.

64. The total amount of refunds claimed was Rs. 13,47,419-2-0 of which sum Rs. 84,832-3-0 were retrenched as follows :—

	Rs.	a.	p.
On account of claims legally inadmissible ...	11,229	6	0
Excess of amounts claimed over those actually due.	73,602	13	0
Total ... Rs.	84,832	3	0

65. The number of claims disposed of was 34,856 against 28,072, the previous year.

V. Public Works.

SPECIAL DRAINAGE.

66. For the purpose of carrying out the various large schemes of drainage required in the city, Mr. James W. Smith, M.I.C.E., the Drainage Engineer of the Municipality of Bombay, was appointed to be in charge of these works, with the designation of Special Drainage Engineer, with effect from the 1st March 1893. He continued to hold that office during the year under report, and in addition thereto carried on the duties of the Acting Deputy Executive Engineer, Drainage (Mr. C. C. James), from the 9th March 1897, up to the 7th November 1898, when Mr. James having returned from leave, charge of that office was handed over to him. In the Special Drainage Department the unfinished works in progress and the new works sanctioned or commenced during the year were as follows :—

UNFINISHED WORKS.

A.—Colaba Sewerage Works.

B.—Umarkhadi Sewerage Works.

C.—Mazagon Sewerage Works.

D.—House Drainage Connections in the Colaba District.

E.—Fergusson Road and Chinchpokli Sewerage Works.

F.—Old Race Course Sewerage Works.

G.—Improvement of roadside drains in Khetwadi District.

H.—Masonry drain from Girgam Road to Back Bay.

I.—Opening out water course at Parel Road and constructing covered drain.

J.—Culvert with penstock Mahalakshmi Reservoir.

K.—Storm-water drain from Wellington Fountain to sea.

L.—Storm-water drain in Elphinstone Road.

M.—Storm-water drain in Wodehouse Road.

N.—Storm-water drain in Lower Colaba and Thomas Street.

O.—Storm-water drain at foot of Wodehouse Bridge.

P.—Ovoiding side drains in 1st Pathan Street.

Q.—Constructing arched masonry drain in Gilder Lane.

R.—Improvement of roadside drains and watercourses about Dadar Road.

S.—Machinery for Parel sectional sewerage districts.

T.—Mazagon Sewerage Works (sectional).

NEW WORKS COMMENCED.

U.—Surface drainage works in Kamattipura District.

V.—Providing 41 manholes on the old ovoid sewers in Kamathipura.

W.—Works in 9-inch pipe sewer in the new roads on the southern part of the Apollo Reclamation and other roads.

A.—Colaba Sewerage Works.

67. The suit filed by Messrs. Bulkley & Co. against the Municipality is still pending before the High Court Commissioner. The expenditure under this head paid during the year amounted to Rs. 59-10-6, and the total expenditure including that amounted to Rs. 8,21,070-3-11 against the grant of Rs. 8,34,856-0-0.

B.—Umarkhadi Sewerage Works.

68. The suit filed by Messrs. Bulkley & Co. against the Municipality is in this case also pending. The expenditure during the year amounted to Rs. 251-11-7, which with the expenditure in the preceding years amounted to Rs. 3,49,961-1-6 against the grant of Rs. 3,86,993-0-0.

C.—Mazagon Sewerage Works (Gravitation Portion).

69. The contractors for these works are Messrs. Sulemanji Mulla Abdulali & Co.

70. The works were not completed, though the contract period of two years expired on the 24th November 1897, on account of the difficult nature of the excavation work and difficulty in obtaining labour on account of the plague. Portions of the works have been inspected and taken over from the contractors. The expenditure during the year amounted to Rs. 18,256-9-9, which added to the previous expenditure amounts to Rs. 2,74,128-6-10 as detailed below :—

	Rs.	a.	p.
Establishment	28,363	3	5
Contingencies	4,826	1	4
Road repairs	21,666	13	10
Work	2,19,912	4	3
	2,74,268	6	10
Credit by sale of contract forms ...	140	0	0
Total ...Rs.	2,74,128	6	10

D.—House Drainage connections (Street Portions) in the Colaba District.

71. The contractor for these works was Mr. Palanji Edalji Plumber. The street portions of the connections which remained to be finished were completed by the end of May 1898. The connections made during the year were 33, and the bill for these, amounting to Rs. 1,746-9-10, was passed in November 1898. The total number of connections made throughout the district is 275.

E.—Fergusson Road and Chinchpokli Sewerage Works (Gravitation Portion).

72. The Contractor for these works was Mr. Sayaji Naguji. The works were completed within the contract time which expired on the 25th March 1898. During the progress of the works additional manholes were found necessary, and an increase in the length of the sewer was also found to be necessary, this caused additional expense, and to meet it a transfer of Rs. 2,000 was obtained from the grant for ovoiding side drains in Girgam Road. The final bill amounting to

Rs. 59,896-0-4 was passed during the year. The expenditure during the year amounted to Rs. 4,168-13-6, and this added to the previous expenditure amounted to Rs. 89,910-12-7 as shown below :—

	Rs.	a.	p.
Establishment	7,088	0	10
Contingencies	1,617	1	0
Road repairs	3,594	7	9
Works	59,974	4	6
18″ Pipe sewer in DeLisle Road ...	17,756	14	6
Rs.	90,030	12	7
Credit by sail of contract forms and transfer of clerks ... ... „	120	0	0
Total...Rs.	89,910	12	7

As against the ultimate grant of Rs. 90,117-0-0.

73. The final bill for the work in the 18″ pipe sewer in DeLisle Road was passed during the year. The Contractors were Messrs. Sulemanji Mulla Abdulali & Co., and the work was completed in 1896. The bill amounted to Rs. 17,675-10-4 against the contract amount of Rs. 18,513-0-0.

F.—Old Race Course Sewerage Works (Gravitation Portion).

74. The Contractors for these works were Messrs. Sulemanji Ali Mahamad & Co. The works were with the exception of three lengths of pipe sewer completed within the contract period. The final bill was passed in June 1898 and amounted to Rs. 32,832-14-0. The contract amount for the work was Rs. 35,846-0-0. A sum of Rs. 4,258 was deducted for work left undone, and the cost of extra work was met from savings from the grant. The total grant amounted to Rs. 46,270-0-0. The expenditure during the year was Rs. 1,556-14-2, and the total expenditure Rs. 39,039-8-1 as detailed under following heads :—

	Rs.	a.	p.
Establishment	3,668	10	8
Contingencies	376	12	0
Road repairs	1,624	14	0
Work	33,378	3	5
Rs.	39,049	8	1
Credit by sale of contract forms „	10	0	0
Total Rs. ...	39,039	8	1

G.—Improvement of road side drains and provision of water gullies in Khetwadi District.

75. The Contractors for these works were Messrs. Vithal Sayana & Co. The works were completed within the contract time which expired on the 21st February 1898. The final bill for the works amounted to Rs. 43,478-3-9, including extra items which amounted to Rs. 4,649-4-3 and the contract items together with excesses amounted to Rs. 38,828-15-6 against the contract amount of Rs. 43,313-0-0, thus showing a saving of Rs. 4,484-0-0, this together with Rs. 165-4-3 from the contingency provision met the cost of the extra items. The bill for a storm-water drain in Khetwadi 10th Lane was passed in June 1898. It amounted to Rs. 3,952-12-0 against a sanctioned grant of Rs. 4,353-0-0.

76. The total grant for the works in Khetwadi amounted to Rs. 54,486-0-0. The expenditure during the year was Rs. 7,117-5-4, and that plus the previous expenditure amounted to Rs. 52,657-2-8 as hereunder detailed :—

	Rs.	a.	p.
Establishment	2,469	3	7
Contingencies	1,704	1	0
Road repairs	1,639	14	7
Work	43,478	3	7
Masonry drain in Khetwadi 10th Lane	3,952	11	11

II.—Masonry drain from Girgam Road through night-soil Depot Lane and Mathew Road Crossing, B. B. & C. I. Railway to Back Bay.

77. Messrs. Sulemanji Mulla Abdulalli & Co. were the Contractors for this work. The work was practically completed within the contract period of six months, which expired on the 30th April 1898, some necessary extra work was carried out, which was not completed until the end of March 1899. The final bill amounting to Rs. 18,962-0-0 inclusive of cost of extra work, and excesses was not passed at the close of the year. The expenditure incurred and passed up

to the end of the financial year amounted to Rs. 14,963-9-4 as detailed below :—

				Rs.	a.	p.

I.—Opening out the water course to the west of Messrs. Kama's property, Parel Road, and constructing a covered drain thereat.

78. Mr. Sayaji Naguji was the Contractor for this work. It consisted of two parts (*a*) opening out the water course and (*b*) the construction of a covered drain. The second part was completed at a cost of Rs. 3,362-6-7. The first part has been deferred under the advice of the Municipal Solicitors as Mr. Cama objects to the work. Out of the grant there is a balance available for that portion of the work amounting to Rs. 4,266-9-5.

J.—Culvert with a penstock in the eastern bank of the Mahalakshmi Reservoir.

79. Contractor Mr. Sayaji Naguji. This work was completed at a cost of Rs. 1,673-4-4 against the grant of Rs. 2,112. Some additional masonry work was found necessary, and it was done by the same contractor at a cost of Rs. 81-15-0 defrayed from the sum of Rs. 438-11-8 savings from the grant.

K.—Storm-water drain from near the Wellington Fountain via Band Circle to the Sea.

80. The Contractors were Messrs. Sulemanji Moola Abdulali & Co. Work was commenced on the 1st May 1897, to be completed by the 15th June 1897, but the whole of the work was not finished until the 1st of May 1898. The delay was caused by the necessity for obtaining the sanction of

Government to the laying of a portion of the drain through Government land. The final bill for the work amounted to Rs. 30,071-5-2 inclusive of extras and excesses and was passed during the year. The total grant for the work was Rs. 37,355-0-0, and the total expenditure was Rs. 36,702-3-2 as shown below :—

			Rs.	a.	p.

L. & M.—Storm-water drain with Gullies in Esplanade Road opposite the Elphinstone College, and storm-water drain in Wodehouse Road near the Y. M. C. A. Buildings.

81. Contractors Messrs. Sulemanji Mulla Abdulali & Co. The final bill for these works was passed during the year; it amounted to Rs. 9,756-2-11. The total grant sanctioned was Rs. 11,527, and the total expenditure including the final bill was Rs. 11,364-10-5, showing a saving of Rs. 162-5-7. The works were handed over to the Deputy Executive Engineer, Drainage, on the 9th July 1897.

N.—Storm-water drain in Lower Colaba Road and Thomas Street.

82. Contractor Mr. Sayaji Naguji. The final bill for these works was passed during the year, it amounted to Rs. 9,581-15-11. The total expenditure including the final bill amounted to Rs. 10,466-0-1 as detailed below :—

		Rs.	a.	p.
Contingencies	...	163	13	4
Road repairs	...	720	7	11
Work	...	9,581	10	10
Total ...	Rs.	10,466	0	1

83. The saving thus amounted to Rs. 3,120-15-11. Marked beneficial effect has resulted from the construction of this drain.

O.—Storm-water drain at the eas foot of Wodehouse Bridge.

84. The Contractor for this work was Mr. Sayaji Naguji.

85. The final bill amounting to Rs. 1,123-11-6 was passed during the year.

86. The total cost amounted to Rs. 1,331-7-8 as against the grant of Rs. 1,639, thus realising a net saving of Rs. 307-8-4.

P.—Ovoiding side drains in Pathan 1st Street.

87. Contractors Messrs. Vithal Sayana & Co. The final bill for this work amounting to Rs. 4,402-14-7 was passed during the year, the total expenditure amounted to Rs. 6,094-15-3 as hereunder detailed :—

	Rs.	a.	p.
Establishment	1,483	4	9
Contingencies	16	10	4
Road repairs	192	1	7
Work	4,402	14	7
Total ... Rs.	6,094	15	3

88. The sanctioned grant was Rs. 6,201, the total expenditure being Rs. 6,094-15-3, there has been a saving of Rs. 106-0-9.

Q.—Constructing an arched masonry drain between the Poor Parsi Chals in Gilder Lane and the B. B. & C. I. Railway.

89. Contractors Messrs. Sulemanji Mulla Abdulalli & Co. The Contractors' bill for this work amounted to Rs. 3,581-5-3, and the total expenditure to Rs. 3,930-10-7 against the grant of Rs. 4,221. There has been a net saving of Rs. 290-5-5.

R.—Improvement of Road-side drains and water courses in and about Dadar Road.

90. Messrs. Sulemanji Mulla Abdulali & Co. were the Contractors for these works. The works were commenced on the 1st March 1898, and the contract period of six months expired on the 31st August 1898. The works were practically completed at the end of December 1898, only some slight defects remained to be remedied until the end of January

1899. A portion of the work having to be carried through ground belonging to the B. B. & C. I. Railway Company necessitated correspondence which had not been brought to a final issue at the close of the year under report, consequently the Contractors could not be held responsible after the completion of the other parts of the work, hence the contract between them and the Municipality has been deemed to be closed. The final bill amounting to Rs. 20,125 including extras amounting to Rs. 4,594, though prepared, was not passed during the year.

91. The total grant sanctioned for the works is Rs. 30,475 and the total expenditure certified and passed to the end of the year was Rs. 14,209-14-2, the details of which are as follow:—

	Rs.	a.	p.
Establishment	1,231	9	6
Contingencies	394	8	7
Road repairs	491	9	7
Work	12,092	2	6
Total ... Rs.	14,209	14	2

S.—Machinery for the Parel, &c., Sectional Sewerage Districts.

92. Contractors Messrs. Hughes and Lancaster by their Agents and Attorneys, Messrs. Richardson and Cruddas.

93. The contract was signed on the 1st April 1898, and the order to commence was given on the same day. The contract period will expire on the 31st March 1900. The work of laying the air and sealed sewerage mains was first commenced, the contract amount for which is Rs. 2,77,480 the measured quantity of work actually paid for at the end of the year amounted to Rs. 1,47,477.

94. Under clause XXXV of the contract, advances were sanctioned and made from time to time to the extent of 50 per cent. on the value of the pipes actually delivered on the site. The total advances made amounted to Rs. 84,639, of which Rs. 38,061-10-5 has been recovered from the Contractors' bills.

95. It having been decided that the air-compressor station for the various sectional districts should be constructed immediately to the north of the Love Grove Pumping Station, steps were taken to acquire the land. Three plots were

needed—one plot has been acquired under the Corporation's Resolution No. 10117, dated 9th February 1899, at the rate of Rs. 1-4-0 per square yard, as regards the other two plots reference had to be made to the Collector who had not given his answer at the close of the year. Boilers and machinery have been supplied and are stored at Love Grove. The total certified expenditure incurred up to the close of the year was Rs. 3,68,649-1-5 as detailed below:—

	Rs.	a.	p.
Establishment	44,357	8	4
Contingencies	1,418	12	3
Road repairs	10,096	8	7
Machinery	3,12,776	4	3
Total ... Rs.	3,68,649	1	5

T.—Mazagon Sectional Sewerage Works.

96. Contractor Mr. Sayaji Naguji. Tenders for these works were invited on the 1st October 1898, returnable on the 20th October 1898. Three tenders were received, the lowest of which was that of the above-named contractor and amounted to Rs. 1,67,219 ; this was accepted and executed on the 5th December 1898, and the order to commence work given on the same day. The contract period is 18 months, and at the close of the year satisfactory progress had been made with the work. The Port Trustees having agreed that their sewerage work should be carried out simultaneously with the Municipal work and by the Municipality, an estimate was furnished amounting to Rs. 44,991, exclusive of the percentage for supervision, and the Trustees agreed to pay the actual cost plus 7½ per cent. for supervision.

97. The total expenditure certified and passed to the end of the year amounted to Rs. 24,196-15-2. The following are the details :—

	Rs.	a.	p.
Establishment	9,425	0	0
Contingencies	557	9	7
Road repairs...	1,209	14	3
Work	13,039	6	9

Total ... Rs.	24,196	15	2

U.—Surface drainage works in the Kamattipura District.

98. Contractors Messrs. Ali Mahamed Abdulali & Co. The Corporation sanctioned these works under their Resolution No. 1198 of the 5th May 1898, at a cost of Rs. 91,805. Tenders were invited on the 29th July 1898, returnable on the 17th August 1898. Six were received, of which that of the above-named contractors was the lowest. It amounted to Rs. 51,898, and was accepted under the Standing Committee's Resolution No. 5001 of the 31st August 1898. It was executed on the 16th September 1898, and the order to commence work given on the 21st September 1898. The contract period expires on the 21st June 1899 ; the progress made has been satisfactory. The expenditure on the whole work incurred and passed during the year amounted to Rs. 50,741-4-11 as detailed below :—

		Rs.	a.	p.
Establishment		2,257	1	10
Contingencies		807	10	4

V.—Providing 41 *manholes on the old Ovoid Sewers in Kamattipura.*

99. This was one of the new works provided for from current revenue in the Budget for 1898-99, and was entrusted to the Contractors for the storm-water drainage works in Kamattipura and was completed by them. The cost amounted to Rs. 2,543-7-7 against the grant of Rs. 3,087 ; the net saving was Rs. 543-8-5.

W.—Work in 9" pipe sewers in the new roads in the southern parts of the Apollo Reclamation (portion of Merewether Road, Henry Road Extension, Ormiston Road Extension and the new 80-foot road near the sea.)

100. Contractors Messrs. Sulemanji Mulla Abdulali & Co. The Port Trustees having desired that this work should be done by the Municipality, they deposited the aggregated sum of Rs. 4,858. The work being of a very urgent character, tenders could not be invited, hence the Standing Committee under their Resolution No. 4320, dated the 11th August 1898, sanctioned the work being placed in the hands of Messrs. Sulemanji Mulla Abdulali & Co., as an extension of their contract for the Mazagon works. The Port Trustees agreed to pay the actual cost plus 7½ per cent. for supervision. The final bill including 7½ per cent. for supervision amounted to Rs. 4,531-10-7 against the grant of Rs. 4,858-0-0, leaving a balance of Rs. 326-5-5 to be refunded to the Trustees.

101. The Committee appointed to report upon the scheme for the drainage of surface and subsoil water held their first meeting on the 20th October 1897, subsequent meetings were held, and the subject came before the Corporation and was referred to another Committee, and a report from them was laid before the Corporation on the 25th February 1899, and at a meeting of the Corporation held on the 11th May 1899, a Resolution was passed authorizing the Commissioner to enlist the services of Mr. W. Santo Crimp, and appointed a Committee to co-operate with that gentleman. An account of what has been done with regard to the subject, will be found embodied in the Special Drainage Engineer's Report at page 654

Supply of Stoneware Pipes and Fittings, Iron Articles and Cement.

102. Quotations were called for the supply of stoneware pipes, &c., from Messrs. Garlick & Co., and Messrs. Richardson & Cruddas, but the latter firm having replied that they had none in stock, the order was placed with the former.

103. The bill certified and passed during the year amounted to Rs. 1,088-9-0. Cast iron gratings required for the surface drainage works of Kamattipura were obtained from the casting contractors, Messrs. Sorabji Shapurji & Co., at the contract rate of Rs. 6-8-0 per cwt., minus a discount of 2½ per cent. The value supplied amounted to Rs. 1,293-1-6 less the discount. Other castings to the value of Rs. 1,988-4-7 were also obtained.

Cement.

104. Indents for cement were made upon the Deputy Executive Engineer, Drainage, as before.

Colaba Air Compressor Station.

105. The machinery in this station has continued to work satisfactorily. There has been a considerable increase in the quantity of sewage lifted, the approximate quantity from the 1st March 1898 to the 28th February 1899, being slightly over 325 million gallons against 220 million gallons for the same period during 1897-98.

106. A Worthington donkey pump was purchased from Messrs. Garlick & Co. for Rs. 410 to be used in the event of failure of the small ejectors in the ejector stations. It is actuated by compressed air from the air main. The Corporation under a Resolution No. 4411 of 3rd August 1896, sanctioned a grant of Rs. 1,063-8-10 from surplus cash balance for providing a fire service at the air compressor station and a subsequent arrangement was entered into between the Municipality and the Port Trustees, whereby the former on payment to the latter of Rs. 445-8-10 acquired the right to effect a 3-inch connection with the 6-inch water main belonging to the Trustees. Two hydrants were fixed in the compound of the station at a cost of Rs. 331-10-11. Hose, buckets, &c., were provided, and the total expenditure from the grant amounted to Rs. 1,047-14-10. A supplement to the grant for stores and contingencies was found necessary, and a transfer of Rs. 750 from the coal grant was sanctioned.

107. The following statement shows the grants under the several Budget heads for the maintenance of the station and the actual expenditure incurred under each head :—

Sections.	Particulars.	Budget grants including transfers and renewed grants	Expenditure.
		Rs. a. p.	Rs. a. p.
1	Establishment	6,876 0 0	6,532 10 4

	Total ... Rs.	31,863 6 0	27,829 11 0

DRAINAGE.

108. *Pumping Station, Love Grove, Worli.*—The Worthington engines at this station continued to work satisfactorily. The efficiency of the pumps ascertained by fortnightly observations showed an average of 92·4 per cent. The gun metal rams of No. 1 engine have been replaced by cast-iron rams. This is a tentative measure for economical reasons, being much cheaper than the gun metal rams. The quantity of coal consumed during the year consisted of 1,265 tons of Borrea Anthracite, 1,254 tons 18 cwts. 1 qr. of Singareni, and 900 tons of Cardiff ; this works out to an average daily consumption of 9 tons 7 cwts. 1 qr. 15·9 lbs. against 10 tons 1 cwt. 10½ lbs. in the previous year. Owing to an increase in the price of coal, the grant of Rs. 56,000 was exceeded by a sum of Rs. 5,479-8-10. This was met by a transfer of Rs. 5,500 from savings from the Drainage Department Budget.

109. On account of the isolated position of this station it has been thought advisable to provide fire-arms and ammunition for the use of the Engineers in case of riots and disturbances. Accordingly four revolvers and 50 rounds of ammunition were purchased from Messrs. Treacher & Co. at a total cost of Rs. 159-0-8 and licenses obtained from the Commissioner of Police for the arming of the non-European Engineers at a cost of four annas each. The work of converting the old engine house into a shred-lifter chamber office and godown has not been completed, but fair progress has been made with work.

110. A rental of Rs. 80 per mensem was realized throughout the year for the bungalow on the property owned by Messrs. Tribuvandas Varjiwandas and Jagmohandas Varjiwandas.

HOUSE CONNECTIONS.

111. The street portions of house drainage connections carried out by the contractors Messrs. Dewram Keshavji & Co. were as follows :—

No.	Name of the District.	No. of connection.	Total cost.
		Rs. a. p.	Rs. a. p.
1	Mandvi	398 0 0	12,752 0 0
2	General District { New houses ... / Old houses in various parts of the City ...	356 0 0 / 172 0 0	9,975 15 3
3	Mugbhat	271 0 0	6,959 11 1
4	Cumballa Hill	57 0 0	5,262 1 7
5	Parel.	64 0 0	2,544 1 3
6	Carnac Road	53 0 0	1,602 0 4
7	Colaba	9 0 0	661 6 4
8	Peerkhan Lane	1 0 0	55 3 3
	Total ...	1,381 0 0	39,813 4 2

112. Action by notice and summons has been taken against 1,342 house-owners where it was necessary to enforce to making of the connections.

CATCH-PITS, WATER GULLIES, MANHOLES, VENT-SHAFTS, &c.

113. *Catch-pit on the Mint Road.*—In the original estimate wooden shutters or dampers were to be used to exclude sewage when necessary, but it was decided that wood would be very unsuitable to the requirements, hence cast-iron penstocks were substituted at an estimated extra cost of Rs. 520, met by a transfer from savings in the grant for drainage loan works. The work was nearly complete at the close of the year. The certified expenditure up to the 31st March 1899 amounted to Rs. 4,804-2-4.

114. *Catch-pit on Hornby Road near Arthur Crawford Market.*—This work was deferred for financial reasons.

115. *Construction of water gullies in different parts of Bombay.*—Three water gullies with connecting drains at Hornby Road and two at the east end of Carnac Bridge were completed by the contractors Messrs. Dewram Keshavji & Co. These works cost respectively Rs. 763-8-8 and Rs. 893-8-3.

116. The drain from the water gully at the Customs Pier Road, Mazagon, was laid direct to the sea at a cost of Rs. 275-4-10, being an excess of Rs. 233-4-10 over the grant of Rs. 42 met from savings in the grants for other water gullies. The contractors were Messrs. Dewram Keshavji & Co.

117. *Construction of permanent manholes on drains.*—Eighteen manholes on Duncan Road and six in Grant Road were constructed departmentally at a total cost of Rs. 1,645-14-0. A grant of Rs. 4,193 was sanctioned for the construction of manholes and shafts on the sewer between the European General Hospital and Arthur Crawford Market. The work was undertaken departmentally and was in progress at the close of the year. The certified expenditure up to the 31st March 1899 was Rs. 977-5-7. The construction of three manholes and six shafts on the Mint Road sewer was completed departmentally on 9th July 1898 at a cost of Rs. 2,237-14-0.

118. *Installation for providing electrolized sea water.*—The plant was stopped on the 20th June 1897, owing to the commencement of the rains and on account of delay in completing

the arrangements for pumping up sea water by means of the electrical transmission plant. The overhead electric line was completed by the 6th April 1898 at a total cost of Rs. 1,342-5-4 as against the estimated amount of Rs. 1,622. The plant was re-started on the 7th April 1898 and found to work satisfactorily. The system was kept at work up to the 18th June 1898, when it was again stopped on account of the south-west monsoon.

119. In connection with flushing operations in the Fort District the Drainage Department used a considerable quantity of the electrolized water which was conveyed in carts belonging to that Department, but by far the greater portion was used by the Health Department. The Health Officer reports favourably regarding the efficacy of the fluid, and suggests further trial. Operations were again renewed on the 9th January 1899, and continued up to the close of the year. The total cost of working and maintaining the plant during the year was Rs. 2,901-10-6. The actual number of days that the system worked was 119. The experimental stage not having yet passed, no definite results have been arrived at.

120. The work of converting the night soil depôt at Haines Road into a receiving depôt could not be completed within the contract period. Hence a three months' extension was granted to the contractors Messrs. Dewram Keshavji & Co., who completed the work on the 24th October 1898. The total expenditure amounted to Rs. 13,647-12-0.

121. Latrines and urinals have been added to those already existing, the sites chosen being such as to best meet local requirements.

122. The sluices and penstocks under supervision of the staff in charge of them worked satisfactorily, and the up-keep charges were within the budgetted provision. New gates for Love Grove sluices are being made at the Municipal Workshops. The total length of sewer cleaning performed during the year was 68,588 feet as against 51,880 feet the previous year. Works in connection with the sanitary arrangements of the various health camps were carried out by the Drainage Branch.

123. Proceedings were taken against persons who omitted to comply with certain conditions of the Municipal Act. Of

these 2,378 were notices, the terms of which were complied with in 1,306 instances and disregarded in 1,072 cases. 1,495 summonses were issued, of which 552 were withdrawn and 943 complied with. The amount of fines inflicted was Rs. 906.

124. The value of drainage stock, such as stoneware pipes, cast-iron fittings, cement, &c., at the commencement of the year was Rs. 3,94,389-1-6. Receipts and issues amounted to Rs. 51,703-5-7 and Rs. 58,779-0-5 respectively, and the total value of stock in hand at the close of the year was Rs. 3,87,313-6-8.

WATER WORKS.

125. *Tansa Lake.*—The rainfall for the year 1898 was 98·68 inches, that for 1896 and 1897 being 120·13 and 104·82 inches respectively. The heaviest fall of rain occurred on the 21st July when 4·05 inches were registered. The lowest recorded level of the water was 394·53 T. H. D. on the 9th June 1898. The lake commenced to overflow on the 8th July after 31·52 inches of rain had been registered and ceased to overflow on the 4th October 1898. The storage above the lowest outlet on the 1st October 1898 was 18,600 millions of gallons and on the 1st April 1899 it was 12,113 millions of gallons, showing a consumption of 6,487 millions of gallons in six months, or 35·6 millions of gallons per day, including evaporation and leakage ; of this about 23·8 million gallons were delivered into the aqueduct. The quantity of water which passed over the waste weir is estimated at 25·198 millions of gallons. The highest flood level was 405·9 T. H. D. on the 21st July. The balance of Water delivered at Ghatcooper syphon head is estimated at 7873·1 millions of gallons. About 47·5 millions of gallons passed into the Vehar Lake as against 165 and 213 millions for the years 1896-97 and 1897-98 respectively. The amount is yearly diminishing owing to the increasing consumption of Tansa water.

126. The quarters for Sub-Inspectors and watchmen were completed on the 30th June 1898. The expenditure up to the end of March 1899 was Rs. 11,560-5-2 against the grant of Rs. 12,000.

127. The repairs to a portion of the embankment from Godowli and Balcomb were effected at a cost of Rs. 48,757-5-4 ; a further sum of Rs. 35,892 was entered in the Budget for 1897-98, but not having been spent will be re-appropriated during the current year.

128. The contract has been let to Messrs. Littlewood, Pallanji & Co. for Rs. 20,726-6-0.

129. Three important leaks between the invert and side walls were stopped, but have re-appeared.

130. One burst occurred during the year at syphon No.5 necessitating stoppage of the water for three days. On the 18th June a subsidence in the bank occurred south of bridge No. 3 over the Bassein creek ; this caused a stoppage of water for three days. The work of re-constructing a portion of the Tansa duct at the end of the 45th mile was not completed at the close of the year.

131. *Vehar Lake.*—The rainfall for 1898 was 94·51 inches, that for 1896 and 1897 being 109·81 and 97·36 respectively. The heaviest fall occurred on the 22nd July when 6·23 inches were registered. The lowest water level during the year was 252·80 T. H. D. on the 8th June 1898. The overflow commenced on the 11th September and ceased on the 1st October 1898. The waste weir stop planks were raised, thereby increasing the storage capacity by about 400 million gallons. The storage of water on the 1st October 1898 was 11,767 million gallons and on the 1st April 1899 8,949 million gallons, showing a consumption of 2,827 million gallons, including evaporation and leakage, but exclusive of that received from Tansa duct. This consumption covers a period of six dry months of the year. 47·5 million gallons were received from the Tansa overflow. The quantity of water that overflowed the waste weir is estimated at 2,300 million gallons. The filter beds worked regularly during the year and were cleansed on an average of every 10 days.

132. Two bursts in the 32″ and 24″ mains occurred, one at Coorla, and the other at the junction of Marole and Andheri roads ; the former caused a stoppage of water for 24 hours and the latter for 30½ hours.

133. The construction of the road from Vehar to Tulsi has been sanctioned, but not yet taken in hand.

134. *Tulsi Lake.*—The rainfall for the year 1898 was 111·58 inches, that for the two previous years 1896 and 1897 being 139·52 and 118·66 inches respectively. The heaviest fall of rain occurred on the 22nd July and was registered at 9·84 inches. The lowest water level reached was 438·15 T. H. D. on the 10th June 1898. Overflow commenced on the 24th July 1898, and ceased on the 21st September. The storage on the 1st October 1898 was 2,269 millions of gallons and on the 1st April 1899, 1,222 millions of gallons, thus showing a consumption of 1,047 millions of gallons. During the six dry months of October to March this was inclusive of evaporation and leakage. The catch-water channel entering the lake at the south-west end was repaired and other necessary work done departmentally.

135. *Pawai Lake.*—Negotiations have been concluded between the Corporation and the Agave Fibre Syndicate to let the property for the cultivation of the Agave plant and its manufacture into fibre and to supply water from the lake.

136. *Amphibia.*—Seven crocodiles and 41 eggs were destroyed during the year.

137. *Bhandarwada Reservoir.*—On account of the contractor, Mr. Sitaram Laxman, not washing the sand for the filters in a proper manner, this portion of the work is being done departmentally. Filter No. 9 was put in use on the 14th February 1899 and found to work satisfactorily, but the rate of filtration is practically reduced by one-fourth owing to a leak through the arching into the reservoir. The work of charging filter No. 8 is nearly complete. The filtering materials of No. 5 filter have been washed and replaced departmentally at a cost of Rs. 1,960. It is now working satisfactorily.

138. *Malabar Hill Reservoir.*—The sand in filters Nos. 2 and 3, which was the subject of a dispute with the contractors, has been washed and replaced departmentally at a cost of Rs. 2,366, of which Rs. 436 were contributed by the contractors. The filters are now working satisfactorily. It is proposed to extend the filter-beds, but experiments will first be made to ascertain the most efficient rate of filtration.

139. *Miscellaneous Works.*—The laying of the 9″ main in Worli Road substituted for the 3″ main was completed during the year at a cost of Rs. 42,617-7-0 and is now in use. The work of laying 4″ cast iron mains in various parts of the city was entrusted to Mr. Pallonji Edulji at an estimated cost of Rs. 24,373-2-0 and completed on the 12th May at an expenditure of Rs. 22,769-10-1. The total number of lineal feet laid was 9,098.

140. A revised scheme for extension of mains in various parts of the city is the subject of inquiry by a committee of the Corporation.

141. *Distribution and Maintenance.*—The number of connections cut off during the year at the instance of the Executive Health Officer was 204 and to meet the necessities of the people 151 stand pipes were erected. The consumption of water continues to be excessive and was about the same as the previous year. The conversion of dipping wells into stand pipes was completed at Sion Road, Bhoiwada Cross Road, Cowasjee Patel Street and Clerk Road.

142. The number of bursts during the year was 93 against 109 the previous year.

143. On account of demolition of buildings, non-payment of rates or for infringements of the Municipal Act, 176 connections were cut off.

144. The net increase in the number of connections, exclusive of those made for health camps, &c., has been 175 or 3·7 per cent. The total number now stands at 19,990. The number of meters in use on the 31st March 1899 was 2,371, being an increase of 162 on that for the previous year. The consumption by meter for the year registered a little over 1,470 millions of gallons. For the preceding year the quantity was a little over 1,253 millions of gallons.

145. The fountain at the junction of Elphinstone and Dadar Roads erected at the expense of Mr. Shaisha R. Naidoo was completed at the beginning of the year.

STOCK.

146. The value of reserve stock on the 1st March 1898 was Rs. 4,22,005-10-5. The purchases during the year aggregated Rs. 46,894-3-3 and the issues Rs. 72,397-12-9. The balance on the 1st March 1899 was Rs. 3,96,501-15-9.

147. The sale of the rights to remove vegetable produce from the environs of the lakes, &c., realized Rs. 1,183 as against Rs. 1,788 in 1897-98.

148. The total number of notices issued during the year was 7,369 against 10,010 in 1897-98. Sanction was accorded by the Standing Committee for the severance of the connection of service pipes in 1,621 instances. In 176 cases the sanction was carried into effect.

MUNICIPAL BUILDINGS.

149. The most important buildings completed during the year are enumerated below :—

Fergusson Road Market.

Quarters for Malis in Victoria Gardens.

Ward Offices for Streets and Buildings Department at Gamdevi.

150. The additional works which were in progress at the Sankli Tank Fire Brigade Station have been completed. The total amount expended upon the construction of this station is Rs. 1,74,453-11-6.

151. The Gamdevi Fire Brigade Station was completed on the 16th July 1898, and occupied the following day. The total amount expended upon this work has been Rs. 14,447-10-8.

152. The Market at Fergusson Road was completed on the 31st October 1898, and was opened to the public on the 1st November 1898. The total expenditure passed up to the 31st March 1899 has been Rs. 6,829-12-9.

153. The extension of the Beef and Slaughter-house at Bandora was delayed for financial reasons, but the work will be taken in hand during the current year. The work of filling in quarry holes near the Slaughter-house at Bandora was completed at a cost of Rs. 3,883-5-7, as against the estimated cost of Rs. 4,177.

154. It was found necessary to add down-take pipes and gutters for carrying off the rain from the additional sheds for sheep and goats at Bandora. The work was completed during the year. The total amount expended upon the structures was Rs. 5,959-10-9.

155. The quarters for malis in the Victoria Gardens were completed on the 4th October 1898, and occupied on the 5th of the same month. The expenditure on the completed work has been Rs. 12,123-0-5.

156. The order to commence the work of erecting quarters for the Head Animal Keeper in the Victoria Gardens was delayed for financial reasons, but the contract was given to Messrs. Deoram Kesavjee & Co. on the 16th December 1898, and fair progress has been made with the work. The total expenditure passed up to the 31st March 1899 has been Rs. 2,538-8-9.

157. The order to commence the additions and alterations to the chal at Dadar was given on the 21st December 1898, and the work is in satisfactory progress. The expenditure passed up to the 31st March 1899 has been Rs. 416-0-3.

158. The Ward Offices of the Executive Engineer's Department at Gamdevi were completed on the 16th April 1898, at a total cost of Rs. 4,239-7-6.

159. The Standing Committee approved, under their Resolution No. 12424 of the 23rd March 1898, of the deed of trust being drawn up by the Municipal Solicitors and the Solicitors of Bai Dinbai jointly for the erection of the Nasarwanji Manokji Petit Public Hall, but the decease of the lady caused some further delay and the arrangements were not completed by the close of the year.

160. A statement of Municipal properties will be found as an Appendix to the Executive Engineer's Report.

161. Applications to build or rebuild during the year numbered 1,671 or 542 more than the previous year; of these 1,638 were passed either wholly or partially, and only 33 unconditionally disapproved on sanitary or other grounds.

162. The number of notices issued to house-owners, under various sections of the Municipal Act, was 3,591, being 1,044 less than in 1897-98. 532 summonses were issued against house-owners for non-compliance with the notices. In 442 instances the parties complied with the terms of the notices. In three cases the parties were warned and discharged, and 29 cases resulted in conviction and fines. There were 37 postponements to periods within the current year, and in 20 instances second summonses were issued, and one case necessitated the issue of a third summons. The total amount of fines was Rs. 410.

163. During the year 28 buildings or parts thereof collapsed. In 18 of these cases no personal injuries were sustained, but in an aggregate of instances 31 persons were injured and 7 killed. Under various sections of the Municipal Act, 3,289 orders were issued for the summary removal of dangerous or objectionable structures; 314 of these were dealt with departmentally and 2,243 were executed by the house-owners or withdrawn, 732 cases remained pending at the close of the year.

164. The total amount sanctioned for Street Improvements was Rs. 2,00,735. Out of this Rs. 1,11,247-12-6 were actually expended during the year. The total ground area added to streets during the year was 5,232·74 square yards.

ROADS.

165. All the properties required for the construction of Reay Road have been acquired and a portion of the road between Dockyard Road and Gunpowder Road was completed at a cost of Rs. 13,812-4-2 and opened to traffic on the 10th August 1898. The required portion of the premises of the N. S. D. Rosary Church was acquired under the Land Acquisition Act and tenders will be invited for the construction of that part of the road which will lie between Dockyard Road and Lawrence De Lima Street. The Military Authorities having handed over strips of land near the Gunpowder Road which were needed for the construction of the new road, this part of the work will be shortly taken in hand. There will then remain that part between Lawrence De Lima Street and Wari Bunder Road, and the northern

approach to the proposed overbridge over the existing railway sidings to be completed, but this involves correspondence with the Port Trustees and the G. I. P. Railway Company and may necessitate a departure from the original line of the road.

166. The completion of the Victoria Road was delayed by a Mahomedan building used as a school-room, which was represented to be a mosque, being in the way, but it has been removed and the road will soon be completed. For the purpose of the proposed road from Dongri Street across Nowroji Hill to Elphinstone Bridge only one property has been acquired. Further progress has been stopped as the City Improvement Trustees contemplate making a new street of which the proposed road would form a part.

167. The vacant lands in Agripada have been handed over to the City Improvement Trustees. At this time, a portion of Souter Road, which the Municipality was constructing, remained incomplete. A compromise has been offered to the contractors which, if accepted, will enable the accounts for the work to be closed. The accounts of the Vincent Road are not settled as the contractor filed a suit for claims above the amount paid to them and the case is still pending. The Arthur Road Diversion has been completed at a cost of Rs. 16,266-11-1.

168. *Miscellaneous.*—The burial ground for the use of Suni-Mahomedans at Tank Bunder has been completed. The inquiry by the Collector of Bombay concerning the acquisition of 29,837·33 square yards of ground at Narielwadi for the future extension of this burial ground has nearly been completed and it is expected that the land will soon be in the possession of the Municipality. Arrangements will then be made to fill it up and build an enclosure wall around it. Walls have been constructed around a portion of the land purchased from Mr. Ashburner at Mount Road and the land has been handed over to the Beni-Israel Community for burial purposes.

169. A plot of land admeasuring 30,390 square yards has been acquired for extending the Christian cemetery at Sewri. The work of preparing the ground and building a wall

around it will be taken in hand shortly. One of the two plots of land for burning and burial ground at Mahim has been acquired by purchase and the Corporation has sanctioned the acquisition of the other. Negotiations are going on.

170. During the year 70,90,194 square feet of roads were repaired at a cost of Rs. 2,24,333 ; the rate for metalling only works out to 6 pies per square foot. The total quantity of metal purchased during the year was 11,61,502·43 cubic feet at a cost of Rs. 77,640-12-1. The watering of the city roads was satisfactorily carried out. The grant under this head was Rs. 85,400, which included Rs. 10,000 for providing hydrants. Of this Rs. 4,045-10-9 was expended. The new system of watering the roads has proved satisfactory.

171. No grant was made for paving foot-paths owing to financial depression. The tram lines at the junction of Cruickshank, Kalbadevi and Girgaum Roads were renewed during the year.

LIGHTING.

172. The total number of gas lamps in the City at the close of the year was 3,873. The minimum contract gas pressure and illuminating power were generally maintained throughout the year as heretofore. The kerosine oil lighting was carried out departmentally ; the oil used was snowflake of 150° proof. The total number of kerosine oil lamps in the City at the close of the year was 1,769. This system of lighting was maintained at a cost of Rs. 36,247-12-7, but from this amount there is to be deducted Rs. 2,857-15-4, being the proceeds of the sale of empty cases and tins, and Rs. 2,457-11-3 for departmental bills for lighting Plague Camps, &c., thus bringing the net cost to Rs. 30,932-2-0. This shows a rate of Rs. 17-7-9 per lamp per annum.

173. The electric-light installation for the Crawford Markets and Municipal Offices worked fairly well during the year. One serious stoppage of the arc lights at the Crawford Markets occurred owing to the burning out of a field magnet coil of the dynamo. No failure of the Municipal Office lights occurred during the year.

174. A new armature for the Clock Tower dynamo was purchased from Messrs. John Fleming & Co. for Rs. 346 and two new link leather belts for the Municipal Office and Markets dynamos were procured from Messrs. Shallis and Duncan at a cost of Rs. 366-6-0. A new cable was laid from the engine room at the Workshops to the Crawford Markets for the arc lamp service at a cost of Rs. 173-15-3. The actual total expenditure for maintaining the system was Rs. 11,898-9-0 ; the apportioned amount was Rs. 10,947 ; the excess was met by a grant of Rs. 1,100, from savings in the grant for gas lighting.

WORKSHOPS.

175. The balance in favour of the Workshops at the close of the year amounted to Rs. 14,083-10-6. The settlement of the question of rent payable to Government for the ground covered by the Workshops and the adjoining house known as Grant House not having been effected, no rent was paid during the year under report. This accounts for the apparent increase in the profits. Charges for water consumed from the 1st October 1897 to 30th September 1898 amounting to Rs. 1,441-5-3 were credited to the Municipal Fund and were met out of the grant for stores and water supply. Unforeseen works necessitated an additional grant of Rs. 30,000 from surplus cash balance, but the whole amount had not been utilized at the close of the year owing to certain articles of hardware not having arrived from England.

176. The Workshops have continued to keep in repair the rolling stock of the Health and Road Departments as well as the numerous articles of plant and machinery used by the various Departments. Dearth of workmen caused considerable difficulties to be encountered. As a great many wheels have to be made, a machine for their manufacture has been budgeted for and the item passed. The machine will, it is expected, shortly be at work. The want of more shop-room is much felt but the unsettled question of tenancy of the ground has prevented the application of remedial measures.

177. The Hydraulic Lift at the Municipal Offices worked satisfactorily during the year. The expenditure incurred amounted to Rs. 1,679-10-7 against the Budget grant of Rs. 1,700.

INSPECTION OF INSANITARY HOUSES.

178. The systematic inspection of houses which was in hand at the commencement of the year in the following districts was continued :—Lower Colaba, Fort, Dhobi Talao, Chukla, Mandvi, Umarkadi, Dongri, Buleshwar, Kamatipura, 1st Nagpada, 2nd Nagpada, and Byculla. The following districts were also taken up :—Market, Kharatalao, Khumbharwada, Tardeo, and Walkeshwar. The inspection in Dhobi Talao and Kamatipura districts has been practically completed. In several cases improvements have been carried out and progress is being made with others.

179. Altogether 2,633 houses were inspected, of which 2,213 were found more or less in need of improvement; 405 houses were found impossible of improvement and only fit for demolition. The remainder did not require improving. In all, 293 houses were demolished.

180. There were 2,086 notices issued during the year requiring house owners to improve their buildings. In 704 instances the owners took the work of improvement in hand. 725 houses were declared unfit for human habitation, out of which 87 were closed permanently for demolition, 509 temporarily for enforcing improvements, and 129 that action might be taken for improving the ventilation.

181. Compensation awarded by the Government Assessor for buildings demolished, under sections I and IX of Government Notification No. P.-228 dated 10th February 1897, amounted to Rs. 12,890, and for the demolition of huts, under section 426 of the Municipal Act, to Rs. 2,989-6-7, and a sum of Rs. 1,097-1-5 remains to be paid owing to the putative owners not having proved their titles to receive the compensation.

PLAGUE CAMPS.

182. Numerous plague camps were erected or strengthened during the year. These camps were mostly composed of bamboo sheds roofed with cudjans, but in some instances corrugated iron was used. General sanitary accommodation was provided wherever needed, and the efficiency of the water-supply was well looked after. Lighting was by means of

kerosine oil lamps placed upon posts. Several camps in low-lying districts were pulled down at the beginning of the south-west monsoon as they might otherwise have been washed down and the materials were utilized for repairing other camps and some were stored for future use.

Disposal of city refuse.

183. The scheme under this head comprises the following works :—

a—The construction of two tipping platforms and a Railway siding on the Mahalakshmi flats, including the erection of culverts over the open Agripada drain, crossing the line of the siding.

b—The construction of rolling stock for the conveyance of the refuse.

c—The construction of roads to the platforms.

d—The construction of a railway line from Kurla station of the G. I. P. Railway to Deonar, the future depository of the ordure, including the culverts to span the waterways.

184. The entire works comprised under sub-heads A, B and C have been completed. That under sub-head D has also been nearly completed. Some difficulty was encountered in carrying out this part of the work owing to the failure of the contractors, hence it was determined to complete this portion of the work departmentally. A beginning was made at the end of May 1898, and the work was in progress at the end of the year under report.

FIRE BRIGADE.

185. The efficiency of the Fire Brigade continued to be maintained. No fatalities occurred to the members but several of them sustained slight injuries in the discharge of their duties and in one instance a Mahomedan Fireman received injury to his ankle which incapacitated him from further service. He was therefore pensioned.

186. The water supply at fires has been satisfactory. The new quarters at Gowalia Tank Road were completed and occupied on the 1st September.

187. The whole of the fire hose has been renewed. Sanction was accorded to the Brigadesmen receiving an allowance of one-fifth of their respective pays (except the Chief Officer) for extra duty performed throughout the year in flushing gullies in connection with the measures adopted for suppressing the Plague.

188. One horse was purchased to replace one destroyed in consequence of having broken one of its hind legs.

189. An order for 3,000 feet of delivery hose and 10,500 feet of hose for flushing purposes was satisfactorily executed by Messrs. J. Fleming & Co. through whom it was obtained.

190. The strength and equipment of the Fire Brigade is as follows :—

Strength.

1	Chief Officer.	12	First Class Tindals.
1	Clerk.	6	Second do.
1	Head Foreman.	108	Firemen of grades.
5	Foremen.	7	Drivers.
6	Engineers.	7	Grooms.

Total 154, including all ranks.

191. The Surgeon having been included in the Health Department Budget, under the Corporation's Resolutions Nos. 14093 and 5285 of the 15th March and 2nd September 1897, respectively, has ceased to appear on the strength of the Fire Brigade.

Equipment.

8	Steam Fire Engines.	6	Telescopic Fire Escapes.
9	Manual do.	1	Brake.
16	Hose reels.	16	Horses.
7	Tender carts.		

192. Delivery hose comprising 256 lengths aggregating 15,360 feet and other necessary appliances.

193. The estimated damage to property by fire and water during the year amounted to Rs. 30,47,915.

194. The following table gives the number of fires and estimated loss during the year under report as compared with the preceding year :—

	Serious Fires.	Slight Fires.	Total.	Estimated loss.
1897-98...	23	113	136	Rs. 19,98,464
1898-99...	12	103	115	„ 30,47,915

195. The most destructive fire of the year occurred on the 26th June at Ahmedabad Street where a large cotton warehouse with its contents and several residential buildings were destroyed, the estimated loss amounting to Rs. 9,55,500. On the 8th September another large fire occurred at the Mahomedan Mill, Tardeo, resulting in a loss of Rs. 5,25,000. On April 7th, a spice warehouse at Syed Mukri Street, Mandvie, was severely damaged by fire, the resulting loss being estimated at Rs. 42,500. On the 1st July a call of fire was received from the P. & O. S.S. " Ganges " in the Harbour, but the brigade appliances could not be utilized there being no means of conveying them to the burning vessel. The loss sustained in this case was estimated at Rs. 4,50,000. On August 27th, a cotton warehouse at Colaba was with its contents damaged by fire and water to the extent of Rs. 1,91,250, and on January the 12th the Damodhar Lukmidas Mill at Parel sustained damage to the extent of Rs. 85,000.

196. A comparative list of fires for the past five years is given below :—

Year.	Number of Fires.	Value of property destroyed.
1894-95...	97	Rs. 2,25,445
1895-96...	130	„ 20,41,571
1896-97...	122	„ 18,75,662
1897-98...	136	„ 19,98,464
1898-99...	115	„ 30,47,915

PUBLIC GARDENS.

197. The following public gardens were maintained during the year :—

(*a*) Victoria Gardens.
(*b*) Elphinstone Circle Garden.
(*c*) Northbrook Garden.
(*d*) Malabar Hill Garden.
(*e*) Bazar Gate Garden.
(*f*) Falkland Road Garden.
(*g*) Dick's Tank Garden.
(*h*) The Flats Garden.
(*i*) Municipal Office Garden.
(*j*) Sir Cowasji Jehangir Garden at Mahim.

198. A portion of the masonry of the clock tower fell down, injuring the clock slightly. Measures were adopted for effecting the necessary repairs.

199. A 4-inch water main has been substituted for the 3-inch one to meet irrigation requirements, and the drainage has been improved.

200. The refreshment room in the Victoria Gardens was let for a period of three years at a monthly rental of Rs. 25, and it is probable that as it is being conducted on a somewhat superior scale by the present lessee it will become a convenient attraction.

201. New quarters for twenty gardeners were completed and occupied during the year, and quarters within the gardens for the Assistant Superintendent were taken in hand, and at the close of the year were approaching completion.

202. The dearth of good gardeners was felt attributable to the plague, but on the whole all the Municipal gardens as well as the roadside trees were well looked after.

203. Numerous additions by purchase and presentation were made to the Horticultural and Zoological sections.

204. Fifteen deaths occurred amongst the animals and birds.

205. The number of visitors to the Victoria Gardens during the year was 788,890 against 762,811 the previous year, being an increase of 26,079.

VICTORIA AND ALBERT MUSEUM.

206. Some additions were made to various sections of the Museum, especially in the Ornithological and Entomological departments and specimens prepared for exhibition. The Geological department received a unique addition in the form of a piece of a meteorolite, which fell in a village at Gambat on the 15th September 1898. It was presented by Mr. H. E. M. James, Commissioner of Sind, who also presented a model in plaster of the whole meteorolite.

207. The usual care was bestowed upon the preservation of the specimens in the various sections.

208. The Museum was open to the public for 313 days during the year, and the number of visitors was 656,840 as against 641,500 during the preceding year. The daily average was 2,098. The number of visitors for the past five years is shown below :—

Year.	No. of Visitors.	Daily Average.
1894-95	685,047	2,188
1895-96	749,299	2,378
1896-97	584,865	1,874
1897-98	641,500	2,042
1898-99	656,840	2,098

VI.—Public Health.

209. The state of the public health during the year under review was unsatisfactory. The mortality was 4,065 more than in the preceding year.

210. The total number of deaths from all causes amounted to 51,961 equal to a death-rate of 63·23 per 1,000 of population, calculated on a population of 8,21,764 (census of 1891). The average number of deaths for the previous five years amounted to 1,56,900, or a death-rate of 38·18 per 1,000 of population.

211. The number and cause of deaths in the City during the last five years are shown in the following table :—

RETURN showing the Number of Deaths and the Death-rate per 1,000 of Population from Different Causes during the last Five Years.

YEARS.	Total number of deaths.	Per 1,000 of population.	Cholera.	Per 1,000 of population.	Small-pox.	Per 1,000 of population.	Measles.	Per 1,000 of population.	Fevers.	Per 1,000 of population.	Phthisis.	Per 1,000 of population.	Diseases of the Nervous System.	Per 1,000 of population.	Diseases of the Respiratory System.	Per 1,000 of population.	Diarrhœa.	Per 1,000 of population.	Dysentery.	Per 1,000 of population.	Accidents.	Per 1,000 of population.	Other causes.	Per 1,000 of population.	Plague.	Per 1,000 of population.

212. The number of deaths according to place of birth was as follows:—

Born in Bombay	15,479
Born elsewhere and unknown	33,733

213. The sections of highest mortality were Kamattipura 95·91, 2nd Nagpada 95·48, Byculla 88·68, Parel 81·48, Kumbharwada 79·54, Tardeo 77·08 and the sections of the lowest mortality were Water Division 2·25, Fort Southern 4·30 and Walkeshwar 20·01 per thousand of population. The death-rate was highest amongst Negro-Africans, Lingayets, Low-caste Hindus, Jains, Mussalmans and Buddhists being respectively, 616·44, 159·43, 98·82, 84·04, 72·60, 63·15, per 1,000 of population and lowest amongst Europeans, Jews, Parsees, Eurasians, Brahmins and Native Christians being respectively 17·89, 36·84, 39·13, 45·26, 46·70, 47·28 per thousand of population.

214. *Small-pox.*—The deaths from small-pox were 55, being 2 less than in the preceding year. The rate of mortality was highest among Native Christians. The mortality was highest in 1st Nagpada, Water Division, Mahim, Worli, Sewri and Mazagon.

215. *Measles.*—There were 254 deaths from measles, being 105 less than in the last year. Of these, 200 occurred in the first four years of life. The highest mortality was amongst Lingayets, Hindu low-castes, Jews and Mussalmans. The death-rate was highest in 1st Nagpada, Khara Talao, Dongri, 2nd Nagpada, Kamathipura, and Byculla.

216. *Fevers.*—There were 4,114 deaths from fevers, being 2,837 less than in the last year. The death-rate was highest in the districts of Parel, Mahim, Kumbharwada, and Byculla. The greatest mortality was amongst Negro-Africans, Hindu low-castes, Mussalmans and Native Christians.

217. *Cholera.*—The number of deaths from cholera was 104, being 1,161 less than in the preceding year. The sections of the highest mortality were Sion, Mahim, Dongri, Mahaluxmi and Byculla, being ·35, ·27, ·26, ·23, ·23 per 1,000 of population. The highest death-rate by caste was among Native Christians, Jains, and Hindu low-castes.

218. *Phthisis.*—There were 5,624 deaths from phthisis being 303 less than in the previous year. The death-rate was highest in 2nd Nagpada, Umarkhadi, Chakla, Kamatipura, and Khara Talao sections. The greatest mortality was amongst Negro-Africans, Lingayets, Mussalmans, Hindu low-castes, and Jains.

219. *Leprosy.*—There were 51 deaths from leprosy, being 12 less than in the preceding year.

220. *Plague.*—There were 18,185 deaths from Plague, being 7,182 more than in the last year. Detailed particulars of this disease have been given by the Executive Health Officer in his report.

221. Of the dead, 22,664 were burnt, 28,943 were buried, and 1,923 were conveyed to the Towers of Silence. This is inclusive of 1,569 still-born.

222. The number of births registered, exclusive of still-born was 10,784, or 1,448 more than in the last year. Of these, 5,640 were males and 5,144 females. The diminution in the number was probably due to the exodus of people on account of the prevalence of plague. Excluding Negro-Africans, the birth-rate was highest amongst Hindu low-castes, Jews, Lingayets. The sections giving the highest birth-rate were Mahim and Sewri.

223. On an average 4,003 men and women, 1,052·8 scavengering and drain carts, and 204·9 night-soil and cess-pool carts were at work each day. 3,88,816·75 tons of garbage, equal to 1,065·25 tons a day, were collected, removed and disposed of against 4,04,284·88 tons of garbage in 1897. 1,69,586·9 tons of night-soil, and cess-pool matter equal to 464·62 tons a day, were collected and removed against 1,56,057·09 in 1897. 172·1 miles of covered drains were opened and cleaned against 173·6 miles in 1897. There were 13 horses and 2,415 bullocks in the charge of the department, and of these 245 bullocks and one horse died. 4,229 notices and 2,401 summonses were issued against 5,077 and 2,489 in 1897.

LICENSES.

224. The total revenue collected on account of license fees during the year under report amounted to Rs. 61,363-8-0 as against Rs. 63,741-8-0 the preceding year; this decrease is more apparent than real, being chiefly due to the fact that some outstandings from the year 1896-97 were collected during the year 1897-98, the outstandings being caused by the absence of the licensees who left the city on account of Plague.

225. The following statement shows the amounts collected and the number of licenses granted during the past five years :—

Year.	No. of Licenses issued.	Amounts collected.
		Rs. a. p.
1894-95	5,701	63,914 8 0
1895-96	5,880	65,048 8 0
1896-97	5,130	56,462 8 0
1897-98	5,750	63,741 8 0
1898-99	5,588	60,646 8 0

226. The working of the department has been satisfactory.

MARKETS.

227. The total revenue from Markets and Slaughter-houses was Rs. 3,86,633-12-11 against Rs. 3,74,002-2-0 in the preceding year, showing a net increase of Rs. 12,631-10-11.

228. This rise is due to increases from several sources, chiefly from market fees and fees for butchers' licenses and slaughtering, an exceptionally large number of animals having been slaughtered during the year.

229. The following table shows for the last five years the number of animals slaughtered at the Bandora Slaughter-houses and in Bombay for Public and Commissariat consumption exclusive of the local supply to Bandora :—

Year.	Horned Cattle.	Sheep & Goats.	Pigs.
1894-95	35,614	514,753	871
1895-96	38,296	521,731	821
1896-97	39,659	474,469	619
1897-98	33,661	533,860	614
1898-99	42,254	571,023	577

230. The appended statement shows the number of animals taken from the Municipal Slaughter-houses for private slaughter during the past five years :—

Year.	Horned Cattle.	Sheep and Goats.
1894-95	250	32,643
1895-96	323	30,731
1896-97	358	5,406
1897-98	128	6,381
1898-99	395	9,200

231. Over forty-nine tons of unwholesome food were destroyed during the year, the greater parts of which consisted as in former years, of mutton, beef and fish.

232. The fruit and vegetable supply was plentiful and cheap, and the supply of beef and mutton was fairly good.

233. There were 67 prosecutions instituted under the several sections of the Municipal Act and the Market Bye-laws; in 54 cases tried before local Magistrates fines amounting collectively to Rs. 371 were inflicted. In the remaining 13 cases the summonses or warrants were withdrawn as the persons against whom they were obtained had left Bombay.

234. The Fergusson Road Market at Parel was completed and occupied from the 1st November 1898.

235. Owing to the prevalence of Plague some difficulty was experienced in the administration of the Markets and Slaughter-houses, especially in keeping together the stall-holders and butchers.

STREET ACCIDENTS.

236. The number of persons injured and killed in the public streets was as follows :—

Injured	562
Killed	19

237. The greatest number of these accidents occurred in the streets and roads mentioned below :—

Colaba Causeway	... 8	Bhendi Bazaar Road	... 25
Esplanade Road	... 8	Kalbadevi Road	... 16
Carnac Road	... 13	Girgaum Road	... 23
Hornby Road	... 18	Queen's Road	... 9
Frere Road	... 13	Falkland Road	... 23
Musjid Bunder Road	.. 26	Duncan Road	... 10
Dongri Street	... 9	Grant Road	... 17
Abdool Rehman Street	... 21	Parel Road	... 20
Nagdevi Street	... 13	Ripon Road	... 14

238. The numbers of street accidents for the past five years were as follow :—

Year.	No. injured.	No. killed.	Total.
1894-95	569	22	591
1895-96	523	28	551
1896-97	463	25	488
1897-98	370	17	387
1898-99	562	19	581

VII.—Education.

239. The actual receipts and expenditure on Municipal Primary Schools for the year 1898-99, were as follow :—

No.	Receipts.	Amount.			No.	Expenditure.	Amount.		
		Rs.	a.	p.		A.—SCHOOLS.	Rs.	a.	p.
1	Balance on the 1st of April 1898	58,122	3	0	1	Head Masters and Teachers ...	59,888	14	6
2	Government Grants to Primary Education and Inspection	42,666	0	0	2	Servants	1,879	14	8
3	Fees from Municipal Schools	12,424	3	0	3	Rent	29,336	5	10
4	Contribution from the General Municipal Fund	80,000	0	0	4	Cost of Class Books...	430	15	0
					5	School Furniture	2,207	5	6
					6	Prizes	1,460	0	0
5	Government Grants-in-aid towards Buildings...	.....			7	Contingencies and Miscellaneous	2,968	6	0
					8	Scholarships in Schools	238	13	3
6	Interest on Endowments or Investments.	523	11	0	9	Stipends of Students under training as Vernacular Teachers	1,016	4	5
7	Miscellaneous	160	15	3	10	Inspectors' Establishment... ...	7,969	11	2
					11	Grants-in-aid to Primary Schools ...	19,342	11	0
						B.—BUILDINGS.			
					1	Municipal Original Works...	.....		
					2	Repairs to Municipal School Houses ...	342	8	5
						Balance on 31st March 1899 ...	62,138	2	6
	Total Rupees ...	1,88,897	0	3		Total Rupees ...	1,88,897	0	3

240. The Government grant remained the same as the previous year, *viz.*, Rs. 42,666, the Municipal grant being Rs. 80,000 as against Rs. 72,478 the year before. There was an increase to the income from fees, the amount being for the year under report, Rs. 12,424 as against Rs. 11,497 in the preceding year.

241. The working balance at the commencement of the year was Rs. 5,31,222-3-0. The total receipts for the year amounted to Rs. 1,35,774-13-3 as against Rs. 1,27,165-9-0 for the previous year. The rise being due to increased Municipal contribution. The total expenditure was Rs. 1,26,358-13-9 as against Rs. 1,22,542-13-1 for the year before. The closing balance on the 31st March 1899 to the credit of the school fund was Rs. 62,538-2-6. The actual expenditure was considerably below the estimate as school and other charges were greatly diminished in consequence of the recurrence of plague. A statement will be found attached to the Committee's report showing the number of scholars on the rolls of the several schools. The attendance has been meagre with the exception that the Urdu Schools have been well attended throughout the year. The paucity of pupils in the other schools is doubtless due to the continuance of the plague.

242. The following new schools were opened during the year :—

Urdu.

1. Byculla School.
2. Dharavi School.

Marathi.

1. Dharavi School.

243. At the Mazagon Urdu School for boys, a separate class for girls was opened under a female teacher.

244. In compliance with the request of some of the residents at Parel, a Gujerati class has been added to the Parel Marathi School.

245. The number of aided Schools at the commencement of the year was 85 to which five new schools were added, but as four fell out of existence, the total number at the close of the year was 86.

246. The Committee received a donation of Rs. 25,000 from the Honorary Secretaries of the Sorabjee Shapurjee Bengalee Memorial Fund for the purpose of providing a building for the Churney Road Girls' School. Difficulties continue to exist as regards finding suitable accommodation for Schools, but it is satisfactory to know that some improvement has resulted from efforts in this direction. It is regrettable to have to record the death of ten teachers during the year, six of their number having died of plague.

W. L. HARVEY,
Municipal Commissioner
for the City of Bombay.

CHIEF ACCOUNTANT'S REPORT

FOR 1898-99.

FINANCIAL.

REPORT OF MR. W. PEARSON, Acting Chief Accountant, for the financial year 1898-99, as forwarded with his No. 3964, dated 15th August 1899.

I have the honour to submit the annual report of this Office for the financial year 1898-99.

2. The year opened with a surplus cash balance of Rs. 2,25,501-12-11 (exclusive of the net amount advanced for the purchase of frontage land in the Agripada, &c., estate Rs. 8,12,546-4-8), and closed with a surplus cash balance of Rs. 6,53,004-6-1.

3. The general results of the year are shown in the subjoined table, which contrasts the actual opening balance, the income and the expenditure with the Budget Estimates under these heads :—

Particulars.	Estimate.	Actuals.	More than Estimate.	Less than Estimate.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Opening Balance	9,00,000 0 0	17,21,557 9 8	8,21,557 9 8	.....
Income.....	72,27,600 0 0	71,61,911 7 8	.....	65,688 8 4
Expenditure—				
Original Estimate ...	72,54,300 0 0	.....	.....	.....
Amended estimate (as per Statement B.)	88,65,049 8 11	73,39,025 12 8	.....	15,26,023 12 8

The opening balance of Rs. 17,21,557-9-8 excludes sums advanced to the extent of Rs. 9,03,586-11-9 for Reserve Stock, but includes a sum of Rs. 5,83,509-8-1 for lapsed grants for 1897-98, and previous years which were intended to be renewed in 1898-99. Allowing for these

lapsed grants the net opening balance is reduced to Rs. 11,38,048-1-7 or Rs. 2,38,048-1-7 more than the estimate. Deducting from the net opening balance of Rs. 11,38,048-1-7, the net amount advanced for the purchase of frontage lands in the Agripada, &c., estate, the balance is reduced to Rs. 3,25,501-12-11.

Of the lapsed grants amounting to Rs. 5,83,509-8-1 a sum of Rs. 60,000 was subsequently found to be not required in 1898-99 and was consequently appropriated in the Budget for 1899-1900.

The gross income realised, amounting to Rs. 71,61,911-7-8 fell short of the estimate by Rs. 65,688-8-4, against a deficit of Rs. 1,50,000 estimated while preparing the budget for the year 1899-1900.

Of the total lapsed grants amounting to Rs. 15,26,023-12-8, allotments to the extent of Rs. 8,19,471-2-11 are proposed to be renewed in the year 1899-1900. Of the balance of the lapsed grants amounting to Rs. 7,06,552-9-9, a saving of Rs. 5,36,915 was anticipated before the close of the year, and taken credit for in arriving at the opening balance for the year 1899-1900 when preparing the Budget Estimate for that year.

The variations between actuals and the Budget Estimate of income and expenditure are dealt with in detail in the following paragraphs :—

INCOME.

A. *Comparison between Actuals and the Budget Estimate.*

4. The estimated income for the year, as budgetted for, was Rs. 72,27,600, the amount actually realised and credited to the Municipal revenues was Rs. 71,61,911-7-8, thus showing a decrease of Rs. 65,688-8-4.

In the annexed Statement A-1 details of this net decrease are given.

A-1.

				Net Decrease Rs....	65,688 8 4

* Includes Rs. 4,055-4-11 received on Water Works portion of the Net Premia, &c., Fund Investment.
† Excluding Rs. 4,37,055-0-1 on account of Rebate to current revenue in respect of plague expenses paid from Revenue in 1896-97 which has been shown by a deduction from the expenditure, *vide* Statement O, page 85.

5. The causes contributing to the more important variations are as follows :—

(1) *General Tax.*—Decrease of Rs. 3,286-3-11. The larger outstandings at the end of 1898-99 than those of the preceding year account for this decrease.

(2) *Wheel Tax and Tolls.*—As in the years 1896-97 and 1897-98, so in the year under review there has been a decrease ; the estimated revenue having fallen short by Rs. 26,303-6-5.

Of this decrease Rs. 19,091-12-5 is on account of Private conveyances, Rs. 1,477-8-0 on Public Conveyances and Rs. 5,734-2-0 on Tolls.

(3) *Town Duties.*—Under this head the income has exceeded the estimate by Rs. 12,161-2-4, as explained in detail at page 116.

(4) *Receipts from Government for Tobacco Duty.*—Increase of Rs. 7,294-4-10 due to increased consumption.

(5) *Halalkhore Tax*—Decrease of Rs. 22,577-13-4. Principally due to a decrease in the Special service to Mills consequent on a smaller number of hands employed.

(6) *Water Tax and other Miscellaneous Water Works Revenue*—Increase of Rs. 1,970-7-2 due to a larger consumption of water by meter measurement. The increase would have been larger, had there not been a larger outstanding this year than in the year previous.

(7) *Market Receipts.*—Decrease of Rs. 27,263-11-6 due on Squatters' fees through Contractors, and Fair ground and feeding fees, Slaughter fees and Stall rents.

(8) *Public Gardens.*—Decrease of Rs. 1,377-15-10 due to diminished sales of flowers and plants, &c., of the Gardens.

(9) *Miscellaneous Fines.*—Decrease of Rs. 3,070-14-0 due to decrease in amount of departmental fines.

(10) *Miscellaneous Receipts.*—Decrease of Rs. 16,587-14-11 due to rent of reclamation ground at the Flats, &c., and to the rights of cutting grass, &c., sold by the Engineer's Department being less than estimated.

(11) *Miscellaneous Fees.*—Decrease of Rs. 6,770-8-8 due to the receipts for Skinning dead animals realising only Rs. 3,000 against an estimate of Rs. 6,000, and to an overestimate on account of Miscellaneous fees.

(12) *Miscellaneous Savings.*—Increase of Rs. 1,830-13-2 due to a larger amount of unclaimed wages having become time-barred.

(13) *Interest and Profit on Investments of Surplus Loan and other Balances.*—Against an estimate of Rs. 90,000, we realised Rs. 98,419-13-8 as under, showing an increase of Rs. 8,419-13-8.

	Rs.	a.	p.
Interest on 5 per cent. Municipal Debentures belonging to different Loan, &c., Funds pledged with the Bank of Bombay and on Surplus Cash, &c., Investments	78,136	15	6
Interest on Fixed Deposits varying from 1½ to 4 lakhs for periods ranging from 3 days to 2 months at rates from 2½ to 12 per cent.	16,510	7	1
Interest on Current Account deposits with Local Banks	3,772	7	1

(14) *Actual Profit on Sale of Stores to Contractors, &c.*—Only Rs. 1,621-15-9 were realized under this head against the estimate of Rs. 5,000.

(15) Profit on Municipal Workshops amounted to Rs. 14,083-10-6 as explained in detail at page 145.

		Net Increase Rs. ...	73,511 7 8	

* Includes Rs. 4,055-4-11 received on the Water Works portion of the Net Premia, &c., Fund Investment.

B.—*Comparison between Actuals and the Revised Estimate.*

6. The foregoing statement A-2 shows that, as compared with the Revised Estimate of income of Rs. 70,88,400, the actual realisations amounted to Rs. 71,61,911-7-8, or an increase of Rs. 73,511-7-8, or over one per cent. on the Revised Estimate.

This result is principally due to an unexpected rise in the receipts from Town and Tobacco Duties. There were decreases aggregating over Rs. 30,000 under General Tax, Wheel Tax and Tolls, Halalkhor Tax, Public Gardens, Miscellaneous Fines and Receipts, Profit on sale of stores and sale proceeds of Tools and Plant, which were counterbalanced by increases under Licenses, Water Tax, Market Receipts, Miscellaneous Fees and Savings, Interest and Profit on Investments and Profit on Municipal Workshops.

B.

CONTRASTED STATEMENT showing the Original Budget Grants for 1898-99, Additions, Transfers and the Grants as amended.

PARTICULARS.	Original Grants sanctioned by the Corporation as per Section 129.	Additional Grants sanctioned by the Corporation under Section 131 (1). EXPENDITURE.

7. From statement B* it will be seen that the Budget Estimate of expenditure as originally sanctioned by the Corporation under section 129 of the Municipal Act amounted to Rs. 72,54,300.

This figure was increased during the year by Rs. 16,10,749-8-11 as follows:—

		Rs.	a.	p.
(*a*)	Additional grants sanctioned by the Corporation under section 131 (1) of the Municipal Act ...	2,78,133	5	4
(*b*)	Additional grant for writing off the net amount advanced for the purchase of frontage lands in the Agripada, &c., Estate	8,12,546	4	8
(*c*)	Additional grants sanctioned under section 131 (1) in respect of unexpended balances of grants for 1896-97, and previous years and of transfers sanctioned in 1897-98 but not utilised in that year.	1,76,038	10	7
(*d*)	Lapsed grants for 1897-98 renewed under section 132 of the Municipal Act	3,44,031	4	4
	Total...Rs.	16,10,749	8	11

The total amount allotted for expenditure during 1898-99 thus aggregated Rs. 88,65,049-8-11.

Transfers aggregating Rs. 1,30,797-1-6 from one Budget head to another were sanctioned by the Standing Committee under Section 133 of the Municipal Act to meet excesses under different Budget heads without affecting the amount of the total Budget provision for the year.

8. The principal items making up the additional sanctioned grants of Rs. 2,78,133-5-4, alluded to above, are as follows:—

	Rs.	a.	p.
Compassionate allowance to the widow of the late Mr. Howard Newton, Deputy Executive Engineer, Water Works	3,000	0	0
Construction of sundry new works at the Arthur Road Hospital	7,349	0	0
Constructing 2 pail Depôts at Oomerkhady and acquiring 2 plots of land required for the same ..	6,099	0	0
Salary of the Acting Municipal Commissioner for three months	7,500	0	0
Excess on the provision made in the budget for 1898-99 for payment of interest to the Bank of Bombay in respect of the 35 lakhs Loans ...	36,773	15	7
Bonus to the employes of the Assessment Department in recognition of their exertions in collecting the revenue during the Plague epidemic ...	5,000	0	0
Excesses in the Street Improvement Grant ...	1,00,000	0	0
Excess on the grant for payment of commission to the B. B. & C. I. Railway Company for collection of Town Duties	3,000	0	0
Excesses incurred on the grants for 1897-98 and previous years	3,051	11	5
½ year's interest payable to the Bank of Bombay on 1st March 1899 in respect of the temporary Loan of 35 lakhs	32,500	0	0
Excess on the grant for purchase of tools and plant, Water Works Maintenance...	5,000	0	0
Minor items below Rs. 3,000 each	18,359	10	4
Rs.	2,78,133	5	4

* *Vide* pages 86 to 91 of this Report.

9. The sources from which the increased expenditure of Rs. 16,10,749-8-11 during 1898-99 over and above the Budget Estimate was proposed to be met are as follows :—

		Rs.	a.	p.
Amount reserved from Surplus Cash Balance per page 105 of the Chief Accountant's Administration Report for 1897-98 for payment of charges for and prior to that year	Rs. 5,83,509 8 1			
Less—Amount of grants finally decided not to be renewed in 1898-99... ... ... „	63,439 9 2			
		5,20,069	14	11
Amount reserved from Surplus Cash Balance per page ii of the Introductory Remarks to the Budget for 1899-1900		2,01,717	0	0
Amount appropriated from Excess Revenue and Savings in Expenditure in 1898-99		76,416	5	4
Amount reserved as per page i of the Introductory Remarks of the Budget for 1899-1900 ...		8,12,546	4	8
Total...Rs		16,10,749	8	11

Grand Total..Rs.	70,59,914 2 9	88,65,049 8 11	73,39,025 12 3		15,26,023 12 8	8,19,471 2 11	7,06,552 9 9	

10. From the foregoing Statement C it will be observed that against a total sum of Rs. 88,65,049-8-11 allotted for expenditure during 1898-99 as per para. 7, the actual disbursements made during the year amounted to only Rs. 73,39,025-12-3, thus leaving an unexpended balance of Rs. 15,26,023-12-8 at the close of the financial year.

Out of this balance, the sum of Rs. 8,19,471-2-11 is proposed to be renewed during the current year for payment of liabilities incurred during the past year and for the cost of works not completed during that year, as well as to provide for works sanctioned but not yet taken in hand.

It will be noticed that the amount of lapsed grants proposed to be renewed this year is higher than that renewed in the past year by Rs. 2,99,401-4-0 ; the increase was principally due to the following causes :—

(1) To a large portion of the Road Repairs grant having remained unexpended owing to the repairs of several roads having been deferred until the latter part of the year in consequence of the bad state of our finances, and then to the scarcity of labour.

(2) To the additional grants, aggregating 1 lakh, sanctioned on 8th December 1898 and 16th February 1899 on account of excess in the Street Improvement Grant having remained almost unexpended owing to claims for set-backs acquired not having been submitted for payment before the close of the year.

(3) To the grant of Rs. 1 lakh for compensation to house-owners for insanitary buildings demolished having remained unexpended, with the exception of a small sum of Rs. 2,521.

(4) To the sum of Rs. 68,000 being required to be renewed for the purchase of bullocks and construction of carts and for other charges in connection with the Health Department Reorganization Scheme.

The last column of Statement C shows that the actual saving amounted to Rs. 7,06,552-9-9, which lapsed to Surplus Cash Balance at the close of the past year.

11. In the following table I have shown the Departments and heads of accounts in which lapses of grants have occurred, the savings anticipated when framing the revised estimates for 1898-99, and the net anticipated saving :—

Rs...	5,86,637 9 9	3,96,607 9 11	1,90,029 15 10
Rebate on account of plague expenses debited to current Revenue (in addition of Rs. 3½ lakhs already shown in the Budget for 1898-99)... Rs.	1,50,000		
Less—Amount of anticipated rebate for work performed for private parties in connection with the plague, not realised in 1898-99, as the whole of such expenses were transferred to private works account at the close of 1897-98 Rs.	30,085 1,19,915 0 0	1,47,915 0 0	*28,000 0 0
Total Rs...	7,06,552 9 9	5,44,522 9 11	1,62,029 15 10

* The amount of Rs. 28,000 was estimated on account of rebate to current Revenue in respect of the proportion, debitable to the Plague Grant, of the expenditure incurred on the Arthur Road Hospital during 1897-98. The amount could not be adjusted in the accounts for 1898-99, as the actual amount was not then ascertained.

133753

Renewal of Grants and Savings in Expenditure per Statement C.

12. The purposes for which the more important portions of the unexpended balances, amounting to Rs. 8,19,471-2-11, under the different major heads are required to be renewed during 1899-1900 and the principal causes contributing to the aggregate saving of Rs. 7,06,552-9-9 are as follow :—

General Superintendence.—The unexpended balance amounted to Rs. 39,397-2-6, of which the sum of Rs. 29,253-12-5 is required to be renewed during 1899-1900 for the payment of legal expenses incurred during the past year, and for payment of printing, &c., charges in connection with the Corporation and Standing Committee's Establishment and the Chief Accountant's Office, charges for winding and keeping in order Municipal clocks, repairs to the Municipal Office buildings, &c. Out of the saving of Rs. 10,143-6-1 the sum of Rs. 5,890-7-10 was saved on the Corporation and Standing Committee's Establishment, owing to the retirement of Mr. Barrow from 21st November 1898 and the new Secretary having joined on the minimum salary and to the post of Office Manager having remained vacant during the whole of the year, and on the provision for fees to members of the Standing Committee. The sum of Rs. 2,279-8-11 was saved in the Municipal Commissioner's Personal Office Establishment, owing to the present Commissioner having joined on the salary of Rs. 2,500, whereas the late Commissioner drew Rs. 3,000, and in the Office Establishment and Contingent Grants. The sum of Rs. 827-12-5 was saved on the General Office Establishment, principally owing to a portion of the grant for 1896-97 for law charges, renewed in 1898-99, not being fully required. The saving on the Accounts and Expenditure Establishment amounted to Rs. 1,145-8-11. This was principally due to vacant appointments not having been for some time filled up.

Assessment and Collection Department.—The unexpended balance was Rs. 22,281-14-10, of which Rs. 13,396-14-9 will have to be renewed for payment of unpaid Establishment and Contingent charges of the Property and Wheel Tax Establishment, Town Duty Commission bills for January and February 1899, which remained unpaid owing to an excess in the grant, and for Land Conveyance License Establishment and Contingent charges from October 1898 to March 1899. The saving of Rs. 8,885-0-1 accrued principally on the Property and Wheel Tax Establishment, and Revenue and Refund Audit Office Establishment and Contingent Grants, and on the provision for summons fees in License cases.

Fire Brigade.—Out of the unexpended balance of Rs. 12,201-2-11, Rs. 4,479-3-1 will have to be renewed principally for payment of charges for clothing supplied and for payment of unpaid interest on the debentures of the 4½ lakhs Fire Brigade Loan. The net saving of Rs. 7,721-15-10 accrued chiefly on the Establishment grant and on the provision for purchase of horses.

Maintenance of Public Gardens.—The unexpended balance, excluding that under New Works, amounted to Rs. 3,706-6-2, of which a sum of Rs. 577-11-4 will have to be renewed for petty charges in connection with the Victoria Gardens and the garden at Mahim. Of the net saving of Rs. 3,128-10-10, Rs. 2,427-14-7 were saved on the Contingent, Seeds and Plants, and Water-supply grants of the Victoria Gardens. The savings on all the other gardens amounted to Rs. 700-12-3. The whole of the unexpended balance of Rs. 20,642-4-5 under Victoria Gardens New Works will have to be renewed for the completion of the works already sanctioned.

Public Works (Engineer's) Department.— Against the total Budget grants aggregating Rs. 17,95,147-9-3, for the four different branches of this Department, the expenditure amounted to Rs. 13,55,094-5-1, leaving an unexpended balance of Rs. 4,40,053-4-2, of which Rs. 3,39,742-10-0 will have to be renewed in 1899-1900, and the balance of Rs. 1,00,310-10-2 was an actual saving.

The major and minor heads are dealt with below :—

I.—General Supervision and Miscellaneous Duties.—The unexpended balance amounted to Rs. 1,118-14-2, of which Rs. 375-9-3 are to be renewed for payment of Establishment, Printing and Contingent charges, and the balance of Rs. 743-4-11 is a saving effected on the Establishment and Contingent Grants.

II.—Drainage.—The aggregate unexpended balances under this head amounted to Rs. 25,506-9-9, of which Rs. 10,024-9-9 are required to be renewed in 1899-1900, and the balance, Rs. 15,482, is a saving. The sub-heads contributing principally to the lapses, with the explanation of the lapses, are as follow :—

A.—Miscellaneous Drainage.—The unexpended balance was Rs. 13,826-4-8, of which Rs. 7,055-0-7 are required in the current year for payment of unpaid Establishment and Contingent and Printing charges, and for the completion of different repairs, &c., works undertaken last year and for cleaning the open main drain from the Bellasis Bridge to the Love Grove Sluice Gates. The balance of Rs. 6,771-4-1 was saved principally on the grants for Establishment, Repairs and Contingencies.

B.—Maintenance of Love Grove Pumping Station.—Out of the unexpended balance of Rs. 5,944-6-4, Rs. 2,249-14-11 are required to be renewed for payment of Printing, Repairs, Stores and Ground Rent charges and for the supply of piston rings. The saving of Rs. 3,694-7-5 was effected principally on the Contingent, Water-supply and Repairs grants.

C.—Maintenance of Sluices.—Out of the unexpended balance of Rs. 1,071-0-5, Rs. 88-8-6 are required for payment of charges for stores supplied. The saving of Rs. 982-7-11 was effected on the Materials, Repairs, Contingent and Water-supply grants.

D.—Maintenance of Pumping Station, Colaba (Shone System).—Out of the unexpended balance of Rs. 4,664-14-4, Rs. 631-1-9 are required for payment of Stores and Repairs charges. The saving of Rs. 4,033-12-7 principally accrued on the Coal, Labour, Contingent and Water Supply grants.

III.—Water Works Maintenance.—There was an unexpended balance of Rs. 1,24,032-15-0, of which Rs. 71,336-11-0 require to be renewed as under :—

		Rs.	a.	p.
(1).	For payment of establishment, materials, clothing, rent, contingent, stationery, repairs, &c., charges	7,176	11	6
(2).	For repairs to the Kasheli Embankment, Tansa Duct...	35,892	0	0
(3).	For sundry works, such as re-washing of sand and other materials in filters of Bhandarwada Reservoir, putting in filtering materials in the Malabar Hill Reservoir filters, and widening and repairing embankment on the Vehar and Tulsi lines	28,267	15	6
		Rs. 71,336	11	0

There was thus a net saving of Rs. 52,696-4-0, which was chiefly effected on the provision for Establishment, Materials and Tools and Plant, Contingent and Repairs Grants.

Adding to the above unexpended balance of Rs. 1,24,032-15-0, Rs. 13,473-9-11 and Rs. 72,925-2-5 on account of the balances of the Water Works New Works, and Debt grants respectively, the total unexpended balance of all the Water Works items aggregated Rs. 2,10,431-11-4, of which Rs. 71,336-11-0, Rs. 12,918-1-3 and Rs. 71,487-8-0, aggregating Rs. 1,55,742-4-3, will have to be renewed in 1899-1900. The net saving thus amounted to Rs. 54,689-7-1.

IV.—Streets and Buildings.—The total unexpended balance under this major head amounted to Rs. 2,89,394-13-3. Of this sum, the actual saving aggregated Rs. 31,389-1-3, and Rs. 2,58,005-12-0 represent lapsed grants which are to be renewed in 1899-1900. The minor heads and the variations therein from the budget estimates are as follow :—

A. Inspection and Supervision.—From the unexpended balance of Rs. 7,553-8-7, a sum of Rs. 323-7-5 is required to be renewed to meet unpaid Establishment, Printing, and Contingent charges. The balance of Rs. 7,230-1-2 was principally saved on the Establishment grant.

B. Public Lighting.—The unexpended balance amounted to Rs. 25,027-5-10, of which Rs. 5,001-1-5 are required to be renewed to meet the cost of shifting lamps at different places, and of substituting incandescent gas lamps for Kerosine lamps, and for 750 new lanterns supplied for Kerosine lamps. The actual saving amounted to

Rs. 20,026-4-5, of which Rs. 9,522-10-3 were savings on the Gas Lighting Grant and Rs. 10,503-10-2 on the Kerosine Lighting Grant. The latter was chiefly owing to the rate for Kerosine oil being lower than that estimated.

C. Road Watering.—From the unexpended balance of Rs. 8,078-14-8, Rs. 5,954-5-3 are required to complete the purchase and fixing of new pattern hydrants in different places. The savings amounted to Rs. 2,124-9-5.

D. Roads, Footpaths, &c.—The whole of the unexpended balance of Rs. 56,088-11-11 under this head with the exception of a small saving of Rs. 248-14-3 is proposed to be renewed in the current year to meet liabilities incurred in the past year and to meet the cost of repairs to roads which had to be deferred last year for want of funds.

E. Street Improvements.—The whole of the unexpended balance of Rs. 95,167-2-8 under this head with the exception of a small saving of Rs. 1,759-4-0 effected on the renewed grant for purchase of Street boards and House No. plates will have to be renewed in 1899-1900 for payment of cost of set-backs acquired during the past year, but not paid for in that year, and for charges for House No. plates, &c., already incurred.

F. Compensation to House-owners for insanitary buildings demolished.—The whole of the unexpended balance of Rs. 97,479-1-7 is proposed to be renewed in 1899-1900, as no provision under this head has been made in the budget for the latter year.

New Works.—The unexpended balance of the grants for New Works, the amount required to be renewed therefrom in 1899-1900 and the actual savings are shown in the following table :—

	Rs. a. p.	Rs. a. p.
Amount required for payment of charges for completed works and for the completion of works in progress—		
Water Works	* 422 5 3	
Other Municipal Works	53,537 0 5	
		53,959 5 8
Amount required for works not taken in hand in 1898-99—		
Water Works	* 12,495 12 0	
Other Municipal Works	18,522 4 0	
		31,018 0 0
(Municipal Rs. 72,059-4-5 + Water Works Rs.	* 12,918-1-3)=	84,977 5 8
Savings on Completed Works—		
Water Works	* 555 8 8	
Other Municipal Works	13,942 14 6	
(Municipal Rs. 13,942-14-6 + Water Works Rs.	* 555-8-8)=	14,498 7 2
(„ „ 86,002-2-11+ „	Rs. * 13,473-9-11)=	Rs. 99,475 12 10

Public Health Department.—I. General Supervision.—The unexpended balance amounted to Rs. 4,787-14-7, from which Rs. 478 are required to be renewed for unpaid Establishment charges and for the cost of fixing Wallace's Pail depôts at the Girgaum and Kamatipura Night-soil Depôts. The net savings amount to Rs. 4,309-14-7, which was principally effected on the provision for salaries of the Superior Staff, owing to the personal allowance provided for Mr. Leask not being required from 20th August 1898, from which date he was transferred to the post of Divisional Health Officer, and to the appointment of one of the Deputy Health Officers having remained vacant owing to the transfer for three months of the incumbent to Plague Duty, and under Office Establishment owing to the transfer of some of the permanent staff to the Divisional Offices under the new scheme.

II.—Conservancy Branch.—The unexpended balance amounted to Rs. 2,21,363-5-2, from which Rs. 21,795-15-0 are required to be renewed for unpaid Establishment, Repairs, Stores, Rent, &c., charges and for the construction of moveable dust-bin carts and drain carts and for the cost of removing and re-erecting four sheds of the Sankli Tank Road Hospital for sick bullocks. The net saving of Rs. 1,99,567-6-2 accrued under the following heads:—

	Unexpended Balance.	To be renewed in 1899-1900.	Actual Savings.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
I. Superintendence and Inspection ...	6,399 5 7	283 1 1	6,116 4 6

Total...Rs.	2,21,363 5 2	21,795 15 0	1,99,567 6 2

III.—Markets and Slaughter Houses.—The unexpended balance amounted to Rs. 12,863-9-3, from which Rs. 1,482-12-9 are to be renewed for payment of Stores, Repairs, Rent, &c., charges. The saving of Rs. 11,380-12-6 accrued principally on the grants for Lighting, Meat Carriage, Repairs and Water Supply.

IV.—Registration of Births and Deaths.—Out of the unexpended balance of Rs. 2,606-2-1, only Rs. 216-15-6 are required to be renewed for payment of Unpaid Establishment and Printing, Contingent and Lighting charges. The balance of Rs. 2,389-2-7 was saved principally on the provision for Office Establishment, Registrars and Contingencies.

V.—Cemeteries.—From the unexpended balance of Rs. 1,393-1-3, Rs. 325-6-6 are required to be renewed for Stores, Water Supply, Shoeing and Repair charges. The saving of Rs. 1,067-10-9 was effected principally on the grants for Establishment, Feed of Horses and Stores.

VII.—Mahalaxmi Dhobiwada.—The unexpended balance amounted to Rs. 2,917-4-4, from which Rs. 1,092-14-10 are required to be renewed for Repairs and Stores charges, thus leaving a saving of Rs. 1,824-5-6 which was effected chiefly on the Water Supply grant.

VI.—Laboratory, VIII.—Infectious Diseases, IX.—Milch Cattle Stables, X.—Tank Conservancy, and XI.—Rustomji Jamshedji Dharamshalla.—The unexpended balances under these heads aggregated Rs. 5,466-11-4 from which Rs. 1,670-4-1 are required to be renewed for payment of Stores and Repair charges in connection with Milch Cattle stables and Falkland Road Dharamshala, and for supplies, repairs, &c., charges in connection with the Arthur Road Infectious Diseases Hospital. The net saving of Rs. 3,796-7-3 was principally effected on the Arthur Road Hospital Establishment, Milch Cattle stables, Repairs and Water Supply grants.

XII.—Vaccination.—From the unexpended balance of Rs. 1,991-9-9, only Rs. 56-9-1 are required to be renewed to meet the cost of Drainage arrangements to the stable in Hornby Road.

XIII.—Erecting temporary stables for the Segregation of cattle suffering from the Foot and Mouth Disease.—The whole of the unexpended balance of Rs. 1,335-8-11 with the exception of the small sum of Rs. 28 required for the payment of certain advertisement charges, is a saving.

XIV.—Coombharwada and Dongri Dispensaries.—The whole of the unexpended balance of Rs. 1,090 under these heads is required to be renewed in 1899-1900 to meet charges in connection with the Dispensaries.

The total unexpended balances of the grants for the different branches of the Health Department aggregated Rs. 2,56,578-8-6 of which Rs. 28,236-13-9 are required to be renewed in 1899-1900, and a saving of Rs. 50,000 has already been taken credit for in the Budget for 1898-99. The net saving on the Health Department grants, therefore, amounted to Rs. 1,78,341-10-9.

Out of the provision made in the Budget for 1898-99 on account of the excess cost of the Health Department Re-organization scheme only Rs. 58,979-15-1 were expended during that year, as the scheme was not brought into force till November 1898, and then only partially. The unexpended balance at the end of the year amounted to Rs. 2,20,779-0-11 from which Rs. 65,304-11-0 are required to be

renewed in 1899-1900 for purchase of bullocks and construction of scavengering and drain carts, for the purchase of office furniture and for the payment of charges already incurred for printing, stationery, advertisement and contingencies. The net saving, therefore amounted to Rs. 1,55,474-5-11.

The whole of the grant amounting to Rs. 31,538 on account of the excess cost of the Registration Department Re-organization scheme remained unexpended. From this, however, a sum of Rs. 2,714 is proposed to be renewed in 1899-1900 for printing, stationery and contingent charges, for extra office furniture for Registration Offices, and for uniforms for extra peons and karkoons in the event of the Re-organization scheme coming into force during 1899-1900.

Including the balance of the grants for the above schemes the total unexpended balance of the Health Department grants aggregated Rs. 5,08,895-9-5, of which Rs. 96,255-8-9 are required to be renewed and Rs. 50,000 have already been taken credit for as a saving as stated above. The net saving thus amounted to Rs. 3,62,640-0-8.

Education.—The unexpended balance amounted to Rs. 3,058-15-7, of which Rs. 553-12-8 will have to be renewed to meet the cost of 4 cases ordered for the Victoria and Albert Museum from the Municipal Workshops, the payment of contribution for February 1899 towards the school for the Deaf and Dumb, and for unpaid stationery charges in connection with the Joint Schools Committee's Establishment. The net saving amounted to Rs. 2,505-2-11 which was almost wholly effected on the Victoria and Albert Museum Establishment, Artware, Annual Repairs, &c., grants.

Hospitals, &c.—The saving of Rs. 1,799-0-9 accrued on the grant for the Goculdas Tejpal Hospital, and the Homeless Leper Asylum at Matunga. The saving under the former head was due to Government having refunded on 4th November 1898 Rs. 2,470-13-9, the unexpended balance of the Municipal contribution for 1897-98, out of which Rs. 940 were spent for the pay of 4 nurses and the cost of their uniforms.

Miscellaneous.—Rs. 17,698-2-0 remained unexpended under these heads of which Rs. 12,060-9-2 are required to be renewed for the following purposes :—

(1) Rs. 2,667-1-1 under Pensions, gratuities, &c., for payment of pensions not drawn by different pensioners up to the close of 1898-99 and for payment of compassionate allowances sanctioned to be paid to the widows of deceased employes.
(2) „ 1,510-7-6 under Discretional Contingencies for payment of charges for certain works sanctioned out of this grant.
(3) „ 45-0-0 under Election expenses for advertisement charges.
(4) „ 0-8-7 under Grain compensation for payment to a peon of the Assessment Department.
(5) „ 5,837-8-0 for cost of printing and binding 550 copies of a Calendar of Municipal Records.
(6) „ 2,000-0-0 for honorarium to be paid to Mr. Barrow for his literary labours in preparing the Calendar.

Rs. 12,060-9-2.

The balance of Rs. 5,637-8-10 was saved on the grants for Pensions, &c., Discretional Contingencies, and cost of analysis of articles of food, &c.

Municipal Debt.—Rs. 2,86,135-8-5 remained unexpended under the grants for Interest on Loans, Bank's Commission, &c., Charges and Repayment of Debt. Of this sum Rs. 2,06,521-6-8 on account of outstanding interest as shown in detail in Appendices 1 (B, D to H, J, M and N), and Rs. 11,000 being the amount of 22 debentures of the Drainage Loan of 1878, which became repayable on or before the 1st January 1899, but which were not surrendered by the holders for repayment up to 31st March 1899 are required to be renewed in 1899-1900. The net saving thus amounted to Rs. 68,614-1-9 as shown below :—

	Rs.	a.	p.	Rs.	a.	p.
Savings on the grants for Commission payable to the Bank of Bombay (Rs. 565-13-5) and for Miscellaneous Loan charges (Rs. 4-4-0)				570	1	5
Savings on interest on Loans due to the Municipality not being able to raise the following Loans during 1898-99 and consequently the interest provision for the same not being required :—						
15½ lakhs Sewerage, Wari Bunder, &c., Roads, Burial Ground and certain Water Works Loan, second instalment of Rs. 5½ lakhs; half-year's interest at 4 per cent.	11,560	0	0			
4 per cent. 25 Lakhs Loan for Sewerage, Water and other Sanitary Works—Instalment of Rs. 18 lakhs; 4 months' interest; Municipal Rs. 22,562-5-7 and Water Works Rs. 1,437-10-5	24,000	0	0			
4 per cent. 19¼ lakhs Sewerage, Roads and Sanitary Works Loan; 1st instalment of Rs. 5¼ lakhs; about 3½ months' interest	6,000	0	0			
4 per cent. Permanent Loan of Rs. 20 lakhs for Plague purposes; about four months' interest	24,949	0	0			
Savings on the interest provision for the temporary loans of Rs. 35 lakhs taken up from the Bank of Bombay ...	1,595	0	4			
				68,044	0	4
(Municipal Rs. 67,176-7-4 + Water Works Rs. 1,437-10-5) =				68,614	1	9

Unpaid Interest (to be renewed)—

One Debenture of the Drainage Loan of 1878, repayable on 1st January 1898, and 21 repayable on 1st January 1899, not presented for repayment up to the end of March 1899 (as per Appendix 1-A)		11,000	0	0			
					2,17,521	6	8
(Municipal Rs. 2,13,210-6-0 + Water Works Rs. 72,925-2-5) =					Rs. 2,86,135	8	5

It should be noted that owing to the very high figures, which the Bank's rates reached in 1897-98, the Municipality had to pay to the Bank of Bombay the sum of Rs. 1,61,773-15-7 as interest on the 15 lakhs Loan from 1st November 1897 to 30th August 1898, and the 20 lakhs Loan from 22nd December 1897 to 30th August 1898. The interest paid to the Bank on the two Loans for the half-year ending 27th February 1899, amounted to Rs. 80,904-15-8.

SURPLUS CASH BALANCE.

13. The subjoined statement shows the state of the Surplus Cash Balance at the close of the year 1898-99 :—

Total ...Rs.		3,74,05,208 13 10	3,71,25,500

14. It will be seen from Statement D that the year closed with a Surplus Cash Balance of Rs. 6,53,004-6-1 excluding the 1 lakh required by law. This result is arrived at after writing off Rs. 8,12,546-4-8 being the net amount advanced for the purchase of frontage land in the Agripada, &c., Estate. When preparing the Budget Estimates for 1899-1900, the Surplus Cash Balance at the close of 1898-99 was estimated at Rs. 4,00,000 excluding the 1 lakh required by law; the actual Surplus Cash Balance has amounted to Rs. 6,53,004-6-1, showing an increase of Rs. 2,53,004-6-1, which is made up thus :—

	Rs.	a.	p.
Income realized in 1898-99 in excess of the amount estimated while preparing the Budget Estimate for 1899-1900	84,311	7	8
Savings in expenditure in 1898-99 in addition to those estimated while preparing the Budget Estimate for 1899-1900	1,69,637	9	9
Savings on account of certain Lapsed grants which were intended to be renewed in 1898-99, but which were subsequently not renewed owing to the works having been deferred	3,439	9	2
	2,57,388	10	7
Less—			
Amount of additional grants sanctioned for 1898-99 in excess of the amount of Rs. 2,01,717 reserved in the Budget for 1899-1900	76,416	5	4
	1,80,972	5	3
Add—			
Amount reserved in the Introductory Remarks of the Budget for 1899-1900, page ii—to meet excess on the Arthur Road Hospital Grant for 1898-99, but which has not been appropriated, pending the adjustment of the accounts of the Hospital	44,000	0	0
	2,24,972	5	3
Reduction in the balance of Reserve Stock in 1898-99	28,032	3	11
	2,53,004	9	2
Less—			
Difference due to round figures having been taken in the opening balance in the budget for 1899-1900 ...	0	3	1
Total ...Rs.	2,53,004	6	1

15. The above balance, it should be noted, should be increased by the sum of Rs. 81,000, which had to be paid to the Bank of Bombay in 1898-99 on account of the half-year's interest on the 35 lakhs temporary Loans, due on 28th February 1899, although provision for the same has been made in the current year's budget. The payment was made to the Bank last year by an additional grant from Surplus Cash Balance, which will be increased by a corresponding saving in the current year's Budget provision.

APPENDICES.

16. *Nos. 1-A and B.*—From the first statement it will be seen that owing to twenty-two debentures, one redeemable on 1st January 1893, and twenty-one on 1st January 1899, not having been surrendered by the holders thereof for repayment up to the close of 1898-99, a sum of Rs. 11,000 remained unpaid on account of the Drainage Loan of 1878, and has been renewed to meet the liability, when claimed. Statement B shows that the outstanding interest on the loan has been reduced from Rs. 23,412-8-0 in the preceding year to Rs. 22,762-8-0 in the year under Report.

Nos. 1-C and D.—As usual the amount of interest paid from the raising of the 44 Lakhs Sanitary Works Loan to the end of 1898-99, the amount of the principal already paid off, and the sum invested as Sinking Fund on account of the loan are shown in Statement 1-C. It will be seen from Statement 1-D that there is a reduction of Rs. 4,000, in the outstanding interest on the 31*st* March 1899, as compared with that in the preceding year.

Nos. 1-E to O exhibit the outstanding interest on the different loans in the beginning of 1898-99, the amounts due in that year, the amounts paid in that year, and the outstanding balances at the close of the year. They also show the amounts of Sinking Fund invested on account of the different loans.

17. *No. 2.—Town Duty Statement.*—As usual this statement gives the various articles on which duty was levied at the time of import under the provisions of Section 192 (1) of the Municipal Act, and the refunds allowed thereon under Section 192 (2) on their export.

In the following table, the Balances, Revenue and Refunds during the year are contrasted with those of the preceding year :—

	1897-98.		1898-99.	
	Rs.	Rs.	Rs.	Rs.
Opening Balance	3,695		23,500	
Revenue	17,29,761		22,55,540	
		17,33,456		22,79,040
Deduct—				
Refunds	7,58,532		11,42,842	
Closing Balance	23,500		19,037	
		7,82,032		11,61,879
Net Revenue		9,51,424		11,17,161
Less—Cost of Collection, &c.		62,808		65,408
Net Revenue after payment of Collection Charges	Rs.	8,88,616	Rs.	10,51,753

The gross collections for the year were estimated in the Budget Estimate at Rs. 19,87,000, and the refunds at Rs. 8,82,000; thus a net revenue of Rs. 11,05,000 was estimated from this source.

From the figures given above it will be seen that the actual realizations were Rs. 2,68,540 more than the estimate and that the closing balance at the end of the year was Rs. 4,463 less than that in the preceding year; thus an increased revenue of Rs. 2,73,003 was realised, but owing to the refunds being Rs. 2,60,842 more than the estimate, the net increase of revenue over the estimate as reduced to Rs. 12,161. The increase of Rs. 2,68,540 was obtained principally on Grain, Wines and Spirits and Sugar. The increase of Rs. 2,60,842 under Refunds was wholly due to Grain and Sugar. The marginal figures show the contrast between the gross income from the duties levied during the year with those of the preceding year. Except the decrease of Rs. 57,360 under Sugar, there were increases aggregating Rs. 5,83,139 on the other items.

Articles.	Actuals for 1897-98.	Actuals for 1898-99.	More.	Less.
	Rs.	Rs.	Rs.	Rs.
Grain	1,92,873	6,36,223	4,42,350	...

Total...Rs	17,29,761	22,55,540	5,83,139	57,360
			57,360	
			Increase. 5,25,779	

18. *No. 3* is the usual Cash Account statement comprising all the cash transactions of the year, both Receipts and Disbursements including adjustments together with advances, deposits, investments, &c.

LOAN WORKS.

19. A further expenditure of Rs. 462-13-0 incurred on laying pipe sewers in certain narrow lanes in the Mandvi District raised the total

expenditure on drainage Works sanctioned out of the Drainage Loan of Rs. 16,94,000 of 1878 to Rs. 16,33,001-14-3 as detailed below :—

	Estimate of 17th January 1879.	Contract sanctioned on 24th January 1880.	Sanctioned contract plus additional works subsequently sanctioned in 1881.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.	Amount payable for work to be done.	Grand Total.

21. A sum of Rs. 201-9-3 was spent in 1898-99 on the Colaba and Umarkhadi Sewerage Works. This brought the total expenditure on Drainage Works sanctioned out of the 23½ Lakhs Loan to Rs. 18,00,987-9-7. Deducting from this sum Rs. 840 realized by the sale of 12″ Cast Iron Sluice Valves belonging to the Colaba Sewerage Works, the net expenditure amounted to Rs. 18,00,147-9-7 as under :—

	Original Estimate.	Revised Estimate sanctioned under Corporation's Resolution No. 3694, dated 17th July 1893.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.

* Including Rs. 11,000 paid to Messrs. Walsh, Lovett, Mitchell & Co. in full settlement of all their claims against the Municipality for extra works and Rs. 10,200, being the proportionate amount debitable to the Tansa Works out of the sum of Rs. 15,000 paid to Mr. Sittaram Luxumon in final settlement of all his claims against the Municipality for bonus, &c.

27. Including the sum of Rs. 4,809-1-2 spent on improvements and alterations at the Malabar Hill Reservoir, and on covering the storage basin at the Bhandarwada Reservoir, and constructing filters over it, the total expenditure on the Water Works sanctioned out of the 23¼ Lakhs Loan aggregated Rs. 1,41,409-5-9 as under :—

Works.	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Works at the Bhandarwada Reservoir...	1,15,000	78,476 10 3	4,577 2 11	83,053 13 2

Road from Vehar to Tulsi ...	25,000	471 3 6	.....	471 3 6
Total ... Rs.	2,45,500	1,36,600 4 7	4,809 1 2	1,41,409 5 9

28. The adjustment in 1898-99 of the sum of Rs. 797-6-1 paid as an advance in 1896-97 on account of survey charges in connection with the laying of water mains in Reay, Kala Chowki and other roads, brought the total expenditure in connection with those mains to Rs. 955-1-0 against the allotment of Rs. 2,31,297 provided for the same in the 25 Lakhs Loan.

29. On the construction of residence for the Chief Inspector, Water Works, and rooms for 6 sluicemen at Babula Tank Road, laying new mains in various places, and renewing the 3″ water main in Worli Road with 9″ pipes, a further expenditure of Rs. 7,375-5-0 was incurred in 1898-99 ; thus the total expenditure on the water works sanctioned out of savings on different Loans aggregated Rs. 1,83,035-13-6, as detailed below :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

Connections at Chinchpokli between Vehar and Tansa Mains	7,402 1 4	7,402 1 4	.....	7,402 1 4
New mains in various places	30,000 0 0	25,296 15 0	2,011 8 4	27,313 7 4
Extra cost (chargeable to capital) of renewing 3″ main in Worli Road with 9″ pipes	27,000 0 0	18,596 10 8	3,099 9 5	21,696 4 1
Total.. Rs.	2,05,453 0 10	1,75,860 8 6	7,375 5 0	1,83,035 13 6

30. The sum of Rs. 3,788 paid in 1898-99 out of the Worn-out Mains Renewal Fund to meet further charges (debitable to revenue) in connection with the renewal of 3" pipes in Worli Road with 9" pipes brought the total expenditure on that work out of the above fund to Rs. 26,517-3-9.

31. With Rs. 5,138-13-0 paid for the acquisition of certain property at Dongri in connection with the road through Nowroji Hill, the total expenditure on roads sanctioned out of the Rs. 10,08,500 Miscellaneous Works Loan amounted to Rs. 89,531-14-8, as detailed below :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Cross road at Mahaluxmi Station from Clerk Road to Haines Road	22,625	19,594 4 8	....	19,594 4 8
Road through Nowroji Hill from Elphinstone Bridge to Dongri Street	*2,63,875	64,798 13 0	5,138 13 0	69,937 10 0
Total..Rs.	2,86,500	84,393 1 8	5,138 13 0	89,531 14 8

*In addition to this sum, an amount of Rs. 68,148 has been provided for this Road in the 35 Lakhs Loan.

32. For the reasons stated in the report for 1897-98 at page 108, the net advance of Rs. 8,12,546-4-8 paid up to the end of that year for the purchase of frontage lands in the Agripada, &c., estate has been written off in the accounts for 1898-99 as provided in the introductory remarks, page i, of the Budget for 1899-1900. This reduced the total expenditure on Roads and Streets in Agripada and elsewhere to Rs. 15,00,000, the sum provided for those roads in the 35 lakhs various Sanitary Works Loan.

33. A sum of Rs. 637-10-3 was spent on the diversion of a drain under the low-level road on the south of the west approach of the Falkland Road overbridge and shifting a gas main from that locality. This brought the total expenditure incurred on bridges sanctioned out of the 35 lakhs Loan to Rs. 1,47,734-9-4, as per particulars given below :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Falkland Road Bridge	22,000	14,444 15 1	637 10 3	15,082 9 4
Wari Bunder Bridge	1,32,652	1,32,652 0 0	....	1,32,652 0 0
Total.. Rs.	1,54,652	1,47,096 15 1	637 10 3	1,47,734 9 4

34. A further sum of Rs. 1,00,849-15-4 was spent on the Wari Bunder Road and Victoria Road Extension. Including the expenditure incurred up to the end of the preceding year, the total expenditure incurred up to the end of 1898-99 on roads sanctioned out of the 15¾ lakhs Loan amounted to Rs. 1,47,355-6-11, as follows :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Wari Bunder Road	5,97,348	1,72,569 15 7	1,00,688 0 6	2,73,158 0 1
Victoria Road Extension	26,200	30,435 8 0	261 14 10	30,697 6 10
	6,23,548	2,03,005 7 7	1,00,849 15 4	3,03,855 6 11
Less—Contribution received from the Port Trust	1,56,500	1,56,500 0 0	.....	1,56,500 0 0
Total..Rs.	4,77,048	46,505 7 7	1,00,849 15 4	1,47,355 6 11

35. On the purchase and fixing of new pattern hydrants, a further sum of Rs. 973-8-10 was spent in 1898-99. This, together with the expenditure incurred up to the close of the preceding year, brought the total expenditure against the allotment of Rs. 50,000 sanctioned for the work to Rs. 48,352-13-2.

36. Including the sum of Rs. 17,737-0-5 spent on the diversion of Arthur Road, and purchase of land at Cavel Street in connection with the laying of a new street thereat, the total amount advanced from surplus balances for different roads, &c., upto 31st March 1899, aggregated Rs. 27,195-12-3, as under :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Diversion of Arthur Road over the Masonry bridge	22,991 0 0	86 8 0	16,180 3 1	16,266 11 1
Purchase of land from Mr. Goculdas Keshavji at Cavel Street in connection with the laying of a new street thereat ..	1,527 8 0	.....	1,556 13 4	1,556 13 4

Purchase of land at the Junction of Fergusson and DeLisle Roads as a part of the site of the proposed overbridge thereat	2,020 0 0	1,984 0 0	.....	1,984 0 0
Total ..Rs.	34,008 8 0	9,458 11 10	17,737 0 5	27,195 12 3

37. On the burial ground for Mahomedans and Beni-Israels there was a further expenditure of Rs. 3,707-1-0, which, together with the expenditure previously incurred, aggregated Rs. 2,06,366-9-1 against the allotment of Rs. 2,41,952 provided for the same in the 15¾ lakhs Loan.

38. An expenditure of Rs. 4,40,020-15-3 was incurred on the scheme for the disposal of Town Sweepings at Deonar, and purchase of land (Narielwady) at Mount Road for extension of the Mahomedan Burial ground and at Sewri for the extension of the Sewri Cemetery. The total expenditure on the different burial grounds, &c., provided for in the 25 lakhs Loan amounted to Rs. 8,06,087-12-9 as per following details :—

	Sanctioned Grant.	Amount expended up to 31st March 1898.	Amount expended during 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Purchase of land at Mount Road, from Mr. Ashburner for extension of Burial Ground for Mahomedans	1,22,000	1,17,046 0 6	....	1,17,046 0 6
Purchase of land at Mount Road in Narielwadi for future extension of the Burial Ground	1,75,000	74 12 0	45,531 2 4	45,605 14 4
Disposal of Town Sweepings at Deonar ..	* 8,44,000	2,48,946 1 0	3,53,671 5 11	6,02,617 6 11
Extension of the Burial Ground at the Sewri Cemetery	87,111	....	40,818 7 0	40,818 7 0
Total..Rs.	12,28,111	3,66,066 13 6	4,40,020 15 3	8,06,087 12 9

* Made up thus :—

Rs. 6,40,000	provided in the Loan of Rs. 25 lakhs.
„ 60,000	do. do. of Rs 19¼ do.
„ 1,44,000	transferred from the provision of Rs. 1,50,000 made in the 23¾ lakhs Loan for the purchase of land on the Flats for the deposit of Town Sweepings.
Rs. 8,44,000	

39. Against the sum of Rs. 60,147 provided in the 19¼ lakhs Loan for purchase of land required for Burning and Burial Grounds at Worli and Mahim, a sum of Rs. 11,158 was paid for purchase of land at Mahim from Mr. Muncherji Bomanji Punthakey and other charges in connection therewith.

40. The sum of Rs. 307-1-3 paid for abatement of land revenue in connection with land taken up for latrines at Colaba and printing, &c., charges brought the total expenditure on that work upto 31st March 1899 to Rs. 2,039-11-11 against the sum of Rs. 24,598 sanctioned for the work out of savings on different Loans.

41. The payment of Rs. 4,717-4-9 made for the temporary market at Currey Road brought the total expenditure on different Markets sanctioned out of savings on former Loans to Rs. 34,889-12-9 as shown below :—

	Sanctioned Grants.	Amount expended up to 31st March 1898.	Amount expended in 1898-99.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.

PLAGUE EXPENDITURE.

43. The total expenditure on plague operations up to 31st March 1899 amounted to Rs. 35,32,408-4-6 as shown below :—

		Rs. a. p.
Incurred by the Municipality up to the appointment of the late Plague Committee (*vide* Appendix No. 8-A)		5,19,867 5 5
Incurred by the late Plague Committee	Rs. 14,95,045 15 10	
Incurred by the Municipality during the existence of the Plague Committee	„ 9,62,459 8 11	
(*Vide* Appendix No. 8-B)		24,57,505 8 9
Incurred by the Municipality after the dissolution of the Plague Committee in June 1898 (*vide* Appendix No. 8-C)		5,55,035 6 4
Total Expenditure finally booked up to 31st March 1899	Rs.	35,32,408 4 6

The sums voted for plague purposes by the Corporation from time to time during the year under report are as follows :—

Corporation's Resolution No.	440,	dated	14th April	1898,	Rs.	2,50,000
Do.	do.	„ 1192	„	5th May	1898	„ 2,50,000
Do.	do.	„ 2098	„	9th June	1898	„ 3,50,000
Do.	do.	„ 6047	„	3rd October	1898	„ 2,50,000
					Rs.	11,00,000

These together with the grants previously sanctioned for plague purposes aggregated Rs. 36,00,000.

The expenditure above referred to, of Rs. 35,32,408-4-6 was met from the following sources :—

	Rs.	a.	p.
From the temporary loan obtained from the Bank of Bombay	20,00,000	0	0
From the provisional grant received from Government for plague expenditure	10,00,900	0	0
By advances from surplus loan and other balances pending the settlement of the question of the total liability of the Municipality in connection with plague expenditure	5,32,408	4	6

At the end of the year we received a further provisional grant of Rs. 4½ lakhs from Government.

It may be noted here that the expenditure given above includes over Rs. one lakh and-a-half on account of Rail, Road, and Sea Inspection &c., charges still recoverable from Government, of which, however, a sum of Rs. 59,488-7-4 have already been adjusted by them against their claim for arrears of Police charges. The latter sum has not yet been adjusted in the Municipal Accounts pending the sanction of the necessary grant.

LIABILITIES.

44. *Statement No. 4.*—The balance of the Vehar Debt due to Government was reduced from Rs. 25,28,997-12-9 on 31st March 1898 to Rs. 25,15,957-2-0 on 31st March 1899 owing to the payment of Rs. 13,040-10-9 made during the year.

Debentures of the value of Rs. 53,000 were paid off during the year on account of the Drainage Loan of Rs. 26,94,000 of 1878. 22 debentures of Rs. 500 each or Rs. 11,000 in all (one repayable on 1st March 1893, and 21 on 1st January 1899, were not surrendered by the holders for repayment up to 31st March 1899. The outstanding balance of this loan on the latter date thus amounted to Rs. 19,68,000 against Rs. 19,57,000 as per the terms of the loan. The difference of Rs. 11,000 has been renewed for the repayment of the debentures when surrendered by the holders.

The third instalment of Rs. 8 lakhs of the temporary loan of Rs. 20 lakhs for plague purposes arranged for with the Bank of Bombay was taken up on the 1st July 1898.

The total Municipal Debt on 31st March 1899, thus amounted to Rs. 4,18,54,457-2-0 against Rs. 4,11,20,497-12-9 at the close of 1897-98.

The deposits received from Government on account of expenditure on plague camps and discretionary relief fund, and the retentions made from the bills of the contractors for sewerage works account

principally for the increase in the balance of contractors, &c., cash deposits from Rs. 2,58,795-12-2 at the close of 1897-98 to Rs. 2,88,833-6-5 on 31st March 1899.

The balance of Rs. 67-15-1 due to Government on account of income tax recovered by the Municipality was paid into Her Majesty's Treasury at the Bank of Bombay in May 1899.

The provisional grant of Rs. 14½ lakhs received from Government for plague expenditure has been shown as a liability pending adjustment on receipt of final orders from Government.

The total liabilities of the Municipality on 31st March 1899, including Rs. 2,40,21,688-8-4 on account of Water Works as per Appendix No. 7 amounted to Rs. 4,38,08,328-7-2 against Rs. 4,16,54,268-11-4 on 31st March 1898.

ASSETS.

45. *Statement No. 5.*—The balance of recoverable advances was reduced from Rs. 3,53,482-1-6 on 31st March 1898 to Rs. 2,18,660-15-8, owing principally to the adjustment of the advances made to the Chairman of the late Plague Committee, and to the recovery of some of the outstandings on account of private works executed by the Drainage Department in Mandvi and other districts in connection with the plague.

The advances to Municipal Officers, &c., would have shown a still larger reduction, had not the sum of Rs. 39,000 advanced under the Corporation's sanction on account of expenses incurred at the Arthur Road Hospital in excess of the Budget provision been debited to the personal account of the Health Officer, pending adjustment on the necessary sanction being accorded to an extra grant.

The private and departmental works outstandings on 31st March 1899 amounted to Rs. 1,03,978-1-3 against Rs. 1,24,047-1-3 on 31st March 1898, showing a decrease of Rs. 20,069.

Details of the outstandings amounting to Rs. 20,513-2-10 on account of works undertaken by the Municipal Workshops, are given at page 140 of this report.

Out of the past year's outstandings, for private works Rs. 51,440-11-5 are in respect of works executed on account of plague in connection with the treating of down-take pipes of houses, &c. As payments of bills on account of the same are still disputed by the house-owners, the recovery is being slowly made, which has in some cases to be done by filing suits against the parties concerned. The remaining outstanding of Rs. 2,722-1-10 is on account of ordinary private works.

Rs. 29,302-1-2 represent outstandings on account of departmental works, which could not be adjusted for want of sanction, &c.

The following table shows that the invested balances at 31st March 1899 amounted to Rs. 49,54,928-6-7, against Rs. 48,27,431-2-7 at the close of 1897-98, showing an increase of Rs. 1,27,497-4-0 :—

Total...Rs.	49,54,928	6	7	48,27,431	2	7

There was a reduction of Rs. 1,78,737-8-11 in the balance of the investments of Surplus Cash and Loan Fund Balances due to the transfer of 5 per cent. Municipal Debentures for the investment of the 5 per cent. Municipal Loans Sinking Fund.

The investment of the Sinking Fund instalments of the different Municipal Loans together with that of the interest realized on the investments made from time to time accounts for the increase of Rs. 3,55,817-9-10.

By the investment of the Municipal Buildings Fire Insurance Fund instalment for 1898-99 and of the interest realized on that fund and the Worn-out Water Mains Renewal, Net Premia, &c., and the School Building Funds, there would have been an increase of Rs. 37,424-11-3 on the investments of these Funds up to 31st March 1899. But owing to the transfer of Rs. 3,788 from the Worn-out Water Mains Renewal Fund to meet further charges, (debitable to revenue) on account of the renewal of the 3" Main in Worli Road, and of Rs. 19,319-8-2 from the Net Premia, &c. Fund to meet the premia payable on investments of 5 per cent. Municipal Loans Sinking Fund Investment, and stamp, printing, advertisement, &c., charges in connection with the temporary Plague Loan renewed with the Bank of Bombay, and the 29 lakhs 4 per cent. Loans intended to be raised in 1898-99, the above increase was reduced to Rs. 14,317-3-1 only.

The refund of the deposits of the hay, grain, road-metal, carts and sandstone Contractors during the year under report reduced the Contractors, &c., Government, &c., Paper Deposit from Rs. 2,53,900 at the close of 1897-98 to Rs. 1,90,000 at the close of 1898-99.

The details of the 5 per cent., 4 per cent., and 3½ per cent. Municipal Loans Sinking Fund Investments aggregating Rs. 22,62,415-4-8 as shown in the preceding table, are given in the subjoined statement :—

a These formed part of investments made on 20th March 1890, 2nd and 13th July 1894 and 14th January 1896 on account of Surplus Cash, &c., Deposit Accounts, and were transferred to this account on 31st March 1897 and 3rd June 1897.

COMPARISON OF ASSETS AND LIABILITIES.

46. It will be seen from the figures given below that the Assets as *Statement No. 5* exceed the Liabilities as per *Statement No. 4* by over one krore and a half :—

Assets per Statement No. 5.

	Rs.	a.	p.
Cash balance—Advances and investments ...	62,30,469	0	2
Reserve stock	8,75,554	7	10
Buildings and other properties	63,32,241	4	0
Overbridges, Roads, Drainage, Water and other works executed out of Loan, &c., Funds ...	4,54,03,366	11	4
Total Assets Rs. ...	5,88,41,631	7	4
Liabilities per *Statement No. 4*	4,38,08,328	7	2
Excess of Assets over Liabilities Rs. ...	1,50,33,303	0	2

The valuation of " buildings and other properties" is under revision by the Executive Engineer's Department and when revised detailed lists, duly certified by the Heads of Departments concerned, are received, the necessary adjustments will be made in the Municipal Accounts.

As sanctioned in Corporation's Resolution No. 11308 of the 9th March 1899, a complete verification and revaluation of all the reserve stock articles will be made by this office and the result reported to the Corporation, when the verification and revaluation is duly completed.

WATER WORKS ACCOUNT.

47. As usual the *Appendices Nos. 6 and 7* exhibit the Income and Expenditure, and the Assets and Liabilities respectively of the Water Works Department, as required by Resolution No. 10625 of the 22nd December 1891 of the Standing Committee.

From *Appendix No. 6*, it will be seen that the Expenditure exceeded the Income in 1898-99 by Rs. 78,143-11-4.

Appendix No. 7 shows that the Assets exceed the Liabilities by Rs. 40,72,397-12-4 as shown below :—

	Rs.	a.	p.
Assets	2,80,94,086	4	8
Liabilities	2,40,21,688	8	4
Excess of Assets over Liabilities...Rs.	40,72,397	12	4

This excess of Assets has been partly secured by a surplus Water Works revenue up to 1898-99 of Rs. 12,97,586-8-0 and the balance of Rs. 27,74,811-4-4 has been met from the Municipal general revenues.

STORES.

48. The reserve stock at 28th February 1899 stood at Rs. 8,75,554-7-10 as compared with Rs. 9,03,586-11-9 at 28th February 1898, thus showing a decrease of Rs. 28,032-3-11.

The distribution of this stock between the various departments of the Municipality at the close of 1897-98 and 1898-99 was as follows :—

Departments.	1897-98.	1898-99.
	Rs. a. p.	Rs. a. p.
General Stores	66,503 9 4	48,124 7 3
Water Works	4,22,605 10 3	4,14,541 10 11
Drainage	3,92,659 4 11	3,95,467 9 9
Executive Engineer	22,418 3 3	17,420 11 11
Rs. ...	9,03,586 11 9	8,75,554 7 10

The reduction in the Stocks at the Paltan Road and Water Works Stores was principally due to the transfer of certain flap-pipes from the former stores to the Drainage Stock and to the issues of disinfectants from the Paltan Road Stores and cast-iron pipes, &c., from the Water Works Stock.

The Drainage stock would also have been reduced by about Rs. 9,000, had not 9″ and 6″ flap pipes of the value of Rs. 12,273-12-10 been transferred from Paltan Road Stores to the Bellasis Bridge Pipe Depôt, as those articles are required by the Drainage Department.

The value of the stock in charge of the Executive Engineer was reduced by Rs. 4,997-7-4 owing to the balance of Kerosine oil remaining on 28th February 1899 out of the stock purchased for Street Lighting being less than that in the preceding year.

The subjoined statement shows the principal articles held in stock at the Paltan Road Stores. The total purchases received at this depôt during the year aggregated Rs. 1,28,385-13-2 and the total issues were Rs. 1,47,391-2-5.

LIST of Principal Articles in the Municipal Stores at Paltan Road on 1st March 1899.

Under this Office No. 7361, dated 10th January 1899, sanction has been asked to write off Rs. 28,331-13-4, on account of the value of certain old pipes, which have remained useless at the stores for a number of years. When this has been done, and when some other articles which have also been in stock for a long period and for which there is no apparent use are disposed of, the balance at the Paltan Road stores will be reduced to a minimum.

WORKSHOPS.

49. The subjoined table contrasts the Opening and Closing Balances, and the Receipts and Disbursements of the Municipal Workshops for the year with those of the preceding year :—

	1897-98.			1898-99.		
	Rs. a. p.	Rs. a. p.		Rs. a. p.	Rs. a. p.

Total...Rs.		1,37,296 2 0			1,43,355 15 10	

* Excluding annas (2) inadvertently credited to Recoveries and subsequently adjusted.

There is a slight increase of Rs. 221-0-10 in the total expenditure on labour and stores during the past year as compared with that in the preceding year.

By charging as usual 35 per cent. on the actual cost of establishment and stores on all the jobs executed in the shops, and by charging an additional 15 per cent. on private works, the Workshops realized a sum of Rs. 34,108-0-9 during the year including the hire of the pumping engine and other petty charges as detailed in the margin. Nearly $\frac{2}{3}$ths of the above sum of Rs. 34,108-0-9 were obtained on repairs to Health Department carts and $\frac{1}{6}$ths on repairs to watering, carts, Engineering Department, as will be seen from the following details :—

	Rs.	a.	p.
35 per cent. Charges	33,858	13	9
15 ,, ,, ...	81	10	11
Hire of Pumping engine	157	8	1
Allowance to Workshops on account of Stationery, &c., for working Garlick Incinerator	60	0	0
Total Rs.	34,108	0	9

Nature of work done.	Actuals.			Amount charged, including 35 per cent. & 15 per cent.			Amount of percentage charged over the actuals.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Private works	158	8	3	242	15	8	86	7	5
Departmental works	85,561	5	4	1,19,682	14	8	34,021	9	4
Total..Rs	85,719	13	7	1,19,925	14	4	34,108	0	9
Repairs to scavengering, drain and hand carts	20,134	9	10	27,181	12	5	7,047	2	7
Do. night-soil carts	6,727	3	6	9,081	12	2	2,354	8	8
Total repairs to Health Department carts..	26,861	13	4	36,263	8	7	9,401	11	3
Repairs to watering carts	6,214	13	7	8,389	0	8	2,175	3	1
Total..Rs	33,076	10	11	44,653	9	3	11,576	14	4

Adding to the above surplus of Rs. 34,108-0-9 derived by the percentage charged for covering shops, supervision, repairs, &c., charges, Rs. 1,238-2-2 obtained by the sale of unserviceable stores, &c., the gross earnings of the shops during the year amounted to Rs. 35,346-2-11, from which the following establishment, shop, supervision, repairs, &c., charges, amounting to Rs. 21,262-8-5, were defrayed, thus leaving a net profit of Rs. 14,083-10-6 :—

	Rs.	a.	p.
Supervising Establishment	8,062	9	9
Stores Establishment	960	0	0
Shop Charges	11,886	10	3
Repairs Charges	353	4	5
Rs.	21,262	8	5

The above large profit is due to the rent amounting to Rs. 7,062 for 1897-98, claimed by Government in respect of the ground occupied by the Workshops not having been paid during the year under report pending the settlement of the dispute with Government, and to a reduction in the amount of shop charges consequent on the new engine purchased in 1897.

The Workshops outstandings on account of completed works for the past year amounted to Rs. 5,188-12-7 against Rs. 731-10-9 in the preceding year, due to certain bills against the Health Department having remained unadjusted. The outstandings on account of incomplete works amounted to Rs. 15,324-6-3, against Rs. 6,235-14-4 at the close of 1897-98. The total outstandings thus amounted to Rs. 20,513-2-10, or Rs. 13,545-9-9 more than in the preceding year. The incomplete jobs comprised the following:—

	Rs.	a.	p.
(1) Making 137 Scavengering Carts	2,422	3	6
(2) Renewing C. I. railings of Municipal Offices	9	7	9
(3) Making and fixing shred lifters at Love Grove	3,097	13	0
(4) Making 8 sluice gates for Worli	3,717	5	6
(5) Making Fence for Municipal Railway between Coorla and Chimboor	6,077	8	6
Total...	Rs. 15,324	6	3

RAISING OF LOANS.

50. As was the case in the preceding year, this Municipality did not succeed during the year under report in raising the permanent Loans required by them.

The original intentions of the Municipality were to raise, during the year, Loans aggregating Rs. 63¼ lakhs. Having in view the unfavourable conditions then prevailing, these intentions were modified and it was decided in the Corporation's Resolution No. 4682, dated 17th August 1898, to raise Loans for Capital Expenditure to the extent of Rs. 49 lakhs only as under:—

2nd and final instalment of the 15¾ lakhs Loan ...	Rs. 5¾ lakhs.
1st Instalment of the 25 lakhs Loan	„ 18 „
1st Instalment of the 13¼ lakhs Loan	„ 5¼ „
	Rs. 29 lakhs.
Permanent Plague Loan	„ 20 „
	Total Rs. 49 lakhs.

Tenders returnable on 8th September 1898 were in the first instance invited for the Loans aggregating Rs. 29 lakhs, but owing to the then unfavourable state of the money market, the result was most unsatisfactory, as, in response to the advertisement very few tenders for insignificant amounts were received.

The temporary Loans of Rs. 35 lakhs taken up from the Bank of Bombay in 1897-98, the last instalment of which was received on 1st July 1898, became due on 31st August 1898, but owing to the inability to raise the required Loans, this Municipality were not in a position to liquidate the debt. Negotiations had, therefore, to be opened with the Bank for the renewal of the Loans, and after some correspondence, the Bank agreed to the renewal of the Loans on the following terms:—

(1) That the rate of interest on the Loans of Rs. 35 lakhs shall be one per cent. below the Bank's current rate for demand Loans on the security of Government Paper, subject to a minimum rate of 4 per cent. per annum.

(2) That no portion of the above Loans shall be repaid before 30th September 1899.

(3) That the security for the above Loans be given in Municipal Debentures.

(4) That the interest on the Loans shall be paid half-yearly.

The last condition was a new one enforced by the Bank.

The renewal of the 35 lakhs Loans with the Bank of Bombay was sanctioned under Government Resolution No. 6937, dated 19th December 1898, General Department.

As out of the 5 per cent. long term debentures for Rs. 15 lakhs pledged with the Bank, debentures for Rs. 2,20,000 were required by the Municipality for the investment of the Sinking Fund of different Loans, arrangements were made with the Bank for their delivery to the Municipality on the issue to the Bank of fresh short term debentures of an equal amount in lieu thereof. Accordingly fresh short term debentures for Rs. 22,20,000 (including Rs. 20 lakhs for the Plague Loan) were issued to the Bank in the form approved by Government under their Resolution No. 1334, dated 20th March 1899, General Department.

The Bank's rates during 1898-99 were as under :—

Between	1st April and 4th May 1898	... 13	per cent.
,,	5th May and 15th June 1898	... 12	,,
,,	16th June and 22nd June 1898 ...	... 10	,,
,,	23rd and 29th June 1898	... 9	,,
,,	30th June and 13th July 1898... ...	... 8	,,
,,	14th and 20th July 1898	... 7	,,
,,	21st July and 27th July 1898	... 5	,,
,,	28th July and 14th December 1898 ...	... 4	,,
,,	15th December and 27th December 1898	... 5	,,
,,	28th December 1898 and 11th January 1899 ...	6	,,
,,	12th January and 27th February 1899...	... 7	,,
,,	28th February and 31st March 1899 ...	... 7	,,

As funds were required for Loan Works and plague expenditure, it was a matter of great anxiety to the Municipality. The Bank of Bombay having declined to grant a further Loan, negotiations were being made with one of the exchange banks to advance the necessary Funds, but in the meantime an appeal made to Government for pecuniary assistance to the Municipality met with their favourable consideration. A provisional grant of Rs. 10 lakhs for plague expenditure was sanctioned by Government and this was drawn by the Municipality during the year in two instalments. This timely aid from Government enabled the Municipality to finance the Plague and Loan Works expenditure up to the end of 1898-99. At the end of March 1899, Government were pleased to grant a further provisional grant of Rs. 4½ lakhs to the Municipality for plague expenditure.

GENERAL.

51. The sums that passed annually through the hands of the Paymaster for payments to municipal employés since 1873, the unpaid wages credited in each year to Deposit Account since 1890, and the

net unpaid time-barred wages credited to the Municipal Fund are shown in the following table :—

Year.	Sums handed over for payment to employés. Rs.	Net unpaid wages credited to Savings. Rs.	Net unpaid wages credited to Deposit Account. Rs.
1872	In this year there was no Paymaster.	2,177	.....
1873	2,40,451	3,098	.....
1874	8,50,000	4,246	.....
1875	8,56,265	3,751	.....
1876	2,62,202	3,395	.....
1877	9,43,565	4,077	.....
1878	9,84,255	9,233—4,300	.....
1879	10,35,050	3,300	.....
1880	10,18,476	3,244	.....
1881	10,14,189	3,478	.....
1882	10,27,054	3,792	.....
1st Quarter of 1883	2,69,746		
1883-84	11,32,207	3,427	.....
1884-85	12,20,854	3,021	.....
1885-86	13,01,935	4,143	.....
1886-87	12,73,988	1,129	.....
1887-88	13,09,592	4,294	.....
1888-89	13,65,572	3,741	.....
1889-90	13,97,194	1,625	3,897
1890-91	14,89,034	50	5,621
1891-92	15,68,255	2,094	1,198
1892-93	15,70,247	3,506	549
1893-94	16,27,172	*4,362	3,950
1894-95	16,60,194	3,347	1,805
1895-96	18,41,892	3,392	974
1896-97	18,54,083	5,196	21,374
1897-98	19,93,311	†12,420	14,575
1898-99	22,98,460	5,344	11,874

It will be seen that the work devolving on the Paymaster has been the heaviest performed by the paystaff since 1873. This large increase in work was a natural outcome of the plague which necessitated extra staff being employed, more especially in the Drainage and Health Departments.

52. The gross transactions of the Municipality during the year including adjustments, transfers, &c., aggregated over Rs. 356 lakhs as shown in the margin against—

Cash received	Rs.	85,54,646 7 0
„ paid	„	81,73,625 5 9
	Rs.	1,67,28,271 12 9
Adjustments	„	1,88,87,945 13 10
Total..	Rs.	3,56,06,217 10 7

Rs.	447½	lakhs in 1897-98
„	285½	„ 1896-97
„	286	„ 1895-96
„	196½	„ 1894-95
„	392½	„ 1893-94
„	315½	„ 1892-93
„	†1,573	„ 1891-92
„	514	„ 1890-91
„	883	„ 1889-90
„	503½	„ 1888-89
„	400½	„ 1887-88

* Forfeited under the Statute of Limitation.
† Including 963 lakhs on account of Water Works Assets and Liabilities transferred to the Municipal Fund, as explained at page 120 of the Administration Report for 1891-92.

53. I subjoin the usual comparison with previous years of the number of receipt and disbursement vouchers scrutinized by this office and adjusted during the year :—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total including Journal Vouchers.
1876	4,862	+	12,073	=	16,935
1877	5,013	+	14,410	=	19,423
1878	5,511	+	18,783	=	24,294
1879	5,626	+	26,163	=	31,789
1880	5,677	+	24,314	=	29,991
1881	5,917	+	27,030	=	32,947
15 months. 1882 + 1st Qr. of 1883	7,839	+	34,085	=	41,924
		or 33,540 proportionately for 12 months.			
1883-84	6,352	+	25,819	=	32,171
1884-85	6,942	+	32,872	=	39,814
1885-86	6,855	+	31,008	=	37,863
1886-87	7,040	+	36,966	=	44,006
1887-88	7,197	+	42,283	=	49,480
1888-89	6,527	+	42,989	=	49,516
1889-90	6,358	+	36,468	=	42,826
1890-91	15,329	+	44,022	=	59,351
1891-92	20,093	+	43,918	=	64,011
1892-93	20,552	+	44,460	=	65,012
1893-94	21,957	+	45,653	=	67,610
1894-95	23,198	+	43,204	=	66,402
1895-96	24,407	+	46,243	=	70,650
1896-97	21,336	+	50,327	=	71,663
1897-98	22,217	+	53,907	=	76,124
1898-99	22,039	+	57,798	=	79,837

It will be seen from the above figures that the number of vouchers scrutinized by this office during the year under report was more than double the number received in 1884-85 and that the audit work goes on increasing year by year.

As compared with 1897-98 the number of inward and outward letters was as follows :—

	1897-98.	1898-99.
Inward letters ... ... (exclusive of Vouchers & remittance reports.)	20,362	22,545
Outward letters ... . (exclusive of intimations sent to Contractors, &c.)	6,117	10,433

The number of outward letters shows an increase of 70 % over that for 1897-98 and of 112 % over that for 1893-94.

54. In conclusion, I would state that Mr. Waite was the Chief Accountant throughout the year under review, and that he having gone on leave, the writing of this report has devolved on me. Mr. Ruttonji Furdoonji Khambatta, the first Senior Audit Clerk, has assisted me in this work, and his exceptional ability and minute acquaintance with all the details of the working and accounts of the Department have been invaluable.

APPENDICES

TO THE

CHIEF ACCOUNTANT'S REPORT

FOR 1898-99.

No. 1 A.

BOMBAY 5% MUNICIPAL LOAN OF 1878 (Rs. 26,94,000).

Raised in two equal instalments on 1st November and 1st December 1878 as per Corporation's Resolution No. 1296, dated 10th September 1878, and Government Resolution No. 2951, dated 28th September 1878.
Wholly repayable on 1st January 1919.

STATEMENT showing the Amount of Interest and Principal annually payable in Bombay from December 1878.

	Principal.	Interest.	Total amount of payment on account of Interest.	Debentures repayable.		Total.

† 83 Debentures of the value of Rs. 41,500 were paid off; only one debenture, No. 810, for Rs. 500 remained unpaid, as it was not presented for repayment between 1st January 1893, the date on which it became repayable and the close of the past year.

‡ 91 Debentures of the value of Rs. 45,500 were paid off; twenty-one Debentures, bearing Nos. 1373 78, 1383 86, 1388/89, 1437/42 and 1449/51 remained unpaid, as they were not presented for repayment between 1st January 1899, the date on which they became repayable and the close of the past year.

NOTE.—Rs. 11,000 have, therefore, been renewed to meet these claims during 1899-1900 if presented by the holders.

W. PEARSON,
Acting Chief Accountant.

W. PEARSON,
Acting Chief Accountant.

W. L. HARVEY,
Municipal Commissioner.

REVENUE.

Report on the working of the Assessment and Collection Department for the year 1898-99 by Mr. R. P. Brunton, Assessor and Collector, as forwarded with his letter No. 14261, dated 20th July 1899.

1. The total amount collected under all heads, exclusive of Miscellaneous Receipts, was Rs. 47,85,033-5-10, against the estimate of Rs. 48,15,100, a difference of Rs. 30,066-10-2, the falling off being in the items of Halalkhor Tax, Wheel Tax, and Tolls. The decrease in the Halalkhor Tax includes Rs. 11,390 for special Halalkhor Tax to mills, and this, with the decreases in Wheel Tax and Tolls, must be attributed to the falling off in the number of vehicles and animals kept, and to a lesser vehicular traffic into the City on account of the Plague.

2. As compared with the total collections for 1897-98, which amounted to Rs. 44,71,371-12-10, the increase for 1898-99 is Rs. 3,13,661-9-0. There was an increase of one per cent. in the General Tax for the year under report.

3. The outstandings on the 31st March 1899, including Wheel Tax, were Rs. 1,13,477-4-5, as against Rs. 1,07,100-5-2 on 31st March 1898. Out of the balance of Rs. 1,13,477-4-5, Rs. 64,129-14-2 have been accounted for up to 15th instant, leaving a balance outstanding for all previous years of Rs. 49,347-6-3, of which the main items are Disputed Bills Rs. 39,714-9-11 and Departmental Bills for Adjustment Rs. 3,365-3-2, the rest being classed as Recoverable, and a small item of Rs. 147-12-10 as Irrecoverable. I would respectfully draw attention to this favourable state of the outstandings, which, considering the unsettled state of the City during the year, both in business and number of tax-paying residents, will, I trust, meet with the approbation of the Commissioner and Corporation.

4. The total collections for the past five years, exclusive of Miscellaneous Receipts, were :—

	Rs.	A.	P.
1894-95	42,86,095	4	9
1895-96	43,51,271	11	4
1896-97	41,76,528	0	6
1897-98	44,71,371	12	10
1898-99	47,85,033	5	10

Registration of Properties.

5. The following table gives the details of the number of properties in the Assessment Book during the past five years :—

Years.	Classification of properties according to description.				Classification of properties according to liability to General Tax.			
	Buildings.	Salt-pans.	Lands (including tanks, wells, &c.)	Total.	Number assessed for the General Tax.	Number exempt or compounded for on special terms.	Small plots of unproductive lands for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9
1894-95 ...	34,265	175	17,708	52,148	40,032	4,446	7,670	52,148
1895-96 ...	35,083	175	17,241	52,499	40,318	4,493	7,688	52,499
1896-97 ...	35,495	146	17,318	52,959	40,653	4,561	7,745	52,959
1897-98 ...	35,091	146	17,928	53,165	40,685	4,578	7,902	53,165
1898-99 ...	34,805	146	18,377	53,328	40,822	4,585	7,921	53,328

6. The recorded gross assessments of properties contrasted with those for the previous four years are as under :—

Years.	Opening assessment (gross).	Amount after disposal of complaints.		Amount of subsequent reductions during the year by demolitions and complaints.	Amount after deduction of subsequent reductions.	Subsequent enhancement (New buildings, enlargements and under-assessments.)	Total gross assessments.	Classification of gross assessments.				Final difference over preceding year's assessments.	
		No. of complaints against opening assessments.	Gross assessment.					Assessments chargeable with General Tax.	Assessments exempt from General Tax.	Assessments for which no General Tax bills issued.	Total.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1894-97 ...	2,72,98,360	2,215	2,72,68,925	1,46,595	2,71,22,330	4,91,411	2,76,13,741	2,50,94,448	25,01,487	17,806	2,76,13,741	6,34,013	...

Tax on Vehicles and Animals.

17. The demand on account of the tax on private vehicles and animals for the four quarters ended 31st December 1898 was Rs. 1,62,961-12-11, against Rs. 1,55,282-7-0 for 1897, to which are to be added Rs. 6,550-2-3 outstanding on 31st March 1898, and Rs. 933-12-0, amount of bills for former years issued in 1898-99, making a total of Rs. 1,70,445-11-2.

18. The total number of Wheel Tax bills issued was 13,365. The amount collected during the year was Rs. 1,61,912-3-7.

19. Out of the amount of Rs. 6,622-6-1 outstanding on 31st March 1899, Rs. 4,530-6-8 have been accounted for up to 15th instant, leaving a balance of Rs. 2,091-15-5.

20. The details are shown in the subjoined table :—

Wheel Tax.

To be collected.		Collected.		Uncollected.	Deduct Bills cancelled on account of former years.		Balance outstanding at the end of 31st March 1899.
Opening balance outstanding.	Total of bills issued in 1898-99.	Total.	On account of former years.	On account of 1898-99.	Total.	Amount written off as irrecoverable under Board's Proceedings Nos. 1179 dated 18th March 1898, 1845-49 dated 15th July 1898, and 2547-53 dated 21st September 1898.	Bills cancelled (amended bills being issued in lieu of the same).	Total.	On account of former years.	On account of 1898-99.	Total.

Amount.	Rs. a. p. 1,55,982 7 9	Amount.	Rs. a. p. 1,58,961 13 11	Rs. a. p. 7,679 6 11			
		4-wheeled Vehicles.					
		2-wheeled Vehicles.					
		Vehicles drawn or impelled otherwise than by horses, &c.					
		Horses.					
		Ponies.					
		Bullocks.					
		Donkeys.					
		Amount.					

In this table bicycles and tricycles appear. They were ordered to be taxed under the Corporation Resolution No. 9604 of 10th January 1898.

The legality of the tax was doubtful, but was confirmed by a decision of the High Court on the 4th April 1899, on a reference to that Court by the Chief Judge of the Small Causes Court in the case of Hogan *vs.* the Municipal Commissioner.

22. The figures in the following table for 1898-99 are supplied by the Chief Accountant, the tax being collected in his Office :—

Years.	Tax on Licensed Public Land Conveyances.	License Fees.	Fees for Badges.	Total.	Toll Fees at Mahim and Sion Causeways.
1	2	3	4	5	6
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

I.—REVENUE AUDIT.

1.—Assessor and Collector's Department.

(*a*) *Ward Offices.*

2. The balances and books of the 60 Ward Clerks in the seven wards of the City were duly examined at the end of each quarter. The amount of audit work done on each of these occasions is shown in detail in Appendix A, the totals being transcribed below for ready reference :—

Ward Balances Examined.

On 1st April 1898.		On 1st July 1898.		On 1st Oct. 1898.		On 4th Jan. 1899.		Total.	
No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.
	Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.
2,541	1,07,075 2 2	15,998	10,10,195 12 5	3,185	1,26,131 0 9	14,503	8,06,610 8 7	36,227	20,50,012 8 10

3. The 36,227 bills for Rs. 20,50,012-8-10 were duly checked in details with the Ward Office Bill Book, Form 16 (every entry in which was subjected to scrutiny), and in totals, which were themselves tested with the book, kept under para. 9, at page 155 of the Manual, which is practically the Ward Clerk's Ledger. They were also checked with the Head Office Accounts (Forms 8 and 9) both in detail and in totals respectively.

(*b*) *Head Office.*

4. The Assessment Book in both its parts—one for the General Tax, and the other for the Water and Halalkhor Taxes—was duly examined, and the exemptions from the payment of the General Tax, the Water Tax, and the Halalkhor Tax were duly checked with a view to ascertain that no property liable to pay any or all of these taxes had escaped

assessment. Appendix B shows the work done in detail, the following being an abstract of its totals :—

Total No. of Properties on the Assessment Book.	Of which number exempted from payment of						Remainder, which pay		
	The General Tax.				The Water Tax.	The Halalkhor Tax.	The General Tax.	The Water Tax.	The Halalkhor Tax.
	Religious and Charitable Institutions.	Properties resting in or occupied by the Corporation.	Properties of small value, for which no Bills are issued.	Total.					
53,649	1,930	1,130	7,549	10,609	18,179	18,260	43,040	35,470	35,389

5. The Vehicle and Animal Tax Book, kept under Section 186 of the Act, was also examined, and all the entries therein checked with the quarterly returns of the Ward Superintendents, and, where necessary, also with the owners' returns, under Section 187, and with the charges made for the preceding quarters. The following table shows the total number of entries so checked for each quarter, Appendix C giving the details for each ward :—

1st Quarter.	2nd Quarter.	3rd Quarter.	4th Quarter.	Total.
3,384	4,116	4,509	4,968	16,977

6. As the year recognised by the Bombay Act VI of 1863 is the calendar year, the revenue from the tax on Public Land Conveyances, licensed by the Commissioner of Police under that Act, was also audited for the twelve months, from 1st January to 31st December 1898, the certificates of issue of licenses supplied by that Officer under arrangements made with him having been duly checked with the register now kept by the Chief Accountant instead of by the Superintendent of the Byculla Ward as in former years. The following table shows the work done :—

Description of Public Land Conveyances.	No. of Certificates or Vouchers.	Amount of Revenue, including Fees for Badges, &c.
		Rs. a. p.
Victorias	1,166	55,174 2 0
Riding hackeries or Recklas	314	4,379 10 0
Labour carts...	5,985	96,821 0 0
Total ...	7,465	1,56,374 12 0

7. Appendix D shows the number of claims to one-fifth drawback under Section 158 (2) of the Act, which were scrutinized by this office during 1898-99, the totals being abstracted below :—

1st half of 1898-99.			2nd half of 1898-99.			Totals for the year.		
Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.
		Rs. a. p.			Rs. a. p.			Rs. a. p.
7,247	5,869	38,754 9 6	7,797	6,153	40,302 4 6	15,044	12,022	79,056 14 0

8. The alteration in value and in demand made through the Increase and Decrease Forms 11, 11A, and 11B, were duly checked with the authority for such alterations, as contained in your orders in the Tabulated Ward Report (Form 13), and in separate sanctions recorded in the Audit Note Books kept in this office. Appendix E exhibits the details of the alterations, of which the following are the totals :—

Total number of Increase and Decrease entries in Forms 11, 11A and 11B.	Original Valuation.	Amended or Revised Valuation.	Difference, being net Increase.
1	2	3	4
	Rs.	Rs.	Rs.
5,751	51,06,740	55,39,061	5,32,323

9. The number of complaints against valuations under Section 163 heard by the Revenue and Refund Audit Officer were 134 in A or Fort Ward, 395 in B or Mandvi Ward, and 173 in D or Girgaum Ward, giving a total of 702. The total number of the decisions on complaints against amendments under Section 167 of the Municipal Act, which were scrutinized by this office, amounted to 221 from all the seven wards of the city.

10. Irrecoverable bills for Rs. 919-6-10, as per details given in the subjoined table, were scrutinized and submitted to you in the prescribed form for action under Section 216 of the Act :—

Wards.	No. of Bills.	Amount.					
		Tax on Vehicles and Animals.	Property Taxes.	Charges for Water by meter measurement.	Special Halalkhor Tax.	Notice Fee.	Total.
		Rs. a. p.	Rs. a. p	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
A ...	12	81 3 0	...	...	...	...	81 3 0
B ...	3	...	...	541 9 1	...	...	541 9 1
C ...	30	151 12 0	...	...	...	...	151 12 0
D ...	2	7 4 0	...	...	...	...	7 4 0
E ...	14	12 13 6	39 11 9	64 13 10	...	0 12 0	118 3 1
F ...	...	...	...	...	...	...	.....
G ...	7	13 0 0	6 7 8	...	...	...	19 7 8
Total.	68	266 0 6	46 3 5	606 6 11	...	0 12 0	919 6 10

The Standing Committee sanctioned their being written off in their Resolutions Nos. 1578, 4686, 6537, 9242 and 118, dated 23rd May 1898, 17th August 1898, 2nd November 1898, 18th January 1899, and 5th April 1899, respectively.

11. The preliminary list of voters under Section 19 for the final Election Roll under Section 21 was duly scrutinized.

12. The demands, collections, and balances of the Department at the close of the year, as duly audited in the manner contemplated by the Manual, are shown in Appendix F in detail, and summarized in the following table :—

	The General Tax.	The Water Tax.	The Halalkhor Tax.	The Vehicle and Animal Tax.	The Tax on Public Land Conveyances, including Badges, &c.	Meter Hire.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
I—Total demands as represented by bills issued ...	23,43,317 11 3	15,83,577 15 9	7,57,712 10 11	1,73,211 8 2	1,56,374 12 0	16,070 4 7	50,30,264 14 8
II—Deduct bills recalled, which were either cancelled or for which amended bills were issued	71,793 12 7	53,654 15 10	18,963 4 7	4,473 14 0	.....	377 9 2	1,49,263 8 2
III—Net demand for collection	22,71,523 14 8	15,29,922 15 11	7,38,749 6 4	1,68,737 10 2	1,56,374 12 0	15,692 11 5	48,81,001 6 6
IV—(*a*) Collection paid into the Treasury, including Departmental adjustments	22,31,726 4 10	14,82,783 9 8	7,18,178 13 9	1,61,912 3 7	1,56,374 12 0	13,897 11 5	47,64,873 7 3
(*b*) Irrecoverable bills written off	12 9 8	610 6 0	29 10 8	203 0 6	.....	.....	855 10 10
Total of IV ...	22,31,738 14 6	14,83,393 15 8	7,18,208 8 5	1,62,115 4 1	1,56,374 12 0	13,897 11 5	47,65,729 2 1
V—Balance at the close of the year...	39,785 0 2	46,529 0 3	20,540 13 11	6,622 6 1	.....	1,795 0 0	1,15,272 4 5

The collections were checked with receipts passed by the Chief Accountant, as also with his totals under each head, and the balances by an examination of the bills actually on hand in the several Ward Offices on 1st April 1899. They were found to be correct.

2—Engineer's Department.

13. The Revenue Books kept in the Streets and Buildings, Water Works, Drainage, and Special Drainage Branches of the Engineer's Department were duly checked each month with the permits, receipts, vouchers, and other papers supporting the several entries therein, the object of the audit being to see that the charges were correctly calculated at rates duly sanctioned, and that the collections as shown by the books were all paid into the Municipal Treasury. The following table shows the work carried out in detail :—

	Items.	Number of Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Projections :—Verandahs, Balconies, Rewas, Weather Frames, &c.	45	6,350	6	10
2	The erection of Scaffolding, &c., on public land.	331	3,418	9	4
3	Opening Roads	1,459	2,124	0	0
4	Temporary occupation of public streets on marriages and other occasions	526	3,120	0	0
5	Licenses issued to Plumbers	92	920	0	0
6	Licenses issued to Surveyors	35	2,625	0	0
7	Supplying copies of office records and giving evidence, &c.	2,358	84	12	6
8	Sale of Tender forms		417	11	6
9	Sale of rights of catching fish, cutting grass, collecting fruits and drawing toddy, &c. ...		1,160	0	0
10	Hire of Steam-rollers, Carts, &c.		5,963	10	3
11	Ground rents		1,906	2	11
12	Sale of building forms under Section 337 ...		312	0	0
13	Sale of repair forms under Section 342 ...		378	0	0
14	Sale of applications for water connections ...	1,330	389	12	0
15	Sale of right of cutting grass		1,999	0	0
16	Sale of Tender forms		37	0	0
17	Fees for testing water pipes, meter fittings, &c.		638	14	0
18	Meter hire...		947	8	7
	Total...	6,176	32,792	7	11

14. A comparison of the Engineer's accounts, with the Audit Note Book in this office which records your sanction in each case as it passes through this office, showed that in 22 cases the fees, the levy of which had been sanctioned by you in the course of the year under report, had not been collected and paid into the Municipal Treasury up to the close of the year, and these 22 cases were duly brought to the notice of the Executive Engineer in this office No. 1180, dated 6th June 1899, which was forwarded to him through you.

3—Health Department.

15. The Revenue books kept in the Health Office as well as those kept in the four Divisional Health Offices Nos. 1 to 4 Divisions, from 14th February to 31st March 1899, were duly checked each month with the receipts, vouchers, and other papers supporting the entries therein, the object of the audit being to ascertain that the amounts collected as shown by the books were at the rates fixed under due authority, and that they were all paid into the Municipal Treasury. The following table exhibits in detail the number of receipts or vouchers examined under each head of revenue and the amount of such revenue :—

	Head of Revenue.	Number of Receipts or Vouchers examined.	Amount.
			Rs. a. p.
1	Digging graves	7,488	3,094 0 0
2	Removing of carcasses of animals	5,889	6,125 8 0
3	Supplying copies of office records and giving evidence, &c.	609	656 0 0
4	Rent of Mahalaxmi Dhobiwada...	5,306	16,531 0 0
5	Rent of reclamation grounds		13,179 8 0
6	Rearing and catching fish, &c.		.....
7	Grazing cattle and cutting grass, &c.		.....
8	Sale of bones, manures, waste papers, &c. ...	650	1,440 4 0
9	Cleansing drains		1,746 9 5
10	Sale of Tender forms		49 4 0
11	Rent of Mody Bay milch cattle stables ...		4,560 0 0
12	Rent of Kamatipura milch cattle stables ...	965	8,544 5 6
13	Rent of Agripada milch cattle stables... ...		3,577 5 5
	Total ...	20,907	59,503 12 4

4—Licensing Department.

16. Appendix G shows the number of licenses for 1898-99, the issue of which was sanctioned by you under Sections 394 and 393 of the Act for the several purposes mentioned in Schedule M, with the amount

of fees leviable therefor. Each of the 5,575 cases for Rs. 61,044-8-0 therein referred to, passed through this office, and was duly scrutinized by it, particularly with reference to the amount of fee leviable. The register of the Superintendent and the counterfoils of the several license books were also checked each month with the Audit Note Book kept in this office, in accordance with your No. 3176 of the 20th May 1890, and with the counterfoils of the receipts given by the Chief Accountant's Cashier, for the purpose of seeing that the full amount of fee leviable in each case was collected and paid into the Municipal Treasury. As in a large majority of cases you sanction the issue of a license after payment of the fee, the registers show no outstanding at the close of the year.

5—Markets and Slaughter-Houses.

17. The registers and accounts kept were duly checked with the counterfoils of receipts issued to stall-holders, &c., and with the other vouchers available. The following table shows the work done :—

Market Revenue.

	Markets.	Number of Receipts or Vouchers examined.	Amount.	Total No. of Receipts or Vouchers examined.	Total Amount.

The total number of vouchers was 14,919 for Rs. 3,83,433-12-11. The total revenue collected appears duly credited in the Chief Accountant's books.

6—Victoria Gardens.

18. The Revenue books kept in the Superintendent's office were duly checked with the counterfoils of receipts issued for the sale of Garden Produce. The following table shows the work done in detail :—

Sale Proceeds of Garden Produce.

	Items.	No. of Receipts or Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Flowers	2,071	1,819	11	0
2	Plants	487	1,338	11	8
3	Leaves	344	155	11	0
4	Seeds	63	114	10	0
5	Fruits	14	10	1	0
6	Miscellaneous	56	641	5	6
	Total ...	3,035	4,580	2	2

The total revenue collected appears duly credited in the Chief Accountant's books.

7—Rent Accounts of Health Camps.

19. The rent accounts of the several Health Camps in charge of the respective district officers were duly checked each month with the counterfoils of receipts issued to the occupiers of the various huts or rooms (as the case may be) in each camp, and with the other vouchers available from July 1898 to the end of March 1899 in compliance with the directions contained in your No. 8972 of 11th July 1898. The object of the Audit being to see that the rents charged as shown by the books were at the rates fixed under due authority, and that they were all paid into the Municipal Treasury. The following table shows the work done in detail :—

	Names of Camps.	Wards.	Place where examined.	No. of Receipts Examined.	Amount.			Remarks.
					Rs.	a.	p.	
1	Elphinstone Bridge Camp.	B ...	District Office No. 3 at Dongri Oomer-khadi.	364	789	0	0	With the exception of one shop only, the whole of the camp was allowed to be occupied only by contacts free of rent from February 1899.
2	Goculdas Tejpal Camp.	C ...	Central Office No. 5 at Dhobitalao.	1,322	2,535	8	0	
3	Nariel Wadi Camp.	E (east).	Central District No. 9 at Wari Bundar.	607	1,188	0	0	
4	Sankli Street Camp	Do. ...	District Office No. 8 at Madanpura Ripon Road.	178	192	0	0	
5	Foras Road (or Elappa Balaram) Camp.	E (west).	District Office No. 6 at Grant Road.	238	317	0	0	The camp was handed over to Rao Bahadur Ellappa Balaram in March 1899.
	Total ...			2,709	5,128	8	0	

8—General.

20. As the monthly or quarterly audit of the several departments proceeded, the errors, irregularities, or omissions, which were discovered in the course of it, were brought to the notice of the heads of departments concerned by means of official communications addressed to them through you.

II—REFUND AUDIT.

1—Assessment Department.

21. The subjoined table shows the number and amount of claims to refund for vacancy under Sections 174 to 179 of the Act, and on account of over-collections which were scrutinized and sanctioned by this office in the year under report :—

Wards.	Number of Claims.	Amount of Refund sanctioned.
		Rs. a. p.
A—Fort and Colaba	269	11,176 15 9
B—Mandvi	278	2,865 13 9
C—Bhuleshwar	330	4,174 12 9
D—Girgaum	180	4,208 9 9
E—Byculla	236	4,712 7 0
F—Parel	42	3,215 4 4
G—Mahim	70	970 12 6
Total ...	1,305	31,324 11 10

The sum of Rs. 31,324-11-10 shown in the above table was sanctioned under the following heads of Revenue :—

Items.	Amount Rs. a. p.
General Tax	8,885 8 10
Water Tax	16,163 4 8
Halalkhor Tax	6,270 0 4
Vehicle and Animal Tax.. ...	5 6 0
Toll Fees...	.....
Meter Hire	.....
Process Fees	0 8 0
Total ... Rs.	31,324 11 10

2—Town Duty Refunds.

22. As the Port Trustees and the two Railway Companies send in no Administration reports of the Town Dues collected by them on behalf of the Municipality, it is usual for this office to submit the two statements (compiled in respect of collections from figures supplied by the Chief Accountant) marked as Appendices H and I to this report. The following table compares the total results for the year under report with those for the preceding year, and shows that while there have been marked increases both in the collections and in the refunds, these almost balance each other with the result that the net revenue shows the insignificant increase of Rs. 996-11-3 over the previous year :—

Year.	Gross Revenue.	Total Refunds.	Net Revenue.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1897-98	17,29,760 15 7	7,37,804 5 0	9,91,956 10 7
1898-99	22,55,540 4 10	12,62,586 15 0	9,92,953 5 10

23. Viewing these results in their details as shown by the Statements H and I it will be seen, first, with regard to the gross collections, that, with the exception of sugar which shows a marked falling off, there have been increases under all the other articles, notably grain, wines and spirits, ghee, timber and firewood. The increases under grain and ghee are due both to larger imports and to enhanced rates of duty, those under flour and fire wood to enhanced rates only, the imports being in fact smaller than those of the previous year, while the increases under the remaining heads are due solely to larger imports, there having been no change in the rates of duty.

24. The refunds, on the other hand, exhibit increases under every head, due in each case to larger exports, coupled, in the case of grain, flour, ghee, and firewood, with the enhanced rates of duty already alluded to.

25. Coming to the details of net revenue, the large increase of Rs. 2,33,695-0-6 contributed to by all the articles except sugar, has been almost wholly counterbalanced by the decrease of Rs. 2,32,698-5-3 under the latter head. This falling off under sugar can be explained by the assumption that the heavy preponderance of the previous year's imports over its exports left, after allowing for local consumption during that year, a large balance available for exports during the year under report, thereby making the net yield during the latter year appear abnormally small just as it showed that of the former year abnormally large.

26. The total amount of refunds claimed during the year was Rs. 13,47,419-2-0, of which sum Rs. 84,832-3-0 were retrenched as follows :—

	Rs.	a.	p.
On account of claims legally inadmissible	11,229	6	0
Excess of amounts claimed over those actually due	73,602	13	0
Total ... Rs.	84,832	3	0

27. The number of claims disposed of during the year was 34,856 (against 28,072 in the previous year), which gives an average of nearly 125 claims per every working day in the year.

Conclusion.

28. In addition to the above, the office had to deal with correspondence of all departments affecting revenue which passes through this office and with questions of principles relating to revenue, the importance of which can scarcely be judged by the number of inward and outward references which were respectively 4,426 and 4,922 in the year under report.

29. It will be seen from para. 19 above that in the year under report an additional burden was thrown upon this department in the shape of the audit of the rent accounts of the various Health Camps in the city. This, besides adding to their work at this office, necessitated the attendance and occupation of two of the clerks of this office on several days in each month (hereafter it will be in each quarter) at the Camps. These men have also, among other duties, to audit the Health Department Accounts, and in regard to these too it has to be noted that since the re-organization of that department during the year under report, the men have had to audit five different sets of accounts, one at the head office of the Health Department and four at the Divisional offices, in lieu of only one set which under former conditions, had to be checked only at the head office. All this increase of work it has been possible to cope with only by utilizing the assistance of such irresponsible persons as candidates, but as this is undesirable, the assistance of an extra clerk will before long have to be asked for.

F.—Roads, Footpaths, &c.	338 to 350
G.—Public Lighting.....	351 to 363
H.—Workshops	364 to 380
I.—General—Contracts, Rights Sold, Bills, Notices and Correspondence, Summary of Clerical Work, Plague Operations, Municipal Properties and Municipal Servants' Act	381 to 636

A.

INTRODUCTORY REMARKS.

ESTABLISHMENT.

3. I held the appointment of Executive Engineer, Municipality, throughout the year and was assisted by the following Officers in conducting the duties of the different branches of the Department.

4. MR. C. C. JAMES, M.I.C.E., Deputy Executive Engineer, Water Works, now Acting as Deputy Executive Engineer, Drainage, having returned to the Municipality, on the abolition of the Plague Committee of which he was appointed a member on the 2nd of March 1897, was granted three months privilege leave which was subsequently converted into six months' sick leave from the 7th of May 1898 to the 6th of November 1898. On the latter date that officer resumed charge of his duties as Acting Deputy Executive Engineer, Drainage.

5. During his absence MR. JAMES W. SMITH, M.I.C.E., conducted the duties of Deputy Executive Engineer, Drainage, in addition to those of Special Drainage Engineer, assisted by MR. E. W. FERN, as Superintendent of Drainage.

6. MR. A. FAIRLIE BRUCE, M.I.C.E., Acting Deputy Executive Engineer, was in charge of the Water Works Branch, assisted by MR. NASSARWANJI DORABJI BHADA, L.C.E., A.M.I.C.E., Assistant Engineer.

7. MR. BHADA was allowed privilege leave for 2 months and 19 days from 3rd October to 21st December 1898.

8. MR. MANEKJI SHERIARJI BHARUCHA, L.C.E., Assistant Engineer, General Department, was in charge of the Road Branch. He also assisted me in preparing projects for new works, framing reports and supervising the new works in the General Department.

9. MR. B. H. HEWETT, A.M.I.C.E., Assistant Engineer, was in charge of the Mechanical Branch and supervised the working, repairs and maintenance of the Love Grove Pumping Station, the Colaba Air Compressor Station, the Municipal Workshops and the Electric Light Installation, &c., &c.

10. MR. JAMSHEDJI DADABHAI NADARSHAH, L.C.E., Special Assistant Engineer, was in charge of the House Inspection Branch. He was assisted by MESSRS. MANEKLAL NARBHERAM, L.C.E., and N. D. KATRAK, L.C.E., Superintendents in that Branch.

11. MESSRS. KAIKHASRU PESTANJI BHEDWAR, L.C.E., NAVROJI HORMASJI KATRAK, L.C.E., HARI BHIKAJI BHANDARE, L.C.E., and PESHOTAN H. DASTUR, Divisional Superintendents, assisted me in matters connected with the Regulations of Streets and Buildings.

12. MR. KAIKHASRU PESTANJI BHEDWAR was granted one year's furlough from 9th December 1897 to 8th December 1898, and MR. PESHOTAN H. DASTUR acted in his absence during that period.

13. MR. GOVINDRAM DULLUBHRAM, Architectural Surveyor, was in charge of the Architectural and Drawing Branches. He helped me in preparing plans and estimates and supervising the construction of new buildings and the maintenance of existing ones. He also supervised the construction of the several temporary hospitals, Segregation and Health Camps, &c., in connection with the measures taken for the suppression of the plague.

B.

NEW WORKS, &c., GENERAL.

MUNICIPAL BUILDINGS, NEW ROADS, &c.

Construction and Repairs.

NEW WORKS, GENERAL—

	Paras.
List of Works completed during the previous years, but the accounts of which remained unadjusted till the commencement of the year under report	14
List of Works which were in progress at the beginning of the year under report and completed during that year	14

15. The following are details of some of the principal buildings enumerated in the foregoing statement :—

FIRE BRIGADE STATIONS.

16. A description of the eleven Fire Brigade Stations sanctioned by the Corporation under their Resolution No. 5144, dated 14th August 1892 and erected in different parts of the Island, are given in the previous reports. These have been completed, and particulars, as regards their cost, &c., are given in the subjoined statement.

17. The only remaining works were the quarters for the Foreman, Engineer, and Laskars at the Gamdevi Station and a few additional works, at the Sankli Tank Station.

18. The above works at the Gamdevi Station were completed on the 16th July 1898 and the buildings were occupied by the Fire Brigade on the following day.

19. The total expenditure on completion of the work has been Rs. 14,447-10-8.

20. All the works in connection with the Sankli Tank Station sanctioned by the Corporation under their Resolution No. 4466 of 9th August 1897, particulars of which were given in the last Administration Report, have been completed.

21. The total expenditure for the construction of this Station has been Rs. 1,74,453-11-6.

Fire Brigade Stations completed up to the end of [redacted]

22. The following statement shows the dates of commencement and completion, cost and other particulars regarding the quarters and Stations for Fire Brigade which have been completed :—

MUNICIPAL MARKETS, &c.

Market at Fergusson Road.

23. The construction of this market referred to in the last report was commenced on the 9th February 1898, and completed on 31st October 1898.

24. The total expenditure, passed up to 31st March 1899 has been Rs. 6,829-12-9.

25. The market was opened to the public on the 1st November 1898.

26. The occupation of the Stalls was sold by public auction on 29th October 1898, and realized Rs. 592-10-8 for the five months ending 31st March 1899. In addition to this, an amount of Rs. 594-11-6 was realized as squatters' fees during the same period. This is satisfactory and tends to show that there was a need for a market in this locality. The present small building has been erected as an experimental measure. If it proves a success it will be enlarged.

Extension of the Beef Slaughter House at Bandora.

27. This work was sanctioned by the Corporation under their Resolution No. 11123 of 21st January 1897, at an estimated cost of Rs. 6,000, but its execution was deferred on account of financial difficulties.

28. Matters having improved, tenders were invited by means of advertisements in the local newspapers but none having been received, offers were invited by means of circulars, from some of the well-known contractors. In response, only one tender, *viz.*, that of Ramji Harji was received which has been recommended for acceptance to the Standing Committee, and the work will be taken in hand during the next year.

Filling in Quarry Holes near the Slaughter House at Bandora.

29. This work which has been fully described in the last Administration Report, was completed on 2nd May 1898, at a cost of Rs. 3,883-5-7 against the estimated cost of Rs. 4,177.

Constructing two additional Sheds for Sheep and Goats at Bandora.

30. As stated in the last Administration Report, this work was completed on the 2nd January 1898. It having been found necessary to provide down-take pipes and zinc-sheet gutters to carry off the rain water, it was taken in hand and completed during the year under report.

31. The total expenditure, on completion of the work, has been Rs. 5,959-10-9.

CHAWLS, QUARTERS, AND OFFICES FOR MUNICIPAL EMPLOYES, &c.

Quarters for Malis in the Victoria Gardens.

32. This work, which has been noticed in the Administration Report of 1897-98, was completed on 4th October 1898, and the building was occupied on the 5th October 1898.

33. The total expenditure on completion of the work, has been Rs. 12,123-0-5.

Quarters for the Head Animal-keeper in the Victoria Gardens.

34. The order to commence this work, which as stated in the last Administration Report, was kept in abeyance, owing to financial considerations, was given to Messrs. Deoram Kashavji & Co., on 16th December 1898. It has made fair progress and will soon be completed.

35. The total expenditure passed upto 31st March 1899, has been Rs. 2,530-8-9.

Additions and Alterations to the Chawl at Dadar.

36. The commencement of this work was postponed until after the rains, with a view to avoid inconvenience to the occupants, the Halalcores of the Health Department.

37. The order to commence was therefore given on 21st December 1898, and the work is progressing satisfactorily.

38. The total expenditure passed up to 31st March 1899 has been Rs. 416-0-3.

Ward Office for the Street and Building Branch of the Executive Engineer's Department at Gamdevi.

39. This work which has been noticed in the last Administration Report was commenced on the 17th January 1898 and completed on 16th April 1898.

40. The total expenditure on completion of the work has been Rs. 4,239-7-6.

THE NASARVANJI MANEKJI PETIT PUBLIC HALL.

41. This work has been fully described in the last Administration Report.

42. When the matter of the preparation of the Trust Deed was under consideration, Bai Dinbai unfortunately died. Negotiations were thereupon opened with her daughter and sole executrix, Bai Avabai Framji Petit, on the subject. This lady did not approve of the proposal to give the sum of Rs. 5,00,000 which was promised by the deceased donor in one sum, but offered to give the money in instalments, and the following mode of payment was subsequently agreed upon with the consent of the Standing Committee, *viz* :—

(*a*) A sum of Rs. 1,00,000 to be paid on the execution of the deed.

(*b*) A further sum of Rs. 1,00,000 on the expiration of one year from the date of the execution of the deed.

(*c*) A further sum of Rs. 1,50,000 on the expiration of two years from the date of the execution of the deed.

(*d*) The balance of Rs. 1,50,000 on the expiration of the third year from the same date.

(*e*) Bai Avabai has further agreed that if the state of the building at any time requires a payment or payments to be made by the donor in advance of any one of the instalments above mentioned, she will, on receipt from the Commissioner, of two clear months' previous notice of any such requirement, make such interim payment or payments as shall be so required, but subject, nevertheless, to an aggregate maximum limit of half the amount of the last previous instalment, and provided that out of the last instalment of Rs. 1,50,000 a sum of Rs. 25,000 shall be retained by the donor unless and until the Engineer shall have certified that the said building is complete.

43. The above conditions having been agreed upon, a draft of the deed of trust has been drawn up by the Municipal Solicitors, and is now being approved of by Bai Avabai.

43*a*. The principal conditions of the deed are :—

(1) That the Corporation shall utilize the amount of the donation for the construction of a hall to be called "The Nesserwanji Maneckji Petit Public Hall" on the site which has been mentioned in the previous report and capable of accommodating and seating about 2,500 people.

(2) That the statue of the late Nesserwanji Maneckji Petit, which it is understood, is to be provided out of the funds subscribed by the public of Bombay to perpetuate his memory, shall alone be placed in a permanent position in the entrance room of the said hall; the Corporation to maintain and keep in good order and condition.

(3) That the hall shall be available for all public meetings and gatherings convened for any lawful purpose on payment of certain charges.

(4) That the hall and the furniture shall be maintained and kept in good order and condition by the Corporation, and that the fees levied for its use shall be appropriated towards such maintenance.

(5) That the Corporation shall keep the building insured at their cost against loss or damage by fire.

(6) That the hall shall be vested in the Corporation, and the management thereof shall be carried on by a Committee, the formation of which has been described in detail in the deed.

43*b*. The Government of India have accorded their final sanction to the Bombay Government leasing to the Municipality the full area of the ground required for the construction of the hall, and the deed of transfer is being prepared by the Solicitor to Government.

43*c*. The purchase money for the site has not yet been paid by the Municipality to Government, but this will be done as soon as the deed of trust for the payment of the donation by Bai Avabai Framji Petit is approved by that lady and the Corporation and executed. All preliminary arrangements for starting the work have in the meantime been made.

NEW ROADS, &c.

Reay Road.

44. All the properties required for the construction of this road have been acquired.

45. The portion of this road between Dockyard Road and Gunpowder Road has been completed at a cost of Rs. 13,812-4-2 and was opened to traffic on 10th August 1898.

46. The portion of the premises of N. S. D. Rozary Church, referred to in the last report has now been acquired under the Land Acquisition Act and arrangements are being made for inviting tenders for the construction of the portion of the road between Dockyard Road and Lawrence De Lima Street.

47. The Military authorities having also recently handed over the strips of land near the Gunpowder Road, the completion of this portion of the road will also be taken in hand shortly.

48. When the portions of the road referred to in the preceding two paras are completed there will still remain the portion between Lawrence De Lima Street and Wari Bunder Road and the northern approach to the proposed overbridge over the existing railway sidings at Wari Bunder. As stated in the last report this work cannot be taken in hand until the alignment of the overbridge and its southern approach is finally settled by the Port Trustees and the G. I. P. Railway Company. If the projected Port Trust Railway be sanctioned, it will be necessary to alter the original line. When this matter is definitely settled the northern approach to the overbridge and the roadway in continuation thereof, up to Lawrence De Lima Street, the plans and estimates of which are ready, will be taken in hand.

Extension of Victoria Road.

49. A great portion of this road has been completed since some time past. Its entire completion has been delayed owing to a Mahomedan Building, which was used as a school-room, but, which was represented to be a Mosque, having come in the way. After considerable trouble this building has now been removed and the completion of the road will soon be effected.

The proposed road from Dongri Street across Nowroji Hill to Elphinstone Bridge.

50. Only one property has been acquired for this road during the year under review. Further progress has been stopped as the road forms part of one of the New Streets, which the City Improvement Trust contemplate carrying out.

ROADS AND STREETS IN AGRIPADA AND ELSEWHERE.

51. The City Improvement Trust having been formed and all the vacant land on which the Agripada Roads were to be constructed having been made over to them, no further work is to be done.

52. At the time the land above-mentioned, was made over one of the roads, *viz.*, Souter Road undertaken by the Municipality remained incomplete. The causes which retarded the completion of this road, are fully described in previous reports to which a reference is solicited. To bring an end to the negotiations with the Contractors, a compromise has been offered to them, which, if accepted, will enable the Municipality to close the accounts of the work.

53. There is also another road, *viz.*, Vincent Road, of which the accounts have not yet been finally closed. The suit filed by the Contractors for claims over and above the amount paid to them, has not yet come on for hearing. The result of this suit will be reported when the matter is finally disposed of.

Arthur Road Diversion.

54. This work which was in progress during the last year has been completed during the year under review at a cost of Rs. 16,266-11-1.

FUTURE DISPOSAL OF THE SWEEPINGS OF THE CITY.

55. As stated in the previous report, the scheme for the transportation of the Town refuse consists of the following works :—

(*a*) the construction of two tipping platforms and a Railway siding on the Mahaluxmi Flats, including the erection of culverts over the open Agripada drain crossing the line of the siding.

(*b*) the construction of Rolling stock for the conveyance of the sweepings.

(*c*) the construction of approach roads to the platforms, and

(*d*) the construction of a railway line from the Kurla Station of the G. I. P. Railway, to Deonar, the future place of deposit of the sweepings including the culverts to span the waterways.

56. The entire work comprised under (*a*), (*b*) and (*c*) has been completed.

57. The work under (*d*) has also been completed with the exception of certain petty works such as the bunds around the kutchra depositing ground at Deonar, and the pitching of the slopes of the Railway bank, which are expected to be completed in the following year.

58. The line was formally opened for use on 12th May 1899, and the transportation of the town sweepings commenced on 7th June 1899.

59. Some difficulty was encountered in carrying out the work under (*d*) (which was, as stated in the previous report, given out by contract), owing to the failure of the Contractors Messrs. Ward and Co.

After doing a certain amount of the Embankment work, the Contractors expressed their inability to proceed further and it was therefore resolved to carry out the rest of the work Departmentally. This formed the most difficult part of the scheme, *viz.*, the construction of embankments and culverts and laying of the pipe drains in the swamps, a great portion of which is under water during high tides. A beginning was made at the end of May 1898, and the work carried on to completion about the same time this year.

60. The following is a brief description of the different works carried out on the Mahaluxmi Flats, and of those between Kurla and Deonar :—

61. There are two platforms for wading the kutchra into the wagons, each having a retaining wall of uncoursed rubble masonry, 700 feet in length and 4 feet in width at the base. These walls are 39 feet apart. Each wall is provided with triangular trusses 10 feet apart from, centre to centre, and buried in masonry for carrying the longitudinal wheel guards 10″ × 10″ which project 9″ beyond the face of the walls to prevent the carts toppling over in the process of emptying their contents. These guards are placed on cast-iron brackets bolted and firmly secured to the tops of the vertical posts of the trusses.

62. The platforms are approached by two roads, 40 feet in width each, and having a total length of about 3,300 feet, leading from Clerk Road to Arthur Road. These roads are carried over the Agripada drain which has been bridged over by means of two archways, one on either side of the Railway siding, the arch being semi-circular in shape, having a span of 10 feet, the arch ring being 14 inches in thickness. A 4″ water pipe has been provided underneath these roads with hydrants of the new pattern introduced in Bombay for watering the surfaces of the roads, by means of hose.

63. There are three sidings between the platforms, which merge into two at a distance of 228 feet beyond the Agripada drain and extend towards the Clerk Road level crossing whence they work into the existing main line of the B. B. & C. I. Railway. The total length of these sidings is 2,445 feet.

64. In consequence of the nature of the soil, the permanent way is carried on a bed of 9″ of well packed rubble stone. It consists generally of 69 lbs. rails resting upon four-holed cast-iron chairs bolted on creosoted sleepers 9′ × 10″ × 5″ placed at a distance of about 2′-8″ from centre to centre.

65. The rails are carried on a skew over the Agripada drain on wrought iron composite girders one foot in depth, and made of T. and L. irons, and supported on masonry abutments, the foundations of which are 8′-6″ in width at bottom and carried to a depth of about 10 feet.

66. The whole of the siding except the portions which run between the platforms is enclosed on both sides with 7 strand wire fencing.

67. The other portion of the work, *viz.*, the Railway between Kurla and Deonar is 16,780 feet in length, excluding an additional siding which is 2,115 feet in length. Nearly the whole of the Railway runs through marshy ground and is carried on an embankment made of the materials excavated from the adjoining ground. The Railway line is almost level throughout its greater length, its steepest grade being 1 in 200 Curves on this line have radii varying from 1,000 feet to 2,000 feet. The line of railway, as constructed, will divide the depositing ground into two parts. The portion to the south will be completely cut off from the sea, while that to the north will be protected hereafter by means of an Embankment, to keep out the sea water, and to prevent the deposited materials from being washed away.

68. A storm-water canal has also been constructed alongside the southern and south-eastern boundary of the depositing ground, for intercepting the storm-waters from the high lands and discharging it into the sea.

69. The total length of this canal is about 10,476 feet. It is 75 feet in width at its commencement, and 175 feet at its end. In the bank of the canal separating the depositing ground from the canal, thirty, 9″ flap traps have been provided for passing out the rain-water from that ground.

70. Certain alterations had also to be made in the Rifle Ranges at Kurla through which the Railway line passes to admit of the shooting being done across the Railway.

71. It has been arranged that the Health Department should carry out the work of loading the material into the wagons at the Tardeo Flats and unloading it at Deonar. The two Railway Companies will carry the material, at the rates and charges mentioned in the previous report, and the maintenance of the Railway line between Kurla and Deonar will be looked after by this Department.

72. Quarters have been erected on a high plot of ground near Chimbur between Kurla and the depositing ground for the staff employed to unload the sweepings at Deonar. It consists of four blocks, each containing 20 rooms, with verandahs 6½ feet wide on either side of it. Each room is 12′ × 10′. Quarters have also been built for the Inspector, and an Office and a store room, with washing places, latrines, a shed for bhangis, &c. These quarters are supplied with water by means of a 2″ service pipe taken from the 48″ Tansa main. A 1″ pipe has been taken further on to the depositing ground.

73. It is expected that the ground would be reclaimed in about 23 years, if the quantity of refuse remains as at present.

74. The land at Chimbur admeasuring about 60 acres, reclaimed by the Municipality some time ago, with town sweepings is let for cultivation for Rs. 7,380, for the year 1899-1900.

75. It is estimated that the land now proposed to be reclaimed will yield a revenue of about one lakh of Rupees after the reclamation is completed, if it yields the same proportionate revenue as that derived from the one above-mentioned.

76. The whole of this work has been under the immediate superintendence of my personal assistant Mr. Maneckji Sheriarji Bharucha, L.C.E., and Messrs. Madhavrao Ramchandra Natu and Muncherji Edulji Joshi, L.C.E., Inspectors, looked after the execution of the work and were responsible for the levels, measurements and keeping of accounts. I cannot speak too favourably of the way each performed his work. Their exertions in carrying out the work so successfully, deserve special mention from me.

MISCELLANEOUS WORKS.

Burial-Grounds, &c.

77. All the works for the preparation and completion of the burial-ground for the use of the Suni-Mahomedans at Tank Bunder have now been completed.

78. The enquiry in the matter of the acquisition of a portion of Narielwadi, admeasuring 29,837·33 square yards, for the future extension of the above Mahomedan Burial Ground referred to in the last report, has now been nearly completed, by the Collector of Bombay, and the land will shortly be handed over to the Municipality, when arrangements will be made to fill it up and to build an enclosure wall around it.

79. The work of constructing walls around a portion of the land, purchased from Mr. Ashburner at Mount Road, has been completed, and the land has already been handed over to the Beni-Israel Community for burial purposes.

80. A large plot of land has also been acquired for the extension of the Christian Cemetery at Sewri. It admeasures 30,390 square yards. Private negotiations with the owner of the ground for its purchase having failed, he having demanded an unreasonable price, recourse was had to the Land Acquisition Act. The owner claimed Rs. 3,23,274, and in addition 15 per cent. for compulsory acquisition. Strenuous efforts had, therefore, to be made to combat this unreasonable claim, with the result that after a protracted hearing the Collector finally awarded Rs. 39,699. The owner declined, at first, to accept the Collector's award, and gave notice of his intention to appeal to the High Court. But before the case came on for hearing, wiser counsels prevailed and he has now accepted the Collector's award, and has paid the expenses incurred by the Government Solicitors on behalf of the Municipality.

81. The work of preparing and filling in the ground and building a compound wall round it will be taken in hand during the next year.

82. One of the two plots of land for the Burning and Burial Ground at Mahim, has been purchased and the sanction of the Corporation having been obtained for the acquisition of the other, it will be acquired shortly. Negotiations are being carried on with the owner for its purchase. If these fail the land will be acquired under the Land Acquisition Act.

83. The following statement gives the particulars of Petty Works executed during the year 1898-99 :—

Number.	Description of Work.	Amount of sanctioned Grant.	Work entrusted to	Date of Commencement.	Date of Completion	Total Cost of Work.
		Rs. a. p.				Rs. a. p.

LOVE GROVE PUMPING STATION.

85. Due attention has been paid to the maintenance of the Worthington Pumping Engines and they continue to work very satisfactorily.

86. The efficiency of the pumps, as tested by fortnightly observations taken by the Drainage Staff, showed an average of 92·4 per cent.

87. The efficiency for the four previous years was as follows:—

1894-95	96·00 per cent.
1895-96	94·00 „
1896-97	91·00 „
1897-98	91·90 „

88. In 1897-98 the gunmetal rams of No. 1 Engine which were much scored and reduced in size owing to the passage of silt through the pumps were turned down and new ram bushes to correspond with the smaller diameter of the rams were put in their place. This procedure was adopted to save the cost of new rams which are heavy and expensive castings.

89. It was found however that the reduced thickness of metal was not sufficient to withstand the pressure to which the rams were exposed and after working for some time they showed signs of collapsing. They were consequently removed and replaced with cast-iron rams made in the Municipal Workshops.

90. The use of cast-iron rams in place of gunmetal ones is an experiment but so far they have answered all expectations. Cast-iron is much cheaper than gunmetal and it has been possible by the use of cast-iron to make the rams much more substantial and to give them such thickness as will allow of their subsequent turning down when they become worn without unduly impairing their strength.

91. The following table gives the combined total number of revolutions of all the Engines for each month of the year:—

Month and Year.	Total Number of Revolutions.
March 1898	1,718,204
April ,,	1,598,918
May ,,	1,542,248
June ,,	1,890,938
July ,,	2,242,426
August ,,	2,083,368
September ,,	2,404,094
October ,,	2,058,549
November ,,	1,848,939
December ,,	1,880,921
January 1899	1,759,283
February ,,	1,564,635
Total for the year ...	22,592,523

92. 1,265 tons of Borrea Anthracite coal, 1,254 tons, 18 cwts. and 1 qr. of Singareni coal and 900 tons of Cardiff coal were consumed during the year.

93. The average rate per ton, for the Borrea Anthracite coal was Rs. 16-11-10·8, for Singareni Rs. 16-3-1·2, and for Cardiff Rs. 22-3-0. The average rate per ton for all of these descriptions of coal was Rs. 17-15-7·4 against Rs. 14-2-7½, in the previous year. The average daily consumption was 9 tons, 7 cwts. 1 qr. 15·9 lbs. against 10 tons, 1 cwt. 10½ lbs. in the previous year.

94. Owing to the high rates prevailing for coal during the year on account of the Welsh Miners' strike, the grant of Rs. 56,000, for the purchase of coal was exceeded by a sum of Rs. 5,479-8-10. This excess was met by a transfer of Rs. 5,500 from savings under other heads of the Drainage Department Budget, *vide* Corporation Resolution No. 7788, dated 15th December 1898.

95. 1,024½ lbs. of Dermatine valve faces for the pumps were purchased from Messrs. Macbeth Brothers and Company at a total cost of Rs. 3,196-7-0 being at the rate of Rs. 3-1-11$\frac{3}{5}$ per lb.

96. 1 dozen cast-iron caps and back plates with bolts and nuts were purchased for the Bab-cock, Wilcox boilers from Messrs. James, Simpson and Company through their agent, Mr. T. C. Pulman, at a total cost of Rs. 68.

97. A 6-inch Centre Screw-cutting lathe was purchased from the Palej Lal Gin and Press Company at a cost of Rs. 610. This lathe was obtained to replace a 9-inch centre lathe which was formerly in use at the station and which was transferred to the Municipal Workshops in September 1896 as it was found that the number of lathes at the latter place were not sufficient to execute the repairs and renewals required at the station with sufficient despatch.

98. 48 High-pressure Cylinder piston-rings and 64 Intermediate Cylinder rings have been ordered from Messrs. James Simpson and Company through their agent at a total cost of Rs. 1,270. The rings were not received before the close of the year and the amount to be paid for them will therefore be renewed with the other lapsed grants for the year under report.

99. On account of the isolated position of the station and its important functions, it has been considered advisable to provide fire arms and ammunition for the use of the four Engineers so that at times of riots or public disturbances they may be able to efficiently guard the premises and the workmen employed there.

100. 4 revolvers and 50 rounds of Ammunition were therefore purchased from Messrs. Treacher and Company at a total cost of Rs. 159-0-8. Licenses for the possession of fire arms were obtained from the Commissioner of Police for two of the Native Engineers at a cost of four anuas each.

101. The work of converting the old Engine house into a Shred Lifter Chamber, Office and Godown sanctioned by the Corporation under their Resolution No. 12033 of 4th February 1897, at an estimated cost of Rs. 25,625, has made fair progress, but was not completed at the end of the year. The removal of the massive foundations of the old Engines has been a very laborious undertaking and has taken several months to accomplish.

102. No progress has been made with the renewal of the brick out-fall chamber on the line of the out-fall sewer. The work had to be postponed for want of funds. The chamber is in a very bad state and it should be taken in hand as soon as possible.

103. There have been no changes in the Engineering staff during the year except that Mr. Nasarwanji Hormusji Daruvala, 3rd Engineer, was appointed to act as an Inspector under the Head Plumber from

May 25th to 30th June. During the period of his absence Mr. Shamrao B. Kantak, 2nd Engineer at the Colaba Compressor Station, acted for him.

104. Veterinary-Lieut.-Col. J. Anderson continued to occupy the bungalow on the property owned by Messrs. Tribhuvandas Varjivandas and Jagmohandas Varjivandas during the year at a monthly rental of Rs. 80.

105. The following statement shows the grants and actual expenditure under each head of the Budget, for the maintenance of the station :—

Sections.	Particulars.	Budget grants with transfers and extra grants.	Expenditure.	More.	Less.
	Love Grove Pumping station.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

HOUSE DRAINAGE CONNECTIONS.

106. The street portions of House Drainage Connections carried out by the Contractors Messrs. Dewram Keshavji and Company were as follows :—

Name of the District.	No. of connections.	Total cost.
		Rs. a. p.
Mandvi	398	12,752 0 0
General District. { New houses	356	9,975 15 3
General District. { Old houses in various parts of the City.	172	
Mugbhat	271	6,959 11 1
Khamballa Hill	57	5,262 1 7
Parel	64	2,544 1 3
Carnac Road	53	1,602 0 4
Colaba	9	661 6 4
Pirkhan Lane	1	55 3 3
Total ...	1,381	39,813 4 2

107. As against the above number of 1,381 street connections, action by notice and by summons has been taken against 1,342 house owners and house connections enforced. Much difficulty has been experienced in getting house Connection Work done owing to many house-owners having left the City on account of Plague.

CATCHPITS, WATER GULLIES, MAN-HOLES, VENT-SHAFTS, &c.

Catch-pit on the Mint Road Sewer.

108. In the original estimate for the work, wooden shutters or dampers were provided to exclude sewage from the catch-pit at the time of emptying it.

109. It was considered when the work was taken in hand that with such appliances the arrangements would be unworkable and it was therefore decided to substitute cast-iron pen-stocks for the wooden shutters.

110. The extra cost of providing such pen-stocks which was estimated at Rs. 520 was met by a transfer from savings in the grant for Drainage Loan Works, miscellaneous extension and improvements of drains as per Corporation Resolution No. 4057, dated 4th August 1898.

111. The pen-stocks were made in the Municipal Workshops under the supervision of the Assistant Engineer, Mechanical Branch, and the cast-iron pipes required for the work were obtained from the Casting Contractors.

112. The work was nearly completed at the close of the year and the certified expenditure on account of it up to the 31st March 1899 amounted to Rs. 4,804-2-4.

Catch-pit on the Hornby Road Sewer near the Arthur Crawford Markets.

113. The construction of this catch-pit was further deferred in consequence of financial difficulties.

Construction of Water Gullies in different parts of Bombay.

114. The construction of (*a*) three water gullies with connecting drains at Hornby Road in front of the Victoria Terminus and (*b*) two water gullies at the east end of Carnac Bridge was completed by Messrs. Devram Keshavji and Company on the 27th April 1898 and 6th June 1898, respectively.

115. The total cost of each of the works, respectively, amounted to Rs. 763-8-8 and Rs. 893-8-3.

116. Owing to objections raised by Mr. Pestonji Naserwanji Godewala, the drain from the water gully at the Custom Pier Road, Mazagaon, was not laid through his land but carried direct to the sea.

117. The total cost of the work consequently amounted to Rs. 275-4-10 and the excess of Rs. 233-4-10 over the grant of Rs. 42 originally sanctioned for the work was met from savings in the grants for other water gullies in accordance with the Municipal Commissioner's No. 9657—18th July 1898.

118. The work was completed by Messrs. Devram Keshavji and Company on the 20th September 1898.

Construction of Permanent Man-holes on Drains in Wards A, B, C, D and E.

119. Eighteen man-holes were constructed in Duncan Road and six in Grant Road on the sites selected by the Health Officer.

120. The work was carried out Departmentally at a total cost of Rs. 1,645-14-0.

Construction of Man-holes and shafts on the Sewer between the European General Hospital and the Arthur Crawford Markets.

121. A grant of Rs. 4,193 was sanctioned under the Corporation Resolution No. 9000—12th January 1899, for the construction of five square man-holes and five shafts on the sewer between the European General Hospital and the Arthur Crawford Markets.

122. The execution of the work was taken in hand Departmentally and was in progress at the end of the year.

123. The certified expenditure on account of the work up to the 31st March 1899 was Rs. 977-5-7.

Construction of three Square Man-holes and six shafts on the Mint Road Sewer.

124. A grant of Rs. 2,550 was sanctioned for the work under the Corporation Resolution No. 10976, dated 14th February 1898.

125. The work was taken in hand Departmentally and completed on the 9th July 1898 at a total cost of Rs. 2,237-14-0.

INSTALLATION FOR PROVIDING ELECTROLIZED SEA-WATER.

126. The working of the plant was stopped on 20th June 1897 owing to the commencement of the South-West Monsoon, and on account of the delay in completing the arrangements for pumping up sea water by means of the Electrical transmission plant.

127. The difficulties raised against the proposed over-head electric line from the Depôt to the Carnac Bandar were finally overcome and the work was completed by the Municipal Workshops by the 6th April 1898 at a total cost of Rs. 1,342-5-4 against the estimated amount of Rs. 1,622.

128. The plant was re-started on 7th April 1898 and it was found that the new arrangements made for obtaining a supply of sea water worked quite satisfactorily and with much greater economy than the Steam pump previously used.

129. Under their Resolution No. 1196 of 5th May 1898, the Corporation accorded sanction to the utilisation of the balance of Rs. 3,353 of the lapsed grant of Rs. 3,425 sanctioned under their Resolution No. 1396 of 6th May to provide for the working expenses of the plant during the year 1898-99.

130. The working of the Installation was continued without intermission up to the 18th June 1898 when it was again closed at the break of the Monsoon.

131. During the above period of work the Drainage Department used considerable quantities of the Electrolized fluid for flushing the sewer in the Fort District, the fluid being transported there in the large flushing carts belonging to the Department, and the Health Department also used it in small quantities, taking it into different parts of the City in wooden casks procured for the purpose.

132. Under his No. 13026 of 15th July, the Health Officer reported as follows to the Municipal Commissioner: "The results of experiments "in flushing privies have been most successful and they lead me to think "that the Electrolised fluid will be very valuable for the flushing of the "shafts of privies. It instantly destroys all disagreeable smells and what "is more important, its effects last for a long time. The only objection "to it is the pungent odour of Chlorine. The favor of your sanction is "therefore requested to eight wooden carts being made for conveying "the fluid round for further trial."

133. After some correspondence it was eventually decided to make use of eight of the iron road watering carts in preference to making new carts for conveying the fluid as several road watering carts were out of use owing to the watering of roads direct from the hydrants.

134. Certain alterations had to be made to these carts to render them suitable for the work and this was sanctioned under the Commissioner's No. 20651 of 11th November 1898 at an estimated cost of Rs. 35 per cart.

135. On the completion of the alterations to the carts the installation was again started on the 9th January 1899 and it continued to work at the close of the year. The Health Department carted away the greater portion of the fluid produced during the above period and the Health Officer will, no doubt, submit a report on the result obtained.

136. The expenditure incurred on the working of the plant during the year, was as follows:—

	Rs.	a.	p.
Establishment (exclusive of Watchmen employed during the time the plant was not at work)	485	15	10
Watchmen (employed during the time the plant was not at wor')...	134	11	3
Stores and Boiler Inspection Fee	414	14	10
Coal	1,795	8	0
Repairs	70	8	7
Total ... Rs.	2,901	10	6

137. In making a calculation of the cost of producing chlorine by this process, the cost of watchmen's wages during the time the plant was stopped has been deducted. The total working expenses would therefore be Rs. 2,766-15-3.

138. The number of days the plant was actually at work was as follows :—

April 7th to 30th, 1898	24	days.
May 1st to 31st—Less—		
1 day stoppage for holiday	29	"
1 " " " washing out the boiler...		
June 1st to 18th—Less—		
1 day stoppage for holiday	17	"
January 9th to 31st, 1899	23	"
February 1st to 28th—Less—		
1 day stoppage for holiday	26	"
1 " " " washing out the boiler		
Total days' actual work...	119	days.

139. The average production of chlorine per diem, inclusive of stoppages for oiling the engine and cleaning the boiler fire, is 21,000 grammes. 21,000 grammes × 119 days=2,499,000 grammes, total =49·191 cwts. The cost per ton would thus be Rs. 1,130.

140. Adding Interest and Sinking Fund on the capital outlay incurred in the purchase and fixing of the electrolisers and the value of the portable engine used to drive the same (exclusive of the Interest and Sinking Fund on the value of other items, such as engine-house and storage tanks, ground rent and cost of pumping up the water at Love Grove,) the total cost per ton would be about Rs. 1,450.

141. In comparing the cost of producing chlorine by the electrolytic process with that obtained from chloride of lime, it may be stated that good commercial chloride of lime is rarely procurable in Bombay. Assuming, however, that when a case is freshly opened, it contains from 30 to 35 per cent. of free chlorine, and taking the cost of the chloride of lime at an average rate of Rs. 260 per ton, the cost of chlorine thus obtained would be about Rs. 780 per ton.

142. The Assistant Executive Engineer, Mechanical Branch, in his report No. 1111 of 26th July 1897, on the first experimental working of the electrolytic process, assumed that the chlorine obtained by either means were of equal value, weight for weight for disinfecting purposes.

143. The Hermite Electrical Sanitation Company, however, in their letter to the *Times of India* newspaper of November 19th, 1897, took strong exception to this assumption, and quoted the authority of several well-known chemists and scientists who found that the chlorine produced by the Hermite Electrolized Solution was twice as effective as the chlorine derived from Bleaching powder or Chloride of lime.

144. If the two methods of production are compared on this basis, even then the cost of production by the electric process, after adding interest on capital, expenditure, &c., for buildings and land occupied by the plant, would not be appreciably less than the cost of Chloride of lime. The Health Officer, however, does not consider that any comparisons on this basis can be fairly made: because Chloride of lime is a deliquescent powder, while Electrolised sea water is a fluid containing not only Chloride of lime but also other agents having a powerful deodorising action.

LATRINES, URINALS AND MISCELLANEOUS WORKS.

Conversion of the Night-Soil Depôt at Haines Road into Receiving Depôt.

145. Messrs. Devram Keshavji and Company who were Contractors for the work, were unable to complete the same within four months from the date of order, *viz.*, the 25th March 1898, as stipulated under their contract for the following reasons :—

(*a*) The heavy and almost incessant rain of the month of July 1898 seriously interfered with the progress of the work.

(*b*) The putting up of a roof over the hoppers and a screen wall on the north side of the Depôt was sanctioned by the Standing Committee under their Resolution No. 3122, dated 6th July 1898, and that Resolution having been forwarded to the Corporation, the Corporation accorded sanction to the same at their meeting of the 4th August 1898.

146. Under the circumstances a three months' extension of the contract time was sanctioned under the Municipal Commissioner's No. 16731, dated 28th September 1898, and the extra establishment charges were met from the contingency provision for the work.

147. The work was completed by the Contractors on the 21th October 1898, and the total expenditure on the work, including establishment and contingent charges, amounted to Rs. 13,647-12-0.

LATRINES.

Bhoiwada Latrines.

148. The construction of the latrines at Bhoiwada was completed by Messrs. Devram Keshavji and Company, Petty Works Contractors, on the 18th January 1899, at a total cost of Rs. 2,249-14-9.

Latrines between Calicut and Kochin Streets.

149. The work of paving the open ground and constructing a bund around the latrine between Calicut and Kochin Streets was completed by Messrs. Devram Keshavji and Company, Petty Works Contractors, at a total cost of Rs. 1,746-8-8.

Imamwada Latrines.

150. The construction of the latrines at Imamwada was completed departmentally at a total cost of Rs. 734-2-10.

Latrines at the Junction of Falkland Road and Gilder Street.

151. A grant of Rs. 367 was sanctioned for converting the flushing tanks of the latrines into automatic flush tanks. The work was carried out departmentally at a total cost of Rs. 364-15-5.

Colaba Latrines.

152. The construction of latrines at Colaba was deferred for some time in consequence of financial difficulties. Towards the close of the year the proposals for constructing two sets of latrines on the two sites acquired for the purpose were under consideration.

Walkeshwar Latrines.

153. The Chairman of the Improvement Trust represented to Government that the location of a permanent latrine on the site selected by the Health Officer, would deteriorate the property of the Trust in the locality and proposed that a portable latrine should be erected on the site.

154. Government thereupon decided under their Resolution, No. 1302, dated 20th February 1899 (Revenue Department), that the Municipality would be permitted to erect a portable latrine on the site in question, on an annual tenancy at such rent as the Collector of Land Revenue, Customs and Opium, Bombay, may fix.

155. The preparation of a revised estimate for the erection of a portable latrine was taken in hand at the close of the year.

Latrines on the Apollo Reclamation.

156. The Wellington Reclamation having been laid out and new roads having been constructed thereat, the Port Trustees desired the removal of latrines which existed on a site rented by the Municipality from the Trustees on the Apollo Reclamation at a nominal rental of Rs. 5 per annum, and they suggested that the Municipality should

erect other latrines near the Saluting Battery in substitution of those which were proposed to be removed on a site near the Saluting Battery which they offered for the purpose, on the following terms :—

(*a*) The arrangement to hold good for ten years.

(*b*) The Municipality to pay to the Trustees Rs. 5 as an annual rent for the new site.

(*c*) That in the event of the Trustees requiring the Municipality to give up the site within the term of ten years, the Trustees should provide another site and pay half the cost of the removal.

(*d*) That the Trustees would share with the Municipality the cost of the proposed removal of the latrines.

157. The terms having been accepted the Secretary, Port Trust, deposited the following sums :—

	Rs. a. p.	Rs. a. p.
On the 4th June 1898 :—		
One half of the estimated cost of erecting a twelve-chamber latrine on water carriage system and a two-chamber urinal	2,809 0 0	
Full estimated cost of 9″ pipe sewer in Merewether Road	1,255 0 0	
		4,064 0 0
On the 25th July 1898 :—		
One half of the cost of removing the old latrines	47 8 0	
Estimated cost of laying a 9″ pipe sewer in the western portion of the extension of Henry Road	637 0 0	
Estimated cost of laying a 9″ pipe sewer in Merewether Road from Henry Road to Ormiston Road	2,966 0 0	
		3,650 8 0
Total ... ... Rs.		7,714 8 0

158. The work was taken in hand departmentally and nearly completed in the beginning of November 1898, when the Water and Drainage connections, and the corrugated sheet partition only remained to be provided, but the further execution of the work was stopped in accordance with the Municipal Commissioner's No. 20291, dated 18th November 1898, as the Port Trustees desired to lay out for building purposes the ground occupied by the latrines and urinals under construction.

159. The Trustees' proposal to remove the newly erected latrines and urinals and to erect new ones in their stead on a site offered by them, on Henry Road was under consideration at the close of the year.

URINALS.

160. The erection of the undermentioned urinals, which was in progress at the close of the last year, was completed by Messrs. Dewram Keshavji and Company, Petty Works Contractors, at the total cost mentioned against each :—

	Total Cost. Rs. a. p.
Two-chamber trough pattern urinal near Messrs. Richardson and Cruddas's Workshop at Parel Road	452 8 9
Six-chamber trough pattern urinal at Masjid Street	586 9 1
Four-chamber trough pattern urinal at the end of Barrack Street	782 15 2

161. The erection of the following urinals was entrusted to the same Contractors, and was also completed by them at the total cost noted against each :—

	Total Cost. Rs. a. p.
Two-chamber trough pattern urinal at De'Souza Street	447 3 6
Six-chamber trough pattern urinal against the wall of the Mumbadevi Tank opposite Coppersmith Bazar	980 13 4
Six-chamber trough pattern urinal at the east wall of Pedder Market, Dockyard Road, Mazagaon	1,098 15 2
Two-chamber trough pattern urinal near St. George's Hospital, Fort	690 13 0
Two-chamber urinal for females on the pavement at the east side of Fort Market.	652 6 3
Three-chamber trough pattern urinal at Nagdevi Street	529 7 3
Six-chamber trough pattern urinal at Cathedral Street	1,004 13 3
Six-chamber trough pattern urinal at DeLisle Road at the south-west corner of the G. I. P. Railway Store Yard ...	1,022 6 5

162. The construction of a two-chamber urinal at Imamwada was carried out departmentally at a total cost of Rs. 734-2-10.

163. The site for erecting an urinal at Apollo Bandar not being available, the question of constructing an under-ground urinal in the locality, was under consideration at the close of the year.

164. The erection of a four-chamber urinal at Jail Road, East, was entrusted to Messrs. Dewram Keshavji and Company, Petty Works Contractors, and was nearly completed by them when owing to objections raised by Mr. Graham, the owner of a house in the locality, it was decided to shift the urinal to Chinch Bandar Road.

165. The latter work was entrusted to the same Contractors, and was in progress at the close of the year.

DRAINAGE SLUICES.

166. The sluices and penstocks which are in charge of the Drainage Branch at the following places were worked satisfactorily during the year with the usual staff :—

(*a*) Dharavi.
(*b*) Warli.
(*c*) Love Grove.
(*d*) Flats.
(*e*) Bellasis Bridge.
(*f*) Queen's Road.
(*g*) Carnac Road.
(*h*) Mint Road.

167. The expenditure incurred for the maintenance of the sluices did not exceed the Budget provision.

168. The existing gates at the Love Grove Sluices, which have been in use since 1878, being rotten and unsafe, a grant of Rs. 7,345 was sanctioned under the Corporation Resolution No. 2109, dated 9th June 1898, for making and fixing four pairs of gates at the Sluices.

169. The work was entrusted to the Asistant Engineer, Mechanical Branch, for execution at the Municipal Workshops, and was in progress at the close of the year.

170. The gates at the Warli and Dharavi Sluices are also in need of renewal, but it is not advisable to incur any heavy expenditure for their renewal until the question of the future outfalls for surface and subsoil waters is settled.

MISCELLANEOUS DRAINAGE.

171. The works under this head, comprising repairs and alterations to, and constructing the cleaning of sewers and drains generally, together with the cleaning and flushing of the main sewers, were carried out under the supervision of the Chief Inspector of Drains.

172. Daily reports in the prescribed form, showing the number of sewer-scrapers and the work done, were submitted by the Chief Inspector.

173. The total length of sewer cleaning carried out in different parts of the City during the current official year has been 68,588 feet as under and as against 51,880 of the year before :—

Mint Road	3,945
Carnac Road	3,184
Prarthana Samaj to Khetwadi 10th Lane	2,795
Falkland Road	3,314
Ardeshir Dadi Street	105
Pipe Depôt	1,335
Clerk Road	3,536
Ripon Road	7,922
DeLisle Road	18,296
Haines Road	4,424
Church Gate Street	850
Mayo Road	7,253
Hornby Road	2,160
Chaupati Road	1,620
French Road	200
Mathew Road	700
Girgam Road	1,050
Kamatipura Centre Road	2,476
Curry Road	2,800
Gilder Street	623
Total Rg. feet...	68,588

Sanitary Arrangements of Health Camps, Plague Hospitals, &c.

174. Fifty-nine works in connection with the sanitary arrangements of the various Health Camps, Observation Camps and Plague Hospitals were carried out by the Drainage Branch. Out of these 48 were executed under the supervision of the Chief Inspector of Drains, and 11 under the supervision of the Head Plumber.

175. The following statement shows that 2,378 notices were served on house-owners.

176. Proceedings were taken in the Police Courts against the house-owners who failed to comply with the requirements of the various sections of the Municipal Act :—

Sections of the Municipal Act.	Total Number of Notices issued.	Subsequently complied with.	Not complied with.	Remarks.
222	3	1	2	
228 & 229	1	1	.....

WORKS EXECUTED.

Works executed Departmentally.

178. The following is a summary of Miscellaneous Drainage Works executed during 1898-99 for Municipal Departments and private parties by the Drainage Branch :—

Number of Works.	Name of Department.	Amount. Rs. a. p.	Aggregate Cost. Rs. a. p.
	Executive Engineer's Department—		
75	Drainage Branch	4,787 13 8	
21	Water Branch	229 8 0	
42	Road Branch	2,710 9 8	7,727 15 4
179	Health Department	... ...	4,104 14 0
21	Market do.	... ...	430 2 4
6	Fire Brigade do.	... ...	30 1 5
8	Garden do.	... ...	189 4 0
1	Assessment do.	... ...	3 12 8
1	Special Drainage Department ...	... ...	86 7 11
8	Joint School Committee do. ...	... ...	102 9 2
59	Plague Department	... ...	15,199 8 7
82	Private Parties	... ...	10,746 2 4
448	Total ... Rs.		38,620 13 9

Works executed by the Petty Works Contractors.

179. The following Drainage works were entrusted to, and executed by, the Petty Works Contractors, Messrs. Devram Keshavji and Company :—

Consecutive No.	Nature of Works.	Locality.	Cost of the Work. Rs. a. p.
1	Laying storm-water drain at 12 places.	Across the footpath along DeLisle Road.	121 5 0
2	Constructing a rubble masonry drain.	Tardeo Road	468 12 2
3	Removing and resetting zinc vent-shaft over the centre point of the roof of house No. 10.	Ropa Lane, Chandanwadi ...	58 4 0
4	Ovoiding the road side drain from the stand-pipe in front of Mr. Davar's new premises.	Nepean Sea Road	234 7 4
5	Constructing six-chamber trough pattern urinal.	At the East end of the Pedder Market, Dockyard Road, Mazagon.	1,098 15 2
6	Constructing a small two-chamber urinal.	Near St. George's Hospital ...	690 13 0
7	Constructing water-gullies ...	At the East-end of Carnac Bridge.	393 8 3
8	Ovoiding open drain at the side of the road in front of the tent pitched for the use of the men, of H. E. the Governor's Band.	Walkeshwar	1,150 12 11
9	Oviding the drain in front of the house of Mr. Nejmudin Tyabji.	Mirza Alli Street	130 11 10
10	Erecting a flushing tank at the head of the Street drain.	Gunpowder Road near Nowghar Tank.	209 2 11
11	Constructing a two-chamber trough pattern urinal.	DeSouza Street	447 3 6
12	Ovoiding side drain and catch-pit with blue stone frame for cast iron grating and brick masonry chamber, &c.	Junction of Nepean Sea Road and Narayen Dabholkar Road.	316 8 6
13	Laying table stones and constructing three water gullies.	Chandanwadi	390 12 7
14	Erecting a two-chamber female urinal on the footpath outside.	Fort Market	631 9 6
15	Removing and refixing metal zinc vent shaft of house No. 6-8-10.	Bhuleshwar Road, opposite Bhuleshwar Market.	65 6 0
16	Constructing a storm-water drain	South of Harkness Road ...	594 5 11
17	Constructing a masonry drain ...	Khandia Tank Street. ...	1,861 11 9
18	Removing the 12" stone-ware broken pipe laid across the Queen's Road and replacing it with an ovoid drain.	Junction of Queen's Road and 1st Marine Lane.	198 8 5
		Carried over...	9,557 14 9

STORES AT BELLASIS BRIDGE DEPOT.

Stoneware Pipes.

180. Stoneware pipes for the Special Drainage Department were supplied by Messrs. Richardson & Cruddas.

181. A quantity of stoneware flap pipes was removed from the Palton Road Store Yard to the Bellasis Bridge Depôt to provide room for work at the Municipal Workshops in accordance with the Municipal Commissioner's No. 22348, dated 8th December 1898.

182. The value of the pipes and specials (traps, junctions, bends, &c.), received during the year was Rs. 22,498-7-7, and of those issued to the different Contractors and sold to Plumbers and others amounted to Rs. 29,417-0-2.

Cast-iron and Galvanized Sheet-iron Fittings, &c.

183. Messrs. Richardson & Cruddas were unable to complete the delivery of the cast-iron pipes and fittings referred to in para. 249 of the last Administration Report until the 9th November 1898.

184. They explained that the delivery of pipes and fittings which were imported by them from England was delayed owing to the strike and heavy breakage in the last lot of pipes imported by them and that the delivery of the articles manufactured by them at their workshops was delayed in consequence of the labour difficulty owing to the plague.

185. The contract time for the supply was, under the circumstances, extended to the 9th November 1898 as per Standing Committee's Resolution No. 8786 of 11th January 1899.

186. Cast-iron manhole frames and covers and other castings for ordinary drainage and miscellaneous works were supplied by Messrs. Sorabji Shapurji & Co., the Casting Contractors for the year.

187. The total value of the cast-iron articles received and issued during the year amounted to Rs. 11,495-13-1 and Rs. 8,055-7-3, respectively.

Cement.

188. Tenders, returnable on the 27th April 1898, were invited for a supply of 800 casks of Portland Cement.

189. Only two tenders were received and that of Mr. Gulamali Jivaji Pachmariwala being the lower, was accepted as per Standing Committee's Resolution No. 1455, dated 23rd May 1898.

190. The Cement delivered was manufactured in Glasgow by Messrs. Gillingham and Company, and the rate allowed for it was Rs. 9-3-0 per cask of 380 lbs. net weight.

191. Under the terms of his agreement Mr. Gulamali was bound to deliver the Cement in three instalments as follows :—

300 casks	on or	before the	31st May 1898.
Do.	do.	do.	20th June 1898.
200	do.	do.	10th July 1898.

192. The Contractor was unable to complete the delivery of the first instalment until the 6th June, of the second instalment until 18th July, and of the third instalment until the 19th July 1898.

193. He explained that the delay in the delivery of the first instalment was owing to the delay in unloading the casks of Cement from the S.S. "Arabia" in consequence of the casks having been deposited in the bottom of the steamer and that the delay in the delivery of the second and third instalments was due to heavy rain which prevailed not only on the dates on which the deliveries were due, but also on the four or five days following those dates in consequence of which there was a large accumulation of water in front of the Store Yard at the Bellasis Bridge Stores Depôt, which he apprehended would damage the cement if then delivered.

194. The contract time for the delivery of the first, second and third instalments was consequently extended to the 6th June, 18th July and 19th July 1898, respectively, under the Municipal Commissioner's No. 13803, dated 31st August 1898.

195. Tenders, returnable on the 10th November 1898, were invited for a further supply of 1,900 casks of Portland Cement.

196. Three, tenders were received, and that of Messrs. Isufali Abdulali and Company being the lowest, was accepted under the Standing Committee's Resolution No. 17244, dated 23rd November 1898.

197. It subsequently turned up that the " Eagle Brand " of Cement which Messrs. Isufali Abdulali and Company had tendered to supply, was not English made, but was one manufactured in Belgium. The Municipal Commissioner, therefore, directed under his No. 22544 of 9th December 1898, that fresh tenders be invited for the above quantity of Cement.

198. Fresh tenders, returnable, on the 9th January 1899, were accordingly invited. Six tenders were received, and that of Messrs. John Fleming and Company being the lowest, was accepted under the Standing Committee's Resolution No. 8809, dated 11th January 1899.

199. The Cement delivered was manufactured by Messrs. Knight, Bewan and Sturge of London, and the rate allowed for it was Rs. 8-11-11 per cask of 380 lbs. net weight.

200. Messrs. John Fleming and Company, under the terms of their contract, were bound to deliver the Cement in four instalments as follows :—

236 casks within two weeks from the date of receipt of order.				
660	do.	five	do.	same order.
604	do.	eight	do.	do.
400	do.	eleven	do.	do.

201. The Contractors delivered the first, third and fourth instalments of Cement within due time, but they did not deliver the second instalment until the 22nd February 1899. The date due for the delivery of this instalment was 16th February 1899.

202. They explained that the reason for the short delay in the delivery of the second instalment was that, while the vessel which brought the Cement, arrived early on the 11th February, it did not dock till the 13th idem, and there was great delay in getting the casks duly landed.

203. The contract time for the instalment was consequently extended to the 22nd February 1899, under the Municipal Commissioner's No. 31356, dated 20th March 1899.

204. Owing to the necessity of calling for fresh tenders for the abovementioned supply of 1,900 casks of Cement, it was not possible to obtain the required quantity until about six weeks later than at first anticipated, and this resulted in a great demand for Cement from the different Municipal Contractors and the want of it also interfered with the progress of the several departmental works.

205. One hundred and fifty casks of Gillingham and Company's Hand-brand Cement at Rs. 8-14-0 per cask were consequently purchased from Messrs. Isufali Abdulali and Company in accordance with the Standing Committee's Resolution No. 10452, dated 15th February 1899.

206. As 148 casks out of the above quantity was supplied by Messrs. Isufali Abdulali and Company immediately on receipt of order, and the two remaining casks within the next few days, the formal execution of a contract for the supply was dispensed with, as a special case, in accordance with the Municipal Commissioner's No. 30602, dated 9th March 1899.

207. The total value of the Cement received and issued during the year amounted to Rs. 17,709-0-11 and Rs. 21,306-0-0, respectively.

Value of Stores on Hand and of Receipts and Issues.

208. The following statement shows, that the value of stores on hand, at the commencement of the year (excluding Rs. 1,888-2-4 being the value of Miscellaneous English Articles) was Rs. 3,94,389-1-6, that

the receipts and issues amounted respectively to Rs. 51,703-5-7 and Rs. 58,779-0-5, and that the value of stock in hand, at the close of the year was Rs. 3,87,313-6-8 :—

No.	Particulars of Stores.	Value of Stock in hand on 1st March 1898.	Value of Stock received during the year 1898 99.	Total of Columns 3 and 4.	Value of issues during 1898-99.	Value of Stock in hand on 1st March 1899.
1	2	3	4	5	6	7
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
A	Stoneware pipes,&c.	2,00,762 11 11	22,498 7 7	2,23,261 3 6	29,417 0 2	1,93,844 3 4
B	Cast-iron fittings...	1,85,820 1 1	11,495 13 1	1,97,315 14 2	8,055 7 3	1,89,260 6 11
C	Cement	7,806 4 6	17,709 0 11	25,515 5 5	21,306 9 0	4,208 12 5
	Total Rs.	3,94,389 1 6	51,703 5 7	4,46,092 7 1	58,779 0 5	3,87,313 6 8

209. The value of the Miscellaneous English articles amounting to Rs. 1,888-2-4 has been omitted from the foregoing statement, because these articles were obtained some years ago by Mr. J. H. Grant, when Municipal Commissioner, while he was in England.

210. The articles were intended to show what Sanitary appliances were at that time manufactured there.

211. Most of the articles being unserviceable were disposed of by public auction on the 14th March 1899. The amount realized by their sale was Rs. 100.

212. The value of a few of these articles which have been reserved has not been entered in the statement, as it was not fixed until the close of the year.

THE TANSA LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

Rain.

213. The rainfall for the year 1898 was 98·68 inches, that for 1896 and 1897 being 120·13 and 104·82 inches, respectively. The accompanying diagram shows the comparative rainfalls for the different days during the years 1891 to 1898.

Days of Heavy Rainfalls.

214. The heaviest daily rainfalls of 3 inches and over in 24 hours were :—

16th	June	1898	... 3·30 inches.
18th	„	„	... 3·18 „
5th	July	„	... 3·53 „
12th	„	„	... 3·47 „
20th	„	„	... 3·30 „
21st	„	„	... 4·05 „

215. The total number of days in which the rainfall exceeded 1 inch being 38.

216. The total amount of rainfall in the drainage area during the last monsoon was estimated at 74,842 million gallons, of this about 36,424 millions or 48·6% reached the lake, the balance being evaporated or absorbed by vegetation.

217. The mean figures for the past 7 years have been 82,833 millions 40,695 million gallons and 50·7 per cent., respectively.

Quantity of Water in, and discharge from, the Lake.

Level of the Lake.

218. The lowest level reached by the water during the year was 394·53 T.H.D. being 10·48 feet below T.W.L. on 9th June 1898. The lake commenced to overflow on 8th July after 31·52 inches of rain had been registered. It finally ceased to overflow on 4th October 1898.

219. The storage above the lowest outlet on the 1st October 1898 was 18,600 millions of gallons, and on the 1st April 1899 was 12,113 millions gallons, shewing a consumption of 6,487 million gallons in 6 months, or 35·6 millions of gallons per day, including evaporation, and leakage, the last being practically *nil*. Of this about 23·8 millions was delivered into the aqueduct, the balance which is practically all evaporation shows a mean of about 4½″ per mensem during the dry season. The consumption for 8 months of the previous year from 1st October 1897 to 1st June 1898 being 8,853 millions of gallons, or 36·4 millions of gallons per day.

Water overflowing the Waste Weir.

220. The quantity of water which passed over the waste weir is calculated to have been 25,198 million gallons. The highest flood level was 405·9 T. H. D. on the 21st July.

Table of Rainfall and Height of Water.

221. Table No. I gives the details of rainfall and height of water in the lake.

222. Quantity of water which enters the duct is, as above stated, about 23·8. This is accounted for as follows:—

Delivered at Ghat-Kuper	22,600,000
Leakage mile 0 to 6	514,000
Do. do. 36 to 44	441,000
Overflow at Syphon heads and leakage which does not appear on the surface and which consequently cannot be gauged	785,000
Evaporation	60,000
	23,800,000 Gallons a day.

the balance being delivered at Ghat-Kuper Syphon head distributed over the different months of the year as follows:—

April	1898	...	...	601·2	millions of gallons.
May	,,	...	...	651·8	,,
June	,,	...	...	554·5	,,
July	,,	...	...	665·7	,,
August	,,	...	...	661·1	,,
September	,,	...	...	636·6	,,
October	,,	...	...	735·0	,,
November	,,	...	...	719·3	,,
December	,,	..	...	689·1	,,
January	1899	...	...	679·8	,,
February	,,	...	...	614·0	,,
March	,,	...	...	665·0	,,
		Total	...	7,873·1	millions of gallons.

223. Total of 12 months equal to an average of 22 million gallons per day.

Quantity of Tansa Water passed into the Vehar Lake.

224. During the year 1898-99, 47·5 million gallons of Tansa water was passed into the Vehar Lake through the clearing sluice at the 42nd mile of the duct, that during the years 1896-97 and 1897-98 being 165 and 213 million gallons, respectively. It may be noted that this amount, owing to increased consumption of Tansa water, is diminishing year by year.

Repairs to Kasheli Embankment.

225. The Corporation, in their Resolution No. 12511, dated 11th February 1896, sanctioned the sum of Rs. 62,115 for repairs to a portion of the embankment between Godauli and Balcomb. The contract for this work was let for Rs. 53,737-8-0 to Mr. Bhasker Shivram who commenced it on the 26th May 1897 and completed it during the year under report, at the cost of Rs. 48,757-5-4, a further sum of Rs. 35,892 was entered in the Budget of 1897-98, which, not having been spent during the year, will be re-appropriated during 1899-1900, the contract for which has been let to Messrs. Littlewood, Pallonji & Co., at a cost of Rs. 20,726-6-0 and the work will shortly be commenced.

Annual Inspection of, and Repairs to, the Duct.

226. The supply was shut off from the 8th to 10th September for inspection and repairs.

227. Three important leaks, miles 37-38, caused by longitudinal cracks aggregating about 700 feet in length between the invert and side walls, were cut out and stopped, reducing the leakage by over 6,00,000 gallons a day.

228. These have, however, unfortunately reappeared near the same spots, though so far in smaller quantity. If they increase, it is proposed to endeavour to stop them by means of asphalt instead of with cement at the end of next monsoon.

229. In addition to the above, a large quantity of roots were removed from the aqueduct.

Bursts on the 48 inch Main and the stoppage of Tansa Water in Bombay.

230. During the year there was one burst at Siphon No. 5 which occurred on 7th April, and which necessitated the water being shut off for three days.

231. On the 18th June a subsidence occurred in the bank, carrying the 48" pipes on Siphon No. 6 south of Bridge No. 3 over the Bassein Creek caused by the monsoon rain. The pipes were jacked back into position and three joints re-made. This necessitated a stoppage of supply for three days. The pillars supporting the pipes were raised to the outer side of the bank to prevent the recurrence of a similar accident.

232. Several similar subsidences were made good without interruption to the supply and a portion of the embankment near the mile 28 and 29, which was washed away by the bursting of a bund, repaired by throwing in rubble stones. Had it not been taken in time a serious accident would in all probability have happened.

VEHAR LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

Rainfall.

233. The rainfall for 1898 was 94·51 inches, that for 1896 and 1897 being 109·81 and 97·36, respectively.

234. The accompanying diagram shows the comparative rainfalls for the different days during the years 1891 to 1898.

Days of Heavy Rainfalls.

235. The heaviest daily rainfalls of three inches and above were :—

15th June	... ...	3·05 inches.
13th July	... ...	3·06 ,,
20th ,,	... ...	3·04 ,,
21st ,,	... ...	5·79 ,,
22nd ,,	... ...	6·23 ,,
8th Sept.	... ...	4·07 ,,
10th ,,	... ...	6·13 ,,
11th ,,	... ...	3·84 ,,

236. Total number of days of one inch and over being 37.

237. The total quantity of rain which fell in the drainage area was about 8,464 million of gallons, of this about 70 per cent. appears to have reached the lake.

Quantity of Water in, and discharge from, the Lake.

Level of the Lake.

238. The lowest water level in the Lake during the year was, 252·80 T. H. D. on 8th June 1898. The water commenced to overflow at 264·50 level T. H. D. on 11th September after 85·66 inches of rain had been registered. The overflow finally ceased on 1st October 1898. The waste weir stop planks were raised from 263·50 to 264·50 T. H. D., thus increasing the storage capacity by about 400 million gallons.

239. The storage of water on the 1st October 1898 was 11,767 million, and on the 1st April 1898, 8,940 million gallons, shewing a consumption of 2,827 million gallons from the Vehar Lake in six dry months of October to March, or equal to 15·5 million gallons per day including evaporation and leakage, but exclusive of that received from Tansa Duct during the period. The quantity of water consumed for eight months of the previous year, from 1st October 1897 to 1st June 1898, being 3,512 million gallons, or 14·4 million gallons per day.

Water received from the Tansa Duct and Tulsi Waste Weir into Vehar Lake.

240. During the year 47·5 million gallons, as above stated, were supplied to this lake from the Tansa Duct, and 865 million gallons overflowed from the Tulsi Lake into Vehar gathering ground.

Quantity of Water overflowing the Vehar Waste Weir.

241. The quantity of water that flowed over the waste weir was 2,300 million gallons.

Evaporation from the Lake.

242. The evaporation for the months of October to March was 21 $\frac{7}{10}$ inches, equal to ·115 inch per day, as detailed in table No. 13.

243. The pitching of the apron behind the waste weir, which has been washed out in the rains of 1897, was repaired departmentally, and successfully stood the overflow during last monsoon.

Filter Beds at Vehar.

244. The filter beds at Vehar have been working regularly during the year. Each of the five filter beds was cleaned every ten days on an average. The total quantity of water filtered in 347 days of the year during which the filters worked was 434 million gallons, equal to an average of 1·35 million gallons per day for four filters out of five, or 502

gallons per day per square yard of working filter. But it may be noted that these filters work during the night at a diminished rate than during the day. In addition to this about 2 million gallons per day of unfiltered water was supplied through the 24" main during the hot weather.

Bursts on the 32-inch and 24-inch Vehar Mains.

245. During the year the bursts on the 32-inch and 24-inch Vehar mains, between Vehar and Kurla, were as follows:—

Date.	Size of Main.	Locality.	Duration of stoppage of supply.	Remarks.
5th Oct. 1898 ...	24"	At the junction of Marole-Andheri Road.	30½ hours.	
27th Jan. 1899 ...	32"	Near Kurla Station ...	24 „	

246. The 32-inch main, especially near Kurla, is in a very unsafe condition and urgently requires renewal.

Table of Rainfall and Leakage.

247. Table No. 2 gives the details of the water level, rainfall and gaugings of leakage at Vehar Lake.

Road from Vehar to Tulsi.

248. The construction of the road from Vehar to Tulsi has been sanctioned, but the work was not taken in hand during the year. The amount sanctioned by the Corporation in the year 1894 for this work was Rs. 25,000. This estimate was obtained by the then Deputy Executive Engineer, but the present Deputy Executive Engineer having reported that it would cost Rs. 76,000 the matter is being further considered. Detailed plans and estimates are being prepared.

Outlet Sluices for Vehar Tower.

249. Plans and estimates have been prepared for providing new outlet sluices and lifting gear for the Vehar outlet tower and works will be taken in hand during the next year.

TULSI LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

Rainfall.

250. The rainfall for the year 1898 was 111·58 inches, that for the two previous years 1896 and 1897 being 139·52 and 118·66 inches, respectively.

251. The accompanying diagram shews the comparative rainfalls for the different days during the years 1891 to 1898.

Days of Heavy Rainfall.

252. The heaviest daily rainfalls of 3 inches and above were :—

13th	June	1898	...	...	...	...	4·49 inches.
15th	„	„	...	...	...	...	4·47 „
17th	„	„	...	...	...	...	3·62 „
6th	July	„	...	...	...	...	3·60 „
7th	„	„	...	...	...	...	3·58 „
21st	„	„	...	...	...	...	7·31 „
22nd	„	„	...	...	..	...	9·84 „
9th	Sept.	„	...	...	...	...	3·40 „
10th	„	„	...	...	...	...	5·43 „
11th	„	„	...	...	...	...	4·53 „

253. The total number of days of 1 inch and more rainfall being 31.

254. The total amount of rain which fell in drainage area was estimated at about 4,298 million gallons ; of this about 2,670 millions or 62 per cent. were received into the Lake. The mean percentage since the lake was constructed in 1881 is calculated to have been about 72.

Quantity of Water in, and discharge from, the Lake.

Levels of the Lake.

255. The lowest water level reached during the year was 438·15 T. H. D. on the 10th June 1898. The lake commenced to overflow on 24th July 1898, after 74·21 inches of rainfall had been registered and ceased on the 21st September.

256. The storage of water on the 1st October 1898 was 2,269 million gallons, on the 1st April 1899 it was 1,222 million gallons shewing the consumption of 1,047 million gallons in 6 dry months of October to March or equal to 5·7 million gallons per day including evaporation and leakage. The quantity of water consumed for 8 months of the previous year from 1st October 1897 to 1st June 1898, being 1,343 million gallons or 5·5 million gallons per day.

Evaporation.

257. The evaporation for the months of October to March was 18·3 inches equal to ·10 inch per day, *vide* table No. 3.

258. Table No. 14 gives the details of water level and gaugings of leakage.

Repairs to the Catch-water Channel.

259. The Catch-water Channel entering the lake at the South-west end of the masonry dam, which had been badly breached during the previous year was repaired. The bank at the lower side was raised to the level of the top of the masonry dam and the channel cleared of vegetation and debris. The work was done departmentally and has proved successful.

PAWAI LAKE.

260. As this lake is utterly useless to the Municipality, negotiations are in progress to let the land belonging to the Corporation, Bungalows, &c., to the Agave Fibre Syndicate for the cultivation of the Agave plant and its manufacture into fibre.

261. Table No. 4 gives details of the water level and rainfall.

BHANDARWADA (JOHN HAY GRANT) SERVICE RESERVOIR.

Covering Basin No. 2 and construction of Filters over it.

262. Owing to the difficulty of getting the Contractor, Mr. Sittaram Luxman, to wash the sand for the filters in a satisfactory manner, this part of the work, was taken out of his hands, and is now being done departmentally.

263. Filter No. 9 was completely charged, and put in use on 14th February 1899, it was found to filter in a satisfactory manner, but there is a leakage through the arching into the Reservoir below, equivalent to a fall in the surface level of fully $1\frac{1}{4}''$ per hour, or nearly a fourth of its full rate of filtration. Though this does not lead to loss of water, it makes it difficult to properly regulate the rate of filtration.

264. The work of charging Filter No. 8 is nearly done and it is hoped that both it and No. 7 will be completed during the next year.

265. The work is being done within the Schedule rate.

266. The filtering materials belonging to Filter No. 5, which had been removed, have been washed and replaced Departmentally at a cost of Rs. 1,960. It is now working satisfactorily.

MALABAR HILL RESERVOIR.

Filters.

267. The sand in Filters Nos. 2 and 3 which formed the subject of dispute with the Contractors has been re-washed and replaced departmentally at a cost of Rs. 2,366, of which Rs. 436, were contributed by the Contractors.

268 They are now in use and are working in a satisfactory manner.

269. Filter No. 4 is at present in hand, about 70 brass of shingle was required to complete the layer of gravel between the metal and sand, of this 19 were taken over from the Contractors and the balance is being obtained from that screened from the sand at Bhandarwada filters. 185 brass of white sand has been contracted for with Messrs. Esufalli Abdulalli & Co. and it is hoped that it will be all placed in the Filter, before the end of the next year.

270. When the above work has been completed it is proposed to carry out certain experiments with a view to ascertain the best rate of filtration. When this is done, the question of the extension of the filters will be considered.

271. Mr. Bruce, the Deputy Executive Engineer, Water Works, has put forward a scheme for extending the filters by adding three new filter beds to the west of those at present in existence at an estimated cost of about 2½ lakhs. This matter will be considered in due course.

QUALITY OF WATER.

Crocodiles and Crocodile Eggs.

272. Seven crocodiles have been killed during the year and 41 eggs destroyed.

Analyses of Water.

273. Analyses of water are given in Table No. 5.

Temperature of Water.

274. The details of observations of the temperature of water at 6 a.m. in the Lakes and Service Reservoirs are given in Table No. 6.

MISCELLANEOUS WORKS.

Extension of Water Mains.

Laying 9" main in Worli Road in place of one 3" diameter.

275. The laying of this main has been completed at a cost of Rs. 42,617-7-0 and is now in use.

Supplying and laying 4" cast-iron mains in various parts of the City.

276. This work which was entrusted to Mr. Pallonji Edulji Contractor at an estimated cost of Rs. 24,373-2-0, was completed on 12th May 1898, at a cost of Rs. 22,769-10-1.

277. The 4" mains referred to were laid in the following streets :—

	L. ft.
Chunam Kiln Road near Grant Road	610
Khetwadi 10th Lane	409
Kandawadi Lane...	309
Parsiwada 3rd Lane	570
Sleater Road	636
Raghunath Dadaji Street	443
Waudby Road	88
Queen's Road	3,074
Khetwadi 12th Lane	1,012
Dhunji Street	1,947
Total ...	9,098 L. ft.

278. A revised scheme for extension of mains in various parts of the City is at present the subject of inquiry by a Committee of the Corporation.

DISTRIBUTION AND MAINTENANCE.

279. The number of connections cut off during the year at the instance of the Executive Health Officer was 204, and 151 stand-pipes were erected to supply people thus deprived of water in their houses.

280. The consumption of water continues to be excessive, and is much the same as last year, save that owing to there being a somewhat larger population, complaints of deficient supply have begun somewhat earlier. This difficulty may be expected to become more and more acute each year so long as the present system of supply is continued.

Dipping Wells.

281. The conversion of dipping wells into stand pipes at the following places was completed during the year under report :—

Sion Road.

Bhoiwada Cross Road.

Cawasji Patel Street and Clerk Road.

The fountain at the junction of Elphinstone and Dadar Roads, erected at the expense of Mr. Shaisha R. Naidoo, was completed at the beginning of the year.

Bursts Repaired.

282. The repairs during the past three years have been as follows:—

Diameter of pipe.	1896-97.	1897-98.	1898-99.	REMARKS.
3"	116	64	65	
4"	89	30	20	
5"	2	4	.....	
6"	7	2	5	
7"	7	.....	.....	
8"	2	4	1	
9"	1	2	.....	
10"	.....	.....	.....	
12"	.....	.....	1	
16"	1	.....	.....	
20"	.....	1	.....	
24"	.....	.....	.....	
27"	.....	.....	.....	
32"	2	2	1	
42"	.....	.....	.....	
48"	3	.....	.....	
Total ...	180	109	93	

283. The following statement shows the localities in which burst in mains of 12" diameter and upwards occurred in 1898-99.

Size of Mains.	Date when burst.	Localities.	When repaired.
12"	1-11-98	Jacob Circle.	
32"	19-5-98	Between Dadar and Matunga Station.	

Connection Work.

284. During the year 471 new connections were made as shewn in Table No. 10.

285. 176 connections were cut off for sanitary reasons referred to above, owing to buildings having been pulled down, for non-payment of rates or on account of infringements of the Municipal Act.

286. The net increase in the number of connections, exclusive of those made for Health Camps, &c., has been 175 or 3·7 per cent. The total number now stands at 19,990.

287. The annual increments for the past three years have been as follows :—

Years.	Number.	Per cent. of increase.
1896-97	267	1·3
1897-98	103	0·5
1898-99	175	3·7

Meter Supplies.

288. The number of meters of different diameters in use on the 31st March 1899 was 2,371, being an increase of 162 on that 2,209 for the preceding year.

289. The consumption by meter during the past three years has been :—

1896-97	1,258,941,436
1897-98	1,253,345,113
1898-99	1,470,056,205

290. Further particulars are given in Table No. 12.

291. During the year 1,415 meters or 60 per cent. of the whole number in use were tested with the following results :—

Defect.	Number.	Percentage of number tested.	Percentage of those found defective.	Percentage of whole number of meters in use.
1. Meters stopped owing to wear and tear ...	375	26·48	65·1	15·8
2. Slow from same cause.	18	1·27	3·1	0·7
3. Stopped by dirt in the Works...	53	3·75	9·2	2·2
4. Slow do. ...	16	1·13	2·8	0·6
5. Fast do. ...	3	0·28	0·5	0·1
6. Stopped owing to damage from external cause	111	7·83	19·3	4·7
7. Accurate	839	59·26	.....	35·9
Total ...		100	100	60·0

292. Since August last two men have been constantly employed for cleaning the 'Dirt boxes' of meters. 580 a month have been so cleaned so that all the meters are gone over about three times a year. The result being that, while in April and May 21 per cent. of the meters tested were found defective owing to dirt sticking in the working parts during the last five months of the year, only one meter was found to be out of order from this cause.

Waste Prevention.

293. The breaking up the roads in many localities and the disturbance of the subsoil for new drainage works has greatly increased the work in this Department.

FINANCIAL.

294. The value of the reserve stock on the 1st March 1898 was Rs. 4,22,005-10-5. The purchase during the year aggregated to Rs. 46,894-3-3. The issues during the year aggregated to Rs. 72,397-12-9, and the value of the balance on the 1st March 1899 was Rs. 3,96,501-15-9. This leaves an amount on the credit of Rs. 8,834-4-0.

Sale of produce at Lakes and other places.

295. The right of taking fruits from the trees on Municipal land about the lakes and on the pipe lines, and of taking grass, leaves, dead trees, brushwood, &c., on the Pawai Lake property was sold in 1898-99 for Rs. 1,183 against Rs. 1,788 realized in 1897-98.

Works executed for Municipal Departments and Private Parties.

296. Works executed by the Water Branch during the year 1898-99 for Municipal Departments and Private Parties amounted to Rs. 43,538-4-3.

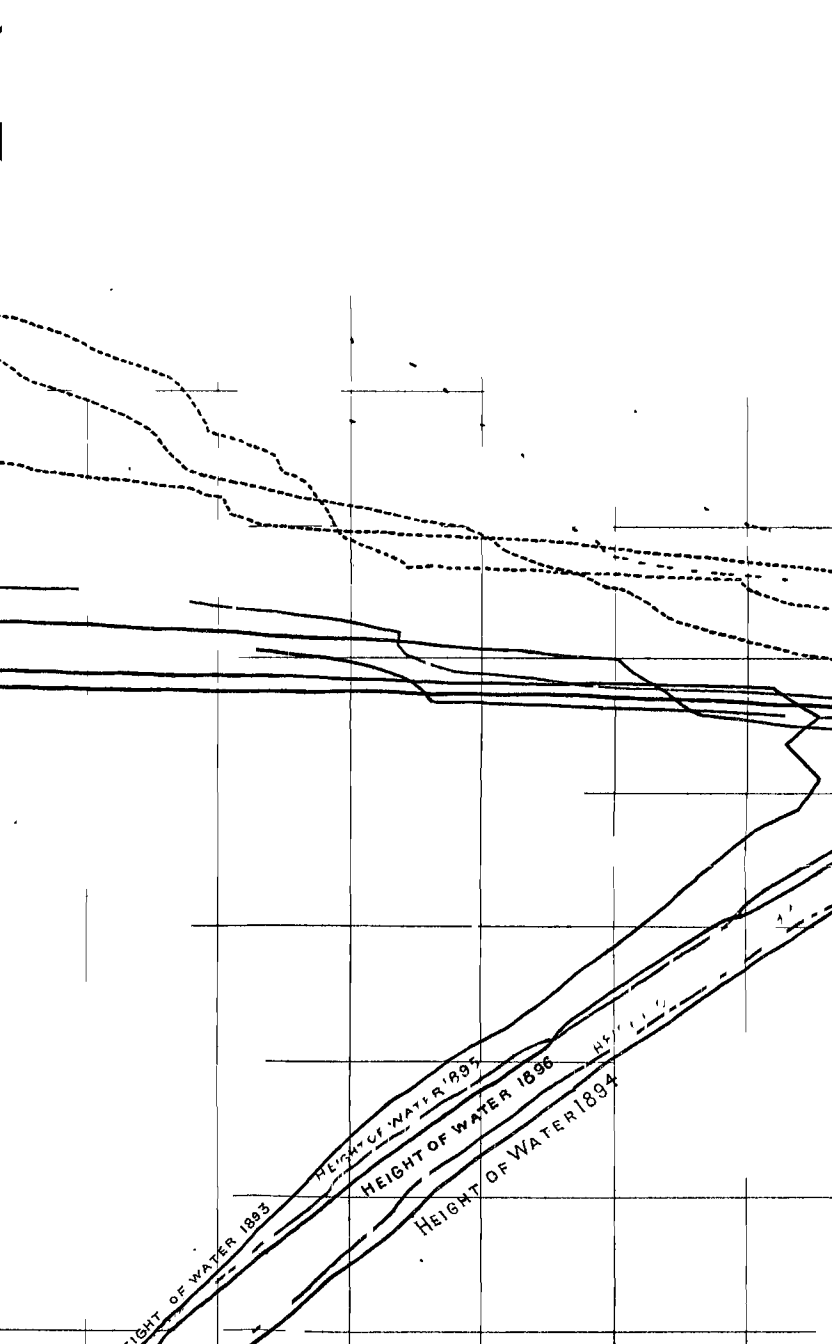
		Rs.	a.	p.
Departmental		37,539	2	0
Private		5,999	2	3
	Total	43,538	4	3

GENERAL.

Notices issued.

297. Tables Nos. 8 and 9 give the number of notices issued during the year. The total was 7,369 against 10,010 in 1897-98 and 9,747 in 1896-97.

298. Applications were made to the Standing Committee, and their sanction accorded under section 379 of the Municipal Act, to sever the connections of service pipes in 1,621 cases for different reasons the sanction was carried out in 176 cases.



HEIGHT OF WATER 1895

4	Unfiltered Vehar water from inlet well ...	7·00	·85	·093	·100
5	Unfiltered Tulsi water from inlet well ...	7·00	·90	·098	·132
6	Tansa water from strained Water Basin at Ghat-Cooper	8·00	·70	·013	·054
7	Filtered Vehar water from No. 1 Filter Channel Bhandarwada Reseroir	7·00	·90	·00	·024
8	Bhandarwada Reservoir unfiltered water ...	7·00	·90	·052	·072
9	Filtered water from No. 1 Filter, Malabar Hill.	7·00	·85	·00	·044
10	Malabar Hill water from inlet well	7·00	·80	·132	·080
11	Tansa Lake surface water near outlet ..	8·00	·60	·005	·080
12	Tansa Lake water from outlet well	8·00	·60	·026	·060

TABLE No. 5.

Analyses made on the 2nd December 1898.

No.	Description of Sample.	Grains per Gallon.		Parts per Million.	
		Total Solids.	Chlorine.	Free Ammonia.	Albuminoid Ammonia.
1	Tansa water from strained water basin at Ghat-Cooper	7·75	·70	·04	·08
2	Tulsi water from inlet well	7·00	·90	·132	·136
3	Vehar water unfiltered from inlet well ...	7·00	·85	·132	·104
4	Vehar water unfiltered from Measuring Chamber	7·00	·85	·00	·092
5	Vehar water from No. 1 Filter	7·20	·85	·00	·030
6	Vehar water from No. 4 Filter	7·00	·80	·00	·032
7	Malabar Hill filtered water from No. 1 Filter...	7·50	·80	·00	·050
8	Malabar Hill water from inlet well	7·75	·80	·00	·082
9	Bhandarwada unfiltered water from inlet Channel	7·00	·90	·00	·058
10	Bhandarwada filtered water from No. 3 Filter..	7·00	·90	·00	·030
11	Tansa Lake water near outlet surface water ...	8·00	·70	·53	·066
12	Tansa Lake water from outlet well, just entering the duct	8·00	·70	·50	·066

TABLE No. 5.

Analyses made on the 3rd December 1898.

No.	Description of Sample.	Grains per gallon.		Parts per Million.	
		Total solids.	Chlorine.	Free Ammonia.	Albuminoid Ammonia.
1	Tansa water from the strained water basin at Ghat-Cooper	7·75	·70	·04	·08
2	Tulsi water from inlet well	7·00	·90	1·32	1·36
3	Vehar water unfiltered from inlet well... ...	7·00	·85	1·32	·104
4	Vehar water unfiltered from Measuring Chamber	7·00	·85	·00	·092
5	Vehar water from No. 1 Filter	7·20	·85	·00	·030
6	Vehar water from No. 4 Filter	7·00	·80	·00	·032
7	Malabar Hill, filtered water from No. 1 Filter ..	7·50	·80	·00	·050
8	Malabar Hill water from inlet well	7·75	·90	·00	·032
9	Bhandarwada unfiltered water from inlet Channel	7·00	·90	·00	·058
10	Bhandarwada filtered water from No. 3 Filter...	7·00	·90	·00	·030
11	Tansa Lake water near outlet surface water ...	8·00	·70	·053	·066
12	Tansa Lake water from outlet well just entering the duct	8·00	·70	·050	·068

TABLE No. 5.

Analyses made on the 10th February 1899.

No.	Description of Water.	Grains per gallon.		Parts per million.	
		Total solids.	Chlorine.	Free Ammonia.	Albuminoid Ammonia.
1	From the strained water basin at Ghat-Cooper, Tansa Water	8·40	·80	·026	·066
2	Unfiltered water from Tulsi inlet well of Lake	7·00	·90	·132	·150
3	Unfiltered water from Vehar inlet of Lake ...	8·00	·80	·106	·108
4	Unfiltered water at measuring well at Vehar...	7·00	·80	·052	·076
5	Filtered water from Filter No. 3...	7·00	·90	·00	·04
6	Filtered water from Filter No. 1...	7·00	·80	·00	·012
7	Bhandarwada Reservoir filtered water depth below surface 6 inches...	6·80	·80	·00	·028
8	Bhandarwada Reservoir Unfiltered Vehar water taken from the inlet Channel	7·0	·90	·008	·060
9	Water from Malabar Hill Reservoir inlet well.	7·0	·90	·011	·106
10	Filtered water from No. 1 Filter	7·0	·80	·00	·34
11	(No. 1 bottle) from Tansa Lake near outlet well surface water	8·8	·6	·0373	·094
12	(No. 2 bottle) from outlet well of Tansa Lake just entering the duct	9·0	·65	·160	·116

E.

REGULATION OF STREETS AND BUILDINGS.

	Paras.
APPLICATIONS FOR BUILDING OR REBUILDING HOUSES	313
NOTICES AND SUMMONSES ISSUED	314 to 319
BUILDINGS OR PARTS OF BUILDINGS WHICH FELL DOWN	320
REMOVAL OF RUINOUS HOUSES, HUTS, OBJECTIONABLE CONSTRUCTIONS, DOORS, &c., PROJECTIONS AND ENCROACHMENTS ...	321
STREET IMPROVEMENT, SET-BACKS, &c. ...	322 to 336
MUNICIPAL GROUND SOLD	337

BUILDING APPLICATIONS.

313. The number of applications for permission to either build or rebuild houses, &c., during the year under report amounted to 1,671, or 542 more than those received during the preceding year. Of these, 1,638 were passed, either wholly or partially, and only 33 were unconditionally disapproved on sanitary and other grounds.

NOTICES AND SUMMONS ISSUED.

314. During the year under review 3,591 notices were issued on house-owners under various sections of the Municipal Act, or 1,044 less than those issued during the previous year.

315. The following statement shows the number of notices issued and the sections of the Municipal Act under which they were issued :—

Sections of Municipal Act.	Particulars.	Number of Notices.
231	To provide rain-water eaves gutters and downtake pipes...	477
247	To provide privy accommodation to new buildings ...	5
257	To remove encroachments on privy, drain, house-gully, &c.	6
299	Intimation of intention to take possession of land outside buildings for street improvement	11
308	To remove new projections	121
309	To remove old projections	18
311	To remove or alter doors or windows opening over streets	36
315	To remove encroachment over a street...	1
329	To fence or enclose tanks, wells, and dangerous places...	3
349	To remove inflammable materials in external walls and roof coverings	732
351	To remove structures erected without Municipal approval or submitting plans for the same	277
353	To remove buildings erected contrary to the provisions of the Act and Bye-laws	424
354	To pull down ruinous houses	383
380	Removing or altering insanitary huts or sheds ...	131
383	To cut or trim trees hanging over streets	6
488	Intimation of intention to enter houses after 24 hours' notice	960
	Total ...	3,591

316. Five hundred and thirty-two summonses were issued under different sections of the Municipal Act against the house-owners who failed to comply with the notices served upon them.

317. In 442 of these cases the parties complied with the terms of the notices served upon them; in three cases the parties were warned and discharged; in 29 cases they were convicted and fined; 37 cases were postponed to the year 1899-1900 and in 20 cases second summonses and in one a third summons were issued.

318. The amount of fines realized was Rs. 410.

319. The following statement shows the different sections of the Act under which offenders were prosecuted and other details of the prosecutions during the year 1898-99 :—

Superintendents.	Number of sections of the Act.	Number of summonses issued.	Cases withdrawn as requirements were complied with, &c.	Persons warned and discharged.	Persons convicted and fined.	Cases postponed to next year 1899-1900.	Number of second summonses.	Number of third summonses.	Number of fourth summonses.	Amount of fines.

STREET IMPROVEMENTS OR SET-BACKS.

322. The amount allowed for Street Improvement for the year 1898-99, was Rs. 1,00,000. This was found insufficient and it had to be supplemented from time to time by additional grants, aggregating Rs. 1,00,735. The total amount sanctioned was therefore Rs. 2,00,735. Out of this amount Rs. 1,11,247-12-6 were actually paid during the year and a large amount of liability is still to be met.

323. The widening of streets is a work of great importance to the City, and I am of opinion that a much larger sum than that annually granted should be given, if the roads are to be

widened to the required extent. The value of land has steadily risen within the last few years, and is still on the ascendant. It is, therefore, advisable that all open spaces lying within the "regular lines" of the streets should be taken up, without loss of time, under Section 299 of the Municipal Act. This, however, cannot be done, as the annual grant is barely sufficient to meet immediate requirements.

324. The insanitary houses in the City are being improved under the Epidemic Diseases Act. This affords an excellent opportunity for setting back the houses, especially in the narrow streets and lanes, but it also cannot be done unless a much larger grant is made. During the past year several houses could have been easily and economically set-back in the process of improvement, but it has not been possible to effect this much desired improvement for want of funds.

325. The following statement shows the areas and amounts of ground added to the streets in each ward during the year under report :—

44·83	square yards in	Ward	A	Rs.	1,676	8	0
373·14	"	"	B	"	19,634	15	10
625·06	"	"	C	"	21,277	12	9

F

ROADS, FOOT-PATHS, &c.

REPAIRS AND MAINTENANCE :—

	Paras.
Road Repairs	338 to 342
Road Metal	343 and 344
Road Watering	345 to 347
Steam Rollers	348
Footpaths	349
TRAMWAYS	350

Road Repairs.

338. The road repair works during the year under review were carried out under considerable difficulties. In the first place so large a sum as Rs. 60,000 was held back from the Road Repair Grant to meet Plague expenditure during the Monsoon, which is just the time when such repairs can be efficiently and economically executed. Permission was, however, granted in the following November to utilize the sum held back, but it was not possible to utilize it to the fullest extent owing to the difficulty in obtaining labor and material.

339. The total expenditure was Rs. 3,12,759-3-4 leaving an unexpended balance of Rs. 27,240-12-8.

340. It is needless for me to reiterate what has been stated in my last report that if the City roads are to be kept in a satisfactory condition, a larger grant than that usually allowed should be made. While the number and extent of new roads increase the amount for repairs remains the same. This is obviously unfair to the roads.

341. The following is a statement of the items of works executed from the budgetted amount of Rs. 3,40,000 for Road Repairs and Maintenance:—

Particulars.	Quantity of work done.	Expenditure.
		Rs. a. p.
Metalling	70,90,194 s. ft.	2,24,332 15 4
Sandstoning	25,79,626 „	16,264 13 4
Scraping	.....	35,328 5 10
Repairs and Maintenance of footpaths, bridges, culverts and road side retaining walls, &c....	.....	8,949 11 5
Roadside trees, fencing and maintenance ...	.....	3,884 4 0
Repairs to and purchase and maintenance of tools and plant and other works incidental to the work of repairs to roads, footpaths, &c.	.....	23,999 1 5
	96,69,820 s. ft.	3,12,759 8 4
Unexpended Balance ...		27,240 12 8
Total sanctioned grant ...		3,40,000 0 0

342. The area of roads metalled being 70,90,194 square feet and the expenditure incurred upon the same being Rs. 2,24,333, the rate for metalling only works out to 6 pies per square foot.

Road Metal.

343. The total quantity of metal purchased during the year under report was 1,161,502·43 cubic feet at a cost of Rs. 77,640-12-1.

344. Considerable difficulty is generally experienced in obtaining metal of the contract size and of uniform dimensions. This difficulty cannot be obviated unless the metal is broken by means of stone crushing machines. To secure this end the contract should not be for one year, but should extend over at least three years to induce the contractors to invest money in purchasing suitable machines.

Road Watering.

345. The City roads were satisfactorily watered during the year under review. The grant under this head was Rs. 85,400 which included Rs. 10,000 for providing road watering hydrants. The latter sum was also held back till November, when permission was accorded to utilize it.

346. Owing to the lateness in sanctioning the above grant it has not been possible to utilize it to the full extent, and Rs. 4,045-10-9 only were expended under this head. The work is still in progress and the balance will be fully utilized during the next year.

347. The new system of watering has proved satisfactory, and it is hoped that an annual grant will be made in future in extending it to other parts of the City.

Steam Rollers.

348. The following statement shows the condition of the various Steam Rollers at the end of the year :—

Ward.	No. of Steam Roller	Weight in Tons.	Date of Manufacture.	Condition.
A	1	20	1891	Good.
D	2	15	1891	Good.
A	3	15	1870	This roller was sold on March 14th, 1899, *vide* Standing Committee's Resolutions No. 10668 of 22nd February 1899 and 11975 of 22nd March 1899.
E	4	12½	1891	Good.
B	5	12½	1888	Good.
C	6	10	1891	Good.
E	7	10	1879	A new boiler has been made and the roller is being re-erected.
A	8	10	1874	Good.
B	9	10	1874	Good.
C	10	8	1888	Good.
D	11	8	1888	Good.
B	12	8	1888	Good.
B	13	8	1889	Good.
G	14	8	1889	Good.
E	15	8	1889	Good.
F	16	8	1889	Good.
B	17	8	1880	Good.
A	18	8	1880	Good.
D	19	8	1874	This roller was sold on March 14th, 1899, *vide* Standing Committee's Resolutions No. 10668 of 22nd February 1899 and 11975 of 22nd March 1899.
G	20	8	1880	New pin-box being fitted.
A	21	6	1894	Good.
D	22	6	1894	Good.

Foot-paths.

349. No grant was made for paving foot-paths during the year under review, owing to financial difficulties. It is hoped, however, that a large grant will be made for this purpose during the next year, as it is very essential on sanitary grounds, as well as on grounds of public convenience, that the foot-paths should be properly paved. The natives of the lower classes being in the habit of throwing foul water from their residences on to the foot-paths the earthen foot-paths absorb this in them rendering them unhealthy, un-even and unfit for use.

Tramways.

350. The Tram Lines at the Junction of Cruickshank, Kalbadevi, and Girgaum Roads were renewed during the current year.

G.

PUBLIC LIGHTING.

	Paras.
GAS LIGHTING	351 and 352
KEROSINE OIL LIGHTING	353 to 355
THE ELECTRIC LIGHTING	356 to 363

GAS LIGHTING.

351. The total number of gas lamps in the city at the end of the year under report was 3,873 as detailed in the following statement, and the total cost has been Rs. 2,17,874.

Ward.	Single light		Double lights				Triple lights.		Quadruple lights.		Quintuple lights.					Total Number of Lamps.
	Part month.	Whole month.	Mylapore.	Free Public Library.	Veterinary Hospital.	Kilpauk Mental Asylum.	Part month.	Whole month.	Agadu Pay.	Victoria Dock.	Hornby Road.	Queen's Statue, Church Gate Street.	Mint Road.	Fort Dock.		
A.....	727	159	8	8	8	...	2	1	8	...	1	4	1	1	...	928
B.....	471	196	...	..	...	...	1	...	...	4	...	...	...	...	1	673
C.....	430	211	...	...	...	...	...	1	...	...	...	...	...	...	...	642
D.....	625	49	...	...	...	...	7	...	...	...	...	...	...	...	...	681

F.....	113	10	...	...	...	...	1	...	...	...	...	...	...	...	...	124
G.....	126	16	...	...	...	...	...	...	...	...	...	...	...	...	...	142
Total ...	2,955	729	8	8	8	4	13	2	8	4	1	4	1	1	1	3,747
Number of burners.	2,955	729	16	16	16	8	39	6	32	16	5	20	5	5	5	3,873

352. The minimum contract pressure and illuminating power were generally maintained throughout the year.

KEROSINE OIL LIGHTING.

353. As in the preceding years the Kerosine oil lighting was carried out departmentally and Snow Flake Kerosine Oil of 150° proof test was used.

354. The total number of Kerosine Oil lamps in the City at the end of the year under review was 1,769 as shown in the following statement :—

WARD.	Double Wick.		Single Wick.		Total.
	Part month.	Whole month.	Part month.	Whole month.	
A	...	...	89	16	105
B	...	...	128	48	176
C	...	1	32	98	131
D	26	...	106	39	171
E	2	...	334	131	467
F	...	...	393	2	395
G	...	...	250	74	324
Total ...	28	1	1,332	408	1,769

355. The total cost of Kerosine Oil lighting during the year under review was Rs. 36,247-12-7. Deducting from this Rs. 2,857-15-4 recovered by the sale of empty Kerosine Oil cases with tins and Rs. 2,457-11-3 for Departmental bills for lighting plague camps, &c., the net cost of Kerosine Oil lighting of the City, during the year has been Rs. 30,932-2-0 which gives for the 1,769 lamps, a rate of Rs. 17-7-9 per lamp per annum.

THE ELECTRIC LIGHT INSTALLATION FOR THE CRAWFORD MARKETS AND THE MUNICIPAL OFFICE.

356. The installation worked fairly well during the year. There was one serious failure of the arc lights in the Crawford Markets shortly after the lamps were started on the night of February 14th, owing to the burning out of the left hand field magnet coil of the dynamo. This necessitated a stoppage of the lights for the remainder of the night. There were also three minor stoppages of a few minutes duration due to defects in the dynamo and the lamps.

357. There was one short stoppage of the Market Clock Tower lights on account of a broken belt.

358. In the Municipal Office there was no failure of the lights throughout the year.

359. With a plant which is in no part in duplicate it is practically impossible to prevent occasional break downs, and the above record of failures can not be considered in any way excessive.

360. A new Armature for the Clock Tower dynamo was purchased from Messrs. John Fleming & Co., at a cost of Rs. 346, and two new link leather belts for the Municipal Office and Market dynamos were obtained from Messrs. Shallis and Duncan at a cost of Rs. 366-6-0.

361. A new cable was also laid under the road between the engine room at the Workshops and the Crawford Markets for the arc lamp service at a cost of Rs. 173-15-3.

362. Owing to the unusually heavy maintenance and renewal charges and to extra lighting in the Municipal Office, the expenditure could not be kept within the apportionment of Rs. 10,947 for the work, and the Corporation under their Resolution, No. 10115, of 9th February 1899, approved of the transfer of Rs. 1,100 from savings in the grant for Gas Lighting, Streets and Buildings Department to meet the excess in the electric lighting.

363. The actual total expenditure amounted to Rs. 11,898-9-0.

Total ... Rs.

365. From this statement it will be observed that the expenditure incurred under the different heads of the Workshops Accounts was as follows :—

			Rs. a. p.	Rs. a. p.	
For Departmental Works, &c.—					
Labour			33,184 2 6		
Stores			63,850 4 9		
Piece-work, cart-hire, &c.			1,094 4 6		
	Total ...			98,128 11 9	
For Workshop Stores—					
Labour			650 6 6		
Stores			3,263 1 7		
	Total ...			2,913 8 1	
For Shop Charges—					
		Rs. a. p.			
Labour		992 15 6			
Stores		9,336 6 6			
Piece-work, contingencies, water tax, &c.		1,557 4 3			
	Total ...		11,886 10 3		
For Tools, Repairs to Machinery, &c.—					
Labour		109 3 0			
Stores		217 1 5			
Piece-work		27 0 0			
	Total ...		353 4 5		
For Supervision Charges, Establishment, &c.—					
Establishment		8,454 14 1			
Stores		.....			
Contingencies		567 11 8			
	Total ...		9,022 9 9		
Total Working Expenditure ...				21,262 8 5	
Total Expenditure during 1898-99 was Rs. ...				1,22,304 12 3	

	Rs. a. p.	Rs. a. p.
The total expenditure during 1898-99 on account of Departmental works, &c., and for store jobs aggregated, with the percentage for supervision, shop charges, &c., to	.....	1,35,150 4 7
Add—Amount of incomplete jobs at the beginning of the year 1898 99	.....	6,235 14 4
		1,41,386 2 11
Deduct—Amount of incomplete jobs at the end of the year 1898-99	.....	15,324 6 3
Thus the total amount of bills preferred by the Workshops in 1898-99 was	.....	1,26,061 12 8

PERCENTAGE FOR SUPERVISION, SHOP, REPAIR CHARGES, &c., GROUND RENT AND WATER SUPPLY.

The actual charges for working the Shops, &c., for supervision (exclusive of the pay of the Assistant Engineer, Mechanical Branch, which was in former years charged to the workshops, but now debited to the Executive Engineer's Office Establishment) shop and repair charges, repairs to and purchase and renewal of tools and machinery, &c., amount to	.....		21,262 8 5
The amount recovered on account of the abovementioned expenses by charging the fixed percentage of 35 per cent. on the cost of labour employed and materials used for works executed at the Shops and 25 per cent. for fixing the fence on the sides of Railway Line from Coorla to Dadar	33,858 13 9	.....	
The difference between the actual cost of working the Municipal pumping engine and the fixed charges at which it was let on hire to private parties and for Departmental works was	157 8 1	.....	
The percentage on private works executed was ...	31 10 11	.....	
Amount realized by the sale of unserviceable and surplus articles was	1,233 2 2	.....	
Allowance for stationery, &c., for the Garlick's Incinerator	60 0 0	.....	
Amount realized by the sale of saw-dust	5 0 0	.....	
The balance in favor of Workshops was therefore ...	.....		14,083 10 6
Total Rs. ...	35,346 2 11		35,346 2 11

366. The balance or surplus in favour of the Workshops amounting to Rs. 14,083-10-6 compares favourably with the balances of the previous 5 years which were as follows :—

Year.	Balance or profit.	REMARKS.
	Rs. a. p.	
1893-94	6,148 15 9	
1894-95	5,272 9 8	
1895-96	6,990 6 3	Ground rent amounting to Rs. 102-8-7 per annum paid to Government out of profits.
1896-97	8,974 4 3	
1897-98	1,141 3 4	Ground rent amounting to Rs. 5,508-12-10 paid to Government out of profits.

367. Pending the settlement of the amount of rent payable to Government for the ground occupied by the Workshops Stores and Grant House, no rent was paid during the year under review. This accounts for the large increase in the profits as compared with the previous year. The balance is principally due to the reduced shop charges consequent on the saving effected by the new engine purchased for driving the machinery in 1897 and also on account of the value and amount of stores used for the execution of new works being larger than usual.

368. Charges for water consumed at the Workshops from 1st October 1897 to 30th September 1898 amounting to Rs. 1,441-5-3 were credited to the Municipal Fund and were met out of the grant for Stores and Water Supply.

369. This grant owing to unforeseen works had to be supplemented by an additional grant of Rs. 30,000 which was met from Surplus Cash Balance, *vide* Corporation Resolution No. 9004 of 12th January 1899. The above sum was not fully utilized as certain materials for works in progress which had to be ordered by the hardware Contractors from England, did not arrive until after the closing of the accounts.

NEW WORKS EXECUTED AT THE WORKSHOPS.

370. The following are the principal items of new works completed during the year :—

Description of Work.	Cost of Work.
	Rs. a. p.
Fixing electrical transmission plant for pumping sea water for electroliser	1,342 5 4
Constructing a corrugated iron shed at the Sankli Tank Fire Brigade Station	4,048 10 10
300 Drain cleaning rods	294 5 6
Providing and fixing iron and wood work of Kutchra loading platform at Mahalaxmi	18,975 8 8
12 Wooden hand carts	1,097 9 3
Erecting a disinfecting Chamber with shed at Byculla Camp	379 8 1
20 W. I. Chairs and 40 Standards for the Tank Bunder burial ground	518 12 5
Erecting a corrugated iron screen between the temporary Chals and the Gun Carriage Factory at Colaba as a protection against fire	900 12 6
14 Iron stand-pipes to fit new pattern hydrants for Health Department...	431 0 1
1,000 Wooden number pegs for the Haines Road Cemetery	363 7 8
6 Hand carts for the removal of dead bodies	590 7 0
2 Penstocks for the Mint Road Catch pit	1,064 5 5
Flushing cart for the Drainage Department	269 9 6
Providing and fixing 2 pairs of level crossing gates at Chimboor for the Kurla-Deonar Railway	673 6 1
Inspectors trolly for do.	301 13 7
100 Wooden pumps for Plague work...	313 7 9
Conservancy cart for mule draft	208 6 10
Fixing new iron plates to the stalls in the Arthur Crawford Beef Market	700 0 0
Total ...	32,473 8 6

371. The following are the principal items of new work commenced but not completed during the year :—

Description of Work.	Estimated Cost.	Expenditure up to 28th February 1899.
	Rs. a. p.	Rs. a. p.
Providing and fixing new shred-lifters at the Love Grove Pumping Station	4,746 0 0	3,097 13 0
Providing and fixing 4 pairs of new sluice gates for the Love Grove sluices	7,345 0 0	3,717 5 6
Providing and fixing a fence alongside the Kurla-Deonar Railway	About 24,000 R. ft. at 9 annas per R. ft. 13,500 0 0	6,077 8 6
Making 137 dust-bin carts	13,700 0 0	2,422 3 6

REPAIRS EXECUTED.

372. Besides the above works, the Workshops have continued to keep in repair the rolling-stock of the Health and Road Departments, as well as the numerous articles of plant and machinery used by the various Departments.

373. Great difficulties were again experienced in keeping the rolling-stock of the Health and Road Departments at work during the height of the third plague epidemic on account of the absence of workmen.

374. The fair weather season is the only time in which wooden wheels can be satisfactorily manufactured, but during the last two years the arrears of work have had to be made up in the monsoon when the wood is damp and swollen, with the consequence that in the dry season they all give trouble by shrinkage.

375. It may be noted that on the completion of the 137 new dust-bin carts which were ordered late in the year, there will be over 2,000 pairs of wheels in regular work in the several Departments of the Municipality. The maintenance of these wheels forms a work of no inconsiderable magnitude and there is no doubt that the substitution of machine work for their manufacture, in place of hand labour which is at the present time so unreliable and scarce, would effect some saving in more than one direction.

376. A commencement has been made by including the cost of wheelwright machine of the latest type in the budget for 1899-1900, and as the item has been passed it is hoped that the machine will shortly be obtained and set to work.

377. From 1st March 1892 up to the present time 307 carts and vehicles of all descriptions, inclusive of those now on order, have been added to the Municipal stock, and considerable difficulty has been experienced for some time on account of insufficient shop accommodation for their repairs.

378. The unsettled question of tenancy of the ground occupied, has prevented this want being anticipated in any way but as there does not appear to be any prospect of an early settlement of the matter, it is imperative that the carpenter's and wheelwright's shop should be enlarged without further delay and proposals for effecting this will be shortly submitted.

ESTABLISHMENT.

379. The death on February 23rd of Mr. Hormasji Nusserwanji Maistry, Carpenter Foreman, is recorded with great regret. Mr. Hormasji had been connected with these workshops since December 1866 and on account of his intimate acquaintance with the working of the carpenter's shop and his exceptional integrity, his services will be difficult to replace.

HYDRAULIC LIFT IN THE MUNICIPAL OFFICES.

380. The Hydraulic Lift worked satisfactorily during the year. The total expenditure incurred amounted to Rs. 1,679-10-7 against the budget grant of Rs. 1,700.

I.

PLAGUE OPERATIONS.

Improvement and demolition of insanitary buildings.

387. During the year the systematic inspection of houses in the following districts, which was in hand at the commencement of the year, was continued :—

1. Lower Colaba.
2. Fort.
3. Dhobitalao.
4. Chakla.
5. Mandvi.
6. Umarkhadi.
7. Dongri.
8. Bhuleshwar.
9. Kamathipura.
10. 1st Nagpada.
11. 2nd Nagpada.
12. Byculla.

388. The following additional Districts were also taken up during the year :—

1. Market.
2. Kharatalao.
3. Kumbharwada.
4. Tardeo.
5. Walkeshwar.

389. The inspection of houses in Kamatipura and in the Dhobitalao District has been practically completed, and the improvement of several houses has been already carried out, while that of others is in progress.

390. Stray cases in the other parts of the City were also inspected when urgency demanded their improvement.

391. The accompanying statement marked **A** gives detailed information as regards the number of houses inspected in each district, those found in need of improvement, and also those condemned as incapable of improvement and fit for demolition.

392. Altogether 2,633 houses were inspected during the year under review, of which 2,213 houses were found more or less in need of improvement, 405 houses were found incapable of improvement and fit for demolition, the remaining being such as not to require any improvement.

393. In all 293 houses were actually demolished during the year.

394. The accompanying statement marked **B** shows the number of notices served under different Sections of the Government Notification and of the Municipal Act.

395. It will be seen from this that during the year 2,086 notices were issued requiring the house-owners to improve their buildings, out of which the owners of 704 houses took the work of improvement in hand, 725 houses had to be declared unfit for human habitation, out of which 87 houses were closed permanently for demolition, 509 temporarily for enforcing improvements in them, and 129 were declared unfit for human habitation to allow of action being taken for the immediate improvement of their ventilation.

396. Statement **C** gives particulars regarding compensation awarded during the year by the Government Assessor for buildings condemned for demolition under Sections I and IX of the above Notification.

397. Statement **D** shows details of compensation paid during the year for huts and sheds demolished under Section 426 of the Municipal Act, and a sum amounting to Rs. 1,097-1-5 still remains to be paid owing to the owners not having proved their title to receive the compensation awarded to them.

398. As a rule, the residences of the poor classes of the community are insanitary, ill ventilated and damp. Many of the rooms have absolutely no light or ventilation, and the floors being low are generally damp and fruitful of disease.

399. It is sometimes found that 10 people live in a room hardly sufficient for one-fourth the number.

400. Attempts have been made to abate the over-crowding in these buildings, but without much success, as it was found that the rooms were re-occupied shortly after the officers of the Municipality left the scene of action.

401. The only remedy is to increase the amount of house accommodation, and it is hoped that the work of the City Improvement Trust will help the City in this matter.

402. Only one Inspector was employed during the year for inspection of houses with a view to abate the overcrowding. This work is difficult of accomplishment, owing, as stated above, to insufficient house accommodation for the poor. The overcrowding was naturally found only in "chalis" occupied by the poorest classes of the people.

403. Until sufficient house accommodation suitable for these people is provided, the evils of over-crowding must continue. Reduction is, however, more rigidly enforced in cases where the creation or spread of disease is apprehended.

404. The establishment had to be slightly revised during the year to enable it to cope with the large amount of additional work which had devolved upon it in scrutinizing the plans, which were no less than 1,085 in number, and in inspecting and examining the houses, and supervising the works of improvement in them. The revision has, however, been made so as not to increase the cost.

405. The work of improvement of the houses is a very disagreeable one, requiring much tact and discretion on the part of the Municipal Officers. I am glad, however, to say that practically no complaints have, up to this time, been received against any of them.

406. As a rule, house-owners are averse to do anything to improve their properties and at first strong opposition is sometimes made, but myself and the Officers and subordinates employed under me succeed by persuasion and firmness in making them understand the advantages of carrying out the works required of them.

407. It is gratifying to note that the owners of the properties, and more especially the tenants, express their appreciation of the great good effected, after the changes are made.

408. The following list shows the Plague Camps in different parts of the City which were either erected or strengthened during the year :—

(1.) Camp at Victoria Bunder, Colaba.
(2.) The Vithal Sayana Camp.
(3.) Cruickshank Road Camp for Evicts.
(4.) Cruickshank Road Contact Camp.
(5.) Arthur Crawford Market Camp.
(6.) The Goculdas Hospital Camp.
(7.) Kennedy Sea Face Camp.
(8.) Modykhana Camp.
(9.) Elphinstone Bridge Camp.
(10.) Wari Bunder Camp.
(11.) Northbrook Garden Camp.
(12.) Piru Lane Camp.
(13.) Babula Tank Camp.
(14.) Jail Road Camp.
(15.) Sankli Tank Camp.
(16.) Contact Camp at Julai Hospital.
(17.) Foras Road Camp for Kamatis.
(18.) Foras Road Camp for Hindus.
(19.) Gilder Street Camp for Mahars.
(20.) Moreland Road Camp.
(21.) Grant Road Camp.
(22.) Chaupati Camp for Hindus near Babulnath.
(23.) Ghorupdeo Camp.
(24.) Narielwadi Health Camp.

(25.) Narielwadi Contact Camp for all classes.
(26.) Narielwadi Contact Camp and Hospital for Mahomedans.
(27.) Elphinstone Road Camp.
(28.) Dadar Camp.
(29.) Camp for Dhobis at Arthur Road.
(30.) Contact Camp at Arthur Road.
(31.) Camp at Mahim Mori Road.
(32.) Camp to the West of Mahim Station.
(33.) Camp at Worli Pakhadi.
(34.) Camp at Worli Koliwada.
(35.) Bandora Camp.
(36.) Bhangi Mohla Health Camp.
(37.) Health Camp for Halalcores of the Health Department at Valpakhady.

409. These camps were made of sheds constructed with bamboo posts, roofs either of double bamboo matting or cadjans, and walls also of bamboo matting.

410. The roofs of some of the sheds in the following camps were made of corrugated iron :—

(1.) Camp at Victoria Bunder, Colaba.
(2.) Health Camp for Halalcores of the Health Department at Valpakhady.

411. The floors of all the sheds were made of earth or murum.

412. Latrine accommodation, &c., were provided in all cases except in those where permanent latrines in the neighbourhood were available for use. Statement **E** gives the particulars of such latrines and other works constructed during the year.

413. Stand-pipes with paved platforms for bathing or washing purposes, as also drainage and cesspool arrangement, were provided where necessary. Statement **F** gives the particulars of the stand-pipes so erected.

414. The lighting of all the camps was done by means of kerosine oil lamps erected in convenient and suitable places on old wooden posts.

415. Several of the camps were pulled down in the beginning of the monsoon, some because they stood on low lying ground likely to be under water during the rains, some being old and incapable of being strengthened and a few on account of plague cases having occurred in them.

416. Some of the materials of the camps so pulled down have been utilized in strengthening the camps kept standing and some have been stacked in depôts under shelter formed in convenient places. A few have also been deposited in the stores at Government House, Parel, and in the Foras Road Stores. Statement **G** gives the particulars of the Camps, &c., erected, strengthened, pulled down, &c., during the year.

CAMP AT VICTORIA BUNDER, COLABA.

417. This camp was erected about May 1897 on ground belonging to the Colaba Land and Mill Company, Limited, for the accommodation of cart drivers and others, whose quarters in the vicinity were condemned and destroyed. It has since been strengthened from time to time and maintained by this Department.

418. At present it consists of 66 rooms, each 10′ × 10′, with a verandah 5′ wide.

419. Twenty-two of these rooms are covered with corrugated iron sheets and 44 with cudjans. The walls are of double matting.

420. In this case the occupants used the privies in the vicinity belonging to the above named Company.

421. All the rooms are at present occupied by Marathas with the exception of 8, which are occupied by Mahars.

422. A rent of Rs. 2-0-0 per room is charged for the rooms covered with corrugated iron and Re. 1-0-0 per month for those covered with jowlies.

THE VITHAL SAYANA CAMP.

423. This camp stands on a piece of ground at Colaba belonging to Government. It was at first put up through the generosity of a private individual Mr. Vithal Sayana.

424. To admit of the camp standing in the rains, 24 rooms were removed and re-constructed by the Municipality with better materials. But unfortunately no sooner were these rooms completed, they took fire accidentally and were all burnt down.

425. Twenty-four new rooms, each 9′ × 9′, with a verandah 3′ wide, have, therefore, been constructed in place of those destroyed.

426. The following additional accommodation has also been provided :—

3 rooms for Camp-Master and Stores.
1 room „ Sweeper.
1 „ „ Bhangies.

427. The new rooms have been handed over to the District Plague Officer.

CRUICKSHANK ROAD CAMP FOR EVICTS.

428. This camp was constructed on a portion of the maidan along the Cruickshank Road in front of the Police Court.

429. The ground was placed at the disposal of the Municipality by Government.

430. The camp consisted of 60 rooms, each 10′ × 10′, with a 5′ verandah in front and 60 cook-rooms, each 6′ × 6′.

431. The camp was occupied by persons turned out of insanitary houses and was kept in charge of this Department.

432. A rent of Rs. 2-0-0 per room was recovered.

433. It was pulled down at the commencement of the monsoon.

CRUICKSHANK ROAD CONTACT CAMP.

434. This camp was erected near the one last above mentioned.

435. It consisted of 60 rooms, each 10′ × 10′ with a verandah 5′ wide in the front.

436. It was pulled down at the commencement of the monsoon.

ARTHUR CRAWFORD MARKET CAMP.

437. This Camp has been erected on an open piece of ground, the site of the old Warrant Officers' Quarters, near the Arthur Crawford Market, which has been placed at the disposal of the Municipality temporarily by the City Improvement Trust.

438. It consisted of 182 rooms, each 10′×10′, with a verandah 5′ wide, with a like number of cook-rooms 6′×6′.

439. There are 25 privy seats and 12 water taps. Until the rains set in the camp was in charge of the District Plague Officer and was at that time used for the accommodation of contacts and rent was recovered by that Officer.

440. Since the commencement of the monsoon the camp has been taken over by the Executive Engineer's Department for the use of evicts from insanitary houses in lieu of the camp along Cruickshank Road which has been demolished.

441. Two rows of huts on high ground have been strengthened and the rest, with the exception of some which were dilapidated and have been pulled down, are allowed to stand.

THE GOCULDAS HOSPITAL CAMP.

442. This is an old camp. It consists of 302 rooms, each measuring 10′×10′ with 5′ verandah in front. These rooms are occupied by all classes of Hindoos.

443. Fifty-five huts out of the above, *viz.*, those in front of the Indo-British Institution have been demolished.

KENNEDY SEA FACE CAMP.

444. This camp consisted of 464 rooms, each measuring 10′ × 10′, with a verandah 5′ wide. There were 301 cook-rooms made of lathe and mud plaster walls white-washed; the roofs were covered with double matting. Six separate bath rooms were provided with drainage arrangements; sheds for Bhangis, each 20′ × 10′, were also erected.

445. Water tubs were placed in the middle of the camp for use in case of fire. These tubs were always kept full of water.

446. This camp was occupied by Christians, Hindoos and Mahars. It was demolished before the rains.

MODY KHANA CAMP.

447. This is also an old camp. During the year under review, a portion of it was pulled down for the convenience of the Railway Company and a portion given over to Government for being used as a Detention Camp. The remainder was given to the Parsee community for use as an Hospital.

448. The camp stands on Port Trust ground, for which the Municipality pay rent.

ELPHINSTONE BRIDGE CAMP.

449. This is also an old camp constructed on the Port Trust ground on payment of rent.

450. It consists of 132 rooms, each measuring 10′ × 10′, with a verandah 5′ wide and a shed for office.

451. This camp was occupied by all classes of Hindoos.

452. During the year under review, it was repaired and strengthened. Two of the blocks of this camp lately fell down and have been removed.

WARI BUNDER CAMP.

453. This was formerly an Hospital erected by the late Plague Committee.

454. It is situated on Port Trust ground, for which the Municipality pay rent.

455. Separate quarters for the Medical Officer, Nurses and an Office have been provided.

456. The camp was strengthened during the year under review and a new drain constructed for it.

NORTHBROOK GARDENS CAMP.

457. This camp was constructed during the year under review.

458. It consisted of 41 rooms, each 12′ × 8′, and a 4′ verandah.

459. This camp was set apart for Mahomedans.

460. A portion of it was strengthened for the rains and the rest kept as it is.

PEEROO LANE CAMP.

461. This camp consists of 12 rooms, each measuring 10′ × 10′, with a 5′ verandah.

462. It was erected during the year on private ground. It has recently been strengthened and is still occupied.

BABULA TANK CAMP.

463. This camp consists of 29 rooms, each measuring 10′ × 10′, with a verandah 5′ wide.

464. It stands on Municipal ground.

465. It has been strengthened for the rains.

JAIL ROAD CAMP.

466. It consists of 21 rooms, each 10′ × 10′, with a verandah 5′ wide.

467. It stands on private ground.

468. It was occupied by Mahomedans only.

469. It has lately been removed.

SANKLI TANK CAMP.

470. This camp consists of 21 rooms. Twelve of these rooms measure 12′ × 12′ and remaining nine 10′ × 11′.

471. The camp stands on Municipal ground.

472. Twenty-four rooms 10′ × 10′ are also provided for bhangies of the Health Department next to the above camp. They were occupied on payment of rent.

473. This camp is still standing. The occupants used the permanent Municipal latrines close by.

CONTACT CAMP AT JULAI HOSPITAL.

474. This camp consists of 20 rooms, each measuring 10′×10′, with a 5′ verandah. It stands on private ground.

475. The occupants used the latrines and water-taps which have been provided for the Julai Hospital.

476. This camp was used by Mahomedans only. It has been strengthened for the monsoon.

FORAS ROAD CAMP FOR KAMATEES.

477. This was an old camp consisting of 60 rooms, each measuring 10′×10′ with a 3′ verandah and a small enclosure in front of each block.

478. It was constructed by Rao Bahadur Elappa Balaram on private ground.

479. Subsequently during the year under review 76 new rooms were added to this camp by Rao Bahadur Elappa Balaram.

480. The portion of this camp newly constructed, which was standing on the low level ground and consisting of 76 rooms, was demolished in the beginning of the monsoon.

481. The remaining huts which were situated on high ground are still standing, and have been strengthened.

482. Water taps, latrines and bath rooms with lighting and drainage arrangements were provided by the Municipality in connection with this camp.

FORAS ROAD CAMP FOR HINDUS.

483. This camp consisted of 100 rooms each, measuring 10′×10′, with a 5′ verandah.

484. It was demolished in the beginning of the rains as it stood on low level ground.

GILDER STREET CAMP FOR MAHARS.

485. This camp consisted of 100 rooms, each measuring 10′×10′, with a 5′ verandah.

486. Fifty of the rooms were constructed on high ground and 50 on low land.

487. The roofs of twenty-five of the rooms were covered with jowlies and the remaining 75 with double matting.

488. A portion of this camp *consisting* of 50 rooms on the low level ground and 25 on high level ground were demolished in the beginning of the rains.

489. The materials have been stacked on the spot.

490. The remaining 25 rooms have been strengthened and allowed to stand during the rains.

MORLAND ROAD CAMP.

491. This camp consisted of 4 separate blocks, one for Julais, one for Hindoos, one for Mahars and one for Bhangies.

THE JULAI PORTION.

492. This consisted of 388 back to back rooms, each measuring 10′×10′, without verandahs.

493. The following additional accommodation was provided :—

(1) 14 blocks, each measuring 100′×20′, to accommodate 20 looms.

(2) A prayer shed.

(3) A large mandap for the preparation of threads by females.

(4) Bath-rooms for males and females.

(5) A Dhobi ghat.

(6) 35 seats of iron latrines and 39 temporary latrines.

(7) 26 water taps and arrangements for lighting and drainage with cesspool complete.

PORTION FOR HINDUS.

494. This consisted of 470 rooms, each measuring 10′×10′, with a verandah 5′ wide.

PORTION FOR MAHARS.

495. It consisted of 200 rooms, each measuring 10′×10′, with a verandah 5′ wide.

PORTION FOR BHUNGEES.

496. This consisted of 50 rooms, each measuring 10′×10′, with a verandah 5′ wide.

497. All the camps at Moreland Road, with the exception of some old huts, have been removed and the materials stacked on the spot.

GRANT ROAD CAMP.

498. This camp consisted of 55 rooms. 27 of these rooms have been formed by partitioning off a permanent open shed which was formerly used as a stable and which belongs to Mr. Panalal Punamchand. They are still occupied.

499. The remaining 28 rooms, 10′×10′, were erected in the compound of the premises.

500. The latter rooms were demolished in the beginning of the rains and the materials thereof utilized in strengthening the sheds in the permanent stables.

501. The neighbouring permanent privies, belonging to the same owner, have been used.

502. There is a separate hut for Ramosees.

CHOWPATTI CAMP FOR HINDOOS (NEAR BABULNATH).

503. This camp consisted of 100 rooms, each measuring 10′×10′, with a 5′ verandah.

504. It was erected on ground belonging to Government which was let out on a lease for cultivation.

505. Compensation had to be paid to the cultivators.

506. As the camp was situated on low ground it was demolished in the beginning of the monsoon.

GHORUPDEO CAMP.

507. This camp consisted of 180 rooms, each measuring 10′×10′, with a 5′ verandah.

508. It was erected on ground belonging to Sir D. M. Petit on payment of rent.

509. It was divided into three portions, one for Hindus, one for Mahomedans and one for Mahars.

510. As the camp was situated on low ground it has been removed.

NARIELWADI HEALTH CAMP.

511. This camp is an old one. It consists of 145 rooms, each measuring $10' \times 10'$, with a verandah 5' wide.

512. It stands on Port Trust ground, for which rent is paid.

513. This is a cosmopolitan camp for which the occupants pay rent.

514. Two rows of huts have been strengthened during the monsoon for the contacts.

515. These sheds are very old and require constant repairs.

NARIELWADI CONTACT CAMP.

516. This camp is also an old one.

517. It was originally used as an hospital.

518. Since its conversion it affords accommodation for about 1,500 persons of all classes.

519. In addition to the above the following has been provided :—

(1). Cooking arrangements, (2) bath rooms, (3) water taps, (4) latrines, (5) quarters for nurses, (6) camp master's quarters, (7) sweepers' quarters, (8) servants' quarters, (9) shed for fire brigade, (10) office room and (11) an engine room for the sterilizer for disinfecting clothes with a separate covered yard.

520. This camp being old, it requires constant attention.

521. It is still standing on Port Trust ground for which the Municipality pay rent.

NARIELWADI CONTACT CAMP AND HOSPITAL FOR MAHOMEDANS.

522. This camp consists of 60 rooms, $10' \times 10'$, with a verandah 5' wide. It also stands on Port Trust ground on payment of rent.

523. Out of these 60 rooms, 50 are used as Health Camp and 10 for contacts.

524. There is also a separate ward, $60' \times 25'$, for 12 patients.

525. This camp is now vacant.

ELPHINSTONE ROAD CAMP.

526. This camp consisted of 24 rooms, each 10′ × 10′, with a 5′ verandah.

527. It stood on Government ground and was occupied by low caste Hindus.

528. As the ground is low, the camp has been demolished.

DADAR CAMP.

529. This consisted of 30 rooms, each measuring 10′ × 10′, with a 5′ verandah.

530. It stood on Municipal ground.

531. This camp was occupied by all classes of people.

532. As it stood on low ground, it has been removed.

CAMP FOR DHOBIES AT ARTHUR ROAD.

533. This camp consists of 50 rooms, each 16′ × 10′, with a verandah 4′ wide. It stands on Municipal ground.

534. There are 6 water taps and 10 iron latrines with lighting, drainage and cesspool arrangements complete. It is now vacant.

CONTACT CAMP AT ARTHUR ROAD.

535. This camp consisted of 50 rooms, each 10′ × 10′, with a 5′ verandah.

536. As it was situated on low ground it has been demolished.

CAMP AT MAHIM, MORI ROAD.

537. This camp consisted of 24 rooms, each measuring 10′ × 10′, with a 5′ verandah. It stood on Municipal ground. Two water taps for the use of occupants were provided. The camp has been pulled down and the whole of the ground was dug up and disinfected.

CAMP TO THE WEST OF MAHIM STATION.

538. It consisted of 21 rooms. It stood on Municipal ground.

539. It was demolished as Plague cases had occurred in it.

540. The materials have been destroyed by fire.

CAMP AT WORLI PAKHADI.

541. This camp consisted of 30 rooms, each measuring 10′ × 10′, with a 5′ verandah.

542. It stood on private ground and was occupied by Hindus.

543. The camp was removed and the materials thereof stacked near the Worli Sluice House. They were subsequently utilized in the construction of the Mahim Hospital.

CAMP AT WORLI COLIWADA.

544. It consisted of 40 rooms.

545. It was occupied by Fishermen.

546. It has been removed and the materials thereof utilized for strengthening other camps, &c.

547. This camp stood on private ground.

BANDORA CAMP.

548. This is an old camp and is still standing.

549. It consists of 24 rooms, each measuring 10′×10′, with a 5′ verandah.

550. It is intended for the use of servants and occupants of the Bandora Slaughter House.

551. It has been strengthened for the monsoon.

BHUNGI MOHOLLA CAMP.

552. This Camp was erected for the halalkores of the Health Department in Bhungi Moholla at a total cost of Rs. 74-15-4.

553. It consists of 4 rooms and is intended to accommodate four families.

CAMP FOR HALALKORES OF THE HEALTH DEPARTMENT AT VALPAKHADY.

554. This camp has been formed in a bungalow belonging to Mr. Ahmedbhoy Habibbhoy which has been rented by the Municipality for one year at Rs. 200 per mensem. This is a semi-permanent camp and is of better materials than the others.

555. The Halalkores who were accommodated in a chawl at Oomerkhady, which was also rented by the Municipality from a private individual and which is not in a fit state for occupation, have been removed to this camp.

556. The accommodation provided is as follows :—

24 rooms have been formed in the main building itself by means of plank partitions. The koba flooring, roof and the doors and window shutters have been repaired.
60 rooms in double rows of sheds in the compound.
17 rooms in single row of sheds in the compound.
Latrines—Iron with 8 seats, 4 in a row with galvanized corrugated iron palisade.
4 water taps with a paved washing place.

Construction.

Floors—Earthen, a foot above the surrounding ground.
Walls—Of planks.
Doors and windows—Common, of plank.
Roof—Of corrugated iron sheets with a ridge ventilator.
Wood-work—Posts of teakwood 4″ diameter and in framing of the roof and partitions of jungle wood scantlings 3′×2″.

PRIVATE CAMPS.

557. Portions of the Maidan, opposite the Municipal Offices, and the open ground along the Kennedy Sea Face were placed at the disposal of the Municipality for being used for the erection of Health Camps. These were laid out to different communities for the erection of camps as described below.

558. All the different communities had erected huts at their own expense. The Parsi community and one faction of the Daivadnya community had put up a few tents in addition to huts. These huts were similar to those put up by the Municipality.

559. Latrine accommodation, cesspools and drainage and kerosine oil lamps in them were provided at Municipal expense in case of all the communities except the Parsi community who had made their own arrangements about this.

560. Sheds for sweepers were also provided by the Municipality.

561. These camps were removed by the respective communities in the beginning of the rains, except a portion of the Pathare Prabhu Community's Camp.

Parsi Community's Camps in front of the Municipal Offices at Cruickshank Road and at the Kennedy Sea Face.

CAMP IN FRONT OF THE MUNICIPAL OFFICES AT CRUICKSHANK ROAD.

562. Area about 10,000 square yards.

CAMP AT THE KENNEDY SEA FACE.

563. Area about 13,414 square yards.

Daivadnya Community's Camps in front of the New Police Magistrate's Court at Cruickshank Road and at the Kennedy Sea Face.

CAMP IN FRONT OF THE NEW POLICE MAGISTRATE'S COURT AT CRUICKSHANK ROAD.

564. Area about 2,853 square yards.

TWO CAMPS AT THE KENNEDY SEA FACE.

565. Area about 3,734 square yards.

Dakshni Brahmin Community's Camp at the Kennedy Sea Face.

566. Area about 5,470 square yards.

Somvanshi Kshatriya Community's Camp at Kennedy Sea Face.

567. Area about 3,072 square yards.

Gaud Brahmin Community's Camp at the Kennedy Sea Face.

568. Area about 3,599 square yards.

Pathare Prabhu Community's two Camps at the Kennedy Sea Face.

569. Area about 11,743 square yards.

Kayastha Prabhu Community's Camp at the Kennedy Sea Face.

570. Area about 1,867 square yards.

Kshatriya Community's Camp at the Kennedy Sea Face.

571. Area about 1,867 square yards.

Palsiker Community's Camp at the Kennedy Sea Face.

572. Area about 1,212 square yards.

Lohana Community's Camp at Frere Road.

573. Area about 1,786 square yards.

574. This camp was erected on the Port Trust ground by the community. Rent of the ground was paid by the Municipality. Latrines, water taps, bath rooms and drainage arrangements were provided by the Municipality at their own expense. This camp is still standing.

Chinchpokli Health Camp and Hospital for Messrs. Greaves, Cotton & Co.'s men.

575. This camp is still standing on Municipal ground. Latrines and water taps have been provided by the Municipality.

Parsi Health Camp on Frere Road between Alibag and Ooran Streets.

576. Area about 3,478 square yards occupied by tents.

577. This camp was put up by the Parsi Community on a piece of Port Trust ground taken up by the Municipality on payment of rent.

VINCENT ROAD CAMPS.

578. The open ground on both sides of Vincent Road, formerly belonging to the Municipality and which has recently been made over to the City Improvement Trust, was placed temporarily at the disposal of the Municipality by the Trustees for being allotted to private individuals for the erection of Health Camps.

579. Sites were allotted by this Department to those who applied, for them.

580. About 200 sheds were put up which were mostly occupied by Brahmins, Prabhus and Marathas of the better class.

581. Sheds were also put by the Bombay Gas Company, for their office staff, and also by the Kohinoor Mills Company for their mill hands and by Messrs. H. J. Rustomji & Company for their office staff.

582 All these sheds consisted of jowlees on roofs, mat-walls and cowdung flooring.

583. Water was supplied at Municipal expense through standpipes put up in convenient places.

584. The people erected their own privies, but the halalkore service was rendered by the Municipality, free of charge.

585. The Parsi community made use of the sheds which were erected on a portion of the ground during the previous year after repairing and strengthening them. They also made their own arrangements for water and privy accommodation.

DADAR CAMPS.

586. The open private fields between the two Railways at Dadar were occupied by about 200 sheds which were put up by Brahmins, Prabhus, Punchkalsis and other Hindus, at their own expense.

587. These camps also consisted of jowlees and mats huts and a few canvas tents.

588. Latrines were erected for the camps as necessity arose, and a number of standpipes and washing places were provided in places at Municipal expense.

ELPHINSTONE ROAD CAMPS.

589. In the open field to the west of the B. B. & C. I. Railway lines, between Elphinstone Road and Dadar Stations, several Christians, Kamatees and Brahmins and other Hindus had sought accommodation. This ground was the property of several private individuals. These camps numbered about 50, and consisted of huts of jowlees and mats.

590. Water was supplied through standpipes erected in convenient places at Municipal expense.

591. The people erected their own latrines, but the halalkore service was rendered by the Municipality, free of charge.

MATUNGA CAMPS.

592. These were on both sides of the Matunga Station.

593. About 300 sheds were erected by private individuals, on private ground.

594. Among them were Brahmins, Punchkalsees, Sonars, Marathas and Lohanas.

595. These sheds also consisted of jowlees and mats.

596. Municipal latrines were erected for each community's camp as necessity arose, and standpipes were also put up at intervals with washing places at Municipal expense.

MAHIM CAMP.

597. The Mahim-Mori Road people and others had erected their own camps on the east of the Mahim Station on open paddy fields. A little further from these camps, several Brahmins and Prabhus had erected their camps, on private ground. All these numbered about 150. The sheds were built of jowlees and mats, and latrine accommodation was given by the Municipality.

598. About 50 fishermen's sheds of jowlees and mats were allowed to be erected on the Mahim Foreshore, as the village they lived in, was visited by Plague. Water stand-pipes were put up for their use at Municipal expense.

MANMALA TANK CAMP.

599. Between Matunga and Mahim on the west of the B. B. & C. I. Railway lines, several Portuguese and Dakshni Brahmins had sought accommodation on private fields to the west of the Tulsi pipe line. Their sheds numbered about 40, and were constructed of jowlees and mats.

600. Privy accommodation and water-supply were given by the Municipality.

PRIVATE HOSPITALS.

Pathare Prabhu's Hospital.

601 This was erected in the Charni Road Gardens. Area about 7,388 square yards.

602. Latrines, water taps and drainage arrangements were provided by the Community itself.

603. Water was supplied by the Municipality free of charge.

Hindu Hospital.

604. This hospital was constructed by the members of the Hindu Communities. Area about 11,000 square yards, were occupied by wards, contact camps, recreation ground, etc.

605. This hospital was provided with latrines, a dhobi-ghat and water taps at Municipal expense.

Kshatriya Community's Hospital in the Charni Road Gardens.

606. Area about 2,566 square yards occupied by sheds.

607. Water was supplied by the Municipality.

HOSPITALS ERECTED BY THE MUNICIPALITY.

Mahim Hospital.

608. During the year under review, a temporary hospital has been constructed at Mahim, on the site of the old contact camp and to the west of the Mahim Station of the B. B. & C. I. Railway. The Hospital stands on Municipal ground.

609. It consists of 12 rooms each 16'×10', and a verandah 5' wide, quarters for nurses, a dispensary, Hospital Assistant's quarters with bath rooms, 1 store room, 5 cook-rooms for different castes, dhobi's washing place, and a dead house.

610. There is also an office room, an ambulance shed and a chowkey. The Hospital has been fenced all round.

611. A new pathway has also been constructed from the Station to the hospital for ambulances and carried up to the camp.

612. To the south side of this Hospital, there is a high piece of ground on which a contact camp has been constructed. This camp consists of 15 rooms, 10'×10', with a 5' verandah.

613. Stand pipes, sweepers' quarters and 5 latrines with cesspool arrangement have also been provided.

614. The materials used in construction are round posts with double bamboo mats and batten doors with double matting and the corrugated sheet iron for roofs.

615. The shed for sweepers, ambulances and chowkey have been covered with cadjans.

616. The estimated cost is Rs. 2,900, but the actual cost will be about Rs. 3,500.

Du Boulay Ward.

617. During the year a semi-permanent additional ward was constructed in connection with the Julai Hospital, which has been named "Du Boulay" Ward.

618. It consists of square jungle-wood posts and plates, bamboo mat frames fixed on hinges to open on flaps all round the verandah. The roof is covered with corrugated iron sheets.

Health Camp and Hospital in Bandora Slaughter House yard.

619. The following works were carried out at the Bandora Slaughter House :—

(1.) A new ward for Plague patients was constructed in place of the two old wards which had fallen down.

(2.) An Hospital for Mahars was provided in an old stable. It contains rooms for about 6 beds.

(3.) The Health Camp has been removed and rebuilt.

620. The following Municipal Hospitals were maintained during the year :—

(1.) Modykhana Hospital.
(2.) Julai Hospital.
(3.) Northbrook Garden Hospital.
(4.) Maratha Hospital.
(5.) Arthur Road Temporary Hospital.
(6.) Grant Road Hospital.
(7.) Parel Hospital.

MISCELLANEOUS.

Camp at Haines Road Cemetery.

621. Six rooms were constructed in the Haines Road Cemetery, each 10′ × 10′, with a 5′ verandah for the use of the grave diggers at the cemetery. These sheds have fallen down recently and the materials have been removed and stacked near the Worli Sluice House.

NURSES' QUARTERS, MODYKHANA HOSPITAL.

622. Three semi-permanent quarters for nurses with out-houses consisting of one cook-room and 3 servants' rooms, were constructed in connection with the Modikhana Hospital on ground belonging to the Port Trustees.

623. The materials used in construction are benteak wood posts, joists and planks and corrugated iron sheets.

624. The roof is covered with felt.

625. Separate bath-rooms have been provided.

LABORATORY AT GOVERNMENT HOUSE, PAREL.

626. A laboratory was fitted up during the year in the Government House, Parel, for the purpose of enabling Dr. Galliotti to carry on his researches at a cost of Rs. 505-9-3.

THE MUNICIPAL SERVANTS' ACT.

636. No circumstances have arisen in this Department during the year to necessitate the putting of the Municipal Servants' Act into operation.

I have the honour to be,

Sir,

Your most obedient servant,

M. C. MURZBAN, F.R.I.B.A., M.INST.C.E.,

Executive Engineer, Municipality.

J.—SPECIAL DRAINAGE WORKS.

Report of Mr. James W. Smith, Special Drainage Engineer, forwarded under his No. S. D. 517 of 24th June 1899.

SIR,—I have the honour to submit the Administration Report of my Department for the year 1898-99.

2. I continued in charge of the office of Deputy Executive Engineer, Drainage, (in addition to carrying out my own duties) up to the 7th November 1898 when Mr. C. C. James having returned from leave, I handed over charge of that office to him.

3. The unfinished works in my Department commenced in previous years, and the new works commenced during the year were as follows :—

UNFINISHED WORKS.

1. Colaba sewerage works.
2. Umarkhadi sewerage works.
3. Mazagon sewerage works (gravitation portion).
4. House drainage connections in the Colaba District (street portions).
5. Fergusson Road and Chinchpokli sewerage works (gravitation portion).
6. Old Race Course sewerage works (gravitation portion).
7. Improvement of roadside drains with masonry gullies in the Khetwadi District.
8. Masonry drain from Girgam Road passing through Night-soil Depôt Lane and Mathew Road and crossing the B. B. & C. I. Railway to Back Bay.
9. Opening out the water-course to the west of Messrs. Kama's property, Parel Road, and constructing a covered drain thereat.

10. Culvert with a penstock in the eastern bank of the Mahalakshmi Reservoir.

11. Storm-water drain from near the Wellington Fountain *viâ* Band Circle to the sea.

12. Storm-water drain with water gullies in Esplanade Road opposite the Elphinstone College.

13. Storm-water drain in Wodehouse Road near the Young Men's Christian Association Buildings.

14. Storm-water drain in Lower Colaba Road and Thomas Street.

15. Storm-water drain at the east foot of Wodehouse Bridge.

16. Ovoiding side drains in Pathan 1st Street.

17. Constructing an arched masonry drain between the poor Parsi chals in Gilder Lane and the B. B. & C. I. Railway.

18. Improvement of roadside drains and water-courses in and about Dadar Road.

19. Machinery for the Parel, &c., Sectional Sewerage Districts.

20. Mazagon Sewerage Works (Sectional).

WORKS COMMENCED DURING THE YEAR.

21. Surface drainage works in Kamatipura District.

22. Providing 41 manholes on the old ovoid sewers in Kamatipura.

23. Works in 9″ pipe sewer in the new roads in the southern part of the Apollo Reclamation (portions of Merewether Road, Henry Road, Extension of Ormiston Road and the new 80-foot road next the sea).

24. Drainage works at the Sewage Farm of the Homeless-Leper Asylum at Matunga.

I.—COLABA SEWERAGE WORKS.

4. The suit filed by Messrs. Bulkley & Co. against the Municipality has not yet come to an end. The matter is still pending before the High Court Commissioner.

5. The expenditure under this head paid during the year amounted to Rs. 59-10-6 and the total expenditure including that amounts to Rs. 8,21,070-3-11 against the grant of Rs. 8,34,856.

II.—UMARKHADI SEWERAGE WORKS.

6. The remarks made under the head of Colaba Sewerage Works, in respect of the suit of Messrs. Bulkley & Co., also hold good in the case of the Umarkhadi Sewerage Works.

7. The expenditure during the year amounted to Rs. 251-11-7 which with the expenditure in the preceding years amounts to Rs. 3,49,961-1-6 against the grant of Rs. 3,86,993.

III.—MAZAGON SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & CO.

8. These works have not yet been completed, though the contract period of two years for completion expired on the 24th November 1897.

9. The contractors during the year proceeded with the works without interruption, but the progress was slow, their excuse for the delay being the difficult nature of the work (*i. e.*, deep excavation in hard laminated and fissured rock) and the disorganization of labour owing to the Plague.

10. The contractors having been called upon to state when they would be able to complete the whole of the works have replied that they will finish them by the end of July 1899.

11. Besides the pipe sewers in the portion of the Nagpada District draining into Bellasis Road, which were taken over from the contractors in 1897, the pipe sewers in Matharpakhadi Road, Nesbit Road, Shepherd Road and a portion of Parel Road draining into the Ripon Road Sewer have been finally inspected and taken over from the contractors.

12. The expenditure during the year amounted to Rs. 18,256-9-9 which added to the previous expenditure amounts to Rs. 2,74,128-6-10 as detailed below :—

	Rs.	a.	p.
Establishment	28,363	3	5
Contingencies	4,336	1	4
Road repairs	21,666	13	10
Work	2,19,912	4	3
Rs.	2,74,268	6	10
Less—Credit by sale of contract forms, &c. „	140	0	0
Total Rs.	2,74,128	6	10

IV.—HOUSE DRAINAGE CONNECTIONS (STREET PORTIONS) IN THE COLABA DISTRICT.

CONTRACTOR—MR. PALANJI EDALJI, PLUMBER.

13. The street portions of the connections which remained to be done in the district were completed by the end of May 1898. Plans showing the drainage required for the houses were furnished by the ordinary Drainage Department.

14. The connections made during the year were 33 and the bill of the contractor for these connections amounting to Rs. 1,746-9-10 in the gross was passed in November 1898.

15. The total number of connections made throughout the district by this Department is 275.

V.—FERGUSSON ROAD AND CHINCHPOKLI SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTOR—MR. SAYAJI NAGUJI.

16. These works were completed within the contract period which expired on the 25th March 1898 as stated in last year's report.

17. During the progress of the work it was found necessary to provide additional manholes so as to avoid the total closing of the portion of Worli Road between the Love Grove Pumping Station and Haines Road which is so extremely narrow that if the usual distance for manholes had been preserved the road would have been entirely closed against traffic. There was also an increase in the length of the sewer in order to join it with the main sewer on the south side of the shred lifter chamber.

18. This additional work caused extra expense entailing an excess upon the grant and a transfer of Rs. 2,000 from the savings in the grant for ovoiding side drains in Girgam Road was obtained to meet the excess. This transfer was sanctioned by the Standing Committee under their Resolution No. 3141, dated 6th July 1898, and by the Corporation under their Resolution No. 4058, dated 4th August 1898.

19. The final bill amounting to Rs. 59,896-0-4 in the gross, was assed during the year. The expenditure during the year amounted

to Rs. 4,168-13-6 and this together with the previous expenditure amounts to Rs. 89,910-12-7 as detailed below :—

	Rs.	a.	p.
Establishment	7,088	0	10
Contingencies	1,617	1	0
Road repairs	3,594	7	9
Work	59,974	4	6
18" Pipe sewer in DeLisle Road	17,756	14	6
Total ... Rs.	90,030	12	7
Less—Credit by sale of Contract forms and transfer of clerk ... ... „ „	120	0	0
Total ... Rs.	89,910	12	7

20. The total grant sanctioned for the works stands as below :—

	Rs.
Work estimated by the Special Drainage Engineer ...	81,617
9" pipe sewer in the eastern part of Fergusson Road as estimated by the Drainage Department	6,500
Add—Transfer sanctioned under Corporation Resolution No. 4058, dated 4th August 1898	2,000
Total ...Rs.	90,117

21. The final bill for the work in the 18" pipe sewer in DeLisle Road which was entrusted to Messrs. Sulemanji Mulla Abdulali & Co., and was completed by them in 1896, was passed during the year. It amounted in the gross to Rs. 17,675-10-4 against the contract amount of Rs. 18,513-0-0.

VI.—OLD RACE COURSE SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTORS—MESSRS. SULEMANJI ALI MUHAMAD & Co.

22. This work which was commenced on the 19th June 1897, was completed within the contract period of 8 months, *i.e.*, before the 20th February 1898.

23. Three stretches of pipe sewer included in the contract (in Souter Street, Sankli Street and Blaney Street), aggregating in length to 825 feet and estimated to cost Rs. 4,258-0-0 have not been completed on account of certain local causes mentioned in the last year's report. The final bill for the works including extra items amounted in the gross to Rs. 32,832-14-0 and was passed in June 1898.

24. The contract amount for the work was Rs. 35,846 and deducting Rs. 4,258 therefrom on account of the work left undone, the amount available for the actual work done was Rs. 31,588. The cost of the work as completed amounted to Rs. 30,054-11-9 excluding items of extra work of the value of Rs. 2,778-2-4. There was thus a saving of Rs. 1,533-4-3 and that together with Rs. 1,244-14-1 from the contingency provision for the Works met the cost of the extra items.

25. Though it was considered by the Commissioner very desirable that the houses in and about Ghelabhai Street should be connected to the sewer laid in that street, yet the sewer could not be used for the purpose as it was not connected with the Ripon Road Sewer because of a house through which the sewer was to pass not having been purchased by the Municipality.

26. As there was no probability of the house being purchased immediately, the only feasible alternative was to make a temporary connection of the new sewer with the Ripon Road Sewer through a firewood shed near the spot.

27. A notice under Section 222 of the Municipal Act was served on the owner of the shed and the temporary connection estimated to cost Rs. 575 was made. The work was done by the Contractors named above and the total actual cost including road repairs amounted to Rs. 572-15-4 which was sanctioned (under the Corporation's Resolution No. 11312, dated the 9th March 1899) to be defrayed from the grant for the Old Race Course Sewerage Works.

28. The notice was served on the owner of the shed on the 30th September 1898. The work was commenced on 3rd October and completed on 12th idem at a cost of Rs. 545-5-8.

29. The total grant for the works under the contract amounted to Rs. 43,270 made up of two items, *viz.*, Rs. 40,815 for the sewerage of the Old Race Course District and Rs. 5,455 for a 9" pipe sewer in Bapty Road. The latter work was completed during the year under report.

30. The expenditure during the year amounted to Rs. 1,556-14-2 and the total expenditure to Rs. 39,039-8-1 as detailed below :—

	Rs.	a.	p.
Establishment	3,668	10	8
Contingencies	376	12	0
Road repairs	1,625	14	0
Work	33,378	3	5
	Rs. 39,049	8	1
Less—Credit by sale of contract forms	„ 10	0	0
Total ...	Rs. 39,039	8	1

VII.—IMPROVEMENT OF ROADSIDE DRAINS AND PROVISION OF WATER GULLIES IN THE KHETWADI DISTRICT.

CONTRACTORS—MESSRS. VITHAL SAYANA & Co.

31. These works were completed within the contract period which expired on 21st February 1898 as stated in the last year's report.

32. The final bill for the work amounted to Rs. 43,478-3-9 in the gross including extra and excess items.

33. The extra items amounted to Rs. 4,649-4-3 and the contract items together with the excesses amounted to Rs. 38,828-15-6 against the contract amount of Rs. 43,313 thus showing a saving of Rs. 4,484. This together with Rs. 165-4-3 from the contingency provision for the works met the cost of the extra items.

34. The bill for a stormwater masonry drain 2'-6" × 2'-6" in Khetwadi 10th Lane, north of Khetwadi Back Road, was passed in June 1898. It amounted to Rs. 3,952-12-0 against the sanctioned amount of Rs. 4,353 shewing a saving of Rs. 400-4-0.

35. The total grant for the works in Khetwadi amounted to Rs. 54,486.

36. The expenditure during the year amounted to Rs. 7,117-5-4 and that together with the previous expenditure amounts to Rs. 52,657-2-8 as detailed below :—

	Rs.	a.	p.
Establishment...	2,469	3	7
Contingencies...	1,704	1	0
Road repairs	1,639	14	7
Work	43,478	3	7
Masonry drain in Khetwadi 10th Lane ...	3,952	11	11
Rs.	53,244	2	8
Less—Credit by sale of contract forms and old stone ladis ... ... „	587	0	0
Total ... Rs.	52,657	2	8

VIII.—MASONRY DRAIN FROM GIRGAON ROAD PASSING THROUGH NIGHTSOIL DEPÔT LANE AND MATHEW ROAD AND CROSSING THE B. B. & C. I. RAILWAY TO BACK BAY.

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & Co.

37. The contract period for the completion of these works was six months and it expired on 30th April 1898.

38. The works specifically comprised in the contract were practically completed by that date and the new drain served its purpose of carrying off stormwater during the last rains.

39. In the estimate for these works as prepared by the Deputy Executive Engineer, Drainage, there was no provision for outfall works at the mouth of the drain such as in my opinion were indispensable especially as the mouth is in an exposed situation on the Chaupati foreshore.

40. These protective works consisting of a pair of tidal flaps and a stone-apron and side walls were carried out but were not completed until the end of March 1899.

41. The final bill amounting to Rs. 18,962 including the cost of the extra works and excesses was not passed at the end of the financial year.

42. The expenditure incurred and passed to the end of the financial year amounted to Rs. 14,963-9-4 as detailed below :—

	Rs.	a.	p.
Establishment	1,071	9	2
Contingencies	245	8	5
Road repairs	918	14	4
Work	12,747	9	5
	Rs. 14,983	9	4
Less—Credit by sale of contract forms	„ 20	0	0
Total...	Rs. 14,963	9	4

IX.—OPENING OUT THE WATER-COURSE TO THE WEST OF MESSRS. KAMA'S PROPERTY, PAREL ROAD, AND CONSTRUCTING A COVERED DRAIN THEREAT.

CONTRACTOR—MR. SAYAJI NAGUJI.

43. This work consisted of—

(*a*) opening out the watercourse ; and

(*b*) the construction of a covered drain.

44. The second part of the work was completed at a cost of Rs. 3,362-6-7 as stated in last year's report.

45. The first part has been deferred under advice of the Municipal Solicitors as Messrs. Kama object to the execution of the work.

46. Out of the grant there is a balance available for that portion of the work amounting to Rs. 4,266-9-5.

X.—CULVERT WITH A PENSTOCK IN THE EASTERN BANK OF THE MAHALAKSHMI STORM-WATER RESERVOIR.

CONTRACTOR—MR. SAVAJI NAGUJI.

47. This work was completed at a cost of Rs. 1,673-4-4 against the grant of Rs. 2,112, as stated in last year's report.

48. Some additional masonry work was subseqnently found necessary and it was done by the same contractor at a cost of Rs. 81-15-0. This cost was defrayed during the year from the sum of Rs. 438-11-8 which represented the savings in the grant.

XI.—STORM-WATER DRAIN FROM NEAR THE WELLINGTON FOUNTAIN *VIA* BAND CIRCLE TO THE SEA.

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & CO.

49. The Contractors commenced the work on 1st May 1897 and undertook to complete it by 15th June 1897. They, however, did not finish the whole of the works until 1st May 1898.

50. A large portion of the ground through which the drain passes belongs to Government and it was only after long correspondence and great delay that permission was obtained from Government to the drain being laid in their ground.

51. Looking to the progress which the Contractors made at the commencement and to the short time in which they finished the construction of the portion of the drains, which runs through Municipal ground, there appears every reason to assume that the contractors would have completed the whole of their work within the contract time if they had not been hampered at that favourable period, but had been given permission from the very commencement to carry out the work in the Government land.

52. In the rains practically no drainage work could be done, and for even two or three months after the rains, the work could be advanced only very slowly owing to the comparatively high level of the subsoil water. During these months the Contractors lost the greater portion of every day in pumping out the water collected during the night.

53. Considering all these circumstances, it was impracticable for the Contractors to finish the work much earlier than they did.

54. Although the drain was not completed before the rains of 1897, yet the public derived benefit from it during those rains, as the Contractors were able to cut out the trench right down to the sea and it served the purposes of the drain in obviating the flooding of the roads.

55. The final bill for the work amounted to Rs. 30,071-5-2, including extras and excesses, and was passed during the year.

56. The total grant for the work was Rs. 37,355, and the total expenditure has been Rs. 36,702-3-2, as detailed below :—

	Rs.	a.	p.
Establishment	3,033	3	2
Contingencies	1,303	9	4
Road repairs	1,464	1	6
Work	30,946	5	2
Rs.	36,747	3	2
Less—Credit by sale of contract forms ... „	45	0	0
Total Rs.	36,702	3	2

XII.—STORM-WATER DRAIN WITH WATER GULLIES IN ESPLANADE ROAD, OPPOSITE THE ELPHINSTONE COLLEGE, AND

XIII.—STORM-WATER DRAIN IN WODEHOUSE ROAD, NEAR THE Y. M. C. A. BUILDINGS.

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & CO.

57. The final bill for these works was passed during the year. It amounted to Rs. 9,756-2-11.

58. The total grant sanctioned was Rs. 11,527, and the total expenditure, including the final bill, amounted to Rs. 11,364-10-5, thus shewing a saving of Rs. 162-5-7.

59. These storm-water drains and water gullies were handed over to the charge of the Deputy Executive Engineer, Drainage, on 9th July 1897.

XIV.—STORM-WATER DRAIN IN LOWER COLABA ROAD AND THOMAS STREET.

CONTRACTOR—MR. SAYAJI NAGUJI.

60. The final bill for these works was passed during the year. It amounted to Rs. 9,581-15-11, including extras and excesses.

61. This storm-water drain was handed over to the charge of the Deputy Executive Engineer, Drainage, on the 10th February 1898.

62. The total expenditure, including the final bill, amounted to Rs. 10,466-0-1, as detailed below :—

	Rs.	a.	p.
Contingencies	163	13	4
Road repairs	720	7	11
Work	9,581	10	10
Total	Rs. 10,466	0	1

63. There has thus been a saving of Rs. 3,120-15-11.

64. The effect of this drain has been very marked, as in the roads through which it runs I observed but very little flooding during the last rains. There was still, however, some flooding in Lower Colaba Road from its junction with Thomas Street to a few hundred feet northwards, and to obviate that a branch storm-water drain was evidently required. I submitted a proposal for constructing one at a cost of Rs. 2,980, from the savings above alluded to, having framed my estimate at the rates of the contract for the Kamatipura Surface Drainage Works, which rates were very favourable and lower than those of any other contract of my Department at present under execution, while the Contractors (Messrs. Ali Muhamad Abdulali and Company) have shewn themselves expeditious and satisfactory in carrying out those and other works entrusted to them.

65. The Corporation sanctioned the carrying out of this work under their Resolution No. 257, dated 13th April 1899, from the savings as proposed, and Messrs Ali Muhamad Abdulali and Company were requested, on the 25th April 1899, to take the work in hand at once. It is very creditable to them that they nearly completed the drain by the end of May 1899, so that the advantage of it will be experienced during this year's rains.

XV.—STORM-WATER DRAIN AT THE EAST FOOT OF WODEHOUSE BRIDGE.

CONTRACTOR—MR. SAYAJI NAGUJL.

66. The final bill for this work, amounting to Rs. 1,123-11-6, was passed during the year.

67. The total cost amounted to Rs. 1,331-7-8 as against the grant of Rs. 1,639, thus shewing a net saving of Rs. 307-8-4.

XVI.—OVOIDING SIDE DRAINS IN PATHAN 1ST STREET.

CONTRACTORS—MESSRS. VITHAL SAYANNA & Co.

68. The final bill for this work, amounting to Rs. 4,402-14-7, was passed during the year.

69. The total expenditure amounted to Rs. 6,094-15-3, as detailed below :—

	Rs.	a.	p.
Establishment	1,483	4	9
Contingencies	16	10	4
Road repairs	192	1	7
Work	4,402	14	7
Total	Rs. 6,094	15	3

70. The grant sanctioned for the work was Rs. 6,201, and the total expenditure being Rs. 6,094-15-3 there has been a net saving of Rs. 106-0-9.

XVII.—CONSTRUCTING AN ARCHED MASONRY DRAIN BETWEEN THE POOR PARSI CHALS IN GILDER LANE AND THE B. B. & C. I. RAILWAY.

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & Co.

71. This work was completed before the end of the last financial year as stated in last year's report, though no expenditure was certified and passed during that year.

72. The Contractors' bill for this work amounted to Rs. 3,581-5-3, and the total expenditure incurred and passed to Rs. 3,930-10-7 against the grant of Rs. 4,221.

73. There has thus been a net saving of Rs. 290-5-5.

XVIII.—IMPROVEMENT OF ROADSIDE DRAINS AND WATER-COURSES IN AND ABOUT DADAR ROAD.

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & Co.

74. These works were commenced on 1st March 1898, and the contract period for completion, which was six months, expired on 31st August 1898.

75. The works were practically completed at the end of December 1898, though some slight defects then remaining were not remedied until the end of January 1899.

76. A portion of the work comprised in the contract was to be done within ground belonging to the B. B. & C.I. Railway, and on my enquiring of the Chief Engineer of that railway if there was any objection to the water-course in their ground being improved, he took exception to the work being done. A great deal of correspondence has ensued between the Agent and the Commissioner, and the matter has not yet come to a final settlement.

77. As I could not give permisson to the Contractors to execute the work within the railway premises they wrote to me on the 10th May 1898, stating that, as they were not allowed to proceed with the work in due time, they would no longer hold themselves responsible for carrying it out. It has been considered unfair to hold them responsible after the completion of the other portions of the work, and the contract between them and the Municipality has been considered as closed.

78. The final bill, which amounted to Rs. 20,125, including extras amounting to Rs. 4,594, though prepared was not passed during the year under report.

79. The total grant sanctioned for the works is Rs. 30,475, and the total expenditure certified and passed to the end of the year was Rs. 14,209-14-2, as detailed below :—

	Rs.	a.	p.
Establishment	1,231	9	6
Contingencies	394	8	7
Road repairs	491	9	7
Work	12,092	2	6
Total Rs.	14,209	14	2

XIX.—MACHINERY FOR THE PAREL, &c., SECTIONAL SEWERAGE DISTRICTS.

CONTRACTORS—MESSRS. HUGHES AND LANCASTER BY THEIR AGENTS AND ATTORNEYS MESSRS. RICHARDSON AND CRUDDAS.

80. The contract for the machinery and the work was signed on 1st April 1898, and an order to commence was given on the same day. The contract period for completion will expire on 31st March 1900.

81. The work of laying the air and sealed *sewage* mains was first commenced. The contract amount for this work is Rs. 2,77,480. A considerable portion has been completed, but the value of the work measured up and actually paid for to the end of the year amounted to only Rs. 1,47,477.

82. Messrs. Richardson and Cruddas informed me, on 20th April 1898, that four shipments of air mains and sealed sewage mains, aggregating in value to about Rs. 88,000, had arrived in the harbour, and requested that an advance might be made on those mains.

83. Under clause XXXV of the contract, the Commissioner sanctioned payment of advances from time to time to the extent of 50 per cent. on the value of the pipes actually delivered on the site. The total advances so made amounted to Rs. 84,639, of which Rs. 38,061-10-5 has been recovered from the Contractors' bills.

84. Under the power reserved to me by clause XXXIII of the contract I altered the alignment of the air main and the sealed sewage main originally proposed to be laid along Tank Bandar Road to Ejector Station No. 2, Mazgaon District. The main will be laid along the Extension of Victoria Road, the recent completion of which has rendered the shorter and more direct route possible. The alteration will effect a saving in the cost.

85. Under clause III of the contract Mr. S. Rebsch, A.M.Inst., C.E., has been appointed the Commissioner's Agent in England for inspecting the manufacture of the machinery and for giving the contractors instalment certificates from time to time as contemplated by clause XXIX.

86. This appointment was sanctioned by the Standing Committee under their Resolution No. 1439, dated the 11th May 1898, and the Committee at the same time fixed the amount of fee payable at 150 guineas.

87. Under clause X of the contract the contractors are required to deliver to the Commissioner's Agent two sets of detail and fully dimensioned plans of all the machinery and other work of every description to be supplied and executed under the contract, but in order to save time I arranged before the appointment of the Agent was made for the plans to be sent direct to me as they were subject to my approval even after delivery to the Agent.

88. The general drawings for Air Compressors and Condensers and for the eccentrics and slide valves for the low pressure cylinders were received from Messrs. Hughes and Lancaster through their Agents Messrs. Richardson & Cruddas, in the middle of June 1898, but the detail plans of the steam and air cylinders were not received.

89. After consultation with Mr. Hewett, Assistant Engineer, Mechanical Branch, and discussion with Mr. Horbury of Messrs. Richardson & Cruddas, I wrote to Messrs. Richardson & Cruddas, informing them that as regards the general arrangement plan I had no very serious objections to put forward, but that I thought it would have been better if instead of there being inside cranks for all cylinders, a starting platform had been adopted at the back of the cylinders keeping the valve chests of the two outer cylinders on the inside and using overhung disk cranks for the high and the low pressure.

90. Although the detail plans of the steam and air cylinders had not arrived, I considered as far as could be judged from the small scale plan received, that certain improvements were desirable, and I mentioned them in my letter No. S. D. 447, dated 17th June 1898, to Messrs. Richardson & Cruddas.

91. The services of Mr. J. Knowles were obtained to assist Mr. Hewett in carefully considering the design forwarded by Messrs. Hughes and Lancaster for the condensers and air pump and in designing modifications. Mr. Knowles was paid a fee of Rs. 50.

92. I addressed Messrs. Richardson & Cruddas stating that the design for the condensers and air pump forwarded by Messrs. Hughes and Lancaster was open to several objections as follows :—

(*a.*) The weight of the air pump trunk and bucket and the friction of rubbing surfaces in the large packing ring would be excessive.

(*b.*) The gun metal delivery valve plate serving also as a neck ring for the trunk would be a very expensive item of renewal.

(*c*) The bucket clearances both top and bottom were excessive and abnormal clearance would considerably decrease the efficiency of the pump.

(*d*) The packing rings as shown in the bucket were unnecessary, and many instances are known of their having been the cause of serious accidents by slipping out and wedging the bucket to the barrel.

(*e*) Exception was taken to the method in which the guard plate of the foot-valve was secured as on removal of the nut, the bolt might drop to the bottom of the pump. The valve grating as shown in the drawing appeared insufficiently secured to the main casting.

(*f*) The ratio between the capacity of the low pressure cylinder and condenser as represented in the drawing was excessive being as 1 to 2.

(*g*) The condenser was not sufficiently compact, and the provision of two injection water inlets was unusual and unnecessary as introducing a complication of valves and pipes detrimental to general efficiency.

(*h*) The extension of the crank shaft for driving the air pump was too small in diameter for safety.

93. In view of the above objections an alternative design was prepared and forwarded to Messrs. Richardson & Cruddas, though I stated it was not intended that the design need be strictly adhered to in every detail. In the general arrangement of parts and leading dimensions it was, however, to be generally adopted.

94. The principal points of difference between this design and that forwarded by Messrs. Hughes and Lancaster are as follow :—

(1) The air pump in the new design is made single acting. The diameter of the bucket has been slightly increased and the stroke reduced from 18 inches to 15 inches to bring the bucket speed as low as possible.

(2) The pump barrel is of cast iron (instead of gun metal) of sufficient thickness to stand reboring once. The bucket is solid and is also of cast iron.

(3) The pump rod is of mild steel sheathed with a solid drawn brass tube $\frac{1}{4}$ inch thick, which can be renewed when worn.

(4) The driving connections from the air pump lever are reversed. This while allowing of the same centres being kept between the main crank shaft of the engine and low pressure cylinder (or in other words between the centre of the connecting rod and verti-

cal condenser as shown in Messrs. Hughes and Lancaster's design) admits of the air pump being placed much closer to the condenser thus making the arrangement more compact.

(5) A bell mouth injection pipe is provided instead of one with a rose. The former is quite as efficient as a rose and it has the advantage of not being liable to choke.

(6) The air pump cross head, radius links and gindes which are inseparable from a single acting pump having little head room form the only extra parts in the present design as compared with that of Messrs. Hughes and Lancaster, and after eliminating the expensive gun metal barrel trunk and bucket and top pump cover of the latter the ultimate expense of construction should leave some balance in favour of the former.

95. Messrs. Richardson & Cruddas informed me on the 15th July that they had received that day a telegram from Messrs. Hughes and Lancaster as follows :—

"Have put engines in hand adopting Hewett's condenser and "other suggestions, subject being relieved vacuum guaran- "tee telegraph confirmation."

96. Having interviewed the Commissioner on the same day, I wrote to Messrs. Richardson & Cruddas, stating that provided the condenser and air pump were properly made according to the design forwarded to them, they would be relieved from the vacuum guarantee stipulated for in the latter part of para. 2 on page 53 of the Specification.

97. Having waited some time for the plans for buildings to receive the machinery, I requested Messrs. Richardson & Cruddas on the 17th June 1898 to furnish them as early as possible. They were received from Messrs. Richardson and Cruddas on 2nd July and after consulting Mr. Hewett, I wrote to Messrs. Richardson & Cruddas on the 8th July 1898, informing them what amendments I considered necessary, and stating that if Messrs. Hughes & Lancaster had no objection to raise against the amended plans, they might be requested to forward as soon as possible full detail plans of the foundations for the engines and boilers to enable me to proceed with the work.

98. As the plans were not received, I sent a reminder on the 18th of January 1899 to Messrs. Richardson and Cruddas, requesting them to furnish the plans by as early a date as possible. The plans were at last received on 16th February 1899.

99. It having been decided that the Air Compressor Station for the various Sectional Districts should be constructed immediately to the north of the Love Grove Pumping Station I opened up negotiations with the owners of the ground with a view to obtaining it by private settlement.

100. Three plots in all are required and they are as follows:—

Owners.	Plot No.	Sq. yds.
Mr. Harkisondas Narottamdas	3362	1,223
„ Bhagwant Bhaskar	3361	5,210
„ Janardan Purushotam and Bai Radhabai...	3360	3,088
	Total ...	9,521

101. I offered Re. 1 per square yard for the part required of plot No. 3362, annas 12 per square yard for plot No. 3361 and annas 10 per square yard for plot No. 3360.

102. The owner of plot No. 3362 demanded Rs. 2-8-0 per square yard, but after consultation with the Executive Engineer and by the Commissioner's verbal direction, I made a firm and final offer of Rs. 1-4-0 per square yard, and it was accepted. The Corporation accordingly sanctioned the purchase of this plot under their Resolution No. 10117, dated 9th February 1899, and the ground was taken over by this Department from Mr. Harkisondas on 11th March 1899.

103. As regards the other two plots the owners demanded Rs. 2 per square yard, but having after consultation with the Executive Engineer been confirmed in my opinion that the rates I had offered were full and sufficient, I declined to increase the rates and the owners declined to accept them.

104. The sanction of the Standing Committee was therefore applied for to the two plots being acquired under the Land Acquisition Act, and it was accorded under their Resolution No. 8114, dated 28th December 1898.

105. Government Resolution (Revenue Department) No. 2050, dated 18th March 1899, having been passed, authorizing the Collector of Land Revenue to acquire the two plots, he held an enquiry into the matter on the 24th April 1899, and the rates he intimated he thought would be fair were Re. 1 per square yard for Mr. Bhagwant Bhasker's plot and Re. 0-14-0 per square yard for that of Mr. Janardan Purushotam and Bai Radhabai, including the 15 per cent. for compulsory acquisition. A second meeting was fixed for 8th May, but it was not held as the parties had in the meantime accepted the Collector's rates. No award has, however, yet been given by the Collector.

106. Two second-hand boilers 30 ft. × 7 ft. have been purchased from the Jivraj Balu Mills at a cost of Rs. 1,200, each to be used as air receivers. Both were delivered at the Mill premises and were conveyed to Love Grove by the Assistant Engineer, Mechanical Branch, at a cost of Rs. 240-2-9.

107. Three shipments of machinery have arrived and have been landed by Messrs. Richardson and Cruddas. The shipments consist of ejectors and accessories, fuel economiser, 23 inlet ventilating shafts, 3 Babcock and Wilcox boilers, Worthington pumps, ventilating air-outlet ornamental shafts, automatic ejector flush siphons, &c., together with their fittings. This machinery has been conveyed to Love Grove and stacked there by Messrs. Richardson and Cruddas.

108. The total expenditure incurred upon these works and certified to the end of the financial year amounted to Rs. 3,68,649-1-5 as detailed below :—

	Rs.	a.	p.
Establishment	44,357	8	4
Contingencies	1,418	12	9
Road repairs	10,096	8	7
Machinery	3,12,776	4	3
Total ...	Rs. 3,68,649	1	5

XX.—MAZAGAON SECTIONAL SEWERAGE WORKS.

Contractor—Mr. Sayaji Naguji.

109. Tenders for these works were invited on 1st October 1898 and were made returnable on the 20th October 1898.

110. Three tenders were received as follows :—

(1) Mr. Sayaji Naguji ... ... Rs. 1,67,219
(2) Messrs. Sulemanji Mulla Abdulali & Co. ... „ 1,90,867
(3) „ Ali Mahamad Abdulali & Co. ... ... „ 2,08,787

111. The lowest tender that of Mr. Sayaji Naguji for Rs. 1,67,219 was accepted under the Standing Committee's Resolution No. 6836, dated the 9th November 1898. This tender was lower than the office estimate by Rs. 752.

112. The contract was executed on the 5th of December 1898 and an order to commence the work was given on the same day.

113. The contract time for completion is 18 months and from the progress the contractor has already made the works will doubtless be completed within that period.

114. The contract includes the pipe-sewers, manholes, flush tanks and vent shafts in a portion of the Port Trust Estate comprised in the Mazagaon Sectional District.

115. Before the contract forms were printed, I enquired of the Port Trust Engineer if the Trustees were willing to have the sewerage work in their property or in any part thereof included in the contract prepared for the Municipal Works. The Engineer having furnished a plan of the Trustees' Estate where pipe-sewers were required, I furnished him with an estimate amounting to Rs. 44,991, exclusive of the percentage for supervision.

116. The matter having been placed before the Port Trustees they considered it would be convenient if the work on their ground were carried out by the Municipality at the same time as the Municipal Work was being done and they agreed to pay the actual cost plus 7½ per cent. for supervision, that is, the same percentage as they have paid for similar work carried out for them by this Department on the Apollo Reclamation.

117. The contract amount of Rs. 1,67,970, is made up as follows :—

		Rs.
(*a*).	Pipe sewers in Municipal Roads Mazgaon ...	1,28,601
(*b*).	18" pipe sewer in Frere Road	4,078
(*c*).	Pipe sewers in Port Trust Roads	35,291
	Total Rs.	1,67,970

118. Item (*a*) is payable from the grant for the Mazgaon Sectional Sewerage Works, item (*b*) from the grant for machinery for Sectional Sewerage Districts and item (*c*) is recoverable from the Port Trustees.

119. The total expenditure certified and passed to the end of the year amounted to Rs. 24,196-15-2 as per details below :—

	Rs.	a.	p.
Establishment	9,425	0	0
Contingencies	557	9	7
Road repairs	1,209	14	3
Work	13,039	6	9
Rs.	24,231	15	2
Credit by sale of contract forms	35	0	0
Total Rs.	24,196	15	2

XXI.—SURFACE DRAINAGE WORKS IN THE KAMATIPURA DISTRICT.

CONTRACTORS—MESSRS. ALI MAHAMAD ABDULALI & Co.

120. The Corporation sanctioned the execution of these works under their Resolution No. 1198, dated 5th May 1898, at a cost of Rs. 91,805.

121. Tenders for the work were invited on 29th July 1898, and made returnable on 17th August 1898. Six tenders were received as follows :—

(1)	Messrs Ali Mahamad Abdulali & Co. ...	Rs.	51,898
(2)	Mr. Savaji Naguji	„	56,071
(3)	Messrs Bhedwar & Co :	„	63,910
(4)	„ Teja Kaya & Co :	„	63,922
(5)	„ Littlewood Palanji & Co. ...	„	66,599
(6)	„ Ali Mahamad Kasum & Co. ...	„	62,758

122. The last named tenderers No. (6) did not enter a rate for cement plastering, and no consideration was given to their tender inasmuch as the amount thereof excluding the item of cement plastering was much higher than that of the lowest tender.

123. The lowest tender (that of Messrs Ali Mahamad Abdulali & Co.) which amounted to Rs. 51,898 or Rs. 21,932, less than the office estimate was accepted under the Standing Committee's Resolution No. 5001, dated the 31st August 1898.

124. The contract was executed on 16th September 1898, and an order to commence the work was given on 21st September 1898.

125. The contract period for completion is 9 calendar months from the date of order which expires on 21st June 1899.

126. The progress is very satisfactory and it is expected that the works will be completed within the contract period.

127. The gullies of houses in and about Jairajbhai Pirbhai Lane were often flooded with sullage causing a serious nuisance, there being no sewer there with which to connect the sullage. It was therefore proposed to lay a 9″ pipe sewer with manholes in Jairajbhai Pirbhai Lane, estimated to cost Rs. 2,624 and the Corporation under their Resolution No. 11307, dated the 9th March 1899, sanctioned the execution of the work from the savings in the grant for the Kamatipura Surface Drainage Works.

128. The work was entrusted to the contractors for the Kamatipura Surface Drainage Works and they completed it by the end of March 1899. The bill amounted to Rs. 1,667-5-8.

129. The expenditure on the whole works incurred and passed during the year amounted to Rs. 50,741-4-11 as detailed below :—

	Rs.	a.	p.
Establishment	2,257	1	10
Contingencies	807	10	4
Road repairs	4,077	2	9
Surface Drainage Works	41,972	0	4
9" pipe sewer	1,667	5	8
	50,781	4	11
Less—Credit by sale of Contract Forms...	40	0	0
Total...Rs.	50,741	4	11

XXII.—PROVIDING 41 MANHOLES ON THE OLD OVOID SEWERS IN KAMATIPURA.

130. This was one of the new works (item No. 12) provided for from current revenue in the Budget for 1898-99.

131. As this Department was carrying out the storm-water drainage works in the Kamatipura District, it was considered advisable that the construction of the manholes should be carried out simultaneously by this Department.

132. Accordingly this was entrusted to the contractors for the Kamatipura works and was completed by them.

133. The cost incurred amounted to Rs. 2,543-7-7 against the grant of Rs. 3,087. The net saving in the grant therefore amounts to Rs. 543-8-5.

XXIII.—WORK IN 9" PIPE SEWERS IN THE NEW ROADS IN THE SOUTHERN PARTS OF THE APOLLO RECLAMATION (PORTION OF MEREWETHER ROAD, HENRY ROAD EXTENSION, ORMISTON ROAD EXTENSION AND THE NEW 80-FOOT ROAD NEXT THE SEA).

CONTRACTORS.—MESSRS. SULEMANJI MULLA ABDULALI & Co.

134. As this Department had previously laid sewers on the Apollo Reclamation for the Port Trustees, they were desirous that the further work they had sanctioned should also be done by my Department.

135. The Engineer, Port Trust, was furnished with the estimates and the amount of Rs. 4,858 was deposited by the Trustees as follows :—

Rs. 1,255 paid on 4th June 1898 for laying 9″ pipe sewer in a portion of Merewether Road.
Rs. 637 paid on 25th July 1898 for laying 9″ pipe sewer in a portion of Henry Road.
Rs. 2,966 paid on 25th July 1898 for laying 9″ pipe sewer in a portion of Merewether Road.

Rs. 4,858.

136. The Engineer, Port Trust, requested that the work might be taken in hand immediately as the Trustees were desirous of constructing portions of the roads at once.

137. The only contractors for pipe sewers then working in the Department were Messrs. Sulemanji Mulla Abdulali & Co., the contractors for the Mazgaon Sewerage works (gravitation portion) and owing to the urgency of the work it was impossible to invite tenders or offers. There was therefore no satisfactory alternative but to entrust the work to them in extension of their contract for the Mazagon Works under Clause XXVIII of that contract, and this was sanctioned by the Standing Committee under their Resolution No. 4320, dated 11th August 1898.

138. An order was accordingly given to the Contractors on 22nd August 1898.

139. It was agreed between the Port Trust and the Municipality that the actual cost plus 7½ per cent. for supervision should be charged.

140. The Contractor's final bill for the work amounted to Rs. 3,746-15-10, and the total cost including road repairs to Rs. 4,215-7-5. Adding to this 7½ per cent. for supervision, the cost chargeable to the Port Trust amounts to Rs. 4,531-10-7 against the amount of Rs. 4,858 deposited by them. The balance (Rs. 326-5-5) will have to be refunded and an application for the same has been received from the Port Trust Engineer.

141. The Port Trust having more recently sanctioned the laying of 9″ pipe sewers in the extension of Ormiston Road and the new 80-foot road next the sea, the Port Trust Engineer requested me to take this work in hand as soon as possible.

142. The estimated amount (Rs. 3,493) was deposited by the Trustees on 13th February 1899.

143. The work was entrusted to the same Contractors (Messrs. Sulemanji Mulla Abdulali & Co.) as per Commissioner's sanction under his No. 30167, dated 11th March 1899.

144. The order for the work was given after the termination of the financial year, and any remarks thereon will be a matter for the next Administration Report.

XXIV.—SCHEME FOR SUBSOIL AND SURFACE DRAINAGE.

145. The Committee appointed by the Corporation under their Resolution No. 6571, dated the 11th October 1897, as mentioned in my last report held their first meeting on 20th October 1897, when on the suggestion of the Chairman the Honourable Mr. W. C. Hughes, it was determined that in order to facilitate a decision on the subject, the sanction of Government should be obtained to enable Mr. Playford Reynolds M. Inst. C.E., Superintending Engineer, Northern Division, to go thoroughly into the question with me and advise the Committee.

146. Accordingly the sanction of Government was obtained, and Mr. Reynolds after consultation with me submitted on the 28th February 1898, his report dated 16th February 1898, to the Chairman. The Chairman in forwarding it for circulation to the Committee, suggested that as Mr. Hargrave, who had gone into the question, had returned to Bombay, and as he (Mr. Hughes) was proceeding to England, Mr. Hargrave should be requested to take the place of Chairman on the Committee.

147. Mr. Reynolds's report was submitted to Mr. Hargrave, and he addressed to the Committee a note thereon.

148. I again addressed the Committee through the Commissioner on 24th March 1898, and inasmuch as the Committee considered the evidence so far placed before them as regards the soil of Bombay being water-logged, inconclusive or insufficient, I laid before them the principal points of evidence in that respect.

149. I forwarded a further report to the Commissioner, criticising and explaining the several points raised in Mr. Reynolds's report of the 16th February 1898, and in Mr. Bruce's notes on the subject. This was forwarded to the Committee by the Commissioner under his No. 32912, dated 28th March 1898.

150. As these documents exhibited a divergence of opinion between Mr. Reynolds and myself,the Committee at their meeting held on the 28th March 1898, suggested that Mr. Reynolds and I should meet again in consultation and endeavour as far as possible to reconcile our views.

151. Accordingly Mr. Reynolds had several consultations with me in my office, and I submitted a further report to the Commissioner (No. S. D. 380) dated 6th June 1898 together with the notes of our consultations dated 11th May, which had been printed for the information of the Committee.

152. It can be seen by comparing those notes with Mr. Reynolds's report dated 16th February 1898, and his forwarding letter and summary dated 28th idem, that the explanations which I was able to give during the consultations considerably diminished the divergence of view which previously existed.

153. The following Resolution was passed by the Committee at their meeting held on 7th July 1898, "That Mr. Nowroji N. Wadia, C.I.E., be requested to prepare a draft report on the lines of the remarks made by him before the Committee."

> "That the Special Drainage Engineer be requested to report as to the desirability of proceeding with the construction of storm-water drains and the effect these would have on the levels of the subsoil water."

154. I submitted to the Commissioner my report (No. S. D. 825, dated 2nd September 1898), called for by the above Resolution. The report comprised plans for draining to the harbour, the surface waters of the high lands on the west of the Island from Paedhoni on the south to Bhoiwada Cross Road on the north estimated to cost Rs. 22,50,249.

155. After going through all the evidence, the Committee made a report, dated 26th November 1898, and recommended the following as likely to best serve the interests of the city :—

(1). That the high level storm-water drain as proposed by Mr. Smith in Tardeo Road estimated at a cost of Rs. 1,77,607 be sanctioned.

(2). That the deepening of the outlet channel at Love Grove be taken in hand without delay and completed, if possible, by the next monsoon.

(3). That the silting going on in the storm-water reservoir since 1886, noted in para. 104 of Mr. Smith's report No. S. D. 1160 be removed, for which purpose the Commissioner be asked to obtain an estimate from the Special Drainage Engineer and the work sanctioned if funds permit.

(4). That trial be made of pumping and carrying direct to the sea the local subsoil water at one or more of the existing tanks with the aid of the pulsometer in the very crowded and low-lying localities (an experiment which would not be expensive as the necessary plant for removing continuously large volumes of water with a large size of pulsometer would not cost much more than £500, while the apparatus being self-acting, removes water without wear or tear, and requires little or no looking after, having no moving parts).

(5). That when funds permit the work of high-level drains mentioned in Mr. Smith's report No. 825 of the 2nd September 1898 (Appendix H) be undertaken, particularly drain A with its branch B.

156. This report of the Committee was considered by the Corporation at their meeting held on 16th January 1899, and the following Resolution was passed :—

"*No. 9183.* That the report of the Committee of the Corporation appointed to consider the scheme formulated by Mr. James W. Smith, Special Drainage Engineer, for facilitating the escape of flood water, both surface and subsoil, and its accompaniments be referred again to a Committee composed of—

(1) The President.
(2) The Honourable Mr. C. T. Burke.
(3) Sir George Cotton, Kt.
(4) Mr. Ismail Jan Mahomad.
(5) „ J. Wilcocks.
(6) „ A. G. Viegas.
(7) „ Nanabhai N. Katrak and
(8) Dr. E. F. Underwood.

With a request that they will favour the Corporation with their opinion on the various matters treated of therein."

157. This Committee having carefully considered the previous Committee's report, and the whole subject in question recorded their opinions and conclusions, of which the following is a summary :—

"Without expressing any opinion on the much debated question as to how far the subsoil water has risen in recent years, this Committee are of opinion that this water is undoubtedly too high for safety in many parts, especially in the low-lying parts of the city.

"Mr. Smith's proposals aim at draining all the districts mentioned in para. 23 of the previous Committee's report, *viz.*, Bhuleshwar, Kharatalao, Kumbharwada, Kamatipura, portions of Tardeo and of Khetwadi, New Nagpada and 1st Nagpada. All these more or less contribute their surface waters to the flats, and the deep-water channel No. 1 would facilitate the removal of those surface waters, while at the same time it would by reason of its depth attract the subsoil water from those districts.

"If it were found that the extension of the channel in the form of the agricultural or dry rubble drain were insufficient to materially affect the subsoil waters in those parts of the districts from which the flow is towards the Flats (*e. g.*, Kamatipura) the agricultural drain should, in that case, be extended into them. The open channel and the agricultural drain would afford a proper point of departure for extensions of the agricultural drain in any direction.

"These low-level drains have the effect of bringing the "low-water level of the sea" as far inland, as is possible having regard to cost; were money no consideration, it would of course be well if those low-level drains were extended into many parts of the city. What is proposed will, it is hoped, cure an evil which ought to have been remedied before the deposits of kachra on the flats were commenced.

"After very full consideration and discussion, the Committee have decided to recommend the construction of the agricultural and low-level drains as proposed by Mr. Smith, and that they should be undertaken at once and completed as soon as possible. These are not meant as a

substitute in any sense for the high-level drains, nor is it intended for a moment to argue that the high-lying area should not be separately provided for; what the Committee now contend is that the low-level drains are the more important of the proposals put forward by the Special Drainage Engineer, and it is impossible to carry out the whole at once, both on practical grounds and for financial reasons; were it possible, the Committee would prefer that the whole were undertaken at once and the scheme now before them, partial as it is, will not be complete until all the proposals are carried to completion, but viewing it simply in the light of expediency, the Committee prefer that the low-level drains should be the first to be undertaken in order of precedence, and they beg to point out that this recommendation includes, besides the agricultural drain and low-level Channel No. 1, the construction of the new sluices near Worli and the deepening of the seaward channel at Love Grove; in fact all the works estimated for by the Engineer at Rs. 11,83,726.

"The Committee accept the opinion of the original Committee as to the desirability of constructing the proposed storm-water drain in Mahalakshmi Road, (Tardeo Road, North), estimated to cost Rs. 1,77,607 and recommend that it be sanctioned and also undertaken at once.

"The Committee also accept the 3rd recommendation made by the original Committee, *viz.*, that the silt deposit be removed at once from the storm-water reservoir.

"As regards experimental pumping, as included in the 4th proposal of the original Committee, there can be no objection to such a trial being made, but the Committee are of opinion that pumping as a system for reducing the level of the subsoil waters in the city cannot, on financial or any grounds, be advocated, and the Committee could not support any proposal of this kind.

"The Committee think it very important that the proposed channel from Dharavi to Worli should be undertaken as soon as possible.

"And finally the Committee fully agree with the recommendation of the previous Committee as regards the construction of high-level drains, and propose that the sum of Rs. 2

lakhs, or such sum as the Corporation may think fit, be set aside annually for the carrying out of the high-level drains estimated by the Special Drainage Engineer to cost Rs. 22,50,249."

158. The report of the Committee was signed by all the eight members except two, Dr. N. N. Katrak and Dr. Ismail Jan Mahomad, each of whom submitted a minute of dissent.

159. The report was submitted on the 25th February 1899, and it was considered by the Corporation at their meeting held on the 13th of March 1899. This meeting was adjourned to 20th March 1899, when the following Resolution was passed :—

"*No. 11938* (1) That the report of the Committee appointed by the Corporation to consider the report dated 26th November 1898, of a previous Committee on the scheme for facilitating the escape of flood-waters, both surface and subsoil in parts of Bombay, be *recorded.*

(2) That the high-level water drain, as proposed by Mr. Smith at an estimated cost of Rs. 1,77,607, be sanctioned.

(3) That the deepening of the outlet channel at Love Grove be proceeded with and completed as early as possible.

(4) That the silting in the storm-water reservoir be removed as early as possible.

(5) That the Commissioner be requested to submit through the Standing Committee proposals for providing the necessary funds for the above-mentioned works.

(6) And that with a view to obtaining reliable, accurate and scientific data on the whole question of subsoil water, the Municipal Commissioner be requested to put himself in communication with Mr. Arthur John Hughes, C.I.E., M. INST. C.E., of Calcutta, and ascertain whether his services would be available for the purpose, and if so, the remuneration he would expect for his professional services."

160. The Commissioner having put himself in communication with Mr. A. J. Hughes, received a reply from him, dated 1st April 1899, proposing terms for his services which he said would be available on 1st November 1899. The terms were as follows :—

"My fee would depend on the length of time occupied in the work, and it would not exceed Rs. 15,000, supposing that I could complete the work in five months. For a shorter term than five months the fee would be :—

	Rs.
For one month	5,000
,, two months	8,000
,, three months	10,500
,, four months	13,000
,, five months	15,000 "

This letter was considered at a meeting of the Corporation held on the 17th April 1899, when the following Resolution was passed :—

"*No. 342.* That the memorandum from the Commissioner, No. 172, dated the 4th April 1899, be recorded.

"That with a view to obtain reliable opinion on the whole question of subsoil drainage the Municipal Commissioner be requested to put himself in communication with Mr. Santo Crimp of the London County Council and ascertain whether his services would be available for that purpose, and if so, the remuneration he would expect for his professional services."

161. The Corporation at their meeting held on 11th May 1899 considered a telegram received from Mr. Santo Crimp by the Commissioner and passed the following Resolution :—

"*No. 1203.* That the letter from the Commissioner, No. 2746, dated the 8th May 1899, be recorded."

That the Commissioner be authorised to engage the services of Mr. W. Santo Crimp on the terms mentioned in Mr. Santo Crimp's telegram for the purpose mentioned in the Corporation's Resolution No. 342, dated the 17th April 1899.

That the Corporation will be prepared to sanction the necessary recommendation of the Standing Committee to meet the cost of engaging Mr. Crimp's services.

That the Commissioner be requested to put the Executive Engineer and the Special Drainage Engineer in communication with Mr. Santo Crimp.

That a Committee composed of the following gentlemen be appointed to help in seeing that all necessary materials are placed before him :—

The President.
Mr. N. N. Katrak.
„ Ismail Jan Mahomad.
„ Dinsha E. Wacha.
The Hon'ble Mr. Bhalchandra K. Bhatawadeker.
Mr. R. M. Sayani.
„ J. Wilcocks.
„ A. G. Viegas.
„ C. T. Burke.
The Hon'ble Mr. Pherozeshah M. Mehta, C.I.E.

XXV.—SUPPLY OF STONEWARE PIPES AND FITTINGS, IRON ARTICLES AND CEMENT.

162. The 9″ stoneware channels (half round) 1,682 feet run and (60) stoneware junctions 9″ × 9″ required for the sewage farm at the Matunga Leper Asylum were obtained from Messrs. Garlick & Co. at Rs. 0-8-6 per foot and Rs. 3-4-0 each, respectively.

163. Quotations for these were called for from Messrs. Richardson & Cruddas also, but they replied that they had none of the articles in stock and therefore they did not quote.

164. The bill certified and passed for the channels and junctions amounted to Rs. 1,088-9-0. All have been used in the work during the year except (70) channels and one junction of the aggregate value of Rs. 77-10-0 which are kept at the Asylum for future repairs and renewals.

165. Two hundred C.-I. gratings for water gullies required for the Surface Drainage Works of Kamatipura were obtained from the casting contractors, Messrs. Sorabji Shapurji & Co., at their contract rate of Rs. 6-8-0 per cwt. *minus* a discount of 2½ per cent.

166. The weight of the gratings was 198 cwt. 3 qrs. 21 lbs., and the value at the contract rate amounted to Rs. 1,293-1-6 *minus* the discount which amounted to Rs. 32-5-3 (62) C.-I. manhole frames and covers required for minor works were also obtained from time to time from the casting contractors. The total weight was 361 cwts. 2 qrs. 1 lb., and the value Rs. 1,988-4-7.

Cement.

167. The cement required for the works carried on by this Department was obtained from the Deputy Executive Engineer, Drainage, as in previous years. Intimation was given him from time to time regarding the probable requirements of this Department with a view to his keeping a sufficient stock in hand to meet those requirements.

XXVI.—COLABA AIR COMPRESSOR STATION.

168. The machinery at the compressor station and the several ejectors have worked satisfactorily during the year, and there have been no stoppages or breakdowns of more than very temporary duration.

169. There has been a considerable increase in the volume of sewage lifted during the year, the approximate gross quantity from 1st March 1898 to 28th February 1899, being slightly over 325 million gallons against 220 million gallons for the same period during 1897-98.

170. I describe the above as approximate gross quantities becau the sewage received at Ejector Station No. 5 is raised three times an that received at Ejector Station No. 4 is raised twice.

171. The total cost of working the station compares well with the cost in the previous year, and reductions may be expected by reason of the more economical working of the engines consequent on the development of greater power, as the volume of sewage lifted increases with additional house drainage connections.

172. 700 tons of Singareni coal, 150 tons of Borrea Anthracite coal and 50 tons of Cardiff coal were purchased during the year. The average rate paid for the Singareni coal was Rs. 16-5-1·7, for the Borrea coal Rs. 15-2-8 and for the Cardiff coal Rs. 22-4-0 per ton.

173. A Worthington Donkey pump, size $5\frac{1}{4}'' \times 3\frac{1}{2}'' \times 5''$ was purchased from Messrs. Garlick & Co., at a cost of Rs. 410 for pumping out the ejector stations in the event of the failure of the small hand ejectors ordinarily used for that purpose. It was mounted on a trolly by the Municipal Workshops at a cost of Rs. 132-8-2.

174. The motive power for working the pump is obtained from the compressed air for working the ejectors, and a connection on the air main at each station has been provided, whereby the pump can be attached and set to work at any time.

175. The Corporation under their Resolution No. 4411 of August 3rd, 1896, sanctioned a grant of Rs. 1,063-8-10 from surplus cash balance for the provision of a fire service at the compressor station.

176. It was originally intended to lay a 3-inch cast-iron main for the purpose from Colaba Causeway, but as the Port Trustees were about to lay fire service mains in their new roads in the vicinity, it was eventually agreed that the Trustees should lay a 6-inch main in place of the 4-inch main contemplated, and that the Municipality should have the right of making a 3-inch connection to the former opposite the entrance to the station compound. For this the Trustees were paid a sum of Rs. 445-8-10.

177. The charges incurred by the Water Works Department for making a 3-inch connection to the Port Trust main and providing

and fixing two new pattern hydrants in the station compound amounted to Rs. 331-10-11 and the Workshop charges for providing a stand pipe, branch pipe, 2-50 ft. lengths of hose with couplings and 4 fire buckets amounted to Rs. 270-11-1. The total amount expended from the grant was thus Rs. 1,047-14-10.

178. An additional 3-inch stop valve has been placed on the air main to Ejector Stations Nos. 4 and 5 just beyond the junction to No. 3 Station to allow of the long lead to the former being shut off for examination or repair without interfering with the working of the latter station.

179. The masonry chamber for this valve was constructed by the Drainage Department at a cost of Rs. 86-7-11.

180. The grant for stores and contingencies being insufficient had to be supplemented by a transfer of Rs. 750 from the grant for coals under section 3 D Maintenance of Pumping Station, Colaba.

181. The following statement shows the grants under the several budget heads for the maintenance of the station and the actual expenditure incurred under each head :—

Sections.	Particulars.	Rs.	a.	p.	Budget grants, including transfers and renewed grants. Rs.	a.	p.	Expenditure. Rs.	a.	p.

I have the honour to be,
SIR,
Your most obedient Servant,
JAMES W. SMITH, M. INST. C. E.,
Special Drainage Engineer.

K.—FIRE BRIGADE.

1. The establishment has been upheld in a state of efficiency during the year, and all appliances are in good condition and thorough working order.

2. No case of loss of life by fire, where the Brigade was concerned, has occurred during the year.

3. Several members of the Brigade have received injuries in the execution of their duties at fires, none of which however were of a serious nature, except Fireman Abdul Karrim Mahomed Jaffer, who received an injury to his left ankle at a fire, which occurred at Colaba on the 13th November 1897, caused by the wheel of a Fire-escape passing over it whilst he was engaged in getting an hydrant to work. He was placed on the sick list by the Fire Brigade Surgeon, and remained on the list until the 31st of August 1898, when he was invalided from service, and recommended to the Corporation for pension, which was allowed at the rate of Rs. 4 per mensem from the 1st of September 1898.

4. The water-supply at fires has been satisfactory in all cases, and the attendance of the Water Works staff has been prompt and of great assistance to the Brigade.

5. The inspection of hydrants throughout the City has been carried out by the Brigade in a systematic manner during the year.

6. The fire service at the Municipal Offices has been maintained in good working order, and the employés have periodically been drilled in the use of the appliances, and the whole of the fire-hose which was deteriorating after over nine years' service, has been replaced by new.

7. The fire appliances at the several Municipal markets have also been periodically inspected and cleaned.

8. The duties at the several Hospitals and Camps (where fire appliances are located) and flushing operations have been carried out daily during the year in a satisfactory manner, and the whole staff of the Brigade (except the Chief Officer) have been in receipt of an extra allowance of one-fifth of their monthly pay.

9. The new quarters for Foreman and Engineer at Gowalia Tank Station were completed and occupied on the 1st of September.

10. One horse was purchased during the year in place of one destroyed, having accidentally broken one of its hind legs. An animal which was purchased on the 16th of March 1897, for use of the Plague Committee, under Commissioner's No. 26459 of the 9th of March 1897, has been added to the department, which now has its full equipment of sixteen horses.

11. An order for 3,000 feet of delivery hose for fire purposes and 10,500 feet for flushing purposes was satisfactorily executed by Messrs. J. Fleming & Co.

12. Provision has been made in the ensuing year's Budget for a supply of 6,420 feet of delivery hose for fire purposes to replace other condemned and sold by public auction in the year 1897-98.

13. The present strength and equipment of the Brigade is as follows :—

Strength.

1 Chief Officer.	12 First Class Tindals.
1 Clerk.	6 Second ,, ,,
1 Head Foreman.	108 Firemen of Grades.
5 Foremen.	7 Drivers.
6 Engineers.	7 Grooms.

Making a total of 154, including all ranks.

The Surgeon has been included in the Health Department Budget Schedule, page 51, under Corporation's Resolution Nos. 14093 and 5285 of the 15th of March and 2nd of September 1897 respectively, and he has therefore been eliminated from the strength of the Fire Brigade.

Equipment.

8 Steam Fire Engines.	6 Telescopic Fire-escapes.
9 Manuals.	1 Brake.
16 Hose Reels.	16 Horses.
7 Tender Carts.	

256 lengths of delivery hose, comprising about 15,360 feet, and other necessary fire-extinguishing appliances.

14. The number of calls to fires, or supposed fires, received during the year has been 120; of this number 14 were reported by the Police but did not require the attendance of the Brigade, the remaining 106 involved the turning out of engines and men, and resulted in 5 false alarms, and 101 fires, 70 of which were extinguished by Brigade appliances, and 31 before the arrival of the Brigade (see tables 1 and 2).

15. The estimated damage to property during the year has amounted to Rs. 23,61,915 showing an increase of Rs. 3,63,451 as compared with the preceding year. (See table No. 3.)

16. The amount of damage to property at the 70 fires extinguished by Brigade appliances is estimated at Rs. 18,95,365, whilst the property in imminent risk of becoming involved at these fires has been rated at Rs. 70,82,565. (See tables 2 and 4.)

17. The estimated damage to insured property has been Rs. 23,30,318, whilst that to uninsured property has been Rs. 31,597.

18. The estimated quantity of water used for extinguishing fires during the year has been 28,77,300 gallons or about 12,845 tons; of this quantity 27,20,000 gallons were taken from the street mains, 22,000 gallons from the sea, and 1,35,300 from wells and tanks. (See table No. 5.)

The distribution of engines, &c., is as under :—

No.	Stations. Names.	Engines. Steamers.	Engines. Manuals	Hose Reels.	Tender Carts.	Fire Escapes.	Brakes.	Horses.	Delivery Hose.	Foremen.	Engineers.	First Class Tindals.	Second Class Tindals.	Firemen of Grades.	Drivers.	Grooms.	Remarks.

The fires of 1898-99 show a decrease of 21 as compared with 1897-98, and with the average of the past ten years a decrease of one.

The most destructive fire of the year was that which occurred at Ahmedabad Street on the 26th June, where a large cotton godown with its contents was destroyed, and several other residential buildings adjoining were damaged, the estimated loss being Rs. 9,75,500. This fire was extinguished by the aid of all our working steamers (six in number) and two hydrants.

A destructive fire also occurred at the Mahomedan Mill, Tardeo, on the 8th of September, which resulted in the Carding and Spinning departments being entirely destroyed. Five steamers and one hydrant were employed to extinguish the fire, and a damage of Rs. 5,25,000 accrued.

The remaining fires worthy of note were as follows:—

On April 7th, at Syed Moke Street, Mandvi, a godown containing spices, &c., was very severely damaged by fire, and four steamers and one hydrant were brought into use to extinguish the same, a damage of Rs. 42,500 resulting.

On July 1st a call was received to the P. & O. S. S. "Ganges" alight in the Harbour. The steamers of the Brigade turned out but were not utilized, as we had no means of transporting them to the burning vessel, which was eventually destroyed, and one of the stewardesses burned to death, the loss of the vessel being estimated at Rs. 4,50,000.

On August 27th a cotton godown at Pasta Lane, Colaba, with its contents was severely damaged by fire and water, and was extinguished by the aid of four steamers, resulting in a damage of Rs. 1,91,250.

On January 12th, at the Damodhar Lukmidass Mill, Fergusson Road, Parel, a large cotton store on the third floor of main building was with its contents severely damaged by fire, and was extinguished after great exertion, owing to the dense smoke and heat, by three steamers, a damage of Rs. 85,000 accruing.

The following tables are annexed :—

Table No. 1.—Attendance at fires.

Do. „ 2.—Statement showing by what means fires were extinguished.

Table No. 3.—Summary of fires and estimated loss.

Do. „ 4.—Statement showing the estimated damage and property at risk at fires extinguished by Fire Brigade appliances.

Do. „ 5.—Estimated quantity of water delivered at fires.

L.—PUBLIC GARDENS.

The following gardens were maintained during the year under report :—

(*a*) Victoria Gardens.
(*b*) Elphinstone Circle Garden.
(*c*) Northbrook Garden.
(*d*) Malabar Hill Garden.
(*e*) Bazaar Gate Garden.
(*f*) Falkland Road Garden.
(*g*) Dick's Tank Garden.
(*h*) Garden on the Flats.
(*i*) Municipal Office Garden.
(*j*) Sir Cowasji Jehangir Garden.

2. The total number of visitors to the Victoria Gardens during the year under report was 788,890, showing a slight increase of 26,079 on the last year, but a decrease of nearly 3 lacs as compared with the year before. The decrease can be attributed, of course, to the presence of plague in the City.

3. The metalling of roads was continued as in the previous year, and all the roads were repaired and maintained in thorough order during the year under report.

4. The work of laying out new water pipes was kept in abeyance until almost at the close of the year under report, the Commissioner's order was received to expend the grant. No branch pipes, however, could be laid out as the pressure in the existing 3″ main, running along the central avenue, was not deemed sufficient to meet even the present number of branches, and consequently under the advice of the Deputy Executive Engineer, Water Works, the 3″ main had to be replaced by a 4″ one to increase the pressure. This was done as far as the grant permitted and the result has been somewhat successful.

5. As in the previous year small drains across roads were constructed to carry the accumulated rain-water to the existing main drain. An estimate is now being prepared to construct other branches to the main drain in the newly acquired portion of the gardens.

6. The refreshment room in the Victoria Gardens, after a lapse of 12 months, was occupied for a period of 3 years at a monthly rental of Rs. 25. The present lessee conducts it on a very decent scale and will, it is believed, tend to draw a large custom from the more respectable class of visitors, whose wants were not properly attended to by the previous occupants.

7. Some of the lawns were again levelled, weeded, and newly turfed, and others that have gone bad are being gradually improved.

8. The shrubberies, during the year under report, were given considerable attention to. In addition to digging and manuring all the shrubberies, some that had degenerated and looked skinny and unthrifty, were entirely newly planted out with different kinds of flowering shrubs. A few very old and scraggy trees, which interfered with other rare ones and prevented the turf from growing on the lawns, were felled. A few rockeries, with different kinds of foliage plants, were constructed also. The lawn and carpet beds in front of the Clock Tower were returfed and relaid out.

9. The entire double row of ornamental beds along the central avenue was renewed and laid out with a new design, which has drawn particular notice of the visitors.

10. The ornamental waterponds were dredged out to some extent, and the banks newly turfed and repaired.

11. Four hundred and sixty-one plants were supplied to the Executive Engineer's Department for road-side plantation during the year under report.

12. New quarters for twenty mallees were completed and occupied during the year under report, and up to now there have been no cases of plague amongst the occupants, particular care being taken to keep the chawl and its surroundings clean and healthy. No privies, however, have yet been provided for these chawls, which causes considerable inconvenience to their inmates and endangers their health. The work has been sanctioned since the 13th of February last, but up to now it has not been taken in hand.

13. The work of constructing quarters in the garden for the Assistant Superintendent was taken in hand during the year under report and is now approaching completion, but as the surroundings of the place remain very swampy and unhealthy during the monsoons they cannot be occupied till after the rains are over.

14. The work of filling in the new portion of the garden, which is submerged more or less during the rains, has been sanctioned and will be completed soon.

15. A portion of the masonry of the Clock Tower again came down damaging the clock work to some extent. Proposals for repairing the same are now being submitted to the Commissioner through the Executive Engineer.

16. The railing of the Kangaroo and Ostrich enclosures, which was old and in a broken down condition, was removed and a new railing of a better type was substituted in its place.

17. Attempts are still being made to increase the stock of new, rare and useful plants, both flowering and ornamental, to meet with the public demand. The usual annuals made a good show during the year under report. Certain portions of the Garden are now being turned into flower beds to increase the supply of cut flowers, thus ensuring a continuous supply of them to the end of the hot season.

18. In spite of the financial difficulties and the consequent curtailment of expenditure, and the dirth of intelligent and skilful workmen since the outbreak of plague, the gardens were kept up to the usual standard of neatness and order.

19. All the other public gardens were maintained in their usual condition, slight improvements being effected wherever necessary. The Northbrook Gardens still continue to be occupied for plague purposes.

20. The Zoo was kept up in *status quo*, minor improvements regarding accommodation being carried out here and there as required. A better aspect of things in this direction may now be anticipated, as a supplementary grant of Rs. 5,000 has been provided in the new budget for further improvements.

21. A list of new plants added to the collection during the year under report has been shown in appendix A attached to this report.

22. The following animals were added to the collection during the year under report by purchase :—

1 Malbrouck monkey.	1 Nilgai.
1 Rock kangaroo.	1 Antelope.
3 Crown pigeons.	1 Spotted deer.
2 Red-breasted parrots.	1 Slender billed cockatoo.
2 Bridled wallabies.	3 Black swans.
2 Silver pheasants.	1 Vulpine phalanger.
2 Ring-necked pheasants.	1 Grey-headed lemur.

and a collection of 100 ducks and 12 flamingoes from Jeypore.

23. The following animals were added to the collection during the year under report by presentation :—

1 Pelican.	By Mr. F. H. Scott Elliott.
1 Indian antelope.	„ Mrs. D. M. Elliott.
1 Indian antelope.	„ Mr. F. Maidment.
1 Leopard.	„ The Administrator of Chota Oodey-[pore.
1 Rose-crested cockatoo.	„ Mr. Moosabhai Adamji.
1 Rib-faced deer.	„ Mr. A. W. Flanagan.
1 Spotted deer.	„ Mr. C. H. Myers.
1 Nilgai.	„ Mr. Counsell.
1 Hog deer.	„ Mr. Harper, F.Z.S.
1 Dingo.	„ Messrs. Tulloch and Allen.
1 Malbrouck monkey.	„ Count Pfeil.
1 Arabian gazelle.	„ Mr. E. Elliott.
1 Arabian gazelle.	„ Messrs. Ludha Ebrahim & Co.
1 Bison calf.	„ Mr. E. L. Cappel, I.C.S.
3 Four-horned antelopes.	„ Mrs. F. L. G. Simpson.
1 Arabian gazelle.	„ Rao Saheb K. N. Sellar.
1 Lion-tailed monkey.	„ Mr. Archdeacon.

24. The following animals were among those that died during the year under report—

1 Ring-tailed Lemur.	1 Bridled wallaby.
2 Rock wallabies.	1 Black swan.
1 Silver pheasant.	1 Gazelle.
2 Sloth bears.	1 Crown pigeon.
2 Antelopes.	2 Flamingoes.

1 Bison calf and some birds and smaller animals.

25. The budgetted and actual expenditure for the year of the different gardens is shown below :—

	Names of Gardens.	Total amount sanctioned.	Expenditure.
		Rs. a. p.	Rs. a. p.
(*a*)	Victoria Gardens	55,041 7 1	51,998 6 4
(*b*)	Elphinstone Circle Garden	2,260 0 0	2,081 11 4
(*c*)	Falkland Road Garden	520 0 0	449 1 5
(*d*)	Northbrook Garden	1,876 0 0	1,883 8 11
(*e*)	Sir Cowasjee Jehangeer Garden	748 0 0	714 15 3
(*f*)	Bazaar Gate Garden	792 0 0	676 15 0
(*g*)	Garden on the Flats	1,181 2 8	1,236 4 3
(*h*)	Dick's Tank Garden	430 0 0	380 5 0
(*i*)	Malabar Hill Garden	1,430 0 0	1,527 11 4
	Total... Rs.	64,278 9 9	60,898 14 10

APPENDIX A.

26. List of plants added to the Victoria Gardens collection during the year 1898-99. :—

Orchids of sorts
Palms of sorts
Ferns of sorts
Selaginellas of sorts
Chrysanthemums of sorts
Caladiums of sorts
Gloxinias of sorts
Begonias of sorts
Amaryllis of sorts
Liliums of sorts
Geraniums of sorts
Arum sanctum
Calla æthiopica
Cyclemen persicum
Sacred Chinese lily
Gesneria macrantha
" hybrida
Hyacinthus candicans
Acacia auriculiformis
Abutilon firefly
" George's hybrids
" Darwini
Eucalyptus siderophloia
Ipomœa learii
Tradescantia discolor albo-lineata
Lagerstræmia tomentosa var: Londoni
Santalum album
Lophospermum scandens
Hevea braziliensis
Castilloa elastica
Finest Symrna fig
Turkey oak
Nutmeg
Agave vivipara
Prestoa Montana
Musa eusete
" Sumatrana
Fuchsia plants
Leucanthemum grandiflorum
Castanospermum Australe
Sisal hemp
Trincomallee wood
Myroxylon toluiferum
Cherimoyer
Colvillea racemosa

M.—THE VICTORIA AND ALBERT MUSEUM.

1. In the Natural History division the department of Mammals received no important additions except one or two minor specimens. A ring-tailed lemur (*Lemur catta*), which died in the Victoria Gardens, was forwarded by the Superintendent to the Museum. The lemur was skinned and its skin was cured and preserved. The skin with the head mounted is exhibited at the Museum.

2. The department of Birds received numerous additions during the year. The specimens prominent among the additions were as follows:—

One Indian Hoopoe (*Upupa indica*), one Open-bill (*Anastomus oscitans*), two Indian Koels (*Eudynamis honorata*), one Black-necked stork (*Xenorhynchus asiaticus*), two Indian bee-eaters (*Merops viridis*), one Crow-pheasant (*Centropus sinensis*), one pheasant-tailed jacana (*Hydrophasianus chirurgus*), one Indian roller (*Coracias indica*), two Orioles (*Oriolus kundoo*), one Blue rock-thrush (*Petrophila cyanus*), two Indian pittas (*Pitta brachyura*), and one White-necked stork (*Dissura episcopus*). A crowned pigeon (*Goura albertisi*) and a flamingo (*Phœnicopterus roseus*), which died in the Victoria Gardens, were forwarded by the Superintendent to the Museum. These birds were all skinned, cured, stuffed and mounted for exhibition at the Museum.

Also a small collection of Indian birds' eggs was added to the department.

3. To the department of Reptiles no important addition was made during the year.

4. To the department of Fishes and Crustaceans numerous minor specimens were added during the year. The most important among them were the tiger-fish (*Stegostoma tigrinum*), and the saw-fish (*Pristis cuspidatus*). The specimens were cured and preserved in spirits of wine.

5. The department of Entomology received 98 specimens of butterflies, moths, beetles and other insects. The species prominent among the additions were as follows:—

Euthalia garuda, Junonia hierta, Curetis thetis, Mycalesis mineus, Danais grammica, Charaxes imna, Attacus atlas, Antheræa mylitta, and *Actias selene.*

Also several cocoons, particularly of the moth (*Antheræa mylitta*), were added to the department.

The butterflies, moths, beetles and other insects added to the collection were all cured, preserved and mounted for exhibition at the Museum.

6. The department of Geology received a very important addition during the year. The Hon'ble Mr. H. E. M. James, Commissioner of Sind, forwarded to the Museum a model and a piece of a meteorite which fell on the 15th September 1898 at Gambat, a village in the Khairpur State in Sind. The model as well as the piece of the meteorite are both exhibited in the Geological collection in the Museum.

7. In the division of Anthropology very few additions were made during the year. The department of Artware received three highly carved sandalwood boxes and several ivory, ebony and palmwood figures. Also a marble model of the Taj at Agra was added to the collection.

8. The department of Ethnology received an artistic bow with an arrow used by the aboriginal inhabitants of the Andamans and the Nicobar Islands, by presentation from Dr. Geo. M. Dixon, Bombay Medical Service.

9. To the department of Numismatology no addition was made during the year.

10. In the Natural History division the specimens in the various departments were constantly examined and were freely supplied with preservatives. During the year two or three skins of smaller mammals were cured and preserved for exhibition purposes. In the department of Birds 60 birds were skinned and their skins were cured, stuffed and mounted at the Museum. The collections of Reptiles, Fishes and Crustaceans were now and then examined and the additions made in the department of Fishes and Crustaceans were cured and preserved in spirits of wine. Also constant attention was paid to the Entomological collection and the specimens added during the year were cured, preserved and mounted for exhibition at the Museum.

11. In the division of Anthropology the collections of sculptures, figures and models of agricultural and other implements were overhauled and re-arranged. The specimens of valuable cloths and other textile fabrics were examined both before and after the rains and their cases were freely supplied with preservatives. As far as was known the specimens in the various departments were all in good order and preservation.

12. The Museum Library received several important additions during the year.

13. A statement showing how the annual and special grants were utilized will be found in Appendix A at the end of the report.

14. During the year under review the Museum was open to the public for 313 days, and the total number of visitors was 656,840, showing a daily average attendance of a little over 2,098. Last year the Museum was open to the public for 314 days, and the total number of visitors was 641,500, showing a daily average attendance of a little over 2,042. The increase in the number of visitors showed that the general population of the native town during the year under report was much larger than it was during the preceding year, though the plague during the year raged more severely than it did during the two preceding years.

APPENDIX A.

Statement showing how the annual and special grants were utilized :—

Natural History Grant.

		Rs.	a.	p.
1.	Spirits of wine	435	0	0
2.	Sundry preservatives	357	0	0
3.	Natural History specimens	132	0	0
4.	Miscellaneous charges	276	0	0
	Total ... Rs.	1,200	0	0

Grant for Cases.

		Rs.	a.	p.
1.	Materials and labour for repairing and polishing old cases	272	4	0
2.	Minor cases	27	12	0
	Total ...Rs.	300	0	0

Artware Grant.

		Rs.	a.	p.
1.	Sandalwood, ivory, marble and other artware specimens	400	0	0

Special Grant.

		Rs.	a.	p.
	Reference books	489	0	3

PUBLIC HEALTH.

I.—REPORT of Lieutenant-Colonel T. S. WEIR, I.M.S., Executive Health Officer.

II.—REPORT of the SUPERINTENDENT OF LICENSES.

III.—REPORT of the SUPERINTENDENT OF MARKETS.

IV.—RETURN OF STREET ACCIDENTS, forwarded by the COMMISSIONER OF POLICE.

V.—REPORT of the MEDICAL OFFICER IN CHARGE INFECTIOUS DISEASES HOSPITAL, Arthur Road.

I.—REPORT OF THE HEALTH OFFICER.

I have the honour to forward herewith my Annual Report for 1898.

Formation of the Island.

2. Before examining the mortality, it is well to consider the position of Bombay.

Portion of the City.

3. The portion of Bombay on which most of the population live in closely built houses and densely populated habitations lies in a valley between rocky ridges, the centre of the valley being in places below mean sea-level ; on the south side most open to the sea, and raised above the sea-level by sand and alluvial deposits.

4. Up the valley, between hillocks, at one time flowed creeks. These creeks and the hollows, over which the sea water spread, have been largely filled with vegetable matters which have not yet at depths decomposed.

5. There is still underground an ooze where these creeks flowed, and the ground waters of the valley are influenced by the pressure of the sea currents around.

6. The valley of Bombay is most unfavourably situated. Into it flows the rain water from higher lands, the escape of which is obstructed by roadways and buildings, and to the north by a dense clay formation. But happily the soil has a marvellous power of purification, even greater than the air. In the centre of the valley towards which most of the drainage flows, the soil is a stiff clay.

7. The area of Bombay is about 22 square miles, and on a portion of this area there is the most densely crowded population in the British Empire, the six sections of greatest density of population having 227,021 people on an area of 403·28 acres.

8. The following table shows the sections of the greatest density and their populations :—

Section.	Population.	Area in acres.	Persons to an acre.
Khara Talao	27,035	40·33	670·39
Chukla	32,197	51·23	628·47
Kumbharwada	32,209	52·23	616 67
Market	44,751	83·63	535·10
Bhuleshwar	38,363	71·73	534·82
Umarkhadi	52,466	104·13	503·85
Total...	227,021	403·28	

9. In 1895, before the appearance of plague, Bombay was more healthy than any large city in India, and the chances of life were better than in many European towns.

Meteorological conditions.

10. It is fervently hoped that this will be the last of this abnormal cycle of years. The Meteorological Reporter was of opinion, that the remarkable period through which India has passed had terminated, in 1897, and a period of normal conditions, he now thinks, is probable for two or three years.

Temperature.

11. The temperature of the air in April, May, June, July, August, September, October and November was above the average.

12. It is a curious and important fact that the ground temperature since 1896 has been rising at all depths, more or less, except in the cold season, being 84·8 in 1896, 84·9 in 1897, and 86·3 in 1898—5 feet below the ground in each year.

Rainfall.

13. The total rainfall for 1898 was 7·44 inches less than in 1897, and 13·56 inches less than in 1896.

14. In a statement forming a portion of this Report is given an abstract of the meteorological observations for 1898 made at Colaba by the Meteorological Reporter to Government.

Other phenomena.

15. There were observed during the year some meteorological phenomena of interest and deserving of notice.

16. On the morning of the 6th of July there was a strong smell, as if sulphuretted hydrogen was generated, over the north of the island, and especially from the salt channels across Matunga and the vacant ground to the north. The smell seemed strongest furthest to the north. At this time a migration of rats had been observed across Sewree, and I believe the smell was due to the decomposition of dead rats, for a number of bodies of rats were afterwards found in the suburbs. The Commissioner of Police and I happened to go over the north of the island on this morning in connection with arrangements being made for the inspection of traffic by the readways into Bombay, and we tried to ascertain the cause. The smell was most offensive, tainting the air far and wide.

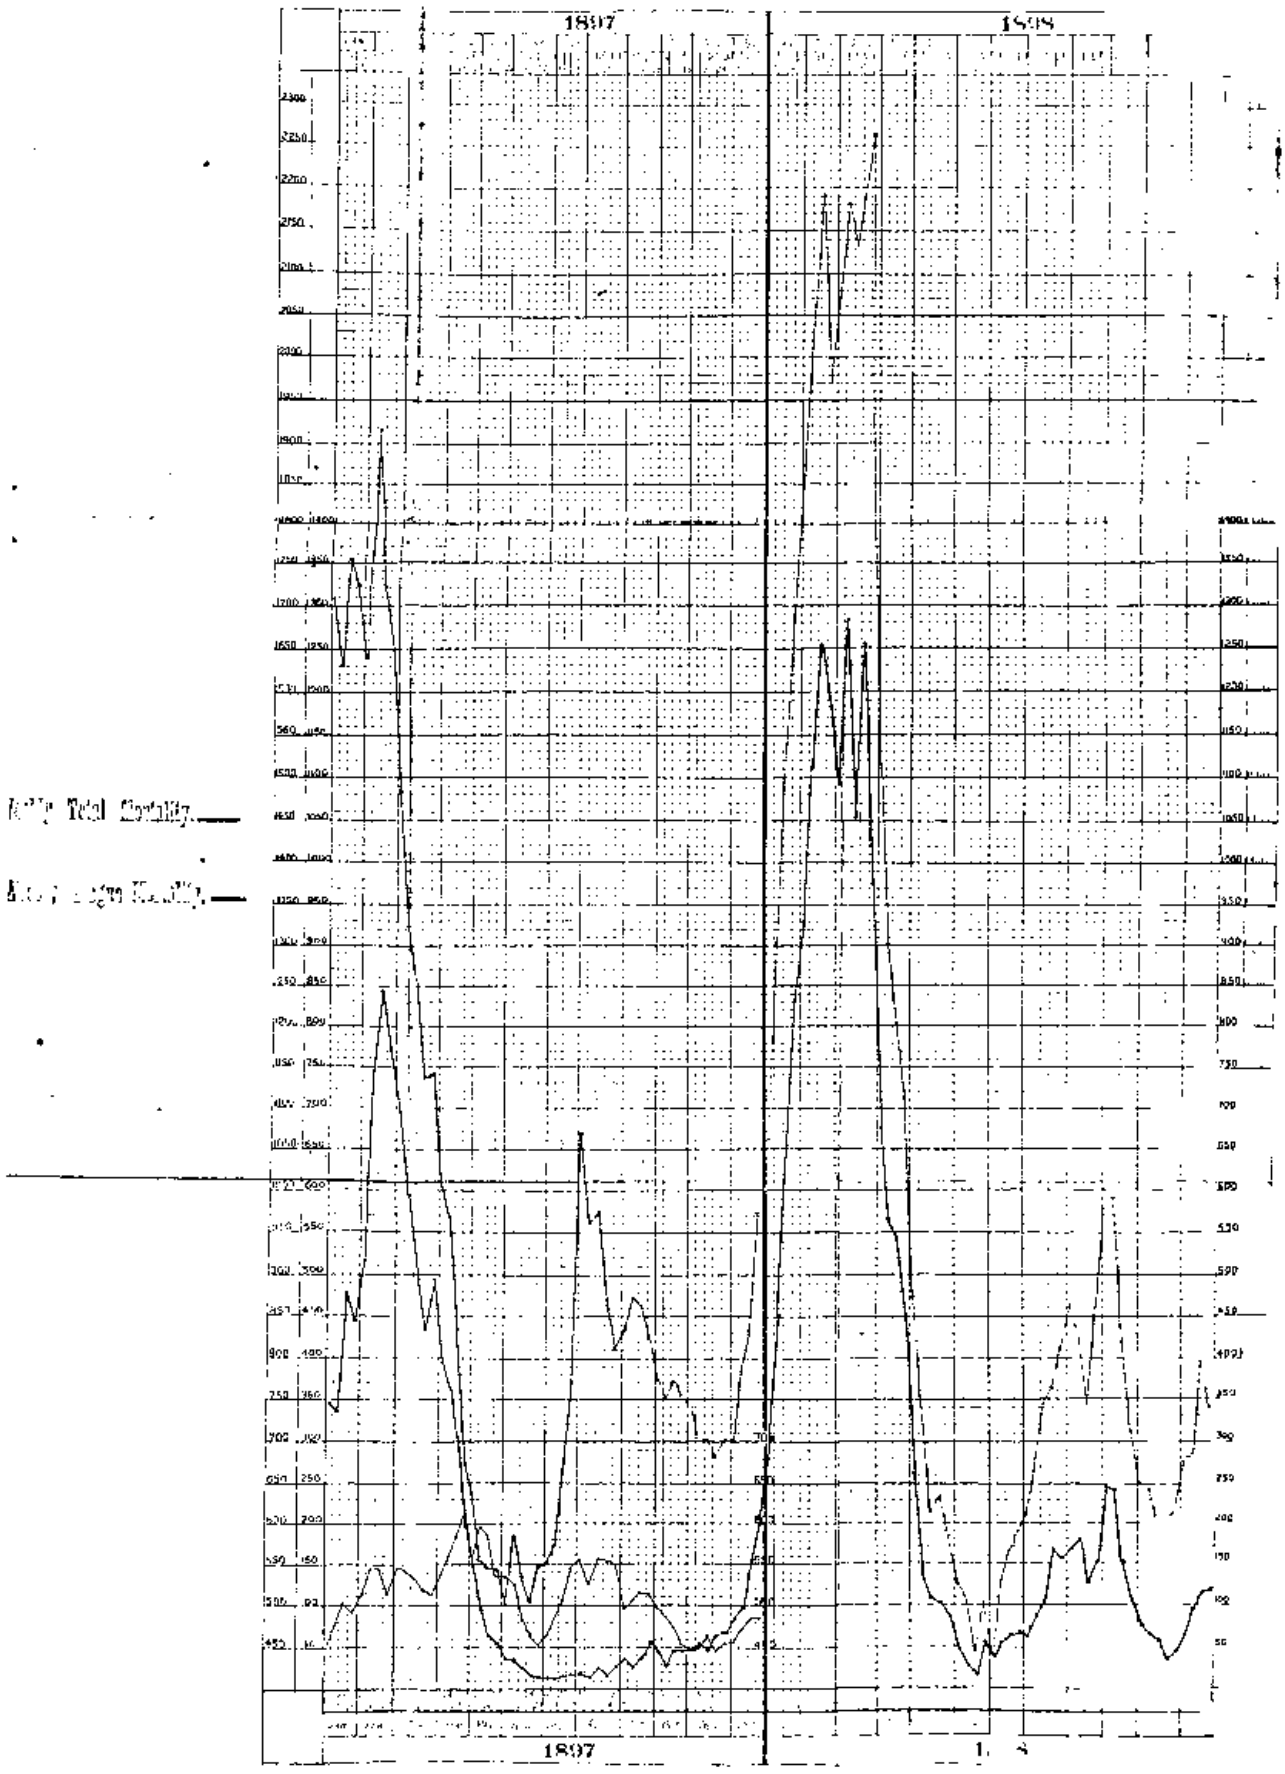
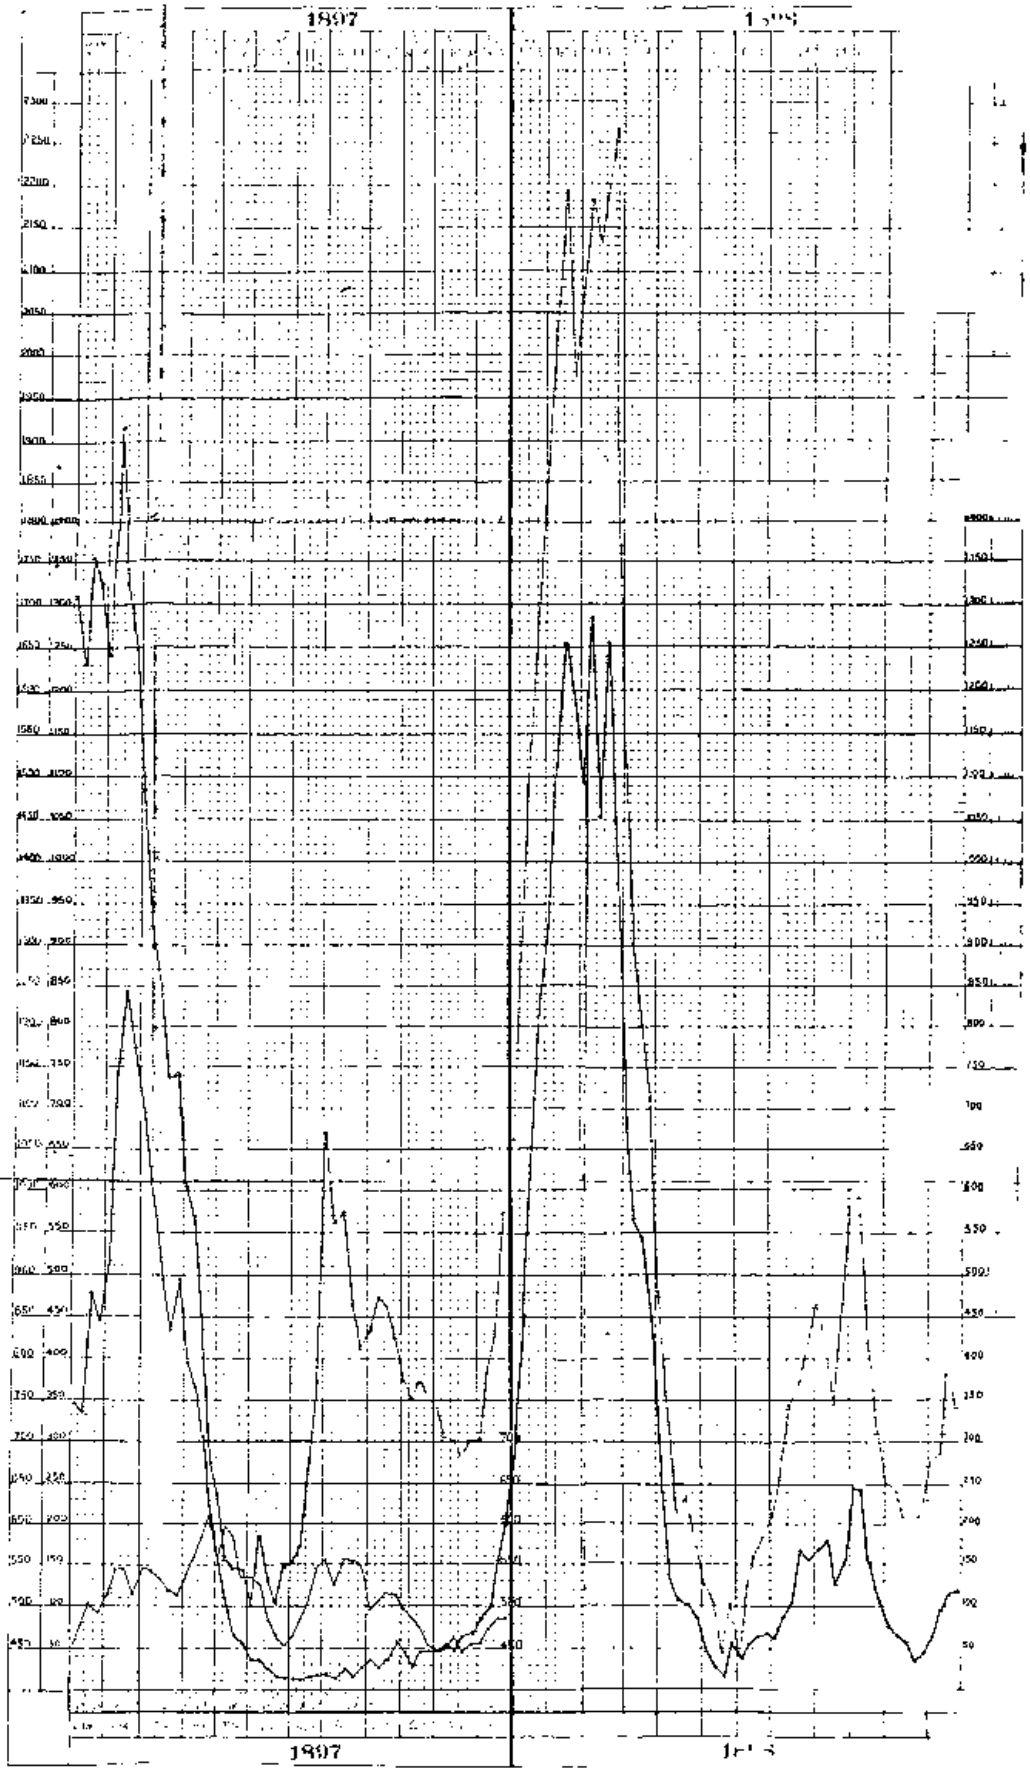
Weekly Total and Plague Mortality.



Weekly Total and Fl[illegible] Mortality.



17. A blue haze was often observed in the evenings of September and October, and rainbows which I had not observed in Bombay for a long period. At this season boils were very prevalent.

18. On the 9th of September a gale blew, and the sky looked like a monsoon storm. In the evening rain fell. A little time afterwards dead rats were found on the west foreshore.

19. There were few mosquitoes seen during the epidemic period of 1898, and it seemed as if they had almost disappeared from the island. The disappearance of mosquitoes was again observed in August.

Course of the epidemic and mortality.

20. The epidemic gradually rose from the middle of December 1897 (a little later than in 1896) till on the 9th of February 1898 a mortality of 347 was recorded, followed by a series of repressions and fluctuations till the 16th of March, when the mortality rose to 358, and again on the 18th of March to the same number, from which date the epidemic began to decline, and fell, until in the middle of June and up to the end of August it descended below the mortality in the corresponding months of 1897.

21. From the end of June the mortality began to ascend till it reached its maximum in the second week of October and then fell, but not descending again to the curve of June, and again began to ascend in the first week of December.

22. It has to be remembered that the total mortality from all causes was not as high as the mortality from plague alone in many cities in India. In 1896 the total mortality was only 40·71 per 1,000, in 1897 it was 58·28 per 1,000, and in 1898 it is not over 63·23 per 1,000.

23. The hopes that some sanguine people entertained, that it was only necessary to carry out a few sanitary measures, and the disease of Plague would stop, have been grievously disappointed. We see now after three years of incessant activity against plague that the disease is more virulent and destructive in type than ever. It is not that the mortality is high after what has been done, but it is what it might have been, and it has to be considered what the mortality would assuredly have been, if the measures that have been carried out had not been taken. Whatever the period or whatever the measures, whether of the Health Department or of the Plague Committee, it is marvellous that the mortality has been so low, that the measures have saved so many lives; and equally marvellous that the city has suffered so little.

24. Such was the general course followed by the epidemic in 1898. The view I held was that the epidemic had been prolonged by the concealment of cases, and that the type was intensified by concealment.

25. As soon as I returned from leave in January 1898, I wrote a report commenting on the progress of the epidemic, the measures of the Plague Committee, and the concealment of cases, and recommending certain measures.

Difficulty of obtaining information.

26. The difficulties of obtaining information that beset the Plague Committee were very great. The type of disease, as in former years, was often difficult of recognition. There was a type similar to cholera, and there were types of disease in cases of which it was difficult, even with a bacteriological examination, to establish whether they were plague or relapsing fever.

Types of the disease.

27. The Plague Commission had an opportunity of seeing one of these cases on their first visit to one of our hospitals. The case was supposed to be one of pneumonic plague with petechiæ, but bacteriological examination proved it to be one of relapsing fever.

28. Cases began with ordinary fever; afterwards fever with symptoms like those of relapsing fever supervened, and finally plague developed.

Retrospect of former claims of Plague.

29. Looking over the reports of former years, I came across a reference to plague, and I find that in 1877 there was some fear of the importation of plague into Bombay. I quote from my report:—"From time to time, as emergencies arose, the exclusion of infectious diseases from the city, either through the channel of the harbour or from inland, has attracted great attention. Committees, in one of which I took a part, have sat and drawn up rules for quarantine. Reports have been drawn up as to how these rules were to be enforced; and in fact everything has been done but to supply the funds with which these rules and suggestions were to be given practical effect to."

30. I then go on to state:—"Nothing had really come out of it of any practical sanitary good."

31. I then refer to the import of some wool from a plague-stricken area in the Persian Gulf, and I described what had to be done, and I go on to write:—"The immediate necessity for a strict supervision of vessels coming from the Persian Gulf was earnestly urged on Government, and in July 1876, a notification was issued laying down certain rules in reference to quarantine, but as no establishment was provided to enforce these rules, they might as well have never been promulgated."

32. I then proceeded to discuss the sanitary provisions necessary for the protection of the city, and I wrote:—"Their enforcement is contingent and dependent on three things, *i. e.*, hospital accommodation, the maintenance of special vehicles, and disinfecting apparatus; unless that these three indispensable conditions are satisfied, the special sanitary clauses, no matter how perfect they may be, will remain a dead letter."

Plague policy.

33. It is scarcely necessary for me to discuss the policy followed in 1898, as the policy is now practically the same as the policy followed by the Health Department when plague first appeared. The policy of 1896 has been justified by events and by the visitations of the following years.

34. The great danger in enforcing plague measures is that they may, if unpopular, excite general opposition and lead to concealment, and if measures lead to concealment, they may do more harm in one direction than good in another. Measures must be unpopular with some groups of population or classes and some individuals, but they need not be unpopular with all. Maximum results must be looked to, and only measures that can be easily carried out and supervised should be attempted.

35. Measures must be carried out to a purpose. The view I took on the 14th of February 1898 was that a month would elapse before the epidemic would reach its climax ; and it seemed to me that the only thing to be done was to save people from the disease, to give protection where protection could reasonably be expected from measures, to save people till the type of disease changed, and the pest became less virulent.

36. I wrote in February 1898 :—"The period has now passed when the epidemic of 1896-1897 had acquired its greatest intensity. From the daily mortality it is evident that the position is more grave now than at the same period last year, for the city is not, I fear, as well protected as it was at this time last year against the spread of the disease. Whereas after the 15th of January 1897, the epidemic had passed its climax and was declining, the mortality is now higher and evidently increasing. Long before this, tiles had been taken off most of the houses in the city in advance of the disease. Great efforts had been made to destroy rats, and water pipes were cut where the supply of water had caused dampness. These were, from our point of view, most important measures, contributing to the reduction of the mortality and giving immunity to the population. There are now some 50 or more cases of plague that escape detection every day in spite of the measures being carried out by the Plague Committee; and yet these measures are as well carried out as they can be under the direction of Sir James Campbell." The measures against Plague.

37. It did not seem to me that the measures, however admirably carried out, had any direct influence on the course of the epidemic although they had an influence on the mortality which would have been much higher without them and might have been as appalling as the mortality recorded in some places ; and I shall show this by the mortality of one day in 1898, which I take in order to comment on. The mortality for the day which I take was 264, the average, when the city is fairly full, being about 70 or less.

38. Admitting that the city had nearly a full population, out of 264 deaths on this day at least 184 were from plague.

39. Of these 184, only 68 had occurred in hospitals; the balance 116 had therefore been concealed.

40. The effect of the measures might therefore be estimated as 68 to 116. But it was really more serious, because the 68 persons who

had died in hospitals had passed a portion of their illness at their homes before they were discovered, and therefore they were at home during one portion of the period when they were dangerous and in hospital during the other period. So that the measures, even when they could be applied, had only a limited effect.

41. When the measures are still more closely examined, the proportion is even less. The microbes which come from the diseased person or a diseased rat are not always to be found in positions that are known, nor in positions where they may be destroyed. Every rat infected is a carrier of the infection, and probably other living things may support and convey the organism. It is therefore probable that the results may be expressed by a proportion smaller than 34 to 116.

42. The fact is, all that we can hope to do at this stage is to lessen the mortality, and the chief object is to protect, as much as can be done, the population. The same law applies throughout nature in dealing with pests.

Measures recommended.

43. The measures I recommended at that time were:—(*a*) The removal of tiles from buildings, street by street, all over the island; (*b*) the construction of openings in all rooms that have not windows, or are not well ventilated; (*c*) the destruction of rats, to help which a reward should be given for each dead rat; (*d*) the flushing down with disinfectants of the whole of buildings where cases occur, and the drying of buildings afterwards by the lighting of large fires; (*e*) the abolition of quarantine on incoming traffic; (*f*) the abandonment of contact segregation, because it could not be carried out, however excellent in principle; (*g*) efforts to be made to encourage *inoculation* on a large scale, and inoculation to be used against plague as vaccination against small-pox. All that had been done in the beginning to support M. Haffkine in the preparation of the prophylactic had been done by the Municipality; all that he asked for was given by the Municipality; and from the beginning not only was cordial support given to him, but sympathy was extended to him when he met with little but discouragement.

Movements of the population and results.

44. The attempt to prevent the movements of the population to the vacant lands in the north of the island could not, I think, have had any effect on the progress of the epidemic, and in January 1898 it had to be abandoned.

And the epidemic continued to decline.

45. The decline of the epidemic was not prevented by the relaxation of measures nor retarded by the return of the population. In April the tide of immigration increased, and the number of people coming into the city was greater than the number going away. Not a single restrictive measure on the movements of the population either stayed or even perceptibly influenced the epidemic.

46. The experience of this year indicates that the measures enforced in 1898 did not produce better results than the measures adopted in the previous years.

47. The true policy was that adopted in the beginning and adopted now, *i. e.*, of encouraging the movements of the population on to the vacant lands, and encouraging their segregation by voluntary efforts. Voluntary segregation of the healthy.

48. It is not necessary for me to examine the measures taken at different times for the examination of people coming into and leaving Bombay. These measures were right in principle, and though the effect produced by them cannot be judged by the number of cases detected, the indirect effect of the measures is much greater than their direct effect. They undoubtedly discouraged the movements of the sick; but within the island or the suburbs immediately outside, the movements of the healthy population ought not to be subject to restraint.

49. It is appalling to consider the feelings of opposition that must have been aroused, and the sufferings that must have been endured when, as in the Report of the Plague Committee, 1897-98, we read:— Concealment, house visitation and cordons.

"In the beginning of January the plague began to get out of hand, and the systematic hiding of the sick made the ordinary house-to-house search fruitless. In sections of the most infected parts of the city, where the death rate was high and the cases taken to hospital were few, it was considered advisable to cordon the areas with troops at an early hour of the morning."

"It is to be admitted that these cordoned searches were not so fruitful of cases as they should have been."

"Whether through secret communications from house to house or across gullies, it is beyond question that on several occasions badly infected cordoned areas were carefully searched, and disproportionately few cases discovered."

50. The danger is well described in the Report of the Plague Committee:—"As the pressure of the North Fort search-parties increased, the sick were removed, and Dhobi Talao became badly infected. From Dhobi Talao the disease spread north to Girgaum and east of Dhanji Street, in 'Market,' where during March it was severe."

51. Let us place alongside this description the ghastly incidents of the desertion of the dead, of corpses carried into the streets and left on the roadways or in the fronts of houses. Ghastly scenes.

52. Again I read:—"The sick person was secreted in the house chosen as a hiding-place, and in many instances the house would only be discovered by three or four deaths occurring in it. The only opposition to rule which was in any way general was the persistent concealing of the sick." Sufferings of the sick.

53. The erection of camps for the segregation of the healthy who have been in contact with the sick is a right measure when carried out at the right time, which is at the beginning of an epidemic; but Segregation.

when an epidemic has acquired intensity, the segregation of a small portion of the people who have been in contact with the sick cannot have any effect.

Inoculation & segregation.

54. The question really is, whether the few people placed in safety in a camp could not more easily be placed in safety by inoculation?

55. While there are few cases, and when it is practicable to find a large number of the people who come in contact with the sick, contact segregation is right and useful. But when there are not few but many cases, and when the sick cannot be found, it is hopeless to expect to find the healthy.

In the monsoon —flooding in the north of the Island.

56. The conditions that existed during the rainy period of 1898 in the localities in the north, as Byculla, most affected were—(*a*) flooded ground between buildings, (*b*) nuisances from the overflow of sewage and water on to the ground, (*c*) overcrowding and crowding of the destitute in insanitary positions; and to these should be added the high prices of food ruling. The local conditions were chiefly nuisances, causing pollution of the soil and air.

Drainage.

57. Though the drainage system has been extended, and year after year sewers constructed and connecting lines of pipes laid, and much useful work done in house connections, an immense work has yet to be finished, for nearly one-quarter of the area of the island has to be drained, and buildings by whole localities have yet to be drained and connected with sewers.

58. In the Annual Report, 1894-95, pp. 526-7, I gave a list of about 100 sewers in 90 streets to which connections had not been completed. The connections with all the sewers in that list, though some of them were ready so long ago as 1880, have not even yet been completed. I wrote of one section :—"a section of extremely imperfect drainage, old worn water channels covered over and worn away by cleaning and scraping, originally intended for rainwater, through which the sewage slowly trickles between the *debris* from the drain walls and ground." In this section a system of sewers has been constructed for a few years, but connections have not been made, but they will, I hope, be commenced very soon.

59. As in 1894, so now, the question of most urgency, after drains to carry away the sewage and water, is the question of connections between buildings and the sewers and pipe drains.

60. The Shone system in Colaba has been completed, but all the connections have not yet been made. In the Fort the gullies have not been reconstructed, and the gullies in the important and densely populated locality of the Fort are even now, as they have been, often imperfect, permitting of leakage and percolation into and under the foundations of buildings.

61. For the disposal of the drainage of nearly a quarter of the island in the northern suburbs, where drains are not likely to be constructed for the next 20 years, and the utilization of drainage on land is not impracticable (of which there is much available, one-fourth of the island being as yet sparsely populated) the construction of septic tanks, or biological filters, has been recommended by me if nothing better can be done. Septic tanks

62. Septic tanks have not yet been tried in India, but they have given most promising results in Europe; and though a septic tank may be described as a well-regulated cesspool, there is ample room in the suburbs for the trial of it.

63. In the north of the island, unless the sewage is to be allowed to collect in cesspools or holes near dwellings, there is no other system, except the purification and utilization of the sewage on the land to be adopted for the disposal of the sewage. The city has grown so rapidly that it has not been practicable to carry out works for the removal of sewage and rain water as quickly as buildings have been constructed, and allowance must be made for this. It has to be remembered that in the suburbs it has been impracticable to construct drains as quickly as new buildings have been erected. Sewage disposal in the North of the Island.

64. Where but a few years ago there were solitary buildings in swamps, there are now towns or densely populated habitations, amidst which there are serious nuisances caused by pools of water or sewage in the rains. In some localities these nuisances cannot be removed through the system of drainage, for the reason that the buildings and the nuisances in the midst of them are on ground lower than the sewers. To drain these localities the ground must be raised and the buildings demolished. Nuisances.

65. The removal of the refuse outside the island has commenced before I write this. I recommended a position at some distance from the railway line for the tipping station, or the point at which the refuse has to be tilted into railway trucks from the carts conveying it from the city to the Flats. As I was apprehensive that the position near the railway line selected for a tipping station might be a nuisance at times, the position was changed and removed away from the railway line. The change of position added to the expenditure, but it prevented a nuisance. The removal of the refuse outside the island is a most important measure, and likely to have a very favourable influence on the health of the island. The refuse itself will be harmless mould in a few years. It is fortunate that the Flats were raised with Refuse, and not with earth which would now have been covered with dwellings and stone—works obstruction to the circulation and movement of air and water. Removal of refuse outside the island.

66. I have written in many reports on the question of overcrowding. The question practically comes to this: is there a single employer of labour in Bombay from the private individual to the master of a few servants, from the Municipality to the Port Trustees, from the Port Trustees to any higher authority, who is able to prevent overcrowding amongst their own servants? Overcrowding.

Overcrowding.

67. This is what I saw in 1898 : a case of plague occurred in the servants' quarters of one of the most select institutions in Bombay. I examined the quarters and found 64 servants living in four rooms about 12' × 16'! What is to be said to this ? The Port Trustees have erected most excellent barracks, with open ground around, for their servants ; better buildings and rooms with better ventilation, inside and outside, could not be found. Few of the best hotels in Bombay have better ventilated rooms for their best customers. Can the Port Trustees prevent overcrowding amongst their servants ? The Municipality have built excellent rooms for their labourers. Can they prevent overcrowding amongst their employés ?

68. The fact is, the poor classes in Bombay will not tolerate interference beyond a certain amount. The economic conditions that oppress them are so rigorous that they will defy interference when it proceeds beyond a certain stage. The weight of opposition is so great that it resists and repels the pressure of authority. The authorities are few, the people are many.

69. The real matter is this: if overcrowding is to be diminished, not only dwellings but relief for the poor must be given, and much higher wages. The construction or improvement of buildings is but the first step in relief. All relief is now voluntary, and generous as the relief in each community is, it is only to help the healthy who can seek it. When the poor become ill they must starve, for the healthy poor are too much occupied by their own necessities to care for or to relieve the sick poor. There are over 100,000 people in Bombay who sleep on the floor and on the outside of buildings! Imagine the effect of this state.

Buildings.

70. I have heard it stated that the overcrowding of buildings was due to the Municipal officers not enforcing the Municipal law. There is no foundation for this. Under the Municipal law, the improvements that have been effected under the Epidemic Diseases Act could not have been carried out and the Epidemic Diseases Act has had to be passed. The feeling in the past was this : that, with the development of the city, the evolution of buildings and the evolution of a higher state of comfort would naturally take place, and undoubtedly this would have been so, if Plague had not come, but the "pestilence cometh, and, as in the past, it cometh with famine"! The progress of the pestilence, though it cannot easily be arrested, can undoubtedly be guided and influenced by measures, amongst the most essential of which are the construction of openings to let air and light into dwellings. Hence a sudden appreciation of the compression of the population and of the great fact that the density of the population must be reduced.

Ventilation of buildings.

Public feeling—change in.

71. It must, however, be remembered that until lately there was no public feeling to support the demands for more ventilation in buildings. Even the Port Trustees would not yield to our demand for a 6-feet open space between buildings. What is now advocated by all was only advocated by a few Municipal Officers before Plague came.

Bamboo partitions in rooms.

72. I am not of the same opinion as some of my colleagues in regard to the danger from bamboo partitions between rooms. I would not prohibit them. I do not think that stone fortresses, even with openings in the walls, are the most wholesome places for dwellings for the poor. There is a good deal, no doubt, to be said against bamboo partitions; but on the other side I think the free percolation of air that is assisted through the interstices is so great an advantage as to compensate for the dangers that may arise from their inflammable or perishable nature.

The Improvement Trust. Improvement of dwellings, &c.

73. The new City Improvement Trust began their great work during 1898. The localities to be improved are so well known, and have so frequently been described, that it is not necessary for me to describe them now. But the improvement of buildings and localities is only the first step. All that can be known about the insanitary portions of Bombay has been known for years, and has been described in many reports, and the way of improvement has been clearly marked and pointed out year after year. There is the fullest information in the report of the Extension Committee, of which the Executive Engineer and I were members. When a locality has been improved, what is to be done about the improvement of the state of the people? This in time will be asked. I wrote last year on this subject:—"The city may give water and keep the ways of the city clean, and do all else that is sanitary, but it cannot give clothes nor food to all the destitute, nor a bed to each one of the 100,000 or more who sleep on the damp ground." Take the most sanitary buildings in Bombay and allow the poor classes to enter it, and in a few weeks they will make it as insanitary as the most insanitary chawl in the most insanitary area. So that, therefore, the improvement of dwellings and localities is but the first and easiest step.

Condition of the people.

Communications within the suburbs not sufficient and more and wider roads wanted.

74. I have suggested certain areas as the first to be improved, but the improvement of densely populated areas of great pressure in the city is but one direction in which improvement should go. Other areas in the suburbs should be prepared for population by communications being opened to them and through them. In some of these portions the only buildings are the huts, nestling amongst mango trees, or hidden in garden foliage. More than one-fourth of the island is sparsely populated and large portions unoccupied; to this area roads must be constructed. I attach great importance to a railway proposed to be run by the Port Trustees from the harbour, N.-E. and N.-W., across the island. The tramway ought to be extended to the north, and a roadway ought to be constructed on either side of the Tulsi pipe line from Dadar right north. All the roads in the suburbs should be widened before buildings are erected on the sides of them. This would open a large area right up the centre of the valley to the sea estuary at Dharavee.

The soil.

75. The two conditions of greatest hygienic importance in the soil are moisture and temperature. Soils are made up of rocks or their

debris and of animal and vegetable life, hence the importance of the configuration of the ground. Where the ground is lowest the waters accumulate, and in cities, as in countries, the lowest portions become *middens* of the highest. Certain tracts of England have been described as the middens of England, and so certain districts of Bombay may be described as the middens of Bombay, to which are carried the soils and the soil waters, with their burdens, from the higher grounds of the higher districts. The affinities of different soils for heat and moisture have an important bearing on their suitability for human dwellings. Hence the importance of an observation made in the local Meterological Observatory on the rise in the temperature of the soil of Bombay. Mr. Moos writes that in 1898 the average temperature 5 feet below the surface of the ground was 1·5° higher than in 1896. Such principles should guide us in selecting a place of residence, for all over the world the damp places over which mists linger are the least salubrious. In Bombay, as elsewhere, the deep valleys are the least wholesome and the high lands the most salubrious.

Water connections.

76. The question has arisen as to the effect of cutting off the water supply inside buildings on the recurrence of cases of plague. Up to the end of January 1899 water connections were cut off in the following number of buildings :—A Ward, 66; B Ward, 100; C Ward, 305; D Ward, 17; E Ward, 1,111; F Ward, 46; and G Ward, 59; total, 1,704. The connections restored were about 210. Cases have recurred in the following number of houses in each ward in which the water supply had been stopped :—A Ward, 51; B Ward, Ward 44; total, 1271. I believe the measure has had the effect of diminishing the number of cases for it has to be remembered that the houses in which water connections have been cut off were all most insanitary, and that in these buildings the water-supply was a cause of dampness in the ground underneath or the floors or walls of rooms adjoining. We know that moisture is essential to the growth and vitality of the organism outside the bodies of the diseased.

Water-supply.

77. It is too often forgotten that the lakes which supply this city with drinking water have been filled with the rain waters that have flowed over forest lands which are intensely malarious and not uninhabited. Attention has been frequently drawn by me to the importance of the conservancy of the gathering grounds, and it has become more important since the investigations of Mr. Hankin. I would draw attention to the necessity that has arisen for the filtration of the whole of the water-supply. The whole of the Tansa supply is at present unfiltered, and nearly 50 per cent. of the supply from Tulsi.

Disinfection.

78. During the year a locally made disinfecting stove was obtained. The apparatus is of the ordinary boiler shape, and rests on a foundation of brick work. It is therefore not portable. The walls consist of two cells, separated by an annular space. This space forms the boiler. The

pressure is limited to 6 lbs., or a temperature of 228° F. Dr. Marsh reported on the efficiency of this stove, and his experiments gave very favourable results, both in the case of the cultures of the bacillus of plague, and in the case of the resistant hay bacillus.

79. This year cases of a disease—jiggers—not hitherto known in Bombay, were imported. I find the accounts of observers in South America do not quite correspond with the descriptions in the text books. The proper name of the disease is, I believe, *Chigoe*, and the flea burrows between the cuticle and the true skin, not only of human beings but of animals. The *Pulex penetrans*, to give the flea its right name, is about $\frac{1}{25}$ of an inch in length. It is popularly stated to burrow in order to lay its eggs; but the fact appears to be that the female burrows to ovulate and to die, except the abdominal section, which continues to feed the germs that afterwards become the eggs. It is different to the common flea, and has a sort of proboscis at its anal extremity. Jiggers.

80. Nothing can better illustrate the difficulties the Municipality have had in carrying out the registration of deaths than the following description of the difficulties experienced by the Plague Committee as given in the Report for 1898:—"The Committee, however, decided that this opinion was not in agreement with the customs and feelings of any class in Bombay, and that any attempt to enforce corpse inspection was likely to give rise to active ill-feeling; and that the possible advantages from the practice were outweighed by the certainty of discontent." Registration of deaths.

81. On the 1st of June the city plague administration was taken over by me, and one of the first measures I gave attention to was *inoculation*. Already I had been busy opening stations for inoculation, and I had been with M. Haffkine to chawls, persuading the people to be inoculated, and we had a great measure of help and encouragement. I began, after taking over charge, a system of payment to the poor at the time of inoculation, and certainly it led to a great increase in the number of inoculations. M. Haffkine one morning with me vaccinated in one chawl as many as 45 people, 22 of whom were women. It was afterwards considered necessary to discontinue payment, and the desire for inoculations began to decrease owing to other causes and influences, the most serious effect of which was, not a spirit of opposition, but a want of faith. Inoculation to be successful must be encouraged at the right time. There is a fashion, and also a sentiment, as in everything human, which have to be taken account of. Taken at the right moment, numbers of people may be persuaded to be inoculated, who could not or would not be persuaded at any other time. Besides, there is not the fear of the disease in Bombay that exists in other places where the disease has been very destructive and fatal. It is necessary to the success of inoculation (1) that the local reaction and pain should be reduced, (2) that the operation should be performed with care and therefore slowly. Inoculation success and difficulties.

82. I think that everything that could be done to open inoculation stations, and persuade the people to be inoculated, was done after the Municipality took over charge of plague measures. About 34 stations Inoculation measures.

were opened, and of the 34 inoculating officers 13 were under the Municipality. After June, when the Municipality took over charge of the plague administration, M. Haffkine and other officers accompanied me to the houses of the poor to inoculate people; but there was not the dread of the disease which was necessary to help us to inoculate large numbers. We met with much encouragement. Frequent meetings were held in the city, at which the Municipal Commissioner, Mr. Harvey was present, and the Commissioner formed a Committee, over which he presided, which sat every week in his office to deliberate on the progress of inoculation and to discuss the best measures to be adopted. I do not think more could have been done than was done in 1898 to bring inoculation within reach of the people, or to persuade the people to be inoculated.

Inoculation statistics.

83. The progress of inoculation by classes is very interesting and it will be observed that the largest number of inoculations have been amongst the poorer classes of Hindus. I do not think that this can be ascribed to payment by results, but to a feeling in favour of inoculation, which had sprung up and been encouraged by the Municipal officers. It will cause some surprise that a larger number of Europeans and Eurasians had not been inoculated. The explanation is this, Europeans believe that as yet, living under the conditions which surround them, the disease will not be communicated to them, or, if communicated, it will be in a mild form; and they think the risk is so slight that it is scarcely worth the trouble of taking protection against it.

(1). Statement showing the number of persons by class inoculated against plague in Bombay during the year 1897.

		Inoculated per 1,000 of population.
Hindus—Brahmins	298	7·84
Other high caste	705	1·56
Low caste	1,244	27·54

Serum. Prof. Lustig's.

84. The results of treatment by Professor Lustig's serum have been encouraging to further experiment. In the Arthur Road Hospital 257 patients were treated; of these 145 died and 112 recovered, giving a mortality of 56·42 per cent. against a mortality of 79·12 per cent. amongst the general patients. It will be said that the patients for the serum treatment were selected, and practically this must be so, but the selection was as well made as it could be. There is no other treatment that holds out much hope of success. The results obtained at this period are encouraging, because the horses had not been kept a sufficient time under treatment and there had not therefore been sufficient time for the preparation of the serum.

Mortality from plague by classes.

85. The mortality by class indicates that the classes most careful of animal life, and most engaged in the distribution of the grain-supply, have suffered most. The low mortality amongst Mussalman must, I think, be ascribed to imperfect recognition. The mortality amongst Hindu low castes is almost the same as in 1897. The mortality amongst three classes, *i.e.*, Europeans, Eurasians and Parsees, rises progressively from 1·32 amongst Europeans (almost the same as in 1897) to 7·39 amongst Eurasians, being 2·3 less than in 1897, to 10·28 amongst Parsees, being 2·7 more than in 1897. It is interesting that in this year of enhanced virulence and greater intensity the number of Europeans who suffered should be 5 less than in 1897.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM PLAGUE BY CLASSES IN 1898.

Classes.	Population by Census of 1891.	Number of Deaths.	Death-rate per 1,000 of Population.

Mortality from Plague by Sections.

86. The distribution by localities of the 18,185 deaths from plague is interesting and follows nearly the same incidence as in former years. It is difficult to draw any exact conclusions from the recorded mortality

Low mortality in some sections.

by sections from plague. There was the difficulty of recognition or detection, and there was concealment influencing the registration of the disease. One of the sections of low mortality, 12·87 per 1,000, was Khara Talao, and yet this section is one of the most insanitary and overcrowded sections in the whole island. The other sections of low mortality are a portion of the Mandvi ward, Chuckla, and Umerkhadi. The distribution of mortality indicates either imperfect recognition or concealment in some sections. There are sections where the mortality must be low, but there are sections where, if the mortality is low, it cannot be correct. It is easy to place the finger on the localities of most concealment. The ward of highest recognised plague mortality is E Ward, which is therefore probably the ward of most detection.

Chaupati	194·23	22nd Do.

87. In both sexes a greater enhancement of mortality was observed amongst those over five years of age than at an earlier period of life. It may be said that the disease is most difficult of recognition and most easy of concealment in those under five years of age, and therefore the enhancement over five years of age, is due to more exact registration. The most susceptible periods are between 25 and 40 years.

Mortality from Plague by sex and age periods.

Mortality from Plague by Dwellings.

88. The course of the mortality by dwellings is almost the same as in 1897, and illustrates the influence of ventilation, though it is not necessary to illustrate by statistics the influence of ventilation on the occurrence of cases any more. The mortality decreased with the height of the dwelling, being nearly 86 per cent. on the ground floor, over 77 on the first floor, 71 on the second floor, 61 on the third floor, 57 on the fourth floor, and 51 on the fifth floor.

STATEMENT SHOWING THE PERCENTAGE OF DEATHS TO ATTACKS FROM PLAGUE BY FLOORS AND WARDS.

Wards.	Ground Floor.	First Floor.	Second Floor.	Third Floor.	Fourth Floor.	Fifth Floor.	Residence unknown.	Harbour.	TOTAL.

* Only 1 case occurred.

These figures approach very closely to the results of 1897. In 1897 the chances of recovery progressively increased from the first floor upwards, from a mortality of 84 per cent. on the ground floor to 45 per cent. on the fifth floor. It will be observed that in all wards there was the same progressive decrease in the fatality with the height of buildings.

Remarks on the Recurrence of Plague.

89. While writing of the mortality by buildings and floors, I would draw attention to the remarks I made last year in regard to the recurrence of plague in buildings. It is, I believe, due chiefly to the existence in these buildings of attractive and favourite feeding and hiding places for rats. At first I thought the greater freedom of certain dwellings or the reduced incidence of Plague in some buildings after the drainage had been improved was due to the effect of the improvement of house drainage; but afterwards I came to the conclusion that it was chiefly due to the closing and filling up of rat holes. Therefore, if it were practicable to improve house drainage, to clean and renew all down-take pipes, to properly construct or repair all house gullies and drains, it would have a great influence on the recrudescence of plague. I have in previous years given statistics showing the recurrence of plague by houses, and I have given evidence on the subject before the Plague Commission.

Plague Mortality by Months.

90. The mortality was highest in March and lowest in June. The most rapid development and spread of the disease occurred in February, the deaths rising to 348 on one day. In February the number of cases rose to 5,351 from 3,654 in January, of whom nearly 84 per cent. died. In March there was a further rise to 5,764 cases and an increase in the mortality to 86 per cent. In April the cases fell to less than one-half and the mortality declined, being equal to nearly 80 per cent. The highest mortality for any one day was 358 on the 16th of March, and again on the 18th, when it was the same number. The disease decreased a little after the middle of March, and the decline became rapid towards the end of the month, and reached its minimum by the end of June. A recrudescence began towards the end of July, and reached its maximum in October, followed by a further recrudescence in the middle of December to develope into a greater epidemic than known before.

The occurrence of Plague and rats.

91. A very interesting case of plague occurred in the Fort in a house in which dead rats were found. In this house living rats had not been seen for some time before. The facts are as follows :—One of the inmates of the house reported that dead rats had been found in the house. The Medical Officer visited it and ascertained that 6 or more dead rats had been found on the second floor, on the 24th of November. This caused a search, and it was ascertained that before this date 3 dead rats had been found on the first floor on the 19th idem, and that an old woman took the rats up and threw them away. This old woman was attacked with plague on the 28th idem, *i. e.*, 10 days after dead rats had been found in the house.

I will now give a number of instances from one ward, C Ward, only (though the number of instances from all wards are very numerous) of cases of plague occurring in buildings after dead rats had been found in them. In fact, any further evidence as to the relation of rats to plague is now unnecessary.

C WARD.

Plague after Inoculation.

92. A very interesting case of a second attack of plague, which was admitted into the Adamji Pirbhoy Hospital, I happened to observe. The patient was inoculated once at the end of February. Six months after he suffered from plague, the left inguinal glands being affected. The glands suppurated and the patient recovered after being two months in hospital. A month after his discharge, he suffered from malarial fever, which lasted about 15 days. In November he had a second attack of plague and the cervical glands were affected. He was then admitted to hospital where he died, having been ill from 3 to 4 days.

Outbreak of Plague in the Mahratta Hospital, danger of communication of the disease in Pneumonic Plague.

93. When the Mahratta Hospital was taken over from the administration of the Plague Committee, I noticed that it was rather close, although there were ample means of ventilation by windows. The walls of the wards had not the flap system of ventilation at the bottom of each wall, which I suggested years ago in the Arthur Road Hospital, although there was ample ventilation by windows in this admirable institution. It was the monsoon, and some of the staff objected to any alterations at that season. In September an extraordinary outbreak of plague occurred amongst the staff in this hospital. On the 5th of September a servant was found to be ill with pneumonic plague, and he died 83 hours after admission. On the 23rd idem a ward-boy who had been attending on a case of pneumonic plague was ill, and died of pneumonic plague under 24 hours' illness. On the 24th an Hospital Assistant was ill, who, on the previous night, had watched a bad case of Pneumonic Plague, and had spent the whole night at the bedside of the patient. He was admitted into hospital on the 25th and died on the 26th. He was attended by his wife, who fell ill on the 29th and died on the 1st of October. I now come to a most sad event in the outbreak. On the night of the 29th of September the Medical Officer of the Hospital had a rigor followed by a rise of temperature. Next morning he was suffering from pneumonic plague. There was no glandular enlarge-

ment. His sputum was examined by Dr. Galliotti and found to contain plague bacilli. A few days before he cut the left index finger in opening a bubo in a plague case. He returned to his house, where he was segregated and treated till his death, and he was attended during his illness by three servants from the hospital staff. The first servant fell ill on the 4th of October and died on the 8th from pneumonic plague, without buboes. The second fell ill on the 6th and died on the 12th. He had a small bubo in the right femoral region. The third was ill on the 6th and died on the 9th. Besides these, two Hospital Assistants suffered from symptoms like plague. One fell ill on the 6th and recovered. The second fell ill on the 9th and died of pneumonic plague on the 13th. But in the house of this Hospital Assistant, two other cases had occurred, one of a brother who died of pneumonic plague on the 8th, and the other of another brother who was attacked and afterwards died. Not one of the staff was inoculated with the prophylactic serum. There is only one other fact of interest, and that is, that during the outbreak dead rats were found in the dispensary under a cupboard; and further, it is of interest to know that three of those who died used to sit for hours in the dispensary. The dead rats were found on the 5th, but they had been dead for some days.

General Mortality by causes.

94. The highest mortality from any one death cause is referred to plague, being 22·12 per 1,000 against 13·3 per 1,000 in 1897. Concurrently with the increase in the mortality from plague there was an increase in the mortality from diseases of the respiratory system, but a considerable decrease in the mortality ascribed to Phthisis and fevers. The chief death causes that contributed to the high mortality are Plague, diseases of the respiratory system and phthisis.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM THE PRINCIPAL CAUSES DURING 1898.

Cause of Death.	No. of Deaths.	Death-rate per 1,000 of Population.

Accidents	559	·68
Other and unknown causes except still-born	8,681	10·56
Total ...	51,961	63·23

Monthly Mortality.

95. The mortality rapidly rose in January through February until a maximum was reached in March. The highest mortality was registered in March, being 9,196 deaths. A recrudescence began in August, developing into a monthly mortality of 3,507 in October.

STATEMENT SHOWING THE NUMBER OF DEATHS FROM ALL CAUSES BY MONTHS IN 1897 AND 1898.

Months.	No. of Deaths from all causes, exclusive of Still-born, in 1897.	No. of Deaths from all causes, exclusive of Still-born, in 1898.
January	7,518	6,699
February	6,860	8,177
March	5,236	9,196

July	2,989	2,295
August	3,924	3,095
September	3,476	3,439
October	3,249	3,507
November	2,840	2,476
December	3,615	3,177
Total	47,896	51,961

Mortality by place of birth.

96. The incidence of the mortality by place of birth indicates even more strongly than the statistics of last year, that the chief sufferers from plague in the population are strangers. In 1897 a total of 16,191 persons born in Bombay and 30,579 born elsewhere died. In 1898 the mortality amongst strangers is even more in excess—33,733 died, and only 15,479 of the people born in Bombay. The course of the epidemic is well indicated by the mortality amongst the people born outside of Bombay. Through January and February the mortality rose till it reached its maximum in March. A progressive decrease followed till July, when a further recrudescence occurred, which subsided in or about November to revive again in December.

TABLE SHOWING THE NUMBER OF DEATHS, EXCLUSIVE OF STILL-BORN, ACCORDING TO PLACE OF BIRTH IN 1898.

Months.	Bombay.	Elsewhere.	Unknown.	Total.
January	1,806	4,631	262	6,699
February	2,146	5,400	631	8,177

Total ...	15,479	33,733	2,749	51,961

97. Notwithstanding the high mortality of the year, the death-rate of Europeans was only 17·89 per 1,000, lower than in the previous and many other years. The total death-rate amongst Europeans in 1898 is lower than in any year since 1893! This is a very remarkable protection from disease during a year of Plague. Yet Europeans did not flee and many of them approached the sick, and exposed themselves fearlessly in aid of the suffering. The Mussulman mortality is also lower than in 1897. The mortality amongst Jews was under 37 per 1,000 and amongst Parsees 39·13 per 1,000. The mortality amongst Parsees is 6·5 per 1,000 higher than in 1897. Excluding small communities, the highest mortality occurred amongst the mass of the Hindu population, being equal to 93 per 1,000. Mussalmen, a large community, have the next highest mortality, the death-rate being as high as 72·60 per 1,000.

Mortality from all causes by class. Low mortality amongst Europeans.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM ALL CAUSES BY CLASSES IN 1898.

Classes.	Population by Census of 1891.	Number of Deaths.	Death-rate per 1,000 of Population.
Jains	25,225	2,120	84·04
Brahmins	37,982	1,774	46·70
Lingnets	784	125	159·43
Bhatias	7,891	483	61·20
Hindus of other castes	451,465	28,004	62·02
Hindus, low-caste	46,169	4,288	93·82
Mussalman	155,101	11,261	72·60
Parsees	47,458	1,857	39·13
Jews	5,021	185	36·84
Native Christians	29,712	1,406	47·28
Eurasians	4,330	196	45·26
Europeans	11,290	202	17·89
Negro-Africans	146	96	657·44
Buddhists	190	12	63·15
Other and unknown castes	.....	9	.....
TOTAL...	821,764	51,961	63·23

98. If the mortality of the classes is examined according to sex, it will be observed that the mortality of the communities amongst whom the death-rate was highest, was influenced by a high fatality and great loss of female life. Take, for instance, the mass of the Hindu low caste population, the excess of female mortality was equal to 11 per 1,000 and amongst Mussalman as much as 22·6 per 1,000. If we take the classes of low mortality, it will be observed that the excess of female mortality is not great. Amongst Parsees it is 2·8, amongst Jews 3·5, and amongst Europeans 7·2. The plague death-rate of Europeans was only 1·32 per 1,000, the attacks being 20 and the deaths 15, out of a total population of a little more than 11,000 Europeans.

Mortality by sex.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM ALL CAUSES BY CLASS AND SEX IN 1898.

Classes.	Males.			Females.		
	Population.	Deaths.	Per 1,000 of Population.	Population.	Deaths.	Per 1,000 of Population.

Total	518,093	30,718	59·29	303,671	21,348	69·95

Mortality by sex and periods of life.

99. The mortality of females is 10·66 in excess of the male death-rate. The mortality amongst males was highest under 1 year of age, and descended till the period of life between 15 and 19 years of age, and again rose from 20 to 24 years. The female mortality followed almost the same incidence as that of the male. But it will be observed that the excess female mortality is less than in the years preceding the appearance of plague. It will also be observed from the table that the female mortality is almost the same as in 1897 and that the excess mortality of the year is amongst males. This is worth noting.

Mortality by sections.

100. As in 1897, the mortality in some of the most crowded sections is relatively low. It is also very remarkable that in some sections in this year a comparatively low mortality has been recorded, notwithstanding the epidemic of plague, and notwithstanding the apprehensions that have been felt. In the Fort South, the death-rate was only a little over 4 per 1,000. In a favourite locality, such as Walkeshwar, the death-rate may be expected to be low, and it will be observed that it is only just over 20 per 1,000. In the Esplanade, a locality in the distribution of its population not unlike Walkeshwar, it is only 24 per 1,000. In the suburb of Sion the mortality is only 36 per 1,000, but in the great section of Fanaswady the mortality is not higher than 48 per 1,000. In the densely populated section of the

Market, the mortality is under 50 per 1,000. In some of the suburbs the mortality is higher than in the most densely populated localities. This is partly due to the movement of the population from the city to the suburbs. But it is also greatly due to other reasons which have been discussed at length in previous Reports. I summarise these causes or reasons as follows :—(*a*) imperfect ventilation of the inside rooms in buildings; (*b*) the greater proportion of earthen floors ; (*c*) the more domestic life of the people that is a greater portion of their time spent inside their rooms and more favourable places for the growth of mosquito life in the wet places or in the gardens of the suburbs. It has to be remembered that some of the best dwellings even in Bombay for the poor are chawls, and that a large number of the poorer classes, in many of the crowded localities, have excellent dwellings, probably better ventilated dwellings than in many cities of the world. Many of the buildings occupied by the poorer classes are excellent, but the buildings are made insanitary by the people and the needs and necessities of the poor. There are a number of chawls in Bombay with rooms as good as the chambers in which Europeans live, but they are differently used to the chambers I refer to, and there is no single room in which a whole family live their life that can remain sanitary. People who do not see it do not and cannot imagine that in many a building a whole family live their life—from the cleansing to the feeding and refreshing of their bodies—in one room. One important alteration needed in the arrangements of the rooms occupied by the poorer classes is the prohibition and removal of the little bathing place or "nahni" in the corners; but condemned this must be, though such a measure will be as unpopular as the measure carried out on my advice, the prohibition of the water-supply where it causes dampness. The mortality in the densely populated sections in the East of the Island is higher than in 1897, the death-rate being 67 per 1,000 in Mandvi, 66 in Umarkadi, 64 in Dongri, and 63 in Chukla. Notwithstanding all the measures that have been adopted, portions of these sections have buildings most imperfectly ventilated. I take one street, Bengalpura, where there are 22 houses without one-side gully for ventilation or drainage. Yet portions of these sections, when drainage connections have been completed, will compare not unfavourably with crowded portions of cities even in Europe. The sections of highest mortality are Kamatipura, 2nd Nagpada, Byculla, Parel, Kumbharwada, Tardeo. The influences affecting the mortality in all these sections have been frequently described at length in my reports. The insanitary conditions in each section are well known and the remedies, although not always easy of application, are equally well recognized. Much has been done to remove the insanitary conditions and to improve the localities, as I have indicated in other portions of this report, but much has yet to be done for the people and by the people themselves. In all measures for the improvement of localities or buildings, this grave question has to be taken into consideration of how much the people can do—however willing—with the wages earned by the mass of the people to preserve their health. It is not a question of comfort—it is a question of subsistence for the many.

Cholera and famine.

101. Amongst the ill-fed during years of famine or scarcity, the famine types of disease may be expected; and though with a better year than in 1896 and 1897, the immigration of the destitute was less, there were a large number of people who, if not famished, were in ill-health from poor food and wretched lodging. In the last report I drew attention to the fact that, synchronous with the prevalence of cholera in this city during the monsoon, the disease was epidemic in the country around.

102. The mortality from cholera this year is small, only 104 deaths were registered, being 1,161 less than 1897, and 380 less than the average. The mortality declined progressively in the first three months of the year, and later only 3 deaths were registered in June; but in July there was a slight increase.

The sections of highest mortality were Sion, Mahim, Dongri, Mahaluxmi and Byculla. Excepting one section, the northern suburbs were most affected. In 1897 the same incidence was observed.

The distribution of mortality by class shows that Native Christians had the largest number of cases, and following them, Hindus. The mortality by sex indicates that the disease fell heaviest on males, the male death-rate being ·15 per 1,000, and the female, ·07 per 1,000, although the percentage of deaths to attacks among females is slightly

higher than that of males. The mortality by place of birth is very striking; whereas there were only 9 deaths of persons whose birth-place was Bombay: there were 95 deaths of persons whose birth-places were outside Bombay.

Mortality from Cholera by source of water-supply.

• The mortality from cholera according to the source of water-supply shows that 80 people who used Vehar water were attacked, of whom 75 died, and 1 only who used well water. In 29 cases the source of water-supply was not known.

The mortality when analysed, according to the period of residence, exhibits the usual phenomena. Of the total cases 16 were under 3 months, and 8 were under 6 months in Bombay. The mortality by place of birth exhibits the influence of immigration, and the susceptibility of immigrants to cholera. Of the 110 cases as already stated, only 9 occurred among persons born in Bombay.

Fevers.

103. 4,114 deaths were registered from fevers, being 2,837 less than last year, and 2,772 less than the average. Of the deaths from fevers, 3,716 were referred to remittent fever, being 2,188 less than in 1897, and 1,957 less than the average. 259 deaths were ascribed to simple fever, being 530 less than in 1897 and 652 less than the average. To ague 102 deaths were referred, being 123 less than in 1897, and 170 less than the average. To enteric fever 37 deaths were referred, being 4 more than in 1897, and 7 more than the average.

104. The mortality from fevers did not follow the same incidence as in 1897. In that year the mortality from fevers decreased in the

Fevers.

first half of the year as the epidemic of plague declined, and again increased in the rains with the revival of Plague. It will be remembered that through the monsoon of 1897 there was a serious increase in the mortality from fevers concurrently with the prevalence of cholera. In 1898, the increase during the rains concurrently with the recrudescence of plague was observed later and proved to be much lower. Taking the whole year 1898, the fluctuations in the mortality from fevers were much lower than in 1897. The highest mortality was registered in March and the lowest in the second month of the rains in July. The investigations of Ross on the conveyance of malarial organisms by mosquitoes, suggests to us the necessity of studying the mosquito life of this Island. The part played by the mosquito suggests also an explanation of the fluctuations in the district mortality.

Mortality from Fever by classes and months.

105. There were however great fluctuations observed in the mortality from fevers in different months in some classes. In April, the mortality from fevers amongst low-caste Hindus rose from 1·3 per 1,000 in March, to 8·2 per 1,000 in April, and remained high till November. The mortality amongst Musulman decreased in April and continued to decline till August. The mortality amongst Parsees reached its maximum in February and did not rise again during the year. The mortality amongst Europeans was very low in January, and in February and March there were no deaths; but in April and May the mortality rose, to decline in June. It ascended in July and August and descended in September, to rise again in October. There were no deaths in November and December. In this year, as in 1897, the mortality amongst Brahmins is low. The mortality by class fluctuates between 1·7 amongst Europeans, and 6·9 amongst Hindu low-castes. The mortality of Musulman is lower, and the death-rate among Parsis is a little above that of Europeans.

106. The highest mortality from fevers occurred in Parel, Mahim, Kumbharwada and Byculla. It will be observed that in 1898, as was seen in 1897, the mortality in some of the most crowded sections is less than in the suburbs. Except in one suburb, Sion, the mortality in all the suburbs is above the average. I believe the part played by the mosquito in the communication of fevers will be found to be the explanation of this incidence of fevers in localities. I would draw attention to a most interesting paper on the subject by Surgeon-General Harvey in the last report of the Sanitary Commissioner with the Government of India. Mortality from Fevers by Sections.

108. A total of 546 deaths was registered from relapsing fever. There were two recrudescences of the disease during the year—one in the cold season attaining its maximum in March, and the second attaining its maximum in the rainy season in October, the maxima periods of intensity corresponding with the maxima periods of intensity of plague. In the Arthur Road Hospital 1,581 cases of relapsing fever were admitted, of whom 329, or 20·8 per cent., died. It is well to contrast this mortality with the death-rate of 73·25 from plague, which was nearly 7 per cent. higher than in 1896-97. Relapsing Fever.

109. From measles 254 deaths were registered, being 105 less than in 1897, and 190 less than the average. The distribution of the mortality follows nearly the same course as in former years, being highest among the Hindu low-castes of all large sections of the population. The death-rate amongst Jews comes next, followed by the mortality amongst Musalman. As in preceding years the mortality amongst females was higher than amongst males, the death-rate amongst females being ·44 per 1,000, and males ·22 per 1,000. Mortality from Measles.

Under 4 years of age the fatality was greatest, being highest in the first 2 years of life.

The distribution of mortality by sections is heaviest in the following :—1st Nagpada, Khara Talao, Dongri, 2nd Nagpada, Kamathipura and Byculla—all sections densely populated and having a large number of the poorer classes. These sections were in former years sections of high fatality from measles.

Phthisis

110. 5,624 deaths were registered from phthisis, being 303 less than in 1897, and 1,372 more than the average. The mortality follows the same incidence, in spite of plague, as in former years. In each year it has testified to the great loss of life caused by seclusion in crowded and ill-ventilated dwellings. The same sections in this year as in the past are sections of high mortality. The sections of ill-repute for this disease are—2nd Nagpada, Umarkhadi, Chuckla, Kamathipura, Khara Talao and Byculla. Byculla has this year, with an increasing population, displaced Bhuleshwar. These are the sections to which the attention of the Improvement Trust has been drawn, and it has, as I know, been already given to them, and surveys have been made. What is wanted in all these sections is more ventilation of building and more ventilation of locality. There are too many houses and people. The number of houses must be reduced, and the number of rooms in the houses that are left, must be fewer. The reduction of mortality as compared with 1897 is due to a lower death-rate amongst females, the number of deaths of females being 2,940 against 3,075 in the last year. But though there is a reduction in the total female mortality, it will be observed from the table that the mortality amongst females is yet very nearly double that of males. This great tax of disease falls on Mussulman and some high class Hindus. In the mass of the poor Hindu population, in spite of the laborious lives of the women, the mortality is less than half the loss of life of Mussulman. There is a decrease of 173 in the mortality amongst Mussulman, but I think this must be chiefly ascribed to a decrease in the female population.

The decrease in the mortality from phthisis indicates one of two things, *i.e.*, either that there had not been great concealment of plague, or that the phthisical population had been reduced by plague. Both amongst males and females, the mortality rose after 10 years of age, as was observed in 1897. In the period between 10 and 14 the first great divergence in the mortality between males and females occurs. This is the period when women come under the conditions that most favour the communication of phthisis. At this time of life, it will be observed, the female mortality is more than three times the male death-rate.

111. During the year only 55 deaths were registered from small-pox against 57 in 1897. Of the deaths from this disease 36 occurred amongst the mass of the Hindu population, and 11 amongst Mussulman. As in the previous year, when the disease was not epidemic, it was most prevalent in certain sections, which are insanitary and have a large proportion of unvaccinated. The mortality at age periods was highest under 5 years of age. Mortality from Small-pox.

112. From the accompanying statement showing the mortality from Plague in hospitals, it will be observed that the mortality in the Arthur Road Hospital has been higher than in 1897, but the results obtained in the Arthur Road Hospital may be considered to be the best that can be expected from any treatment amongst the class of patients admitted into, and treated in that hospital. Mortality in Hospitals.

Name of Hospital.	Number Admitted.	Number Died.	Percentage of Mortality.	Remarks.
Arthur Road Hospital	2,187	1,602	73·25	
Modikhana Hospital	1,083	814	75·16

Sarvajanik Hospital (Parel Government House)	795	‡ 554	79 45	‡ These figures are up to 2nd May 1898 when the hospital was closed.

Mortality from other causes.

113. From diseases of the *digestive system* 4,602 deaths were registered, being 66 less than in 1897, and 1,472 more than the average. Of this mortality, 1,800 were referred to diarrhœa, being 69 less than in 1897 and 312 more than the average. From dysentery, 1,585 deaths were registered, being 97 less than in 1897, and 722 more than the average. To all other diseases of the digestive system, 1,217 deaths were registered, being 100 more than in 1897, and 438 more than the average.

From diseases of the *nervous system*, 2,577 deaths were registered, being 436 more than in 1897, and 389 more than the average.

To diseases of the *circulatory system*, 358 deaths were referred, being 125 more than in 1897, and 165 more than the average.

From diseases of the *urinary system*, 197 deaths were registered, being 62 more than in 1897, and 101 more than the average.

To the *generative system*, 704 deaths were referred, being 174 more than in 1897, and 380 more than the average.

To diseases of the organs of *locomotion* and *cellular tissue*, 146 deaths were referred, being 15 less than in 1897, but 36 more than the average.

From affections of the *cutaneous system*, 64 deaths were registered, being the same number as in 1897, but 27 more than the average.

To *dropsy* 166 deaths were referred, being 29 less than in 1897, but 21 more than the average.

From *leprosy* 51 deaths were registered, being 12 less than in 1897 and one less than the average.

8,423 deaths were registered from diseases of the *respiratory system*, being 566 more than in 1897, and 2,885 more than the average. Of the deaths from diseases of the Respiratory system, 4,458 were referred to *bronchitis*, being 372 less than in 1897, and 1,136 more than the average. To *pneumonia*, 1,370 deaths were referred, being 38 more than in 1897 and 20 more than the average. To *whooping cough* 182 deaths were registered, being 99 less than in 1897.

From diseases of the *eye*, *ear* and *nose* 11 deaths were registered.

To *old age* and *debility* 3,135 deaths were ascribed, being 71 less than in 1897, and 542 more than the average.

The number of premature births is 38, being 17 more than in 1897 and 8 more than the average.

To *accidents* and *violence*, 559 deaths were registered, being 39 more than in 1897, and 91 more than the average.

To *poisoning* 65 deaths were referred, being 27 more than in 1897 and 9 more than the average. Of the deaths from poisoning, 32 were reported to have been accidental, 29 suicidal, and 4 unknown. To *drowning* 124 deaths were due, being 32 more than in 1897, and 25 more than the average.

Births.

114. 10,784 living and 1,569 still-born births were registered, being 1,448 more than in the last year. Of the living births 5,640, were males and 5,144 were females. The proportion of males to females by the census of 1891 was as 170·60 to 100 and assuming that there were 100 females to 100 males, the birth-rate would be equal to 22·38 per 1,000 of population.

Vital Statistics.

115. The decrease in the birth-rate, which has been observed in the areas affected by plague, is a phenomenon that must be anticipated from a study of the historical events that have marked all plague epidemics. It is a phenomenon so constant in plague epidemics that, had it not been observed in Bombay, the *birth registration* must have been condemned as untrue. The birth-rate in Bombay, assuming that there are 100 males to 100 females, was equal to 32·55 in 1895 to 32·97 in 1896, to 19·38 in 1897 and 22·38 in 1898. Had the birth-rate been of nearly normal rate in 1897 and 1898, it would have been due either to incorrect registration or to an extraordinary immigration of women.

Birth-rate by Communities.

116. The birth-rate fluctuates in communities according to the proportion of males to females, being nearly normal in the classes with the highest proportion of females. The highest birth-rate was registered among Hindu low-castes, being 30 per 1,000. I exclude the small community of Africans, amongst whom the birth and death-rates greatly fluctuate. Jews have the next highest birth-rate, equal to 25 per 1,000. Then follow Lingayets, having a birth-rate of 24 per 1,000, and Parsees 22 per 1,000. I ascribe the low birth-rate among Parsees to two influences—firstly, plague, and secondly, to a large number of females having gone to live in the country outside Bombay.

Birth-rate by localities.

117. The birth-rate by localities fluctuates with the proportion of males to females in each section. The highest birth-rate is registered in the two suburbs of Mahim and Sewree.

TABLE SHOWING THE NUMBER OF BIRTHS AND THE BIRTH-RATE BY SECTIONS IN 1898.

Reorganization Scheme.

118. During the year the City was divided into 4 Administrative Divisions and four Divisional Health Officers appointed to Nos. 1, 2, 3 and 4 Divisions. Buildings for the offices of Nos. 2, 3 and 4 were obtained and office establishments employed. The office of No. 1 Division had to be placed in the Municipal Building, as a suitable building for an office could not be obtained in the Division. The appointment of Divisional Health Officers is the first of the measures sanctioned for providing a larger and re-organized Health Department.

Miscellaneous.

119. The total expenditure on the Health Department came to Rs. 15,40,720-9-2, and the income to Rs. 8,02,621-2-6 ; the actual cost of the department to the Municipality was, therefore, Rs. 7,38,099-6-8. In addition to this an extraordinary expenditure, which amounted to Rs. 3,04,706-6-8, was incurred on account of special sanitary measures necessary to deal with the Epidemic of plague.

Establishment.

120. On an average 4,003 men and women and 1,052·8 scavenging and drain carts, and 204·9 night-soil and cess-pool carts were at work in 1898.

Garbage.

121. 3,88,816·75 tons of garbage, equal to 1,065·25 tons a day, were collected and removed, and disposed of, against 404,284·88 tons of garbage in 1897.

Night-soil and cess pool matter.

122. 1,69,586·9 tons of night-soil and cess-pool matter. equal to 464·62 tons a day, were collected and removed as against 1,56,057·09 in 1897.

Drain-cleaning.

123. 172·1 miles of covered drains were opened and cleaned against 173·6 miles in 1897.

Notices, &c.

124. 4,229 notices and some 2,401 summonses were issued against 5,077 notices and 2,489 summonses in 1897.

Fines.

125. The amount of fines recovered amounted to Rs. 1,925-8-0 against Rs. 2,546 in 1897.

Building plans.

126. 1,009 building plans were received and disposed of against 637 in 1897.

Kutchra incineration.

127. From the table following, which shows the work of the Garlick incinerator, it will be seen that 35,433 cart loads of kutchra were burnt in 303 days in 1898.

TABLE SHOWING THE NUMBER OF CART-LOADS OF KUTCHRA BURNT AT THE GARLICK INCINERATOR IN 1898.

Government Observatory, Colaba, Bombay.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1898.

TABLE showing for the year 1898 the Sums of the Velocities, and the Mean Velocities, in miles per hour, of the Winds which blew in each Month, from each of the Sixteen Principal Directions, and also the number of hourly Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several months, and of different Winds during the same Month.

2.—LICENSE DEPARTMENT.

1. I am glad to state that in spite of the disastrous plague epidemic and consequent depression in trade prevailing in the city these three years, I am able to show a revenue which will be, I submit, deemed very satisfactory.

2. I append a tabulated statement showing the amount of fees collected under each head of licensable trades for each of the months of the year under report.

3. The income from all these up to 31st March last, including Rs. 344 collected for 1897-98 during 1898-99, was Rs. 60,646-8, adding to which Rs. 717 collected for last year up to the date of this report, the total income from license fees amounts to Rs. 61,363-8, that is Rs. 1,363-8 in excess of the budget estimate. Had not the Government Remount stables on the Kennedy Sea Face and the hay stacks on Frere Road, Modi Bay East, been closed during the year (the latter by the order of the Commissioner) the revenue would have gone up by at least a thousand rupees more.

4. The outstanding balance for the last year is now hardly Rs. 100, and I expect to collect it within a few days.

5. All the members of my staff both indoor and outdoor have very cheerfully contributed to this happy result with their honest hard work in spite of the depressing effects of the plague, and I have every reason to be satisfied with the way in which they have all discharged their arduous and responsible but unpopular duties, not only in raising revenue alone, but also in controlling trades, offensive and dangerous to public health and property.

5. The number of prosecutions undertaken during the year against persons for carrying licensable trades without licenses or for violating the conditions and limitations thereof amounted to 1,904 against 2,115 instituted during 1897-98.

6. Five thousand five hundred and eighty-eight licenses for 1898-99 were issued up to the date of this report, against five thousand seven hundred and fifty issued during 1897-98.

3.—MARKETS.

I have the honour to submit the Administration Report of the Markets and Slaughter Houses, Establishment for the year 1898-99, as under :—

1. The total amount of stallages from the different Municipal markets, recoverable every quarter or half-year under the terms of section 407 (*a*) and (*c*) at the opening of the year, amounted to Rs. 47,205 against Rs. 47,512 at the closing of the year, showing an increase of Rs. 307, which is in a measure due to the opening of the new Fergusson Road Market at Parel from 1st November 1898. The following is the detailed statement :—

Names of Markets.	Rents per quarter as appearing at the opening of the year.	Rents per quarter as appearing at the closing of the year.	Increase.	Decrease.	Net increase.	Remarks.
	Rs.	Rs.	Rs.	Rs.	Rs.	
Colaba Market	305	305	...	...		
Fort do. ...	4,676	4,688	12	...		Half-yearly.
A. C. Fruit & Vegetable Market...	14,542	14,542	...	...		
Do. Fish and Mutton Market...	2,614	2,614	...	...		
Do. Mutton Market (new)...	947	947	...	...		
Do. Beef Market ...	2,528	2,624	96	...		
Godowns...	1,628	1,553	...	75		
Fowl rooms	825	852	27	...		
Erskine Road Fruit and Vegetable Market(old)	6,283	6,283	...	...		
Do. do. (new)...	2,503	2,492	...	11		
Do. Mutton Market.	2,530	2,530	...	...		
Bhuleshwar Market ...	3,395	3,232	...	163		
Pedder do. ...	464	464	...	...		
Foras Road do. ...	345	345	...	...		
Pork do. ...	100	100	...	...		Yearly.
DeLisle Road Sheep Market	3,570	3,570	...	...		Half-yearly.
Fergusson Road Market.	...	421	421	...		
Total ...	47,205	47,512	556	249	Net Increase Rs. 307-0-0.	

2. The total amount of Market fees (exclusive of departmental squatters' fees and those recovered from the contractors) collected during the year under report on the basis of the scale shewn above amounted to Rs. 1,44,779-2-8 against Rs. 1,37,898-0-0 in the previous year, shewing an increase of Rs. 6,881-2-8. There would have been on the whole a decrease of Rs. 2,375-0-0 under this head if an abatement of one month's rent amounting to Rs. 9,192 had not been allowed in the previous year, as during the year under report a large number of stalls were vacated (*vide* detailed statement in the margin) particularly in the Bhooleshwar and the Erskine Road Markets owing to most of the customers in the neighbourhood of the markets having left Bombay on account of the plague. The following is an explanatory statement which will shew in detail the difference in stall *rents* on account of the total or partial vacancy of stalls during the quarter as also the subsequent alterations in stall rents on account of rise or

Names of Markets.	Total number of stalls.	Average number of stalls entirely vacant in each quarter.	Remarks.
Colaba Market	79	31	
Fort Market	265	81	Rent collected half-yearly.
A. C. Fruit and Vegetable Market	563	48	
Do. Fish and Mutton Market ..	119	47	
Do. Mutton Market (new) ..	68	15	
Do. Beef Market	77	One stall was vacant in the 1st quarter and one in the last quarter

4. The squatters' fees, from Fish Markets, &c., scale fees, in the Crawford Markets compound, and the Fair ground rent and feeding fees at the Bandora Slaughter Houses, recovered from the contractors during the year under report amounted to Rs. 79,515-0-0 plus Rs. 10-0-0 recovered from the A. C. Fish Market contractor for one day's delay in the payment of his instalment for the month of July 1898, as per Clause 3 of the particulars and conditions of sale against Rs. 81,045-0-0 in the previous year, showing a deficit of Rs. 1,520-0-0 only. The right of collecting these fees is annually put up to auction, but the right of collecting scale fees for the year under report was sold departmentally to the contractors for the previous year with the approval of the Standing Committee, for the reasons advanced in this office report No. 2535 of 9th November 1898 to the Municipal Commissioner. Taking into consideration the state of business in the Markets which had been very slack throughout the year on account of the plague, I consider the total amount realized fair. In the following statement is contrasted in detail the amount recovered during the year under report with those in the previous four years :—

Particulars.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99.	Difference as compared with 1897-98.		Remarks

Fair ground rent and feeding fees at Bandora ...	57,000	59,100	65,500	54,200	51,000		3,200	
GRAND TOTAL ...	88,385	91,625	99,055	81,045	79,525			
Increase over preceding year's amount	2,510	3,240	7,430	...	...			
Decrease over preceding year's amount	...	...	...	18,010	1,520			

† This amount is from the opening of the market, that is from 1st November 1898 up to the close of the year.

5. The squatters' fees collected departmentally during the year under report amounted to Rs. 2,661-15-9 against Rs. 2,423-7-6 in the previous year, showing an increase of Rs. 238-8-3. In the following statement is contrasted the fees recovered during the year under report with those in the previous year:—

Names of Markets.	1898-99.	1897-98.	Difference.	
			Increase.	Decrease.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Fort Market...	10 15 0	55 12 0	.....	44 13 0
A. C. Fruit and Vegetable Market	233 6 6	227 12 6	5 10 0	.....
Erskine Road Fruit and Vegetable Market	1,278 4 3	1,169 13 9	108 6 6	.....
Bhooleshwar Market ...	995 6 6	921 2 3	74 4 3	.....
Foras Road Market ...	0 8 0	2 12 0	.....	2 4 0
Colaba Market	53 12 0	46 3 0	7 9 0	.....
Fergusson Road Market ...	89 11 6	.....	89 11 6	.....
Total	2,661 15 9	2,423 7 6	285 9 3	47 1 0

6. In the above statement the amount of Rs. 89-11-6 from the squatters in the Fergusson Road Market is for a period of five months only, that is from 1st November 1898, the date of the opening of the market up to the close of the year. These squatters were allowed to sell vegetable, &c., in the compound since all the stalls in the vegetable line were occupied, and if this had not been done, they would have persisted in vending their goods on the public road in the neighbourhood of the market which would have caused much discontent amongst the stall-holders and would probably have led to some of them throwing up their stalls. The other items of increases are due to a large number of squatters having been allowed to vend their goods under the eaves of the markets than in the preceding year.

7. The revenue from other sources, comprising the following heads, was Rs. 2,231-15-6 against Rs. 2,384-2-6 in the previous year, as detailed against each head in the following statement:—

Particulars.	1898-99.	1897-98.	Increase.	Decrease.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Verifying weights and measures	1,852 0 0	1,817 4 0	34 12 0	.....

Fee for producing office record	.....	10 0 0	.....	10 0 0
Fee for attending courts, inspection fees, &c. ...	1 0 0	.....	1 0 0	.....
Sale proceeds of cocoanut in the S. H. compound ...	1 14 0	.....	1 14 0	.....
Sale proceeds of wood of trees in the Crawford Markets' compound ...	18 8 0	.....	18 8 0	.....
Total ...	2,231 15 6	2,384 2 6	123 2 0	275 5 0

8. Since there is no appreciable difference in the revenue under the miscellaneous heads in the above statement, the detailed explanation is not necessary.

Slaughter Fees, Butchers' Lucense Fees, &c., &c.

9. The total collection under these heads amounted to Rs. 1,57,435-11-0 against Rs. 1,50,251-8-0 in the previous year,

showing an increase of Rs. 7,184-3-0, as contrasted in the following statement :—

Particulars.	1898-99.	1897-98.	Increase.	Decrease.
	Rs. a. p.	Rs. a. p.	Rs a p.	Rs. a. p.
Slaughter fees	1,35,143 11 0	1,28,679 8 0	6,464 3 0	.....

Do. Brigadier-General do.	200 0 0	200 0 0	.....	.....
Proceeds of blood from the Contractor Mr. K. D. Framji	180 0 0	165 0 0	15 0 0	.....
Total ...	3,380 0 0	3,365 0 0	15 0 0	.....
GRAND TOTAL ...	1,57,435 11 0	1,50,251 8 0	7,184 3 0	.....

10. In the above statement the collection from slaughter fees shews a large increase of Rs. 6,464-3-0. This is due to the fact that during the year under report there was a very heavy slaughter both in respect of sheep and goats and cattle (excepting buffaloes) comparing that with the previous year as will appear from the statement in the margin giving an average of 106 cows, bullocks and calves and 1,522 sheep and goats per day, against 80 cows, &c., and 1,483 sheep and goats per day in the previous year. In appendix **A** is shewn in detail the total number of animals slaughtered, removed for private slaughter within the meaning of section 403 (*e*) of the Act by private individuals, removed by the Fadkarees or sheep dealers for disposal at the DeLisle Road Sheep Market, &c., &c., each month during the year under report and the amount of fees levied thereon.

Description of animals.	1898-99.	1897-98.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Buffaloes ...	1,864	2,498	...	634
Cows, bullocks and calves ...	38,502	29,143	9,359	.....
Sheep and goats...	5,55,607	5,41,641	13,966	.....

11. The other item of increase is under the head of "License fees". This is due to a greater number of licenses, particularly of Beef

and Mutton Hawkers, Butchers in private markets and cattle dealers at Bandora, having been issued during the year under report than in the previous year as detailed in the following contrasted statement :—

Year.	Licence fees collected in Bombay.								Licence fees collected at Bandra.						Total.
	From Butchers in Municipal Markets.	From dealers in Municipal Markets other than Butchers under section 401.	From Butchers in private markets.	From Private Market owners.	From persons in minor places under section 41(b).	From Beef Hawkers.	From Mutton Hawkers.	From Dealers in Dead Sheep Skins Pinkskins.	From Cattle-pounds, Bandra.	From Butchers at Bandra.	From Slaughter-houses.	From Dairy farmers.	From Cattle-pounds, Mahim.	From Tabouring, Cart Driving, &c.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1909-10	174	1,603	9 90	4,801	760	1,325	150	45	684	3,677	74	5	1	432	13,927
1910-11	683	1,753	25	4,801	725	710	111	490	575	3,682	76	45	1	477	15,9

12. The increase in chawl rents is due to several of the rooms that were vacant in the previous year on account of the plague having been re-occupied during the year under report.

13. Thus the total collection under all the heads detailed in the several statements above, amounted to Rs. 3,86,633-12-11 against the previous year's collection of Rs. 3,74,002-2-0 and the estimated amount of Rs. 3,87,650 which is exclusive of the probable cost of feeding charges (about Rs. 25,000) paid out of the Fair ground rent and feeding fees recovered from the Bandora Contractor. The following is the general abstract showing the several heads to which the amount is credited :—

Particulars of Heads to which the amount is credited.	1898-99.			1897-98.

Miscellaneous	20	6	0	.....		
Total ...	3,86,633	12	11	3,74,002	2	0

14. It will be observed on reference to the above statement that the total increase under all the heads amounted to Rs. 12,631-10-11, and the cause for the same has been explained in the foregoing paras.

under the respective heads. The following table will show the revenue of each of the last ten years :—

	Rs.	a.	p.
1889-90	3,29,170	3	9
1890-91	3,48,106	5	7
1891-92	3,63,781	8	3
1892-93	3,77,527	4	6
1893-94	3,80,324	13	5
1894-95	3,92,261	13	0
1895-96	4,03,356	12	8
1896-97	3,95,440	13	6
1897-98	3,74,002	2	0
1898-99	3,86,633	12	11

15. During the year under report 1,951 buffaloes, 43,467 horned cattle and 641,650 sheep and goats were brought on the Bandora Fair ground for examination and disposal, out of which 83 buffaloes, 2,736 horned cattle and 36,404 sheep and goats were found unfit for slaughter on inspection, and were consequently rejected as shown in the following statement. The remainder were either slaughtered for the markets or were otherwise disposed of, the details of which are shown in Appendix **A** :—

Month.	Animals presented for examination.			Animals rejected.		
	Buffaloes.	Horned cattle.	Sheep and goats.	Buffaloes.	Horned cattle.	Sheep and goats.
1898.						
April	136	2,882	54,821	8	152	2,084
May	115	4,184	58,418	9	121	3,042
June	142	3,660	48,750	11	210	3,736
July	148	3,608	51,735	12	176	3,045
August	196	3,261	57,948	5	274	2,359
September	186	3,269	45,019	6	136	2,213
October	165	4,019	55,755	7	159	2,981
November	139	3,352	52,603	7	363	2,063
December	180	3,765	60,243	5	254	4,072
1899.						
January	200	4,268	56,534	2	372	4,122
February	181	3,616	50,238	6	262	3,245
March...	163	3,583	49,586	5	257	3,442
Total for 1898-99 ...	1,951	43,467	641,650	83	2,736	36,404
Total for 1897-98 ...	2,764	35,600	6,27,312	263	3,711	49,675

16. The above statement will show that the animals both horned cattle and sheep and goats brought on the Bandora Fair ground during the year under report, were on the whole healthy and in good condition, comparing them with the previous year as can be verified by the facts in the same statement that only 6·2 per cent. of horned cattle and 5·6 per cent. of sheep and goats out of the total number of animals brought on the Fair ground were found unfit for slaughter on inspection.

Refunds.

17. The total amount of refunds for which certificates were granted on account of slaughter fees in respect of the animals which were removed from the slaughter-houses compound for shipping requirements was Rs. 1,298-8-0, the details of which are as under :—

Number of cows, bullocks or calves removed.	Amount of refund.	Number of sheep and goats removed.	Amount of refund.	Total amount of refund.
	Rs. a. p.		Rs. a. p.	Rs. a. p.
.....	.....	2,597	1,298 8 0	1,298 8 0

18. The quantity of unwholesome food destroyed during the year under report as unfit for human consumption, under the provisions of sections 415 and 416 of the Act, was 111,740 lbs. against 120,991 lbs. in the previous year, as detailed below :—

Description of articles.	Quantity in lbs. destroyed in 1898-99.	Quantity in lbs. destroyed in 1897-98.	Remarks.
Mutton	55,639	60,758	Destroyed at Bandora.
Beef	1,125	7,458	
Mutton	1,038	2,338	
Beef	26,830	25,130	
Fish	18,423	14,376	
Fruit	11,628	4,163	
Vegetables	376	741	Destroyed in Bombay.
Corn	...	36	
Sweetmeat	...	84	
Coorla beef	2,681	5,817	
Pork	...	100	
Total ...	111,740	120,901	

19. In Appendix **B** is shown in detail the convictions obtained for bringing meat from Coorla in contravention of section 412 and for the infringement of the other sections of the Act and the By-laws during the year under report. There were in all 67 cases, of which 54 cases were tried in the different Magistrates' Courts, and the total amount

of fines inflicted was Rs. 371-0-0. The other 13 cases were withdrawn as the summonses could not be served or the warrant executed on the parties on account of their absence from Bombay.

General Remarks.

20. During the year under report the fruit and vegetable supply was plentiful and cheap. The beef and mutton supply was also fairly good. The following figures will show the quantity and varieties of fruit imported into the Bombay markets during the year under report compared with those in the previous year :—

Articles.	Number of baskets in 1898-99.	Number of baskets in 1897-98.
Pomegranates ...	15,118	8,663
Moosoombi ...	9,834	11,973
Apples ...	2,202	5,183
Mangoes ...	909	5,862
Oranges ...	11,749	9,602
Grapes ...	2,094	2,355

21. The Fergusson Road Market at Parel was completed and occupied from 1st November 1898. When this market was constructed it was understood that it would be enlarged in future if it should prove a success financially. There are in all fourteen vegetables and fourteen mutton stalls besides the fish area inside the market accommodating fourteen squatters and about twenty squatters outside under the eaves of the market. The total income from the date of its opening up to the close of the year is Rs. 1,087-6-2 as under :—

	Rs.	a.	p.
Stall rents	592	10	8
Squatters' fees from contractor for fish area ...	405	0	0
Squatters' fees (Departmental)	89	11	6
Total ...	1,087	6	2

The average monthly expenditure is about Rs. 94 as under :—

	Rs.	a.	p.
One Sub-Inspector at Rs. 30 per month, plus Rs. 5 conveyance allowance	35	0	0
Two Peons at Rs. 10 each	20	0	0
Two Labourers at Rs. 11 each	22	0	0
Lighting	7	0	0
Contingencies	10	0	0
Total ...	94	0	0
			5
Total for five months ...	470	0	0

22. The above figures will show that from a financial point of view this market is a success, the gain in five months being Rs. 620-0-0 in round sum. There is a demand for vegetable stalls, and since all the stalls are occupied, some squatters are allowed to vend vegetable in the compound of the market on payment of one anna per basket. I am of opinion that this market if enlarged will pay handsomely in the future.

23. During the year under report both the clerical as well as the executive staff under my control have worked well. In this respect I would specially mention Mr. Saunders, the Assistant Superintendent at the Bandora Abattoires and Mr. Sullivan, the Meat Inspector at the A. C. Markets, and also Mr. Burjorji Rustomji, the Head Clerk and Accountant in the Markets Office, who have, as usual, rendered excellent service during the year under report.

Appendix A.

STATEMENT showing the number of animals slaughtered, removed for private slaughter, &c., during the year 1898-99.

5.—REPORT ON THE WORKING OF THE MUNICIPAL HOSPITAL FOR INFECTIOUS DISEASES AT ARTHUR ROAD FOR THE YEAR 1898.

I.—The report for 1897, covered a period of eighteen months, from 1st January 1897 to 30th June 1898—and brought up the history of plague work to the end of the Second Plague epidemic of 1897-98. It is proposed in this report to bring together the data, statistics, etc., of the recrudescence of plague during the monsoon of 1898, and of the epidemic of 1898-99 up to the end of May 1897.

II.—*Grounds and Buildings.*

The full accommodation of the hospital was kept up during the year. In order to provide accommodation for contacts, evicts and attendants and relatives of patients, two of the newly put up temporary wards to the north of the hospital, were converted into a camp with sufficient room for about 200 persons. These were re-converted into wards early during the present year, and a separate contact camp was put up alongside.

Considerable alterations and additions were made to the permanent and temporary structures. Indian Patent stone flooring was laid down in the two remaining permanent wards, and covered passages were constructed between the W. Cs. and the same. Corrugated-iron sheds were put up for a bathing place, for a bhatie for the dhobies, and the cook room was similarly enlarged. All the permanent and temporary structures were repaired, painted or lime-washed as required.

A new W. C. on the English system was constructed for the use of the resident staff. A new *pucca* built mortuary, 24′ × 20′ was also erected.

III.—*Conservancy and Water-supply.*

The same system as described in the report for 1897, continued.

IV.—*Medical Staff, Establishment and Nursing.*

(*a*) No changes were made in the Medical Officers throughout the year. Dr. D. S. Fraser continued as Assistant Medical Officer and was placed in charge during the absence on leave of the Medical Officer.

(*b*) *Hospital Assistants.*—The number of hospital assistants remained at three, an extra Assistant was temporarily attached during the early part of the year and his services were subsequently dispensed with on the decline of the epidemic.

(*c*) *Nursing.*—The changes in the nursing staff have been so constant, and so varied, that scarcely any nurses have worked continuously for a sufficient length of time. The plague nursing was entirely under the English Nurses, and amongst those attached from time to time, may be mentioned Misses Green (Lady Superintendent), Harris, Boyd, Coleman, Reynolds, Tanner, Harvey, Dowson, Hitchman, Murphy, Greening, Wood, Gardner, Blaney, Richardson, Reilly, Holmes, Fry, &c., &c.

The nursing of relapsing fever, and observation cases continued, as hitherto under the local nurses, Mrs. Baker, Mrs. Manning, Mrs. Crichton and Misses Beale, Phillips, and Eagan were attached to these wards.

(*d*) The number of ward servants, etc., as given in the last report as existing in the early part of 1898, was considerably reduced after the decline of the epidemic of 1897-98.

It had however again to be increased with increasing requirements, but not to the same extent as in 1898.

Establishment in March 1899 :—

1 Chief Medical Officer.
1 Assistant Medical Officer.
4 Hospital Assistants.
10 English Nurses.
6 Local Nurses.
2 Under Nurses.
1 Clerk.
1 Compounder.
1 Telephone Clerk.
46 Ward-boys.
10 Ayahs.
4 Cooks.
3 Dhobies.
1 Mali.
1 Bhisti.
1 Dispensary servant.
8 Ambulance men.
4 Lime-Washers.
4 Police ramosees.
16 Sweepers (Male).
10 Sweepers (Female).

The above establishment has been considerably reduced since the decline of the epidemic.

V.—*Medical History of the year* 1898-99.

The plague epidemic of 1897-98 ended practically in the beginning of June 1898, and the state of public health looked somewhat hopeful towards the beginning of the monsoon. Unfortunately, however, matters did not thus continue long, and about the middle of July, signs were not wanting to point towards another epidemic or at least a severe recrudescence of the disease. And eventually a recrudescence did develope, and the months of August, September and October again showed heavier plague, as well as total mortality, and the admissions into the hospitals were also proportionately so. Towards the end of October, the recrudescence abated, and during November the admissions again fell, with a corresponding improvement in the plague and total mortality. But in the month following it became early evident, that the third epidemic had already commenced. The total and plague mortality again increased, and the epidemic ran throughout its full course, reaching its acme during the four weeks of March when the total weekly mortality recorded the highest figures than in any of the previous epidemics. It commenced to decline gradually with marked and irregular oscillations, and terminated practically at the end of June 1899. And at the time of writing this report (August) it appears as if a recrudescence similar to that of 1898, were just beginning.

This, the third plague epidemic, was known no less for its extreme virulence, than for the severity of the individual cases, and during March, it far surpassed in malignancy, the worst period of the second epidemic. Scarcely ten per cent. of patients were free from serious lung complications—a factor, which was non-existent in the previous epidemics and which contributed not a little to the higher mortality rate.

Relapsing fever has continued to exist in an epidemic form all throughout the period, and though the admissions fell off to some extent in November and December 1898, and January 1899, they again increased with the increase of plague, and have decreased with its decline. Through some cause or other the fever persists in the city, and the admissions which had considerably fallen off in July, are again heavy.

The following table shows the particulars of the patients admitted during 1898 and up to the end of May 1899.

The total admissions during the former period were 4,319, and during the latter 1,769.

TABLE SHOWING the number of admissions from all diseases during 1898, and the first five months of 1899 :—

Months.		Plague.	Relapsing Fever.	Cholera.	Small-pox.	Chicken-pox.	Measles.	Whooping Cough.	Observation Cases and other Diseases.	Total.

VI.—*Plague.*

The total number of admissions from plague during 1898 was 2,187 ; of these, 1,602 died and 585 recovered, giving a mortality rate for the year of 73·25 per cent., a rate that is higher by nearly seven per cent. than in 1896 and 1897.

There were 1,108 admissions up to the end of May 1899, and of these, 878 died and 230 recovered, the mortality rate being 79·24 per cent. and which again is more than seven per cent. higher than during the corresponding period of 1898. A fact, which clearly denotes the increasing virulence of each succeeding epidemic.

The total of all the admissions from plague since 1896, appear to be 4,862 patients with an actual mortality rate of 73·75 per cent. after eliminating convalescent patients transferred from other hospitals.

The following table shows the particulars of admissions, deaths, recoveries, &c., in detail :—

Months.	Number.	Died within 24 hours.	Died within 48 hours.	Total deaths.	Recovered.	Percentage of mortality.

GRAND TOTAL ...	4,862	1,446	894	3,541	1,321	72·83‡

* Convalescent patients from other hospitals were transferred during these months; if these be excluded, the actual mortality for these months would be 40·00 and 22·22 per cent. respectively.

† The mortality for April, May and June 1898, would be 58·41, 54·88 and 57·14 per cent. respectively, if the convalescent admissions be excluded.

‡ If the convalescents be eliminated, the actual mortality rate of all the acute cases would be 73·75 per cent.

On comparing the epidemic and inter-epidemic months from 1896 to 1899, there appears to be a steadily increasing mortality rate, year after year, during the corresponding months except in one or two instances, thus further corroborating the increasing virulence of the disease year after year.

The following table gives a comparative statement of the months, arranged according to the epidemic, and inter-epidemic periods :—

Epidemic period—	1896.	1897.	1898.	1899.
November	66·67	50·00	81·81	...
December	74·12	68·68	75·34	...
January	.....	68·95	72·38	83·77
February	.....	81·64	77·37	79·32
March	.....	67·35	75·11	79·48
April	.....	56·66	58·41	78·04
May	.....	40·00	54·83	65·38
Inter-epidemic period—				
June	.....	22·22	57·14	82·35
July	.....	53·84	78·57	...
August	.....	63·63	76·71	...
September	.....	66·66	82·41	...
October	52·23	51·61	84·12	...

The following tables show the number of admissions, deaths, recoveries, and mortality rates amongst the various races and also by sexes in each race. Hindoos stand high with a mortality rate of 74·38 per cent., the mortality rates amongst Mussalmans and Native Christians is about equal and ten per cent. lower :—

Castes.	Number.	Died.	Recovered.	Percentage of Mortality.
Hindoos...	4,135	3,076	1,059	74·38
Mussalmans	308	200	108	64·93
Native Christians	378	244	134	64·55
Parsees	20	7	13	35·00
Beni-Israel	21	14	7	66·66
Total ...	4,862	3,541	1,321	72·83

Hindoos.

Sex.	Number.	Died.	Recovered.	Percentage of Mortality.
Males	2,940	2,225	715	75·68
Females...	854	616	238	72·13
Children	341	235	106	68·91
Total ...	4,135	3,076	1,059	74·38

Mussalmans.

Sex.	No.	Died.	Recovered.	Percentage of Mortality.
Males	259	164	95	63·32
Females	38	29	9	76·31
Children	11	7	4	63·63
Total ...	308	200	108	64·93

Native Christians.

Sex.	Number.	Died.	Recovered.	Percentage of Mortality.
Males	269	172	97	63·94
Females	84	57	27	67·85
Children	25	15	10	60·00
Total ...	378	244	134	64·55

Parsees.

Sex.	Number.	Died.	Recovered.	Percentage of Mortality.
Males	15	5	10	33·33
Females	4	2	2	50·00
Children	1	...	1	.....
Total ...	20	7	13	35·00

Beni-Israels.

Sex.	Number.	Died.	Recovered.	Percentage of Mortality.
Males	10	7	3	70·00
Females	4	3	1	75·00
Children	7	4	3	57·14
Total ...	21	14	7	66·66

Comparing the mortality by sexes, it appears that in males it is highest, and in children lowest, the mean difference being about 6 per cent. :—

Sex.	Number.	Died.	Recovered.	Percentage of Mortality.
Males	3,493	2,573	920	73·66
Females	984	707	277	71·95
Children	385	261	124	67·79
Total ...	4,862	3,541	1,321	72·83

VII.—*Relapsing Fever.*

The total number of relapsing fever patients treated during 1898 was 1,581, with 329 deaths, and 1,252 recoveries, giving a mortality rate of 20·80 per cent. From January to May 1899, there were 480 admissions, with 117 deaths, and 363 recoveries, equal to a mortality rate of 24·57 per cent.

The following table shows the admissions, deaths, recoveries and percentage of mortality from relapsing fever since April 1897. It appears that this fever has also become more virulent, and the mortality which averaged only 18·08 per cent. in 1897, rose to 20·80 in 1898, and to 24·37 during the first five months of 1899 :—

Months.	No.	Died.	Recoveries.	Percentage of Mortality.
April 1897	7	...	7	00·0
May "	12	1	11	8·33
June "	23	1	22	4·64
July "	15	1	14	6·66
August "	24	...	24	00·00
September "	54	6	48	11·11
October "	57	7	50	12·28
November "	82	10	72	12·19
December "	190	44	146	23·15
Total ...	464	70	394	15·08
January 1898	188	31	157	16·48
February "	218	36	182	16·51
March "	101	37	64	36·63
April "	17	5	12	29·41
May "	101	26	75	25·74

October "	191	37	154	19·37
November "	90	30	60	33·33
December "	99	21	78	21·21
Total ...	1,581	329	1,252	20·80
January 1899	91	18	73	19·78
February "	113	16	96	14·28
March "	135	40	95	29·62
April "	81	21	60	25·92
May "	61	22	39	36·06
Total ...	480	117	363	24·37
GRAND TOTAL ...	2,525	516	2,009	20·43

The following statement shows the various castes and mortality in each from relapsing fever :—

Castes.	No.	Died.	Recovered.	Percentage of Mortality.
Hindus	2,435	497	1,938	20·41
Mussalmans	55	10	45	18·18
Native Christians	34	9	25	26·47
Israel	1	...	1	00·00
Total ...	2,525	516	2,009	20·43

Relapsing fever prevails to a very limited extent amongst the other races in the city and its incidence is confined mainly to the Hindus of the labouring and lower classes. They number 2,435 cases in a gross total of 2,525.

Arranged according to sexes, the following table shows the incidence and mortality in each sex, amongst the Hindus :—

Sex.	No.	Died.	Recovered.	Percentage of Mortality.
Males	1,834	399	1,435	21·75
Females	437	89	348	23·66
Children...	164	9	155	5·48
Total ...	2,435	497	1,938	20·41

There is a difference of about 2 per cent. in the mortality between males and females, but the rate in children is remarkably low, being only 5·48 per cent.

VIII.—*Cholera.*

Cholera has been practically non-existent. Only 6 sporadic cases were admitted during the period ; of these 2 died and 4 recovered.

IX.—*Small-pox.*

Only 28 cases of small-pox were admitted during 1898 and of these 9 died and 19 recovered.

From January to May 1899, 64 cases have been admitted, and of these 4 died and 60 recovered.

X.—*Chicken-pox.*

Chicken-pox admissions numbered 56 during 1898; all recovered. There were only 6 admissions up to the end of May 1899, and no deaths.

XI.—*Measles.*

13 cases of measles were admitted in 1898, 12 recovered and 1 died, 39 were admitted up to the end of May 1899, and of these 3 died and 30 recovered.

XII.—*Whooping Cough.*

There were only 2 admissions and both recovered.

XIII.—*Observation Cases.*

446 patients were kept under observation during 1898, and 72 up to the end of May 1899. Most of them were discharged after varying periods of detention, a few died from exhaustion consequent on chronic diarrhœa or dysentery, etc., and some were transferred to the General Hospitals. These cases comprised remittent and intermittent fevers, acute rheumatism, hepatitis, hepatic abscess, diarrhœa, dysentery, venereal diseases, pneumonia, bronchitis, pleurisy, hemiplegia, paralysis agitans, paraplegia, chorea, valvular diseases of the heart, Brights disease, guineaworm, skin diseases, scurvy, scorfula, etc., etc.

XIV.—*Statistics for the Year* 1898.

The following statement shows the number of patients treated during the year 1898, as compared with 1897. The total treated during the year 1898 was 4,319, as compared with 2,945 in 1897 :—

	1897.	1898.
Plague	1,270	2,187
Relapsing fever ...	464	1,581
Cholera	251	6
Small-pox	53	28
Chicken-pox ...	16	56
Measles	17	13
Mumps	2	0
Whooping cough ...	4	2
Observation Cases and other diseases ...	868	446
Total ...	2,945	4,319

XV.—*Conduct of the Establishment.*

Dr. D. S. Fraser has proved a most capable, efficient and invaluable assistant, and has worked with rare zeal and ability in the discharge of his duties.

Hospital Assistants Samuel Samson, Pandarinath Bhawanrao, and Liladhar Jugjiwandas have been most unsparing in their labours and have worked hard and incessantly throughout these trying times. The services of the latter two have been lent by Government, and I would most strongly urge their claims for some recognition for their arduous and anxious labours. And especially so, in the case of Mr. Pandarinath who has been attached to this hospital since October 1896 and who, in addition to hard work, had the misfortune to fall a victim to plague, from which he fortunately recovered. If any Hospital Assistant deserves special commendation for plague work, it is Mr. Pandarinath and I have once again much pleasure in bringing his claims to the notice of the Municipal Commissioner, for such representation to Government as he may be pleased to make.

N. H. CHOKSY, KHAN BAHADUR,
Medical Officer in charge,
Arthur Road Hospital.

BOMBAY, 12*th August* 1899.

EDUCATIONAL.

REPORT OF THE JOINT SCHOOLS COMMITTEE, forwarded by the Committee's Secretary under his No. 248 of 9th June 1899.

THE JOINT SCHOOLS COMMITTEE'S OFFICE,
MUNICIPAL OFFICE, FORT,
BOMBAY, *23rd May* 1899.

REPORT ON THE ADMINISTRATION OF THE JOINT SCHOOLS COMMITTEE FOR THE YEAR 1898-99.

Personnel of the Committee.

At the commencement of the year the Joint Schools Committee consisted of the following members:—

Appointed by Government.	*Appointed by the Corporation.*
NOWROSJEE N. WADIA, Esq., C.I.E.	PROFESSOR O. V. MULLER, M.A.
GRATTAN GEARY, Esq.	NANU N. KOTHARE, Esq.
CHIMANLAL H. SETALWAD, Esq. B.A., LL.B.	IBRAHIM RAHIMTOOLA, Esq.
PRINCIPAL J. T. HATHORNTHWAITE, M.A.	KAIKHOSRO N. KABRAJEE, Esq.

The two senior members who retired, under section 39 (3) of the Bombay Municipal Act, were Mr. Nowrosjee N. Wadia and Professor O. V. Muller. The Government appointed Khan Bahadoor Darasha R. Chichgur in place of Mr. Wadia, while Professor Muller, a representative of the Corporation, was re-appointed by that Body. The Committee placed on record their sense of the warm and active interest, taken by the retiring member, Mr. Wadia, as Chairman of the Committee for over three years, and as a member since its foundation ten years ago.

Principal Hathornthwaite was re-elected Chairman of the Committee for the year.

Finance.

The opening workable balance to the credit of the School Fund on 1st April 1898, was Rs 53,122-3. The total receipts for the year were Rs. 1,35,774-13-3 as against Rs. 1,27,165-9-0, for the year 1897-98, the rise being due to increased municipal contribution. The total expenditure was Rs. 1,26,358-13-9, as against Rs. 1,22,542-13-1 for the previous year. The closing balance on 31st March 1899, to the credit of the School Fund was Rs. 62,538-2-6.

The actual expenditure was considerably below the estimate, owing mainly to the general disorganization caused by plague. A large number of teachers went away on leave on half pay, or without pay, as the case might be, and on account of paucity of attendance in most of the schools, there was no need to appoint substitutes in their place. Besides the considerable saving effected on this account, the new schools, which were provided for in the Budget, could not be opened from the commencement of the year, nor was it considered necessary, in the prevailing circumstances of the city, to incur at once the whole of the expenditure included for them in the Budget. Plague having also seriously affected the attendance and progress of the Aided Schools, the grants earned by them were much below what they might have obtained in ordinary times.

The average cost per pupil was Rs. 29·5, as against Rs. 33 in 1897-98 and was distributed as under :—

Teaching	...	...	...	...	...	...	Rs.	19
Rent	...	...	..	...	...	...	„	8·1
Miscellaneous	...	...	...	...	...	...	„	2·4
						Total ...	Rs.	29·5

The Plague and its Effects.

The Municipal Schools again suffered grievously, both in progress and attendance, on account of another visitation of plague this year. When it assumed epidemic proportions in the cold weather the number in almost all the Marathi and Gujerati Schools declined very considerably, and a few of them had not a single pupil for days. From time to time the schools in deeply infected localities had to be temporarily closed as a measure of precaution. The attendance in these schools was gradually so far reduced that after the Annual Examination was completed, they were closed for the summer vacation three weeks before the usual date. Considering the circumstances, the examination results were very fairly satisfactory.

The Committee are glad to observe that, as in the two previous years, the Urdoo schools were able to maintain very satisfactory attendance throughout the year in spite of the plague. None of these schools had to be closed even for a time, and the teachers were not anxious like many of their colleagues in the Gujerati and Marathi schools, to go away on leave. The progress made by the Urdoo schools, in the face of adverse circumstances, is very re-assuring.

It is to be regretted that, speaking generally, the progress of primary education in Bombay has suffered a check in consequence of successive visitations of plague. Until the disease first made its appearance in October 1896, the number of schools and scholars was steadily increasing, and elementary education was spreading among the masses at a satisfactory rate of progress, which has been temporarily arrested.

There is, however, every reason to believe that when the public health regains its normal state, there will be simultaneously a revival of the conditions favourable to the growth of education.

New Schools.

Having regard to the urgent wants of certain localities, the Committee opened a few new schools during the year. One Urdoo school was opened at Byculla and another at Dharavi, both being now well attended. The Mahomedans of Dharavi expressed their gratification by passing a resolution at a public meeting, cordially thanking the Committee for opening a school there for their children. A Marathi school was also opened at Dharavi for the children of low caste Hindus, and the Committee are glad to observe that of all the Marathi schools, the attendance in this school was the highest at the end of the year. There are now three schools maintained by the Committee for the depressed classes, the experiment of providing them with the means of instruction being attended with considerable success. At the Mazagon Urdoo school for boys, a separate class for girls was opened under a female teacher, similar provision having been made at the Khara Talao Urdoo school last year. These classes are well attended and popular, and it is hoped that they will gradually develope into independent girls' schools. In compliance with the request of some of the residents of Parel, a Gujerati class has been attached to the Marathi school in the locality.

Night Schools.

Owing to the general exodus of the working classes every year when the plague is at its height, the six night schools under the Committee were reduced to a very unsatisfactory condition. In some of them the attendance was absolutely *nil*, while in others it was but nominal. The Committee have, therefore, closed them for the present but will re-open them, as soon as a favourable opportunity may arise.

Rules regarding Teachers' salary.

The Committee, after very careful consideration, have framed a set of rules regulating the pay and promotion of teachers, which having received the approval and sanction of the Corporation were reported to the Director of Public Instruction, as required by the Committee's By-laws. The scale of pay has been fixed in view of the cost of living in Bombay, the maxima attainable by the teachers at various stages of their service being higher than the amount fixed under the Government scale hitherto in force.

The Committee have for some years been acting on the principle of never appointing untrained teachers to permanent posts. But they have in their schools a number of such teachers who were permanently employed by Government before the transfer of the schools to the Municipality. They have grown grey in the service and will die out in the course of a few years. Although many of them combine with age, mature teaching experience, and have for long been doing good work as teachers, yet because untrained, they are debarred under the By-laws from obtaining more than Rs. 10 per mensem. To remedy this evil, the Committee have framed rules for granting to this class of teachers a personal allowance rising gradually to five rupees per mensem, in addition to their regular pay, and these rules have been approved by the Corporation and the Director of Public Instruction.

Trained Teachers.

It is satisfactory to note that the long-felt want of trained female teachers for Gujerati Girls' Schools is being gradually supplied. Last year, the Committee took into their service four female teachers who had just passed out of the Ahmedabad Training College, and during the year under report arrangements were made for the employment of three more.

The Committee allow stipends for the maintenance of those who go to the Training College for study; but it is to be regretted that young teachers do not avail themselves of the advantages offered to the extent desired by the Committee.

Public Competitive Examinations.

The Charni Road Girls' School, which is reported to be in a high state of efficiency, again distinguished itself this year by winning two of the Scholarships awarded by the Ladies' Branch of the National Indian Association. The two Government Middle School Scholarships were also carried off by Municipal Schools, namely the Vithalwady and the Girgaum Marathi Schools. The Vithalwady School, where instruction is given up to the highest vernacular standard, also passed two out of three pupils presented for the Third Grade Public Service Certificate.

Among the Aided Schools for girls which submitted pupils at the Mary Carpenter Scholarship Examination, those belonging to the Students' Literary and Scientific Society carried off as many as seven out of eleven Scholarships—a result which speaks highly for the quality of the instruction imparted in these Schools. A Scholarship was also won by a pupil of the Merwanjee Setna Girls' School.

Aided and Indigenous Schools.

The Aided and Indigenous Schools suffered much on account of the epidemic, but considering the circumstances, the examination results were fairly good. The number of these schools at the commencement of the year was 85. Five new schools were added to the list during the year, while four schools having ceased to exist were struck off the register, so that the total number at present receiving grant-in-aid from the Committee is 86. The grants earned by most of the schools were below the average, owing to reduced attendance. But there was a notable exception in the case of the American Mission School, which earned thrice the amount obtained by it in the previous year, as it had imported a large number of destitute children from the famine-stricken districts, who are reported to be well looked after.

School Buildings and Accommodation.

The various difficulties attending the provision of good and satisfactory accommodation in buildings adapted to School requirements have been detailed in previous reports. It is, however, satisfactory to record that the persistent efforts of the Joint Schools Committee have resulted in a marked and steady improvement in school accommodation. The undermentioned schools were removed during the year:—

1.	Rangari Street Boys' School	(Gujerati)
2.	Rangari Street Girls' School	(Do.)
3.	Byculla School	(Do.)
4.	Byculla Boys' School	(Marathi)
5.	Valkeshwar School	(Do.)
6.	Amerchandwadi Boys' School	(Do.)
7.	Amerchandwadi Girls' School	(Do.)

The change was for the better as regards all these schools, except the Amerchandwadi schools for boys and girls. They occupied a portion of the building belonging to the Lohana Mahajan, which afforded the best available accommodation in the locality; but had to be removed to inferior quarters owing to the Lohana Plague Hospital being opened in the same building.

The Khara Talao Urdoo School for boys was provided with an additional room, required for the separate class formed there under a female teacher for the girls attending it.

The Committee have thankfully received a donation of Rs. 25,000 from the Honorary Secretaries of the Sorabjee Shapurjee Bengalee Memorial Fund for the purpose of providing a building for the Charni Road Girls' school in which the late Mr. Bengalee took a very deep interest. Another building in prospect is the Lord Harris School, which, it is hoped, will be commenced at an early date.

Physical Exercise.

Most of the schools are located in hired buildings where it is not possible to provide the children with a play-ground for drill and other exercises. The Dongri School building, which has been specially constructed by a private landlord in accordance with plans approved by the Joint Schools Committee, is provided with an open space in front which serves as a play-ground. The Head Master is interesting himself in the children's sports and exercises, and the older boys are playing cricket under his supervision.

The Death Roll.

The Committee regret to record that ten teachers died during the year, six of the deaths being due to plague. The number includes two head Masters, Mr. Harilal Bapujee, of the Girgaum School, and Mr. Narayen V. Juvekar of the Shivdi School, both of whom were old and experienced teachers, Mr. Harilal having nearly completed the term of his service for pension. It was fortunate that many teachers had gone to reside in huts and in uninfected parts of the suburbs while the plague was at its height; otherwise the death rate would probably have been higher.

Retirement of Teachers.

Two teachers were permitted to retire during the year,—Mr. Dhondo M. Wakankar, Head Master, Nagpada School, and Mr. Kashinath R. Londhe, 1st Assistant, Girgaum School. Mr. Wakankar retired on a medical certificate of physical unfitness, and Mr. Londhe on having completed his full period of service.

Dismissal of a Teacher.

Jacore Haribhai, Head Mistress, Musjid Bunder Girls' School, was, after a careful enquiry into certain serious allegations made against her, judged unfit to be in charge of a girls' school, and with the sanction of the Director of Public Instruction, was dismissed from the service of the Joint Schools Committee.

Donations.

Mr. Narayen V. Mandlik, executor of the Rehatsek Estate, repeated this year his donation amounting to Rs. 800, for the purpose of giving money prizes to children attending the Committee's Schools. The

Committee accepted the gift with thanks, and distributed the amount accordingly. The thanks of the Committee are also due to the Gentlemen who have given small donations for the award of prizes in selected schools; and it is to be hoped that their example will be more generally followed.

School Statistics.

The usual school statistics are given below :—

(*a*)—Classification of schools.

Class of Schools.	1897-98.				1898-99.			
	Marathi.	Gujerati.	Urdoo.	Total.	Marathi.	Gujerati.	Urdoo	Total.
Middle Schools ...	3	2	...	5	3	2	...	5
Primary for Boys...	29	12	12	53	30	13	14	57
Primary for Girls...	9	7	1	17	9	7	1	17
Night Schools	1	5	...	6	...	...	...	...
Total...	42	26	13	81	42	22	15	79

Four new day schools were opened during the year, while six night schools were closed for want of attendance. There is, therefore, a net decrease of 2 in the total number of Municipal Schools. It is intended to re-open the night schools as soon as the health of the city resumes its normal condition.

(*b*)—Number of schools and scholars.

Class of Schools.	Number of Schools in 1897-98.	Number of Schools in 1898-99.	Pupils in 1897-98.	Pupils in 1898-99.
Municipal	81	79	3,075	3,618
Aided	85	86	5,912	5,860
Total ...	166	165	8,987	9,478

There is an increase of 543 in the total number of pupils attending the Municipal Schools over that of the previous year. Taking the circumstances of the city into consideration, the increase is satisfactory enough, although the total is only about half the average of the normal years preceding the advent of the plague.

The Aided Schools, on the other hand, have receded from a total attendance of 5,912 in 1897-98, to 5·860 in the year under report.

The decrease however is slight, and there is little doubt that these schools will speedily recover their position when the disorganization attending the plague epidemics shall have ceased.

A large number of small private schools have been swept away by the plague. A searching enquiry was made four years ago by the Committee as to the number and character of these schools, and it was found that there were in all 280 schools, attended by 18,187 scholars.

(*c*)—Classification according to sex.

Schools.	1897-98.			1898-99.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.
Municipal	2,428	647	3,075	2,781	837	3,618
Aided	3,346	2,566	5,912	3,260	2,600	5,860
Total ..	5,774	3,213	8,987	6,041	3,437	9,478

(*d*)—Classification according to race.

Races.	1897-98.—Schools.			1898-99.—Schools.		
	Municipal.	Aided.	Total.	Municipal.	Aided.	Total.
European & Eurasians ..	.....	.....	.....	.....	.....	.....
Hindus	1,720	3,004	4,724	1,969	2,860	4,829
Mahomedans	1,078	262	1,340	1,349	346	1,695
Parsis	203	1,732	1,935	211	1,782	1,993
Portuguese and Native Christians	31	418	449	26	424	450
Jews	15	493	508	44	444	488
Aborigines	27	3	30	18	.....	18
Others	1	.....	1	1	4	5
Total ...	3,075	5,912	8,987	3,618	5,860	9,478

It will be noticed from the above table that the attendance of Mahomedans shows the highest proportion of increase. Taking the Municipal and the Aided Schools together, there has been a rise of 355 Mussalman pupils, of whom so many as 271 have joined Municipal Schools. The number of aborigines has declined from 30 to 18. They belong chiefly to the fishermen caste and nearly all of them attend the Municipal School at Worlee Koliwada. The devastation of the quarter occupied by the fisherfolk by fire and plague accounts for the decrease of attendance in the School specially intended for their children.

N. B. MASANI,
Secretary, Joint Schools Committee.

NANABHAI B. MASANI,
Secretary, Joint Schools Committee.

ANNUAL REPORT

OF THE

MUNICIPAL AUDITORS,

1898-99.

To

M. N. WADIA, Esq.,

Municipal Secretary,

Bombay.

We have the honor to forward herewith our reports on the Municipal Accounts and the Joint Schools Committee Accounts for 1898-99 in view to their being printed and placed before the Corporation.

We are,

Sir,

Your obedient Servants,

NANABHAI RASTAMJI RANINA,

A. THOMSON,

Municipal Auditors.

BOMBAY, 23*rd August* 1899.

REPORT OF THE AUDITORS OF MUNICIPAL ACCOUNTS FOR THE YEAR 1898-99.

No. 11732. For the audit of the accounts of the year under review, we were appointed Auditors by the Corporation at their ordinary monthly meeting held on the 3rd March 1898, by their Resolution quoted at margin.

2. As usual all the vouchers and papers relating to both the receipts and disbursements of 1898-99 have been compared by us with the day books and subsidiary ledgers; the general ledger postings have also been checked with the entries in the day books and those in the journal with the subsidiary and general ledgers.

3. The Bank receipts of investments of the different loans, also of Municipal Buildings Fire Insurance, School Building, Worn-out Mains Renewal, and Premia, &c., Funds, as well as Securities from contractors in Government, Port Trust, and Municipal Bonds, deposited with the Bank, and the Bank's pass-books have been examined by us and found to be correct and in order.

4. In accordance with the directions of the Corporation contained in their Resolution passed on the 19th November 1888, which were communicated to the Auditors under the Municipal Secretary's letter No. 5374, dated the 30th idem, all Sinking Fund investments pertaining to the year were examined, and we certify that they have all been duly and properly made.

5. It was pointed out in para. 5 of our report for 1897-98 that no payment was made in that year towards the sinking fund on account of renewals of existing water mains worn out, though budget provision existed for such payment. In the budget estimate for 1898-99, no provision on that account was made and accordingly no payment to that fund has been made.

6. It appears necessary to make mention of the fact that in addition to the concurrent audit of the accounts, the weekly statements of receipts and disbursements of Municipal funds were examined by us as they were prepared and prior to their publication in the *Government Gazette*. In addition to the check exercised by us over these statements we have continued to prepare and submit to the Secretary for the purpose of being laid before the Corporation monthly statements showing totals of receipts and disbursements under each account head as they stood in the subsidiary ledgers at the end of the *last* week of each month, which totals as explained in our previous annual reports were agreed with the aggregate total of each head of account given in the weekly statements of the month as well of the ledger.

6*a*. Perhaps it is permissible in this report to observe that for years past it has been the practice for the Auditors to offer remarks on the differences between the actuals of the year under report with those of the preceding year. On referring to the printed reports of previous years it is found that the Commissioner's explanations under the same heads were not so complete or so full as they are now, and per-

haps therefore the Auditors' observations were considered necessary. The necessity for the continuance of our remarks does not now appear to us to exist, and we would therefore suggest the advisability of omitting remarks under those heads from our future reports and thus obviate the duplication of work.

7. The Plague Committee ceased making payments from June 1898 since which date all disbursements of plague charges have been made by the Chief Accountant's Office. Our auditorial duties have continued to be very heavy owing to large and steady payments on account of plague which involved the submission of numerous additional bills, &c. Some idea of the stupendous nature of our duties during the year will be gathered from the following comparison of the account vouchers (including those booked in the journal) compared with the Nos. of the previous year.

	1897-98. Nos.	1898-99. Nos.
Receipts	22,217	23,039
Disbursements	53,907	57,798
	76,124	79,837

8. In the usual manner we will now proceed to make comparison of the receipts and expenditure of the year with the figures of the previous year, giving explanations of the causes of increase or decrease as they occur and when these are large.

9. The *total receipts* of municipal revenue from all sources, including water tax and other miscellaneous water works revenue, interest and profit on investments in 1898-99 amounted to

Rs. 71,61,911-7-8 in 1898-99,
against „ *71,45,560-8-5 in 1897-98,

being Rs. 16,350-15-3 in excess of the revenue of the previous year. The actual excess is however Rs. 4,50,316-0-6, which is arrived at by adding the rebate allowed in 1897-98 to the figures above given.

10. The *total disbursements* from Municipal Funds, including Water Works Account, amounted to Rs. 70,26,479-7-7. Deducting therefrom Rs. 37,424-11-3, as per margin, the net total disbursements amounted to ... ... Rs. 69,89,054-12-4 in 1898-99 against ... ... „ 74,60,490-11-5 „ 1897-98

	Rs.	a.	p.
Municipal Buildings Fire Insurance Fund.	3,090	0	0
Interest realized on do. ...	1,517	0	8
Interest realized on Worn-out Mains Renewal Fund	14,986	15	8
Interest realized on Net Premia Fund ...	16,177	0	0
Do. do. on School Building Fund ...	1,743	10	11
	37,424	11	3

being Rs. 4,71,435-15-1 less than the disbursements of the previous year.

* Includes Rs. 4,37,055-0-1 on account of rebate to current revenue in respect of Plague expenses paid from Revenue in 1896-97.

11. The *opening cash balance* on the 1st April 1898, *vide* statement D. of the Chief Accountant's report, stood at Rs. 26,25,144-5-5, which sum *plus* the gross receipts of the year gives Rs. 97,87,055-13-1 against the gross disbursements of Rs. 70,26,479-7-7, thus leaving a credit balance of Rs. 27,60,576-5-6.

12. *General Tax.*—(Budget estimate Rs. 22,27,500.) The total receipts under this head, comprising House, Police, Lighting and Fire Brigade rates, and including the annual contribution from Government of Rs. 1,09,947, and from the Port Trust of Rs. 1,70,420 amounted to Rs. 22,24,213-12-1

against Rs. 20,56,286-1-11 in 1897-98

being Rs. 1,67,927-10-2 greater than the receipts of the previous year, due to the following causes :

a. Expansion of revenue.

b. Increase of taxation from 8 to 9 per cent.

13. *Wheel Tax and Tolls.*—(Budget estimate Rs. 3,65,500.) The net realizations under this head amounted

to Rs. 3,39,196- 9-7 in 1898-99

against „ 3,46,837-15-3 in 1897-98

being Rs. 7,641-5-8 less than the receipts of 1897-98 due to a reduction in the number of Public and Private conveyances.

The decrease was under the following heads :—

	Rs.	a.	p.
Private Conveyances	2,450	3	8
Public	4,467	2	0
Tolls	724	0	0
Rs.	7,641	5	8

14. *Town Duties.*—(Budget Estimate Rs. 11,05,000.)

Gross collection Rs. 22,60,003-5-4 in 1898-99

„ „ „ 17,09,956-3-1 in 1897-98

being Rs. 5,50,047-2-3 more than the gross receipts of the previous year as per particulars given below, due to enhanced rates on grain and ghee and partly to larger imports of grain, wines and spirits, &c., than in the previous year :—

	1898-99.			1897-98.			Difference.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Port Trust Collections	15,71,995	11	7	14,50,235	9	10	1,21,670	1	9
B. B. & C. I. Ry. „	2,44,982	10	0	64,555	6	0	1,80,427	4	0
G. I. P. Ry. „	4,43,124	15	9	1,95,165	3	3	2,47,949	12	6
	22,60,003	5	4	17,09,956	3	1	5,50,047	2	3

15. *Refund of Town Duties*—

In 1898-99 Rs. 11,42,842-3-0
„ 1897-98 „ 7,58,532-2-0

being Rs. 3,84,310-1-0 more than the refunds of the previous year. This must always be a variable item and one which it is almost impossible to estimate accurately, the amount being dependent on the quantity of goods exported to out-stations.

16. *Commission and Charges* for collecting Town Duties were paid as under :—

Budget Estimate		1898-99.	1897-98.	Difference.
Rs.		Rs. a. p.	Rs. a. p.	Rs. a. p.
42,750	Port Trust...	35,507 8 3	43,484 13 1	7,977 4 10
12,330	G. I. P. Ry.	12,330 7 3	7,223 14 11	5,106 8 4
4,320	B. B. & C. I. Ry....	7,135 1 0	1,994 1 0	5,141 0 0
59,900		54,973 0 6	53,702 13 0	2,270 3 6

17. The amount provided in the budget estimate for 1897-98 was Rs. 52,500, while the actuals were Rs. 52,702-13-0 as shown above. The increased provision was made on the estimated increase in receipts from Town Duties owing to enhancement of the rates on grain, ghee and firewood.

18. *Summary of Town Duties*—

	1898-99.	1897-98.
Gross Collections	Rs. 23,60,003 5 4	17,09,956 3 1
Less—Refund, Commission, Audit, &c., Charges...	„ 11,42,842 3 0	8,21,339 15 0
Difference...	Rs. 11,17,161 2 4	8,88,616 4 1

19. *Licenses*—

Budget Estimate.	Particulars.	Realizations.	
		1898-99.	1897-98.
Rs.		Rs. a. p.	Rs. a. p.
60,000	(*a*) Dangerous and offensive trades	60,656 8 0	64,078 8 0
3,000	(*b*) Streets and Buildings ...	3,545 0 0	3,240 0 0
24,000	(*c*) Land conveyance, music, &c.	23,553 0 0	21,344 4 0
87,000		87,754 8 0	88,662 12 0

20. The expenditure incurred during the year under item (*a*) amounted to Rs. 16,361-9-0, and under item (*c*) to Rs. 8,743-8-5, leaving a net revenue of Rs. 44,295-8-0 and Rs. 14,809-7-7, respectively, under those heads.

21. *Liquor Licenses.*—The usual fixed amount of Rs. 1,43,750 was paid by Government in the month of April 1898, in accordance with Section 63, Act V of 1878.

22. *Tobacco Duty.*—(Budget Estimate, Rs. 2,01,250.) The net receipts under this head, collected through the Collector of Customs, amounted to Rs. 2,08,544-4-10 in 1898-99 against Rs. 1,89,323-6-9 in 1897-98, which is Rs. 19,220-14-1 more than the recoveries of the preceding year. The estimate under this head is based on figures furnished by the Collector of Customs and from the nature of the duty the receipts must be a varying item.

23. *Halalcore Tax.*—(Budget Estimate Rs. 7,35,700.)

Net recovery for	1898-99	...	Rs. 7,13,122- 2- 8
Do.	1897-98	...	„ 7,35,485- 4- 7

being Rs. 22,363- 1-11 less than the receipts of the previous year. The reduction of revenue under this head is due to a larger amount than usual of outstandings of previous years having been collected in 1897-98.

24. *Water Tax and other Miscellaneous Water Tax Revenue.*—(Budget Estimate, Rs. 14,99,000.)

Net realizations Rs. 15,00,970- 7-2 in 1898-99
„ „ „ 13,29,851-15-7 in 1897-98

being Rs. 1,71,118- 7-7 more than the revenue of the previous year.

25. In addition to the realizations above given, the sum of Rs. 14,986-15-8 should be added on account of interest realized on the Worn-out Mains Renewal Fund, and Rs. 4,055-4-11 on account of interest on the Net Premia Fund Investment.

26. The total expenditure on account of Water Works, including New Works, Interest and Sinking Fund on Loans, &c., amounted to Rs. 15,98,156-7-1 against Rs. 16,84,069-15-8 in 1897-98 which shows a decrease of Rs. 85,913-8-7 as compared with the expenditure of the previous year.

27. The total expenditure on account of Water Works above given, when compared with the receipts of the year, shews an increase over the latter of Rs. 78,143-11-4.

28. The excess over receipts in 1897-98 was Rs. 3,34,580-2-2.

29. *Markets and Slaughter-Houses*—

Budget Estimates.	Particulars.	1898-99.	1897-98.
		Rs. a. p.	Rs. a. p.
3,87,000	Receipts	3,60,386 4 6	3,47,537 11 9
1,74,653	Expenditure	1,69,690 3 6	1,50,745 11 6
	Net Income... ...	1,90,696 1 0	1,96,792 0 3

30. The net results of the year show that the receipts exceeded the expenditure by Rs. 1,90,696-1-0, as compared with the previous year's receipts and expenditure ; the net income is less by Rs. 6,095-15-3.

31. *Public Gardens Income.*—(Budget Estimate, Rs. 7,000). The receipts as compared with those of the previous year were as under :—

1898-99	...	...	...	Rs.	5,226 0 2
1897-98	...	...	...	„	5,589 10 1
			Difference ...	Rs.	363 9 11

32. The receipts of the year were Rs. 363-9-11 less than those of the previous year. The difference between the receipts of the two preceding years was Rs. 2,150-7-11. It is observed that the budget estimate for the year under review was Rs. 1,000 less than the sum estimated in 1897-98.

33. *Maintenance of Public Gardens.*—Victoria Garden.—(Budget Estimate, Rs. 53,880.)

Actual expenditure in 1898-99		...Rs.	51,993 5 2
Do.	in 1897-98	... „	48,981 11 10

being Rs. 3,011 9 4 more than the previous year. The budget provision of the previous year was Rs. 56,449.

34. The expenditure during 1898-99, on account of the Victoria Garden, including cost of new works* exceeded the receipts of that year by Rs. 61,197-14-2 against Rs. 43,392-1-9 the difference between receipts and expenditure of the previous year.

* Rs. 14,430-9-2.

35. *Maintenance of the remaining eight Gardens.*—(Budget Estimate, Rs. 9,108).

Expenditure in 1898-99	...	... Rs.	8,534 14 5
Do. in 1897-98	...	... „	6,926 15 10

being Rs. 1,607 14 7 more than the expenditure of the previous year.

36. The aggregate expenditure on all the gardens, including new works, amounted to Rs. 74,958-12-9, which is Rs. 3,512-0-9 less than the aggregate expenditure of the previous year.

37. *Miscellaneous Fines and Penalties.*—(Budget Estimate Rs. 11,000).

Actual receipts in 1898-99	... Rs.	7,929	2 0
Do. in 1897-98	... „	8,686	7 3

being Rs. 757 5 3 less than the receipts under this head in the previous year.

38. *Miscellaneous Receipts.*—(Budget Estimate, Rs. 1,20,000).

Actual receipts in 1898-99	... Rs.	1,03,412	1 1
Do. in 1897-98	... „	1,44,971	3 0

which is Rs. 41,559 1 11 less than the receipts of the previous year due to realizations under the heads (*a*) sale of land, (*b*) rent of reclamation lands, &c., (*c*) right of catching fish, cutting grass, &c., being lower than those of 1897-98.

39. *Miscellaneous Fees.*—(Budget Estimate, Rs. 40,000).

Actual receipts in 1898-99	... Rs.	33,229	7 4
Do. in 1897-98	... „	31,283	11 2

which is Rs. 1,945 12 2 more than the receipts of the previous year.

40. *Miscellaneous Savings.*—(Budget Estimate, Rs. 3,500).

Savings in 1898-99	...	... Rs.	5,330 13 2
„ in 1897-98	...	... „	12,420 7 8

which is Rs. 7,089 10 6 less than the savings of the previous year, due to a larger amount having been forfeited and credited to this head in the accounts of 1897-98.

41. *Tramway Rent.*—(Budget Estimate, Rs.49,700).

Receipts in 1898-99	...	... Rs.	49,693 9 10
Do. in 1897-98	...	... „	49,025 15 4
		Difference... Rs.	667 10 6

42. The excess receipts are due to the doubling of the line from the Money School to the Portuguese Church at Girgaum.

43. *Contribution from Municipal Servants towards Pension Fund.*—(Budget Estimate, Rs. 20,000).

Receipts in 1898-99	Rs.	19,000	5	6
Do. in 1897-98	„	18,963	3	2
The difference is a trifling one...	Rs.	37	2	6

44. *Sale Proceeds of Unserviceable Tools and Plant, &c.*—(Budget Estimate, Rs. 2,050).

Receipts in 1898-99	Rs.	1,863	0	3
Do. in 1897-98	„	*Nil.*		

45. As explained in the previous year's report, unserviceable stores are now disposed of under another system.

46. In 1896-97 the receipts under this head amounted to Rs. 1,811-13-9, while in the succeeding year it was 'Nil' for reasons already given. The receipts in 1898-99 may therefore be taken to be those of two years which gives an average of Rs. 931-8-1 and compares unfavorably with the receipts of 1896-97.

47. *Actual Profit on Sale of Stores to Contractors, &c.*—(Budget Estimate, Rs. 2,050).

The amount realized under this head is Rs. 1,621-15-9, against Rs. 7,168-9-10 in 1897-98.

48. In the previous year the budget provision under this head was Rs. 5,000, whilst the actuals exceeded that figure. In the year under review, whilst the budget estimate is less than half the sum of the previous year, the receipts fall short of that sum by Rs. 428-0-3.

49. The difference in the receipts of the two years is partly due to less stores having been sold to contractors and partly to the loss sustained by the sale of old and unserviceable articles by auction for a trivial sum.

50. *Interest and Profit on Investments of Surplus Loan and other Balances.*—(Budget Estimate, Rs. 90,000).

	Rs.	a.	p.
Realizations in 1898-99	98,419	13	8
Do. in 1897-98	1,29,643	11	0
Difference... Rs.	31,223	13	4

The decrease would seem to be due to funds to the same extent as in 1897-98 not being available for investment.

51. *Interest on Sinking and Insurance, &c., Funds Investments—*

Budget Estimate.	Particulars.	1898-99.	1897-98.
		Rs. a. p.	Rs. a. p.
92,200	5, 4 and 3½ per cent. Municipal Loans Sinking Fund Investment	92,567 9 10	76,963 10 2
1,500	Municipal Buildings Fire Insurance Fund Investment	1,517 0 8	1,356 0 10
15,600	Worn-out Mains Renewal Fund Investment	14,986 15 8	15,768 9 8
16,000	Investment of net premia, &c., received on different Municipal Loans... ...	16,187 0 0	15,376 6 10
1,700	School Building Fund	1,743 10 11	977 6 1
1,27,000		1,27,002 5 1	1,10,442 1 7

52. *Workshops.*—The receipts and expenditure on account of work executed are as under :—

	1898-99.	1897-98.
	Rs. a. p.	Rs. a. p.
Receipts	1,15,875 3 11	1,16,267 5 8
Add—Outstandings	20,513 2 10	6,967 9 1
	1,36,388 6 9	1,23,234 14 9
Deduct—Expenditure	1,22,304 12 3	1,22,083 11 5
Profit ...	14,083 10 6	1,151 3 4

53. The difference in profit between 1898-99 and the previous year, *viz.*, Rs. 12,932-7-2 is due to (*a*) the non-payment of ground rent due to Government, *viz.*, Rs. 7,062, as also to sale proceeds by auction of surplus and unserviceable articles which realized Rs. 1,238-2-2.

54. The outstandings of the year compare unfavourably with the amount of the previous year. Out of the sum of Rs. 20,513-2-10 shown as outstanding in 1898-99 the sum of Rs. 15,324-6-3 represents the value of incomplete works and comprises the following items :—

	Rs. a. p.
Public Health Department	8,499 12 0
Drainage Department	6,815 2 6
Executive Engineer's Department ...	9 7 9
Rs.	15,324 6 3

55. *Private Works.*—The amounts expended as well as those recovered on account of private works are as under :—

	1898-99.	1897-98.
	Rs. a. p.	Rs. a. p.
Receipts	86,348 2 10	73,156 1 7
Deduct—Outstandings of previous year	1,13,314 10 6	48,359 7 5
Actual recoverable receipts of the year	26,966 7 8	24,796 10 2
Add—Outstandings	54,162 13 3	1,13,314 10 6
Total Receipts for the year ...	27,196 5 7	1,38,111 4 8
Deduct—Expenditure	23,945 11 4	1,34,462 5 1
	3,250 10 3	3,648 15 7
Excess recoveries	664 2 2	242 0 5
Net profit during the year ...	3,914 12 5	3,891 0 0

56. *Departmental Works—*

	1898-99.	1897-98.
	Rs. a. p.	Rs. a. p.
Receipts	92,035 8 0	1,37,316 1 8
Deduct—Outstandings of previous years ...	3,764 13 8	2,095 15 1
	88,270 10 4	1,25,220 2 7
Add—Outstandings	29,302 1 2	3,764 13 8
Total receipts for the year... ...	1,17,572 11 6	1,28,985 0 3
Total expenditure for the year ...	1,17,572 11 6	1,28,985 0 3

57. The aggregate of the figures under the head of outstanding given in the preceding two paras. is Rs. 83,464-14-5 which appears high, but perhaps there are reasons why it all could not be adjusted in the accounts of the past year.

58. *General Superintendence—*

Budget Estimates.	Sub-heads.	1898-99.	1897-98.
Rs.		Rs. a. p.	Rs. a. p.
58,780	Corporation and Standing Committee Establishment	52,535 12 2	54,826 14 9
60,125	Municipal Commissioner's Personal Office Establishment	67,770 8 8	73,270 13 2
46,050	General Office Establishment	33,036 10 9	30,271 3 6
58,016	Accounts and Expenditure Audit Establishment	57,037 3 5	56,423 8 0
2,23,981		2,10,380 3 0	2,14,791 13 5

59. The difference between the expenditure of the year under report as compared with that of the previous year is Rs. 4,411-10-5 only and hardly needs explanation as on the whole there has been a reduction of expenditure.

60. *Assessment and Collection Department—*

Budget Estimates.	Sub-heads.	1898-99.			1897-98.		
Rs.		Rs.	a.	p.	Rs.	a.	p.
1,49,628	Property and Wheel Tax Establishment.	1,48,928	0	10	1,44,000	14	2
59,900	Port Trust and Railway (Town Duty Departments)	54,973	0	6	52,702	13	0
2,016	Tolls Collection	2,016	0	0	1,988	0	0
29,944	Licensing Establishment	25,104	8	5	26,267	0	3
26,104	Revenue and Refund Audit Office Establishment	26,160	8	0	25,528	13	1
2,67,592		2,57,182	1	9	2,50,487	8	6

61. The Budget Estimate in 1897-98 under this head was Rs. 2,61,942 against Rs. 2,67,592 in 1898-99—excess Rs. 5,650.

62. The expenditure of the year exceeds that of the previous year by Rs. 6,694-9-3 owing to increased expenditure under the two first heads given above.

63. *Fire Brigade.*—(Budget Estimate, Rs.1,18,921).

Expenditure in 1898-99	Rs.	1,09,076	4	5
Do. in 1897-98	„	1,18,507	12	0
Difference ...	Rs.	9,431	7	7

64. The additional ½ per cent. tax on account of Fire Brigade charges realized the sum of Rs. 1,17,219-1-9 during the year, against Rs. 1,20,960-14-1 in 1897-98.

65. The total revenue from this tax has again exceeded the expenditure by Rs. 8,142-13-4.

66. The reduction in expenditure as shown above is chiefly due to no charges for clothing having been incurred in 1898-99, whereas charges for 1896-97 and 1897-98 were included in the accounts of the previous year.

67. *Engineer's Department—*

Budget Estimate.	Sub-heads.	1898-99.	1897-98.	Difference.
Rs.		Rs. a. p.	Rs. a. p.	Rs. a. p.
49,992	General Supervision and Miscellaneous Duties	49,135 10 0	48,996 8 11	139 1 1
1,13,446	Drainage—Miscellaneous Drainage	1,15,149 14 8	1,13,229 0 7	1,920 14 1
98,910	„ Maintenance of Love Grove Pumping Station	97,248 1 8	96,646 1 5	602 0 3
4,330	„ „ of Sluices	3,258 15 7	4,019 0 8	—760 1 1
31,565	„ „ of Pumping Station (Colaba)...	27,198 7 8	21,332 2 1	5,866 5 7
2,73,705	Water Works	2,13,913 14 1	2,48,285 3 8	—34,371 5 7
86,282	Streets and Buildings—Inspection and Supervision	79,910 14 2	76,136 5 4	3,774 8 10
2,76,352	„ „ Public Lighting	2,53,215 8 6	2,63,812 1 11	—10,596 9 5
85,400	„ „ Road Watering	77,321 1 4	72,987 8 2	4,333 9 2
3,43,900	„ „ Roads, Foot-paths, &c.	2,88,162 14 1	3,70,183 4 7	—82,020 6 6
1,00,000	„ „ Street Improvements	1,09,416 0 11	1,16,540 2 1	—7,124 1 2
1,00,000	„ „ Compensation to House owners for buildings demolished on account of being insanitary	2,520 14 5	*Nil.*	2,520 14 5
38,642	Cleaning, Lighting, and Repairing Port Trust Wharves, Roads	38,642 0 0	38,642 0 0	*Nil.*
16,02,525		13,55,094 5 1	14,70,809 7 5	—1,15,715 2 4

68. The only noticeable increase as compared with the expenditure of the previous year occurred under the head of "Maintenance of the Pumping Station, Colaba" which was due to increased charges on account of coal which rose from Rs. 7,481 in 1897-98 to Rs. 14,876 in 1898-99.

69. Under the majority of heads there was a marked as well as a substantial decrease principally under the following two heads :—

"Water Works."

"Roads, footpaths, &c."

That under the first mentioned head which amounts to Rs. 34,371-5-7, is due to less expenditure having been incurred on repairs to the Tansa main embankment at Kasheli, and to the non-recurrence of expenditure on the Tansa duct at the end of the 45th mile, while under the second head it is due principally to no expenditure having been incurred in connection with the paving of footpaths in 1898-99, and to the repairs of some of the roads in the city having been deferred for obvious reasons.

70. Out of the sum of Rs. 1,00,000 provided for "compensation to house owners for insanitary buildings," the sum of Rs. 97,479-1-9 remains as balance which probably, or a part of it at least, will be expended in the current year when the lapsed grant is renewed. In the Budget Estimate of the current year no provision on that account has been made.

Budget Estimates.			Sub-heads.	1898-99.			1897-98.			Difference.		
Rs.	a.	p.		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
14,71,580	0	0	General Supervision and Conservancy	13,47,524	15	7	12,83,905	13	5	64,619	2	2

377	0	0	Rastamji Jamsetji Dharamsala	334	3	7	184	4	3	149	15	4
17,284	0	0	Vaccination Contribution to Government	15,293	6	3	17,084	13	7	— 1,792	7	4
500	0	0	Establishment for the temporary sheds at Gilder Street for the segregation of animals suffering from Rinderpest, &c. ...	447	14	10	*Nil.*			447	14	10
2,550	0	0	Erecting temporary stables for the segregation of cattle suffering from foot and mouth disease, &c.	714	8	11	503	10	2	210	14	9
570	0	0	Inspecting milch cattle stables in the city during the prevalence of foot and mouth disease and rinderpest	358	11	4	474	13	5	— 116	2	1
1,680	0	0	Kumbharwada Dispensary	950	0	0	*Nil.*			950	0	0
2,79,759	0	0	Excess cost of Health Department Reorganization scheme ...	58,979	15	1	*Nil.*			58,979	15	1
20,49,796	0	0		16,89,174	6	0	15,86,632	15	1	1,02,541	6	11

72. The difference under the head "General Supervision and Conservancy" is due (*a*) to extra labour carts paid during 1898-99 by a transfer to the Health Department budget, whereas the same charges in 1897-98 were paid out of plague grant. (*b*) Extra Establishment employed in 1898-99 for gully flushing and for Halalcore service, also to water supply bills for previous years having been adjusted in the accounts for 1898-99.

73. The excess under the head "Markets and Slaughter Houses" is due to heavy repairs in that year to the markets, and to bills amounting to Rs. 3,470 for the previous year on the same accounts having been paid in 1898-99; also to bills for water supply in 1897-98 having been paid in 1898-99.

74. *Mahaluxmi Dhobiwada*—(Budget Estimate, Rs. 33,701.)

	1898-99.	1897-98.
Receipts	Rs. 16,517 0 0	16,779 0 0
Expenditure	„ 32,342 10 1	19,186 4 2
Difference ...	Rs. 15,825 10 1	2,407 4 2

75. The expenditure it will be observed continues to be greater than the receipts. As compared with the previous year there has been an increase in expenditure amounting to Rs. 13,418-5-11 due to water supply bills for last year having been adjusted in the accounts of 1898-99. The receipts of the year as compared with those of 1897-98 shew a decrease of Rs. 262.

76. *Milch Cattle Stables*—(Budget Estimate, Rs. 12,029.)

	1898-99.	1897-98.
Receipts	Rs. 16,501 5 1	15,671 0 5
Expenditure	„ 10,487 3 9	7,768 2 9
Actual Profit	Rs. 6,014 1 4	7,902 13 8

77. The receipts of the year compare favorably with those of 1897-98, while the expenditure has been larger by Rs. 2,719-1-0. The net profit of the year has been Rs. 6,014-1-4.

78. *Hospitals.*—

Budget Estimates.	Sub-heads.	1898-99.	1897-98.
Rs.		Rs. a. p.	Rs. a. p.
36,000	Gocouldas Tejpal Hospital	34,469 2 3	33,426 9 10
3,000	Jaffer Sulleman Dispensary	3,000 0 0	3,000 0 0
18,000	Leper Asylum, Matunga	17,731 13 0	17,806 14 4
57,000		55,200 15 3	54,233 8 2

79. The amount of budget provision in the year under review has been the same as in the previous one; but the expenditure in 1898-99 has been greater than in 1897-98 by Rs. 967-7-1.

80. *Police Charges.*—The amount provided under this head in the Budget Estimate was Rs. 5,00,000 which was paid to Government. The actuals compiled to this head are Rs. 5,01,012-12-5, the difference being due to expenditure on account of some structural alterations and additions to buildings in the occupation of the Police.

81. *Plague Expenses.*—The expenditure on this account compiled in the accounts for 1898-99 amounted to Rs. 17,69,569-8-11, which includes the 5 lakhs debited to current account in the year 1897-98.

82. The grants made by Government and brought into the books for 1898-99, towards construction of Health camps, and Discretional grant have been as under :—

	Rs.	a.	p.
For Camps, &c.	60,000	0	0
Discretional relief	40,437	0	9

The expenditure therefore has been as follows :—

	Rs.	a.	p.
For Camps, &c.	51,041	0	6
Discretional relief	38,556	12	3

leaving a balance of Rs. 8,958-15-6 under the first head, and Rs. 1,880-4-6 under the second.

83. *Miscellaneous*—

Budget Estimates.	Sub-heads.	1898-99.			1897-98.		
Rs.		Rs.	a.	p	Rs.	a.	p.
50,000	Pensions, Gratuities, &c.	56,866	0	8	70,096	0	7
7,000	Discretional Contingencies	4,950	6	1	5,686	5	3

.....	Cost of analysis of articles of food ...	820	0	0	.....		
.....	Loss on irrecoverable private bills ...	19	11	2	.....		
.....	Illuminating the address to the Viceroy...	995	2	8	.....		
.....	Insurance of Municipal Building ...	1,500	0	0	.....		

84. The items which are comprised in the sum of Rs. 4,950-6-1 compiled under the head of " Discretional Contingencies " are detailed below :—

LIST showing the Amounts paid out of the Discretional Contingencies during 1898-99.

	Particulars.	Amount.			Total.		
		Rs.	a.	p.	Rs.	a.	p.
1.	Telegram charges paid to Messrs. King, King & Co., for making enquiries in connection with the Hon'ble Mr. P. M. Mehta	21	10	9			
2.	Telegram charges in connection with the raising of Loans	23	0	0			
					44	10	9
3.	Making canvas curtains affixed to the arches of the Deputy Executive Engineer, Water Works Office, facing the Railway Station	235	9	7			
4.	Providing canvas curtains to the arches in the east side of the second floor of the Municipal Offices ...	307	2	0			
					542	11	7
5.	Employment of two Hamals for pulling punkhas in the Corporation Hall				64	15	7
6.	Purchase of a table and allowance to the Telephone Company for fitting up a telephone	35	0	0			
7.	Subscription to the Telephone Company for the Telephone connection with the Municipal Commissioner's residence	66	9	4			
					101	9	4
8.	Amount paid to Mr. E. Greenwood for materials and labour expended on the work of preparing a head and neck for the Queen's Statue				800	0	0
9.	Binding 59 volumes of Indian Law Reports, &c., at Rs. 1-8-0 per volume				88	8	0
	Compensation paid to a Police sepoy No. G-1669 on account of the cost of his kit lost by him while rendering assistance to extinguish fire at Worli Village on 20th February 1897				14	8	0
10.	Making and fixing map rollers for Municipal Commissioner's Office	20	14	10			
11.	Making a map of the Island of Bombay at the *Times of India* for the Commissioner's Office	8	0	0			
					28	14	10
12.	Cost of closing up the existing entrances and making a new entrance gate and roadway at the Tank Bunder Burial Ground	389	9	4			
13.	Purchase of two revolvers with 100 cartridges and one revolver belt for the Health Department Inspectors.	85	0	0			
14.	Amount paid to Messrs. John Fleming & Co. for the supply of two safety valves for Masons & Co.'s Light Portable Engine	52	0	0			
15.	Dealing with relapsing fever cases by supplying the patients and contacts, where necessary, with funds to go away to their native countries	300	0	0			
16.	Payment of wages to Noorkhan Boorekhan, a farrier, for March 1898 employed in the Health Department ...	20	0	0			
17.	Employment of a farrier for the months of January and February 1899	20	0	0			
18.	Repairing a screen used for covering dead bodies ...	62	15	1

86. As in the previous year, so in 1898-99, no provision was made on account of the School Building Fund, the total amount, including interest standing to the credit of which fund on 31st March 1899, was Rs. 52,721-1-0.

87. The usual report on the audit of the accounts of the Municipal School funds is appended to this report.

88. The increased expenditure under the head "Victoria and Albert Museum" appears to be due to structural alterations and repairs as well as to the building and its contents having been insured.

89. *Special Extraordinary Works*—(Budget estimate, Rs. 52,780.)

Expended in 1897-98	...	...	Rs. 1,39,577-4-7
„ 1898-99	...	...	„ 64,521-4-5

The new works executed during the year and their cost under major heads are given below :—

	Rs.	a.	p.
Drainage Miscellaneous Works	23,990	8	1
Water Works	3,096	12	9
Streets and Buildings	2,961	3	10
Sanitary and other Miscellaneous Works ...	34,472	11	9
Rs.	64,521	4	5

90. The noticeable items of expenditure under the above heads are :—

	Rs.	a.	p.
(*a*) Constructing 3 manholes over six shafts between European General Hospital and the Town Hall	2,337	14	0
(*b*) Working of the electrolisers at Carnac Bunder.	4,347	13	2
(*c*) Construction of a ward office for the Engineer's Department at Gamdevi Road ...	2,961	3	10
(*d*) Construction of latrines and urinals ...	7,236	8	7
(*e*) Construction of night-soil depôt at Bhungy Mohola and Haines Road	11,170	2	3

91. As compared with 1897-98, there has been a reduction in expenditure under this head to the extent of Rs. 75,056-0-2.

92. *Loan Works*—

		Rs.	a.	p.
Expended in 1897-98	... ...	... 29,13,192	8	10
„ 1898-99	... ...	... 20,22,955	4	7*
Difference...		Rs. 8,90,237	4	3

* This includes the credit of Rs. 8,12,546-4-8 on account of the write-off of the net amount advanced for the purchase of frontage lands in the Agripada, &c., estate.

The expenditure under this head is summarised under the following heads :—

	Rs.	a.	p.
Drainage	4,46,474	10	4
Water Works	18,644	12	7
Markets...	4,717	4	9
Fire Brigade	15,565	3	4
Miscellaneous Works	4,55,193	1	6
Roads and Streets	1,25,336	15	10
Plague Charges	17,69,569	8	11
Total... Rs.	28,35,501	9	3
Less.—Net amount advanced for the purchase of frontage lands in Agripada, &c., estate written off	8,12,546	4	8
Net ... Rs.	20,22,955	4	7

93. *Municipal Debt.*—The particulars in regard to the payments made under this head being incorporated in the Municipal Commissioner's report, there appears to be no necessity for our repeating the same.

94. *Personal Accounts of Municipal Officers.*—The amount of permanent advances made to Municipal officers to meet contingent expenditure, also the sums which have been carried to this head pending adjustment, amounted on the 31st March 1899 to Rs. 64,005-10-5 against Rs. 2,27,227-4-3 on the same date in the previous year.

95. The abovementioned sum does not include advances made to Plague Officers which amount to Rs. 1,949-14-0.

96. The reduced amount in 1898-99 is apparently due to advances having been curtailed.

97. *Reserve Stock.*—The value of stock on hand on the 31st March 1899 as ascertained from the accounts rendered to the Chief Accountant's Office, was as under :—

	1898-99.			1897-98.		
	Rs.	a.	p.	Rs.	a.	p.
Executive Engineer	17,420	11	11	22,418	3	3
Drainage "	3,95,467	9	9	3,92,659	4	11
Water "	4,14,541	10	11	4,22,005	10	3
General Stock	48,124	7	3	66,503	9	4
Total...Rs.	8,75,554	7	10	9,03,586	11	9

98. *Income Tax.*—The amount of income tax recovered by the Chief Accountant during the year under review from the fees paid to the members of the Standing Committee and the salaries and wages of Municipal Officers and servants from whom tax is recoverable,

also on wheel tax, amounted to Rs. 33,241-0-0 against Rs. 27,839-0-1 in 1897-98. The amount paid to the Income Tax Collector is Rs. 33,173-0-11 leaving a balance in the Municipal Treasury of Rs. 67-15-1 which will be paid during the current year.

99. *Assets and Liabilities.*—The following figures taken from the Chief Accountant's books shew the Assets and Liabilities of the year as compared with those of the preceding year :—

	1898-99.			1897-98.		
	Rs.	a.	p.	Rs.	a.	p.
Assets	5,88,41,631	7	4	5,66,61,883	12	10
Liabilities ...	4,38,08,328	7	2	4,16,54,268	11	4
Difference ...Rs.	1,50,33,303	0	2	Rs. 1,50,07,615	1	6

Scrutiny of Collections and of Outstanding Bills of Rates and Taxes for the year 1898-99 *and of previous years.*

100. *Collections.*—During the year under report there were issued by the Assessor and Collector 86,679 net demand assessment bills for Property and Wheel Tax of the value of Rs. 43,39,514-13-3, and 1,488 bills for meter hire for the same year of the value of Rs. 14,545-4-7.

The following figures give the particulars of the bills and collections :—

		Rs.	a.	p.	Rs.	a.	p.
86,058	bills for Property and Wheel Tax were issued for 1898-99 of the value of				43,12,795	10	11

Total outstandings on the 31st day of March 1899. Rs.					1,15,272	4	5

NANABHAI RASTAMJI RANINA,

A. THOMSON,

Municipal Auditors.

BOMBAY, 15*th August* 1899.

To

M. N. WADIA, Esq.,

Municipal Secretary,

Bombay.

Sir,

In accordance with Section 137 of the Bombay Municipal Act of 1888, we have the honor to forward three Appendices marked A, B and C, containing the result of our scrutiny of the Outstanding Bills of Rates and Taxes, which were in the hands of Ward Clerks and in the Office of the Assessor and Collector on 31st March 1899.

These Appendices form part of our Annual Report on the Municipal Accounts for the year 1898-99 now under preparation.

We have the honor to be,

Sir,

Your obedient servants,

NANABHAI R. RANINA,

A. THOMSON,

Municipal Auditors.

Bombay, 30*th June* 1899.

NANABHAI R. RANINA,
A. THOMSON,
Municipal Auditors.

BOMBAY, 30*th June* 1899.

REPORT ON THE ACCOUNTS OF THE JOINT SCHOOLS COMMITTEE.

In accordance with Bye-law No. 15 of the Joint Schools Committee, we beg to report that we have audited the accounts and examined all the vouchers and papers relating to the receipts and disbursements of the School fund in charge of the Joint Schools Committee from 1st April 1898 to 31st March 1899.

The opening balance on 1st April 1898 (including recoverable advances and excluding deposits) was Rs. 53,122-3-0.

The total receipts of the Joint Schools Committee for the year 1898-99 amounted to Rs. 1,35,774-13-3, against Rs. 1,27,165-9-0 in 1897-98, being Rs. 8,609-4-3 more than in the previous year, due to the Municipal contribution having been increased from Rs. 72,478 to Rs. 80,000.

The total expenditure incurred was Rs. 1,26,358-13-9, against Rs. 1,22,542-13-1 in 1897-98, being Rs. 3,816-0-8 more than in the previous year, the increase being due to the opening of two new schools and to providing better accommodation for some of the old schools.

The credit balance was Rs. 62,538-2-6, being Rs. 9,415-15-6 in excess of the proceding year.
